**Information and Communication Technologies in Tourism** - Stefan Klein 2012-12-06

For the third time now, experts in tourism from all over the world come to Innsbruck in order to exchange ideas, inform themselves and others about current developments and build a network of personal relations. The main topics of ENTER 96 are business engineering and standardisation, covering a wide area of subjects like the redesign of touristic products and the processes of their production. This covers, however, not only single business processes but also the entire value chain in tourism, ending up in redesign of distribution channel and changing relations among

principals, tour operators, travel agents and customers. Standardisation increasingly becomes a prerequisite for interorganisational coordination and cooperation, EDI is slowly being introduced in tourism and Internet related standards like HTML and VRML. will have a major impact on the future development of electronic distribution platforms for services in tourism. As the proceedings underscore, ENTER has been established as an international platform for scientific and practical discourse on Information and Communication Technologies in Tourism. The close interdisciplinary link between technological and economic questions in tourism opens up new, promising threads for applied research and development likewise.

**The Big Three and Me** - Billy Casper 2012-03-01

Billy Casper had a higher winning percentage than Arnold Palmer, he won twice as many times on the PGA Tour as Gary Player, and during his career he finished in the top twenty-five more consistently than Jack Nicklaus. And yet, when golf historians write about the legends of the game, with special attention paid to the above-listed "Big Three," his name is often left out of the discussion, or is at best an afterthought. In this fascinating autobiography, Casper tells his life story, shining candid insight into the man who quietly collected fifty-one PGA Tour victories, the seventh highest total in history.

**My Struggle for Freedom** - Hans Küng 2005-01-01

Hans Küng is undoubtedly one of the most important theologians of our time, but he has always been a controversial figure, and as the result of a much-publicized clash over papal infallibility had his permission to teach revoked by the Vatican. Yet at seventy-five he is also something like a senior statesman, one of the 'Group of Eminent Persons' convened by the UN Secretary-General Kofi Annan, and a friend of heads of government like Tony Blair and President Mubarak of Egypt. In this fascinating autobiography he gives a frank and outspoken account of the first four decades of his life. He tells of his youth in Switzerland and his decision to become a priest; his doubts and struggles as he studied in Rome and Paris, and his experiences as a professor in Tübingen, where he received a chair at the amazingly early age of thirty-one. Most importantly, as one of the last surviving eye-witnesses he gives an authentic account of the struggles behind the scenes at the Second Vatican Council, in which he took part as a theological expert. Here it becomes clear just how major an influence he was, to the point of shaping the Council's agenda and drafting speeches for bishops to deliver in plenary sessions. With its rich thought and vivid narrative, Küng's book paints a moving picture of his personal convictions, and his struggle for a Christianity characterized not by the domination of an official church but by Jesus.

**Handbook of Urban Mobilities** - Ole B. Jensen 2020-06-10

This book offers the reader a comprehensive understanding and the multitude of methods utilized in the research of urban mobilities with cities and 'the urban' as its pivotal axis. It covers theories and concepts for scholars and researchers to understand, observe and analyse the world of urban mobilities. The Handbook of Urban Mobilities facilitates the understanding of urban mobilities within a historic conscience of societal transformation. It explores key concepts and theories within the 'mobilities turn' with a particular urban framework, as well as the methods and tools at play when empirical, urban mobilities research is undertaken. This book also explores the urban mobilities practices related to

commutes; particular modes of moving; the exploration of everyday life and embodied practices as they manifest themselves within urban mobilities; and the themes of power, conflict, and social exclusion. A discussion of urban planning, public control, and governance is also undertaken in the book, wherein the themes of infrastructures, technologies and design are duly considered. With chapters written in an accessible style, this handbook carries timely contributions within the contemporary state of the art of urban mobilities research. It will thus be useful for academics and students of graduate programmes and post-graduate studies within disciplines such as urban geography, political science, sociology, anthropology, urban planning, traffic and transportation planning, and architecture and urban design.

The Compassionate World - Karl Gary 2015-12-16

This book has something for everybody. If you are a sociologist, you may like the new addition of Human Energy to secular humanism. If you are a civil engineer, you may like the new designs that complement Earth. If you are a physicist, you may really enjoy the explanation of how the human concept was developed 13.5 billion years ago in the Big Bang flashback of creation. If you are a biologist, you will definitely enjoy how natural selection is actually achieved. If you are a politician, a human involved with standard religion or a money manager, you won't like this book very much at all. For the human species to survive, and we will. We must transform our two major manipulations to human consciousness - Money and Religion. A well-thought-out system is fully presented that details the adjustments to every social structure, so that powerful humans can no longer damage another human mind into negative states of existence. Where other teachers remind us of how we are all connected as one big Soul, with the common language that the internal space is the foundation to seek if one wants external peace. I go deeper into the actual creation of human consciousness and its complete evolution to the advanced human genes that will light our Earth and dilutes the fake light exploding from the sun. Everybody knows we are all connected as one; most can feel that. This book explains the final realm of that connection. That place is called Heaven. The human species with a Light Soul, is a

game plan invented eons ago. The stage right before heaven is very close at hand. It is called The Compassionate World. Here is how we build it. My Best Wishes Always! Karl Gary

**Overcoming School Refusal** - Joanne Garfi 2018-01-31

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

**The Future of the United Nations System** - International Peace Research Association 1998

What does the future hold for the UN? In this book, twenty-two scholars from all continents cover prevention of violence, creating economic and social structures that sustain human fulfilment, sharing and protecting the commons, and peace education. They offer sixty-six recommendations for new institutions and programs on issues that include controlling weapons, humanitarian intervention, human rights, economic policies, advancement of women, refugees, ecological security, communications, and peace education. Most of the recommendations do not require amendments to the UN Charter or to the treaties establishing the UN Specialized Agencies. Instead, their implementation would require creative efforts of Member States, secretariats, NGOs, and dedicated individuals that are pointed toward attainment of multilateral capacity for coping with an array of global problems that increasingly threaten the quality of human life.

