Ageing and Stabilisation of Paper - M. Strlic (ed.) 2005

Global Gidelines for the Pevention of Surgical Site

Infection - World Health Organization 2017-01-27

Surgical site infections are caused by bacteria that get in through incisions made during

surgery. They threaten the lives of millions of patients each year and contribute to the spread of antibiotic resistance. In low- and middle-income countries, 11% of patients who undergo surgery are infected in the process. In Africa, up to 20% of women who have a caesarean section contract a wound infection, compromising their own health and their ability to care for their babies. But surgical site infections are not just a problem for poor countries. In the United States, they contribute to patients spending more than 400 000 extra days in hospital at a cost of an additional US \$10 billion per year. No international evidence-based

guidelines had previously been available before WHO launched its global guidelines on the prevention of surgical site infection on 3 November 2016, and there are inconsistencies in the interpretation of evidence and recommendations in existing national guidelines.

These new WHO guidelines are valid for any country and suitable to local adaptations, and take account of the strength of available scientific evidence, the cost and resource implications, and patient values and preferences.

Principles on Climate

Obligations of Enterprises -

Expert Group on Global Climate Change 2018-02-16

Climate change is the most important challenge humankind has ever faced. It is commonly accepted that GHG emissions must be reduced at great pace and to a significant extent to keep global warming below 2 (or, preferably, 1.5) degrees Celsius. This can only be reached if the obligations of major players—States, enterprises and investors—are sufficiently clear. The Oslo Principles aim to discern the legal obligations of States. The current Principles focus on the obligations of enterprises and investors. They identify the reduction obligations of enterprises, and articulate a series of related obligations.

Investors can—and many already do—play an important role. These Principles aim to provide a legal basis for active investment management and engagement geared at stimulating enterprises to comply with their legal obligations. An extensive commentary further explains the Principles and their legal underpinning. The members of the expert group are Thomas Pogge, Brian Preston, Tianbao Qin, James Silk, Jaap Spier (reporter), Elisabeth Steiner, Philip Sutherland, and Daniël Witte. (Series: Legal Perspectives on Global Challenges, Vol. 5) [Subject: International Environmental

Law, Climate Change] *Global Innovation Index 2020* - Cornell University 2020-08-13
The Global Innovation Index 2020 provides detailed metrics about the innovation performance of 131 countries and economies around the world. Its 80 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. The 2020 edition sheds light on the state of innovation financing by investigating the evolution of financing mechanisms for entrepreneurs and other innovators, and by pointing to progress and remaining challenges – including in the

context of the economic slowdown induced by the coronavirus disease (COVID-19) crisis.

The Glycemic-Load Diet - Rob Thompson 2006-03-17

A cardiologist's revolutionary weight-loss plan that allows dieters to enjoy good carbs while still losing weight The glycemic index has been the basis of many popular diets. But it doesn't take into account the serving sizes people actually eat and eliminates too many foods for dieters to stick with it. Now Dr. Robert Thompson's breakthrough program uses the glycemic load--the glycemic index adjusted for serving size--to take the GI a step forward.

The glycemic load is a more accurate and effective tool in controlling weight and insulin resistance, allowing dieters to eat more foods while still burning fat, cutting cravings, and speeding up their metabolism. Safe, simple, and scientifically proven, it's the smartest weight-loss plan yet.

Paul Wilmott on quantitative finance. 2(2008) - Paul Wilmott 2008

Equity Valuation - Jan Viebig 2008-04-30

Equity Valuation: Models from the Leading Investment Banks is a clear and reader-friendly guide to how today's leading investment banks analyze firms.

Editors Jan Viebig and Thorsten Poddig bring together expertise from UBS, Morgan Stanley, DWS Investment GmbH and Credit Suisse, providing a unique analysis of leading equity valuation models, from the very individuals who use them. Filled with real world insights, practical examples and theoretical approaches, the book will examine the strengths and weaknesses of some of the leading valuation approaches, helping readers understand how analysts:

- estimate cash flows
- calculate discount rates
- adjust for accounting distortions
- take uncertainty into consideration

Written for investment professionals, corporate

managers and anyone interested in developing their understanding of this key area, *Equity Valuation: Models from the Leading Investment Banks* will arm readers with the latest thinking and depth of knowledge necessary to make the right decisions in their valuation methodologies.

