Migration and Remittances During the Global Financial Crisis and Beyond - Ibrahim Sirkeci 2012-05-30

During the 2008 financial crisis, the possible changes in remittance-sending behavior and potential avenues to alleviate a probable decline in remittance flows became concerns. This book brings together a wide array of studies from around the world focusing on the recent trends in remittance flows. The authors have gathered a select group of researchers from academic, practitioner and policy making bodies. Thus the book can be seen as a conversation between the different stakeholders involved in or affected by remittance flows globally. The book is a first-of-its-kind attempt to analyze the effects of an ongoing crisis on remittance flows globally. Data analyzed by the book reveals three trends. First, The more diversified the destinations and the labour markets for migrants the more resilient are the remittances sent by migrants. Second, the lower the barriers to labor mobility, the stronger the link between remittances and economic cycles in that corridor. And third, as remittances proved to be relatively resilient in comparison to private capital flows, many remittance-dependent countries became even more dependent on remittance inflows for meeting external financing needs. There are several reasons for migration and remittances to be relatively resilient to the crisis. First, remittances are sent by the stock (cumulative flows) of migrants, not only by the recent arrivals (in fact, recent arrivals often do not remit as regularly as they must establish themselves in their new homes). Second, contrary to expectations, return migration did not take place as expected even as the financial crisis reduced employment opportunities in the US and Europe. Third, in addition to the persistence of migrant stocks that lent persistence to remittance flows, existing migrants often absorbed income shocks and continued to send money home. Fourth, if some migrants did return or had the intention to return, they tended to take their savings back to their country of origin. Finally, exchange rate movements during the crisis caused unexpected changes in remittance behavior: as local currencies of many remittance recipient countries depreciated

sharply against the US dollar, they produced a “sale” effect on remittance behavior of migrants in the US and other destination countries.

Archives in Liquid Times - Frans Smit 2017

Archives in Liquid Times aims to broaden and deepen the thinking about archives in today's digital environment. It is a book that tries to fuel the debate about archives in different fields of research. It shows that in these liquid times, archives need and deserve to be considered from different angles. Archives in Liquid Times is a publication in which archival science is linked to philosophy (of information) and data science. Not only do the contributors try to open windows to new concepts and perspectives, but also to new uses of existing concepts concerning archives. The articles in this book contain philosophical reflections, speculative essays and presentations of new models and concepts alongside well-known topics in archival theory. Among the contributors are scholars from different fields of research, like Anne Gilliland, Wolfgang Ernst, Geoffrey Yeo, Martijn van Otterlo, Charles Jeurgens and Geert-Jan van Bussel. This book includes interviews with Luciano Floridi and Eric Ketelaar, in which they reflect on key issues arising from the contributions. The editors are Frans Smit, Arnoud Glaudemans and Rienk Jonker.

Seafood Processing By-Products - Se-Kwon Kim 2014-04-08

The seafood processing industry produces a large amount of by-products that usually consist of bioactive materials such as proteins, enzymes, fatty acids, and biopolymers. These by-products are often underutilized

or wasted, even though they have been shown to have biotechnological, nutritional, pharmaceutical, and biomedical applications. For example, by-products derived from crustaceans and algae have been successfully applied in place of collagen and gelatin in food, cosmetics, drug delivery, and tissue engineering. Divided into four parts and consisting of twenty-seven chapters, this book discusses seafood by-product development, isolation, and characterization, and demonstrates the importance of seafood by-products for the pharmaceutical, nutraceutical, and biomedical industries.

