Finish Line New York Math - Continental Press Staff
2014-11-03

The next generation of Finish Line is here! Finish Line New York Math provides focused instruction to help students think critically and master New York's Common Core Learning Standards (CCLS). This workbook includes 300+ pages of focused practice and a new lesson format. The gradual release model is extended to four parts to promote deeper learning: Skill Introduction, Focused Instruction, Guided Practice, and Independent Practice. Guided questions teach the process of how to answer a question. The first unit in the book reviews big ideas from the previous grade with four-to-five topics that are key to new concepts in the current grade. This feature allows students to refresh their skills in these areas before building on them to learn new ideas. Units conclude with a review, which covers all skills in the

unit. PARCC-type items are included, as well as multiple-choice, open-ended, and multipart questions. A glossary features terms that appear in boldface throughout the book. Flashcards are provided for students to practice important ideas, formulas, and symbols from the book. Finish Line is designed to supplement core basal programs, including GO Math!(tm) and Connected Mathematics® Project 3 (CMP3).

Math Lessons For A Living Education Level 4 - Angela O'Dell 2016-06-20

Teach math lessons through the creative means of a life storyProvide 36 weeks of instruction based on skill levels rather than grade levelsGuide students by the use of inexpensive manipulatives, including index cards, dried beans, and construction paper! We often tend to compartmentalize when teaching children. In real life, there aren't artificial barriers between "subjects." For example, when you are cooking or baking, you have to use the skills of reading, logical thinking, and measuring,

just to name a few. In driving a car, you see and read road signs, read maps, and count miles. So why do we say to children, "This is math, this is language, this is about science and nature, and this is history"? The most natural and effective means to teach children is through life examples. Content, story, and the ability to show math in real life make a living math book!