Structural change, fundamentals, and growth : a framework and case studies - McMillan, Margaret 2017-05-11

Measurement, Analysis and Remediation of Environmental Pollutants - Tarun Gupta 2019-10-08

This book discusses contamination of water, air, and

soil media. The book covers health effects of such contamination and discusses remedial measures to improve the situation. Contributions by experts provide a comprehensive discussion on the latest developments in the detection and analysis of contaminants, enabling researchers to understand the evolution of these pollutants in real time and develop more accurate source apportionment of these pollutants. The contents of this book will be of interest to researchers, professionals, and policy makers alike.

Bariatric and Metabolic Surgery - Luigi Angrisani 2016-10-01

This book describes the surgical bariatric procedures most frequently performed worldwide and examines their evolution in recent years both within Italy and internationally. For each operation, indications, the surgical technique, potential complications, and the outcomes with respect to weight and obesity-associated comorbidities are presented. In view of the significant failure rate revealed by studies on the long-term results of bariatric surgery, the problem of weight regain and revision surgery are also discussed in detail, covering the different types of revision, conversion to other procedures, and the main

outcomes. In addition, individual chapters focus on selected topics of importance. The role of bariatric surgery in the cure of type 2 diabetes (“diabetes surgery”) is discussed and the debate over the significance of gastroesophageal reflux disease and hiatal hernia for choice of procedure is summarized. Finally, the most common endoluminal procedures, which have been gaining in importance, are described and other bariatric operations, outlined.

Epilepsy Board Review -

Mohamad Z. Koubeissi

2017-06-27

This concise text mirrors the content of the Epilepsy Board

as distributed by the American Board of Psychiatry and Neurology. Epilepsy diagnosis, classification and treatment are thoroughly covered, along with seizure classification, epidemiology, normal and abnormal EEG, and treatment with antiepileptic medications and other modalities. Formatted with multiple choice questions and explanations, this complete resource will prepare physicians and students for the Epilepsy Board examination and provide the latest clinical approaches.

Price Setting and Price Regulation in Health Care -

OECD 2019-06-26

The objectives of this study are to describe experiences in price

setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings.

The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).

Herbicide Resistance in Plants -

Hugh J Beckie 2020-09-04

Today, herbicide-resistant weeds dominate research and development efforts in the discipline of weed science. The incidence, management challenges, and cost of multiple herbicide-resistant weed populations are continually increasing worldwide. Crop varieties with multiple herbicide-resistance traits are being rapidly adopted by growers and land managers to keep ahead of the weed resistance tsunami. This Special Issue of *Plants* comprises papers that describe the current status and future outlook of herbicide resistance research and development in

weedy and domestic plants,

with topics covering the full

spectrum from resistance

mechanisms to resistance

management. The unifying

framework for this Special issue

is the challenge posed to all of

management?

Reconceiving Reproductive

Health: Theological and

Christian Ethical Reflections -

Manitza Kotzé 2019-12-12

While reproduction is fairly often

touched upon in theological and

Christian ethical discussions,

reproductive health is not.

However, reproductive health is

a matter of theological and

ethical concern. Discussion pertaining to reproductive health includes a number of debates about, for instance, abortion and the termination of pregnancy, reproductive loss, childlessness, infertility, stillbirth, miscarriage and adoption. Additionally, new reproductive possibilities made available by the development of reproductive technology have necessitated theological and ethical reflection on, for example, surrogacy, post-menopausal pregnancies, litter births, single mothers or fathers by choice, in vitro fertilisation and the so-called saviour siblings. These new developments compel us to reconceive our notions of what

reproductive health is or should be. Many of these topics are receiving increasing attention in a variety of theological publications. The focus of this volume is unique, however, and to the best of our knowledge, this is the first volume dealing not only with reproductive issues, but also reflecting theologically and ethically on reproductive health. It makes a contribution by providing a variety of perspectives from different theological fields on this theme, and in many chapters, focussing especially on the South African context. These discussions are also part of urgent debates within churches, which require

developing life-giving theological language and imaginative theological alternatives that may speak to experiences of matters relating to reproductive health. The popular books, TV series and films that touch upon these discussions — including *The Handmaid's Tale* and *Mother!* — strengthen the perception that a more in-depth theological and ethical discussion on the theme may be necessary, particularly towards exploring stories and confessions from our faith tradition that may provide us with a timely opportunity to do the important work of theological *reconceiving*.