**Say Something** - Jennifer Brown 2014-01-07

In *Hate List*, Jennifer Brown delivered a powerful story about grief, friendship, and forgiveness in the aftermath of a school shooting. Now, she explores an evocative new narrative while digging deeper into the themes first touched upon in her debut novel. David Judy knows what it's like to be bullied. Shy and gentle, with a soft voice and "a girl's name for a

last name," he is a prime target. Thankfully, there's one girl David feels at ease with -- Valerie, the girl who's been dating his neighbor and sometimes-friend, Nick. Valerie is kind to David and pulls him into their circle of outcast friends, where he finally feels like he (sort of) belongs. So when David starts to suspect that Nick and his friend Jeremy are planning a revenge plot against their tormentors, he wrestles with whether or not to tell someone. By the time he finally works up the courage to say something...it's too late. David tries to put what he knows behind him -- to forget and move on -- but that's hard to do as senior year starts and he watches his old friend, Valerie, struggle in a deep, dark place of guilt and confusion. It's time to speak up. David may not be able to end bullying, but by standing up, he might just make a difference. And that's what matters.

**The Role of Smallholder Farms in Food and Nutrition Security** - Sergio Gomez y Paloma 2020-01-01

This open access book discusses the current role of smallholders in connection with food security and poverty reduction in developing countries. It addresses the opportunities they enjoy, and the constraints they face, by analysing the availability, access to and utilization of production factors. Due to the relevance of smallholder farms, enhancing

their production capacities and economic and social resilience could produce positive impacts on food security and nutrition at a number of levels. In addition to the role of small farmers as food suppliers, the book considers their role as consumers and their level of nutrition security. It investigates the link between agriculture and nutrition in order to better understand how agriculture affects human health and dietary patterns. Given the importance of smallholdings, strategies to increase their productivity are essential to improving food and nutrition security, as well as food diversity.

Information and Communication Technologies in Tourism 1997 - A.Min Tjoa 2012-12-06

For the fourth time now, experts in tourism from various countries come to attend the ENTER conference in order to inform themselves and others about the current developments in the usage of information and communication technologies. The ENTER conference is thought as a platform for the exchange of ideas, experiences, opinions, and visions among scientists and practitioners. The visions presented at the last three ENTER conferences have triggered many requirements of important ongoing and planned projects in the application of communication and information technologies in tourism. The scope of the papers of this proceedings covers the most recent and relevant topics in our area of interest. The sessions are primarily devoted to intelligent agents and systems, the future role of global (reservation) systems, the new chances of database applications due to the most recent technological developments, and above all the role of the Internet (and Intranet). I would like to express my cordial thanks to all institutions actively supporting this event, namely: • The Edinburgh & Lothian Tourist Board • The International Federation of Information Technology in Tourism (IFITT) Several people spent numerous hours organizing the scientific programme of ENTER. The names of most of them will appear in the following pages.

Im Herbst 2012 wird das Museum Berggruen wieder seine Pforten öffnen umfangreich renoviert und ergänzt um einen Erweiterungsbau, das sogenannte Kommandantenhaus am Spandauer Damm. Die im Jahr 2000 von der Nationalgalerie erworbene Sammlung zur Klassischen Moderne von Heinz Berggruen erhält somit mehr Platz für zusätzliche Leihgaben aus dem Besitz der Familie. In diesem hochwertigen Bildband sind neben den zahlreichen Werken von Picasso, Klee und Matisse, die den

Kernbestand des Museums bilden, auch Arbeiten von ihren großen Zeitgenossen Alberto Giacometti, Henri Laurens, Georges Braque sowie afrikanische Plastik abgebildet. Die im Museum neu hinzugekommenen Werke werden mit großformatigen Abbildungen und in bewährter Manier mit kommentierenden, aktuell geschriebenen Texten vorgestellt. 0. *Metadata in the Geosciences* - David Medyckyj-Scott 1991

### **Learning Strategies** - John Nisbet 2017-09-13

Originally published in 1986, designed for teachers and those concerned with the education of primary and secondary school pupils, *Learning Strategies* presented a new approach to 'learning to learn'. Its aim was to encourage teachers to start thinking about different approaches to harnessing the potential of young learners. It was also relevant to adult learners, and to those who teach them. Thus, although about learning, the book is also very much about teaching. *Learning Strategies* presents a critical view of the study skills courses offered in schools at the time, and assesses in non-technical language what contributions could be made to the learning debate by recent developments in cognitive psychology. The traditional curriculum concentrated on 'information' and developing skills in reading, writing, mathematics and specialist subjects, while the more general strategies of how to learn, to solve problems, and to select appropriate methods of working, were too often neglected. Learning to learn involves strategies like planning ahead, monitoring one's performance, checking and self-testing. Strategies like these are taught in schools, but children do not learn to apply them beyond specific applications in narrowly defined tasks. The book examines the broader

notion of learning strategies, and the means by which we can control and regulate our use of skills in learning. It also shows how these ideas can be translated into classroom practice. The final chapter reviews the place of learning strategies in the curriculum.

### **The Rejection of Consequentialism** - Samuel Scheffler 1994-08-11

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.
