Organizational Cognition

- Theresa K. Lant
2000-07

Organizational Cognition is a collection of chapters written by scholars from around the world. The editors outline the history of two approaches to the study of cognition in organizations, the computational approach and the interpretive approach. The chapters represent some of the most cutting-edge research on organizational cognition, covering research that spans many levels of analysis. Much of the work in the book demonstrates how computational and interpretive approaches can be combined in a way that provides greater insight into cognitive processes in and among organizations. The editors conclude by elaborating the likely

boundary conditions of each approach and how they can be combined for a more complete understanding of cognition in organizations.

Overcoming School Refusal - Joanne Garfi 2018-01-31

School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and

community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book.

Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school.

Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Managerial and

Organizational Cognition

- Colin Eden 1998-03-19
Interest in the field of managerial and organizational cognition has been intense over the last few years. This book explores and provides an in-depth overview of the latest developments in the area and presents answers to the questions accompanying its growth: Is the field distinctive? How does it extend our understanding of managerial processes? From different disciplinary perspectives and empirical settings, the contributors study patterns of managerial cognition. In particular, the longitudinal approach reflected in the volume contributes to its impact as a grounded, practice-based analysis of cognition in organizations.

C.G.Jung and Literary Theory - S. Rowland

1999-04-26

C.G. Jung and Literary Theory remedies a significant omission in literary studies by doing for Jung and poststructuralist literary theories what has been achieved for Freud and Lacan. Offering radically new Jungian theories of deconstruction, feminism, the body, sexuality, spirituality, postcolonialism, reader-response, the book also investigates the controversial occult and fascist heritage of Jung. By using the work of Derrida, Kristeva and Irigaray and examining

Jungian fiction, this book transforms modern literary theory in ways which simultaneously critique Jung's work.

Higher Education

Pathways - Ashwin, Paul
2018-12-14

In what ways does access to undergraduate education have a transformative impact on people and societies? What conditions are required for this impact

to occur? What are the pathways from an undergraduate education to the public good, including inclusive economic development? These questions have particular resonance in the South African higher education context, which is attempting to tackle the challenges of widening access and improving completion rates in a system in which the segregations of the apartheid years are still apparent. Higher education is recognised in core legislation as having a distinctive and crucial role in building post-apartheid society. Undergraduate education is seen as central to addressing skills shortages in South Africa. It is also seen to yield significant social returns, including a consistent positive impact on societal institutions

and the development of a range of capabilities that have public, as well as private, benefits. This book offers comprehensive contemporary evidence that allows for a fresh engagement with these pressing issues.

The Lines Between the

Lines - Bess Rowen

2021-10-18

What is the purpose of a stage direction? These italicized lines written in between the lines of spoken dialogue tell us a great deal of information about a play's genre, mood, tone, visual setting, cast of characters, and more. Yet generations of actors have been taught to cross these words out as records of previous performances or signs of overly controlling playwrights, while scholars have either treated them as problems to be solved or as silent lines of dialogue. Stage directions can be all of these things, and yet there are examples from over one-hundred years of American playwriting that show that stage

directions can also be so much more. The *Lines Between the Lines* focuses on how playwrights have written stage directions that engage readers, production team members, and scholars in a process of embodied creation in order to determine meaning. Author Bess Rowen calls the products of this method "affective stage directions" because they reach out from the page and affect the bodies of those who encounter them. Affective stage directions do not tell a reader or production team what a given moment looks like, but rather how a moment feels. In this way, these stage directions provide playgrounds for individual readers or production teams to make sense of a given moment in a play based on their own individual cultural experience, geographic

location, and identity-markers. Affective stage directions enable us to check our assumptions about what kinds of bodies are represented on stage, allowing for a greater multitude of voices and kinds of embodied identity to make their own interpretations of a play while still following the text exactly. The tools provided in this book are as useful for the theater scholar as they are for the theater audience member, casting director, and actor. Each chapter covers a different function of stage directions (spoken, affective, choreographic, multivalent, impossible) and looks at it through a different practical lens (focusing on actors, directors, designers, dramaturgs, and readers). Every embodied person will

have a slightly different understanding of affective stage directions, and it is precisely this diversity that makes these stage directions crucial to understanding theater in our time.

Creating a Class -
Mitchell L. Stevens
2009-09-15

In real life, Mitchell Stevens is a professor in bustling New York. But for a year and a half, he worked in the admissions office of a bucolic New England college that is known for its high academic standards, beautiful campus, and social conscience. Ambitious high schoolers and savvy guidance counselors know that admission here is highly competitive. But creating classes,

Stevens finds, is a lot more complicated than most people imagine. Admissions officers love students but they work for the good of the school. They must bring each class in "on budget," burnish the statistics so crucial to institutional prestige, and take care of their colleagues in the athletic department and the development office. Stevens shows that the job cannot be done without "systematic preferencing," and racial affirmative action is the least of it. Kids have an edge if their parents can pay full tuition, if they attend high schools with exotic zip codes, if they are athletes--especially football players--and even if they are popular. With novelistic flair, sensitivity to history, and a keen eye for telling detail, Stevens

explains how elite colleges and universities have assumed their central role in the production of the nation's most privileged classes. Creating a Class makes clear that, for better or worse, these schools now define the standards of youthful accomplishment in American culture more generally.

East Plays West -

Stephen Wagg 2012-09-10

The Cold War spanned some five decades from the devastation that remained after World War

Two until the fall of the Berlin wall, and for much of that time the perception was that only on the Eastern side were politics and sport inextricably linked. However, this assumption underestimates the extent to which sport was an important symbol for both power blocs in their ongoing ideological struggle. This collection of essays from leading international authorities on sport, culture and ideology brings together an impressive body of work organized around key political themes and outstanding moments in sport, and is at once a political history of sport and an illuminating new perspective on the forces that shaped this unsettled time.

Leadership in Administration - Philip Selznick 2011-05-11
Foundational study of how institutions work and how leadership promotes them. Often

cited in many fields and consistently assigned to classes in a variety of departments -- including sociology and business, and executive training in management and military leadership -- this book is considered to have virtually created the modern field of institutional-leadership management. It is still recognized as a lively and accessible presentation of the institutionalist school's answer to traditional "rationalist" approaches. Selznick's analysis goes beyond efficiency and traditional loyalty: he examines the more nuanced variables of effective leadership of organizations in business, education, government, the military, and labor. Quality, authorized ebook format includes linked notes and

Contents and embedded pagination from print editions for continuity of referencing and classroom adoptions across all platforms. *Dynamic Consultation in a Changing Workplace* - Edward B. Klein 2000 The authors examine the role of the consultant in assisting leaders to understand change from a dynamic systems perspective and to manage that change strategically. The case examples they present emphasize the need for consultants to connect the internal psychological landscapes of executives, managers, and employees with their external manifestations during times of organizational transformation, while remaining attuned to the impact of these issues on the consultant's own lives and work.
