**Beer School** - Steve Hindy 2011-01-31

What do you get when you cross a journalist and a banker? A brewery, of course. "A great city should have great beer. New York finally has, thanks to Brooklyn. Steve Hindy and Tom Potter provided it. Beer School explains how they did it: their mistakes as well as their triumphs. Steve writes with a journalist's skepticism-as though he has forgotten that he is reporting on himself. Tom is even less forgiving-he's a banker, after all. The inside story reads at times like a cautionary tale, but it is an account of a great and welcome achievement." -Michael Jackson, The Beer Hunter(r) "An accessible and insightful case study with terrific insight for aspiring entrepreneurs. And if that's not enough, it is all about beer!" -Professor Murray Low, Executive Director, Lang Center for Entrepreneurship, Columbia Business School "Great lessons on what every first-time entrepreneur will experience. Being down the block from the Brooklyn Brewery, I had firsthand witness to their positive impact on our community. I give Steve and Tom's book an A++!" -Norm Brodsky, Senior Contributing Editor, Inc. magazine "Beer School is a useful and entertaining book. In essence, this is the story of starting a beer business from scratch in New York City. The product is one readers can relate to, and the market is as tough as they get. What a fun challenge! The book can help not only those entrepreneurs who are starting a business but also those trying to grow one once it is established. Steve and Tom write with enthusiasm and insight about building their business. It is clear that they learned a lot along the way. Readers can learn from these lessons too." -Michael Preston, Adjunct Professor, Lang Center for Entrepreneurship, Columbia Business School, and coauthor, The Road to Success: How to Manage Growth "Although we

(thankfully!) never had to deal with the Mob, being held up at gunpoint, or having our beer and equipment ripped off, we definitely identified with the challenges faced in those early days of cobbling a brewery together. The revealing story Steve and Tom tell about two partners entering a business out of passion, in an industry they knew little about, being seriously undercapitalized, with an overly naive business plan, and their ultimate success, is an inspiring tale." -Ken Grossman, founder, Sierra Nevada Brewing Co.

**The Future of Disability in America** - Institute of Medicine 2007-10-24

The future of disability in America will depend on how well the U.S. prepares for and manages the demographic, fiscal, and technological developments that will unfold during the next two to three decades. Building upon two prior studies from the Institute of Medicine (the 1991 Institute of Medicine's report *Disability in America* and the 1997 report *Enabling America*), *The Future of Disability in America* examines both progress and concerns about continuing barriers that limit the independence, productivity, and participation in community life of people with disabilities. This book offers a comprehensive look at a wide range of issues, including the prevalence of disability across the lifespan; disability trends the role of assistive technology; barriers posed by health care and other facilities with inaccessible buildings, equipment, and information formats; the needs of young people moving from pediatric to adult health care and of adults experiencing premature aging and secondary health problems; selected issues in health care financing (e.g., risk adjusting payments to health plans, coverage of assistive technology); and the organizing and financing of disability-related research. *The Future of Disability in America* is an assessment of both principles and scientific evidence for disability policies and services. This book's recommendations propose steps to eliminate barriers and strengthen the evidence base for future public and private actions to reduce the impact of disability on individuals, families, and society.

**The Sustainable City VIII (2 Volume Set)** - S.S. Zubir 2013-12-03

With majority of the Earth's people now urban dwellers, and cities being the most

efficient habitat for the utilisation of resources, it is imperative that we continue to support standards of living and efficiencies of urban areas. However, the urbanisation process has not been without its problems. While much has been done to address the original issues surrounding the quality of urban life, new challenges continue to arise. It is no longer sustainable to achieve improvements by means that require greater and greater energy consumption as we did in the past. Despite their complexity, however, cities are a great laboratory for architects, engineers, and other key professionals to apply new ideas and new technology to meet our requirements for more sustainable city environments. Containing papers presented at the latest in a series of conferences organised by the Wessex Institute of Technology, these proceedings, split in to two volumes address not just environmental, architectural, and engineering concerns, but also quality of life, security, risk, and heritage. The diversity of topics and the case studies based on existing projects make the book an important contribution to the literature on urban planning.

**Health and Medicine** - Ross M. Mullner 2011-06-28

This volume in The SAGE Reference Series on Disability explores health and medical issues for people with disabilities. It is one of eight volumes in the cross-disciplinary and issues-based series, which incorporates links from varied fields making up disability studies as volumes examine topics central to the lives of individuals with disabilities and their families. With a balance of history, theory, research, and application, specialists set out the findings and implications of research and practice for others whose current or future work involves the care or study of those with disabilities, as well as for the disabled themselves. The concise, engaging presentational style emphasizes accessibility. Taken individually, each volume sets out the fundamentals of the topic it addresses, accompanied by compiled data and statistics, recommended further readings, a guide to organizations and associations, and other annotated resources, thus providing the ideal introductory platform and gateway for further study. Taken together, the series represents both a survey of major disability issues and a guide to new directions and trends and contemporary resources in the field as a whole.

**Alleviating Poverty Through Profitable Partnerships 2e** - Patricia H. Werhane  
2020-05-01

Poverty is an unnecessary form of human degradation and badly conceived economics. Our thesis is that poverty can be reduced, if not eradicated, both locally and globally. But this will occur only if we change our shared narratives about global free enterprise, remind ourselves that poverty is a system, and conceive of poverty alleviation as a "bottom up" project. There is no "one size fits all" for poverty reduction. Rather, poverty is a system and must be addressed locally. It is our aim, as it is the aim of the United Nations, the World Bank, and many other organizations, to erase it from our vocabulary and from this planet. With a series of case studies that accompany each chapter, this book should assist readers in thinking about poverty alleviation from a number of perspectives, from bottom-up entrepreneurial projects, local-corporate ventures, with public-private partnerships, from focused philanthropy, with education and health care initiatives, and agriculture reforms in rural communities, all with creating a win-win for local and partnership individuals, organizations, and communities.. The book should be useful in various undergraduate and graduate courses on ethics, applied ethics. developing economic systems, and on poverty.