Mobile Museums - Felix Driver 2021-04-19

Mobile Museums presents an argument for the importance of circulation in the study of museum collections, past and present. It brings together an impressive array of international scholars and curators from a wide variety of disciplines – including the history of science, museum anthropology and postcolonial history - to consider the mobility of collections. The book combines historical perspectives on the circulation of museum objects in the past with contemporary accounts of their re-mobilisation, notably in the context of Indigenous community engagement. Contributors seek to explore processes of circulation historically in order to re-examine, inform and unsettle common assumptions about the way museum collections have evolved over time and through space. By foregrounding questions of circulation, the chapters in Mobile Museums collectively represent a fundamental shift in the understanding of the history and future uses of museum collections. The book addresses a variety of different types of collection, including the botanical, the ethnographic, the economic and the archaeological. Its perspective is truly global, with case studies drawn from South America, West Africa, Oceania, Australia, the United States, Europe and the UK. Mobile Museums helps us to understand why the mobility of museum collections was a fundamental aspect of their history and why it continues to matter today. Praise for Mobile Museums 'This book advances a paradigm shift in studies of museums and collections. A distinguished group of contributors reveal that collections are not dead assemblages. The nineteenth and twentieth centuries were marked by vigorous international traffic in ethnography and natural history specimens that tell us much about colonialism, travel and the history of knowledge – and have implications for the remobilisation of museums in the future.' – Nicholas Thomas, University of Cambridge 'The first major work to examine the implications and consequences of the migration of materials from one scientific or cultural milieu to another, it highlights the need for a more nuanced understanding of collections and offers insights into their potential for future re-mobilisation.' – Arthur MacGregor

Fragile Lives in Fragile Ecosystems - International Rice Research Institute 1995

Fragile lives in fragile ecosystems: Feeding the world's poor from neglected rice ecosystems was the theme of the 1995 International Rice Research Conference. During the February meeting, participants assessed progress in rice research and identified new research approaches for reducing constraints and improving productivity and sustainability of less favored and fragile rice producing areas - these are the upland, rainfed lowland, and flood-prone ecosystems.

Research in the Archival Multiverse - Sue McKemmish 2016-12-01

Within the past 15 years, the field of archival studies around the world has experienced unprecedented growth and archival studies graduate education programs today have among the highest enrollments in any information field. During the same period, there has also been unparalleled expansion and innovation in the diversity of methods and theories being applied in archival scholarship. Global in scope, Research in the Archival Multiverse compiles critical and reflective essays across a wide range of emerging research areas and interests in archival studies with the aim of providing current and future archival academics with a text addressing possible methods and theoretical frameworks that have been and might be used in archival scholarship. More than a collation of research methods for handy reference, this volume advocates for reflexive research practice as a means by which to lay bare the fuzziness and messiness of research. Whereas research in the form of published research papers and juried conference presentations provide a view of the study framed in terms of research questions and findings, reflexive research practice reveals the

context of the study and chains of situations, choices, and decisions that influence the trajectories of the studies themselves. Such elucidations from the position of the researcher are instructive for others, who may be inspired to apply or adapt the method for their own research. Thanks, Obama - David Litt 2017-09-19

A NEW YORK TIMES BESTSELLER An Esquire Best Book of 2017 Remember when presidents spoke in complete sentences instead of in unhinged tweets? Former Obama speechwriter David Litt does. In his comic, coming-of-age memoir, he takes us back to the Obama years – and charts a path forward in the age of

Trump. More than any other presidency, Barack Obama's eight years in the White House were defined by young people – twenty-somethings who didn't have much experience in politics (or anything else, for that matter), yet suddenly found themselves in the most high-stakes office building on earth. David Litt was one of those twenty-somethings. After graduating from college in 2008, he went straight to the Obama campaign. In 2011, he became one of the youngest White House speechwriters in history. Until leaving the White House in 2016, he wrote on topics from healthcare to climate change to criminal justice reform. As President Obama's go-to comedy writer, he also took the lead on the White House Correspondents' Dinner, the so-called "State of the Union of jokes." Now, in this refreshingly honest memoir, Litt brings us inside Obamaworld. With a humorists' eye for detail, he describes what it's like to accidentally trigger an international incident or nearly set a president's hair aflame. He answers questions you never knew you had: Which White House men's room is the classiest? What do you do when the commander in chief gets your name wrong? Where should you never, under any circumstances, change clothes on Air Force One? With nearly a decade of stories to tell, Litt makes clear that politics is completely, hopelessly absurd. But it's also important. For all the moments of chaos, frustration, and yes, disillusionment, Litt remains a believer in the words that first drew him to the Obama campaign: "People who love this country can change it." In telling his own story, Litt sheds fresh light on his former boss's legacy. And he argues that, despite the current political climate, the politics championed by Barack Obama will outlive the presidency of Donald Trump. Full of hilarious stories and told in a truly original voice, *Thanks, Obama* is an exciting debut about what it means – personally, professionally, and politically – to grow up.