How to Write Dissertations &

Project Reports - Kathleen
McMillan 2010

Students need more help than ever before in selecting their dissertation or project topic and ensuring this major project gets the best marks. This book provides crucial support that will help organise their thinking and get them on the road to success.

**Authors, Publishers and
Politicians** - James J. Barnes
1974

American Agriculturist - 1906

**Blood and Marrow
Transplantation Long Term
Management** - Bipin N. Savani
2021-03-02

Hematopoietic cell transplantation (HCT) provides curative therapy for a variety of diseases. Over the past several decades, significant advances have been made in the field of HCT, to the point where HCT has become an integral part of treatment modality for a variety of hematologic malignancies and some nonmalignant diseases. HCT remains an important treatment option for a wide variety of hematologic and nonhematologic disorders, despite recent advances in the field of immunologic therapies. Factors driving this growth include expanded disease indications, greater donor options (expanding unrelated

donor registries and haploidentical HCT), and accommodation of older and less fit recipients. The development of less toxic pretransplant conditioning regimens, more effective prophylaxis of graft-versus-host disease (GVHD), improved infection control, and other advances in transplant technology have resulted in a rapidly growing number of transplant recipients surviving long-term free of the disease for which they were transplanted. The changes over decades in the transplant recipient population and in the practice of HCT will have almost inevitably altered the composition of the

long-term survivor population over time. Apart from an increasingly older transplant recipient cohort, the pattern of transplant indications has shifted from the 1990s when chronic myeloid leukemia made up a significant proportion of allo-HCT indications. Changes in cell source, donor types, conditioning regimens, GVHD prophylaxis, and supportive care have all occurred, with ongoing reductions in both relapse and non-relapse mortality (NRM) have been demonstrated. These patients have increased risks for a variety of late complications, which can cause morbidity and mortality. Most long-term

survivors return to the care of their local hematologists/oncologists or primary care physicians, who may not be familiar with specialized monitoring and management of long complications after HCT for this patient population. As HCT survivorship increases, the focus of care has shifted to the identification and treatment of long-term complications that may affect quality of life and long-term morbidity and mortality. Preventive care as well as early detection and treatments are important aspects to reducing morbidity and mortality in long-term survivors after allo-HCT. This

second edition, Blood and Marrow Transplantation Long-Term Management: Survivorship after Transplant, provides up-to-date information about diagnosis, screening, treatment, and long-term surveillance of long-term survivors after HCT.

Agricultural Statistics 2003 - Forestine Chapman 2003-06 Prepared under the direction of Forestine Chapman. Rose M. Petrone was responsible for coordination and technical editorial work. C ontains reliable information on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of

facts in forms suited to most common use.

The Definitive Guide to Point and Figure - Jeremy du Plessis 2012-10-04

Point and Figure charts are one of the great secrets of the Technical Analysis world. Highly sophisticated and with a thoroughbred pedigree, they can, however, be overlooked by traders today. Jeremy du Plessis - one of the foremost Point and Figure experts in the world - returns with a fully updated second edition of this definitive guide in an effort to redress this imbalance. This second edition, with an extensive revision to the text and introduction of brand new

techniques, demystifies the world of Point and Figure charting. It includes a detailed explanation of the history and development of the technique from its invention to the modern day, and covers the makeup of the chart patterns, why they are created, and how to interpret them. Throughout, readers are encouraged to understand Point and Figure charts from first principles, rather than just remember the names of a series of patterns. It is the first major work for 50 years to discuss in depth the original 1-box reversal method of Point and Figure charting and contrast it with the more popular 3-box reversal method. Further,

