**The New Cool** - Neal Bascomb 2011-03-01

That Monday afternoon, in high-school gyms across America, kids were battling for the only glory American culture seems to want to dispense to the young these days: sports glory. But at Dos Pueblos High School in Goleta, California, in a gear-cluttered classroom, a different type of "cool" was brewing. A physics

teacher with a dream – the first public high-school teacher ever to win a MacArthur Genius Award -- had rounded up a band of high-I.Q. students who wanted to put their technical know-how to work. If you asked these brainiacs what the stakes were that first week of their project, they'd have told you it was all about winning a robotics competition – building the ultimate robot and prevailing in a machine-to-machine contest in front of 25,000 screaming fans at Atlanta's Georgia Dome. But for their mentor, Amir Abo-Shaer, much more hung in the balance. The fact was, Amir had in mind a different vision for education, one based not on rote learning -- on absorbing facts and figures -- but on active creation. In his mind's eye, he saw an even more robust academy within Dos Pueblos that would make science, technology, engineering, and math (STEM) cool again, and he knew he was poised on the edge of making that dream a reality. All he needed to get the necessary funding was one flashy win – a triumph that would firmly put his Engineering Academy at Dos Pueblos on the map. He imagined that one day there would be a nation filled with such academies, and a new popular veneration for STEM – a “new cool” – that would return America to its former innovative glory. It was a dream shared by Dean Kamen, a modern-day inventing wizard – often-called “the Edison of his time” – who'd concocted the very same FIRST Robotics Competition that had lured the kids at Dos Pueblos. Kamen had created FIRST (For Inspiration and Recognition of Science and Technology) nearly twenty years prior. And now, with a participant alumni base approaching a million strong, he felt that awareness was about to hit critical mass. But before the Dos Pueblos D'Penguineers

could do their part in bringing a new cool to America, they'd have to vanquish an intimidating lineup of “super-teams”– high-school technology goliaths that hailed from engineering hot spots such as Silicon Valley, Massachusetts' Route 128 technology corridor, and Michigan's auto-design belt. Some of these teams were so good that winning wasn't just hoped for every year, it was expected. In *The New Cool*, Neal Bascomb manages to make even those who know little about – or are vaguely suspicious of – technology care passionately about a team of kids questing after a different kind of glory. In these kids' heartaches and headaches – and yes, high-five triumphs -- we glimpse the path not just to a new way of educating our youth but of honoring the crucial skills a society needs to prosper. A new cool.

Smart Fibres, Fabrics and Clothing - Xiaoming Tao 2001-10-04

This important book provides a guide to the fundamentals and latest developments in smart technology for textiles and clothing. The contributors represent a distinguished international panel of experts and the book covers many aspects of cutting edge research and development. Smart fibres, fabrics and clothing starts with a review of the background to smart technology and goes on to cover a wide range of the material science and fibre science aspects of the technology including: Electrically active polymeric materials and the applications of nonionic polymer gel and elastomers for artificial muscles; Thermally sensitive fibres and fabrics; Cross-linked polyol fibrous substrates stimuli-responsive interpenetrating polymer network hydrogel; Permeation control through stimuli-responsive polymer membranes; optical fibre sensors, hollow fibre membranes for gas separation;

integrating fibre-formed components into textile structures; Wearable electronic and photonic technologies; Adaptive and responsive textile structures (ARTS); Biomedical applications including the applications of scaffolds in tissue engineering It is essential reading for academics in textile and materials science departments, researchers, designers and engineers in the textiles and clothing product design field. Product managers and senior executives within textile and clothing manufacturing will also find the latest insights into technological developments in the field valuable and fascinating.

**Scars, Marks & Tattoos** - Jacqueline Caruso 2021-03-31

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

**Systems Analysis and Design** - Alan Dennis 2020-11-26

Systems Analysis and Design: An Object-Oriented Approach with UML, Sixth Edition helps students develop the core skills required to plan, design, analyze, and implement information systems. Offering a practical hands-on approach to the subject, this textbook is designed to keep students focused on doing SAD, rather than simply reading about it. Each chapter describes a specific part of the SAD process, providing clear instructions, a detailed example, and practice exercises. Students are guided through the topics in the same order as

professional analysts working on a typical real-world project. Now in its sixth edition, this edition has been carefully updated to reflect current methods and practices in SAD and prepare students for their future roles as systems analysts. Every essential area of systems analysis and design is clearly and thoroughly covered, from project management, to analysis and design modeling, to construction, installation, and operations. The textbook includes access to a range of teaching and learning resources, and a running case study of a fictitious healthcare company that shows students how SAD concepts are applied in real-life scenarios.

**I am Erased** - Kalash Jain 2021-11-22  
'Coming of age' a term which carries with it different perspectives and interpretations. It is the phase where innocence blooms into maturity, curiosity and playfulness merges into knowledge and responsibility. For some it means the loss of a childhood they cherished yet for some it means relishing the chance of being adults. 'I am Erased' is one such anthology where we look into all such perspectives and visions through a delightful combination of short stories, poems and several forms of write-ups. We venture into a world where 'coming of age' has a whole lot of possibilities for our writers. They create a myriad of thoughts and emotions which I am sure will delight our readers. Let's all delve into the theme and explore versions of write-ups each different in style yet united by the bond of those same emotions.

**Building an Ecosystem Approach to Aquaculture** - Doris Soto 2008

520 Aquaculture growth worldwide involves the expansion of cultivated areas, a higher density of aquaculture installations and farmed individuals, and greater use of feed resources produced outside the immediate culture area. To ensure that such development of the sector does not carry negative impacts on the environment and on parts of society due to weak regulation or poor management, an ecosystem approach for aquaculture (EAA) is encouraged. These proceedings consider aspects relevant for an ecosystem-based management in

aquaculture. The document also includes two comprehensive reviews covering the status of brackish, marine and freshwater aquaculture within an ecosystem approach perspective.--Publisher's description.