Increasing Productivity of Intensive Rice Systems Through Site-specific Nutrient Management - Achim Dobermann 2004

The integrated, efficient use of nutrients is one of the key issues for sustainable resource management in irrigated rice in Asia - one of the most intensive agricultural systems in the world. This book summarizes research conducted from 1994-2001 to develop and evaluate a new concept for site-specific nutrient management and the tools needed for applying it in farmers' fields with irrigated rice.

A Nation on the Line - Jan M. Padios 2018-04-03

In 2011 the Philippines surpassed India to become what the New York Times referred to as "the world's capital of call centers." By the end of 2015 the Philippine call center industry employed over one million people and generated twenty-two billion dollars in revenue. In *A Nation on the Line* Jan M. Padios examines this massive industry in the context of globalization, race, gender, transnationalism, and postcolonialism, outlining how it has become a significant site of efforts to redefine Filipino identity and culture, the Philippine

nation-state, and the value of Filipino labor. She also chronicles the many contradictory effects of call center work on Filipino identity, family, consumer culture, and sexual politics. As Padios demonstrates, the critical question of call centers does not merely expose the logic of transnational capitalism and the legacies of colonialism; it also problematizes the process of nation-building and peoplehood in the early twenty-first century.

Nature's Numbers - Ian Stewart 2008-08-04

"It appears to us that the universe is structured in a deeply mathematical way. Falling bodies fall with predictable accelerations. Eclipses can be accurately forecast centuries in advance. Nuclear power plants generate electricity according to well-known formulas. But those examples are the tip of the iceberg. In Nature's Numbers, Ian Stewart presents many more, each charming in its own way.. Stewart admirably captures compelling and accessible mathematical ideas along with the pleasure of thinking of them. He writes with clarity and precision. Those who enjoy this sort of thing will love this book."—Los Angeles Times

Insiders' Guide to Technology-Assisted Review (TAR) - Ernst & Young LLP 2015-01-26

Understand TAR mechanics, processes, and technologies, as taught by EY experts Insider's Guide to Technology-Assisted Review provides professionals with a thorough understanding of the process that is becoming increasingly important to the legal industry. With detailed discussion of the methods, technologies, and practices involved in TAR, readers without advanced degrees in linguistics or related technologies will gain a solid knowledge base upon which to evaluate both current practices and the new tools and technology continually hitting the market. Written by the world-renown experts at Ernst & Young's Technology and Discovery Services, this book provides a valuable resource for professionals seeking a more efficient way to handle the discovery and analysis process. Technology-Assisted Review streamlines the discovery and document review process by essentially "training" a computer to evaluate documents as required. The term "predictive coding" is used in a narrower sense, but both terms have several meanings, and can mean different things to different firms. Insider's Guide to Technology-Assisted Review cuts through the confusion, differentiating the different types of TAR and explaining the process and mechanics of each. Readers will: Understand the fundamental concepts of technology-assisted review Simplify ediscovery, documentation, and storage of large document sets Learn how TAR tools work, and the resources they require to function Consider the specialized skillset required to fully exploit TAR technology Technology-Assisted Review is here to stay, as the legal industry evolves to take full advantage of the cutting-edge technology becoming more widely available. As TAR becomes standard practice, it's important for professionals to understand its

possibilities and limitations. Insider's Guide to Technology-Assisted Review provides clear, comprehensive guidance toward this complex topic.

Midwifery from the Tudors to the 21st Century - Julia Allison 2020-06-14

This book recounts the journey of English midwives over six centuries and their battle for survival as a discrete profession, caring safely for childbearing women. With a particular focus on sixteenth and twentieth century midwifery practice, it includes new research which provides evidence of the identity, social status, lives, families and practice of contemporary midwives, and argues that the excellent care given by ecclesiastically licensed midwives in Tudor England was not bettered until the twentieth century. Relying on a wide variety of archived and personally collected material, this history illuminates the lives, words, professional experiences and outcomes of midwives. It explores the place of women in society, the development of

midwifery education and regulation, the seventeenth century arrival of the accoucheurs and the continuing drive by obstetricians to medicalise birth. A fascinating and compelling read, it highlights the politics and challenges that have shaped midwifery practice today and encourages readers to be confident in midwifery-led care and giving women choices in childbirth. It is an important read for all those interested in childbirth.