the explanation of how to use Point and Figure charts to project targets and calculate risk-reward ratios is the most comprehensive ever seen. Also featured in the second edition are: - A step-by-step analysis of the FTSE 100 Index using the 3-box method, as well as the NASDAQ Composite Index, using the 1-box method - A detailed discussion of optimising techniques - An in-depth chapter on Analysing Point and Figure charts, extensively rewritten from the first edition - A new explanation of how Point and Figure parameters are chosen and the implications of choosing them - Two new Point and Figure construction

methods never seen before - Point and Figure's contribution to market breadth, with a look at bullish percent and two brand new indicators - Full discussion of Point and Figure gaps and how they provide valuable information about the chart - Lesser known, more advanced techniques such as the use of moving averages, parabolic SAR and Bollinger Bands on Point and Figure charts - Price and volume activity histograms and how they provide information about support and resistance All this is illustrated with numerous colour charts and observations from years of trading experience. According to du Plessis, Point and Figure

charts are the 'voice of the market'. This book helps you listen to, and understand, that voice. Part of the Market Technicians Association (MTA) Required Reading list. *American Psychiatric Association Practice Guidelines* - American Psychiatric Association 1996 The aim of the American Psychiatric Association Practice Guideline series is to improve patient care. Guidelines provide a comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general

public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

Putin's Asymmetric Assault on Democracy in Russia and Europe - Chris Sampson

2018-04-24

The official U.S. government report on Russian interference

in democracy around the world! Most Americans were surprised to learn of Russian efforts to manipulate the results of the 2016 presidential election, and have become increasingly concerned about the vulnerabilities of our democracy. Here for the first time in an official U.S. government report is the fascinating and detailed account of how ex-KGB agent Vladimir Putin has used computer hackers, official state spy agencies, and even Russian organized crime thugs over the past thirty years to achieve his policy agenda?not only for Russian political domination, but also for his own enrichment and

the enrichment of the oligarchs who control almost all aspects of the Russian economy. This complete report includes chapters on: Putin's Rise and Motivations Manipulation and Repression Inside Russia Old Active Measures and Modern Malign Influence Operations Weaponization of Civil Society, Ideology, Culture, Crime, and Energy Kremlin Interference in Semi-Consolidated Democracies and Transitional Governments Kremlin Interference in Consolidated Democracies Multilateral and U.S. efforts to Counter the Kremlin's Asymmetric Arsenal In Putin's Asymmetric Assault on Democracy in Russia and

Europe, we learn about Vladimir Putin's rise to power through the KGB to mayor of St. Petersburg and eventually as head of the Russian state. We discover the history of how Putin used classic Cold War KGB tactics by weaponizing civil society, culture, ideology, and Russia's criminal element against the nascent Russian democracy by cultivating and using ties to NGOs, thinktanks, extremist political groups, the Russian orthodox church, industrial and energy policy, and the Russian Mafia. We also see how the Kremlin then exported this political extortion, intimidation, and monetary corruption first to its Eastern

European neighbors, then their western partners in the European Union, and how it has now landed on America's shores. Just as certain people in the intelligence community became increasingly alarmed at the growing strength and sophistication of Al-Qaeda in the late 1990s, the senators and staffers of the U.S. Senate Committee on Foreign Relations are giving the nation fair warning of a 9/11-level assault on the United States, this time by Russia's spy agencies. Putin's Asymmetric Assault on Democracy in Russia and Europe reveals not only the history of Russia's devastating tactics, but how to recognize

and counter them.

Credit Risk Measurement -

Anthony Saunders 2002-10-06

The most cutting-edge read on the pricing, modeling, and management of credit risk available. The rise of credit risk measurement and the credit derivatives market started in the early 1990s and has grown ever since. For many professionals, understanding credit risk measurement as a discipline is now more important than ever. *Credit Risk Measurement, Second Edition* has been fully revised to reflect the latest thinking on credit risk measurement and to provide credit risk professionals with a solid understanding of the

alternative approaches to credit risk measurement. This readable guide discusses the latest pricing, modeling, and management techniques available for dealing with credit risk. New chapters highlight the latest generation of credit risk measurement models, including a popular class known as intensity-based models. Credit Risk Measurement, Second Edition also analyzes significant changes in banking regulations that are impacting credit risk measurement at financial institutions. With fresh insights and updated information on the world of credit risk measurement, this book is a must-read reference for all

credit risk professionals. Anthony Saunders (New York, NY) is the John M. Schiff Professor of Finance and Chair of the Department of Finance at the Stern School of Business at New York University. He holds positions on the Board of Academic Consultants of the Federal Reserve Board of Governors as well as the Council of Research Advisors for the Federal National Mortgage Association. He is the editor of the Journal of Banking and Finance and the Journal of Financial Markets, Instruments and Institutions. Linda Allen (New York, NY) is Professor of Finance at Baruch College and Adjunct Professor of Finance at

the Stern School of Business at New York University. She also is author of *Capital Markets and Institutions: A Global View* (Wiley: 0471130494). Over the years, financial professionals around the world have looked to the Wiley Finance series and its wide array of bestselling books for the knowledge, insights, and techniques that are essential to success in financial markets. As the pace of change in financial markets and instruments quickens, Wiley Finance continues to respond. With critically acclaimed books by leading thinkers on value investing, risk management, asset allocation, and many other critical subjects, the Wiley

Finance series provides the financial community with information they want. Written to provide professionals and individuals with the most current thinking from the best minds in the industry, it is no wonder that the Wiley Finance series is the first and last stop for financial professionals looking to increase their financial expertise.

Textbook of Neural Repair and Rehabilitation - Michael Selzer
2014-04-24

Volume 1 of the Textbook of Neural Repair and Rehabilitation covers the basic sciences relevant to recovery of function following injury to the nervous system.

Ulrich's Periodicals Directory -
1989

The Payment System - Tom
Kokkola 2010

"This book is designed to provide the reader with an insight into the main concepts involved in the handling of payments, securities and derivatives and the organisation and functioning of the market infrastructure concerned.

Emphasis is placed on the general principles governing the functioning of the relevant systems and processes and the presentation of the underlying economic, business, legal, institutional, organisational and policy issues. The book is

aimed at decision-makers, practitioners, lawyers and academics wishing to acquire a deeper understanding of market infrastructure issues. It should also prove useful for students with an interest in monetary and financial issues."--Introduction (Pg. 20, para 8).

Brief Interventions for Alcohol and Other Drugs - Aalborg Research Aalborg Research Press 2018-03-02

In September 2011, the International Network on Brief Interventions for Alcohol (INEBRIA) (now the International Network on Brief Interventions for Alcohol and Other Drugs) held its 8th Annual Conference in Boston,

MA, USA. The goal of the conference, which was attended by 236 people from 19 countries, was to foster international collaborations between screening and brief intervention (SBI) researchers and to facilitate the development and dissemination of SBI research with a particular focus on implementation and sustainability. Ultimately, new findings on lingering research questions were presented, new collaborations among alcohol SBI researchers were formed, and junior SBI researchers found mentoring opportunities as well as an outlet for their work. The conference was funded in part by grants from

the National Institute on Alcohol Abuse and Alcoholism (NIAAA) and the National Institute on Drug Abuse (NIDA). This thematic series features invited papers from selected conference presentations as well as abstracts presented at the meeting. It is our hope that sharing this information will improve the evidence-based identification and treatment of unhealthy alcohol and other drug use. Future papers may be added to the series from subsequent INEBRIA conferences and other sources, since research on SBI seems unlikely to solve all relevant questions for some time to come. In addition, SBI appears

to be key to addressing unhealthy alcohol and other drug use in many settings. Founded in 2004 at the conclusion of a World Health Organization study, INEBRIA aims to provide global leadership to researchers and practitioners interested in the potential of SBI to reduce alcohol-related harm. That goal has since been expanded to include SBI for other psychoactive substances, although the main emphasis continues to be on reducing alcohol-related problems. Proceeds from the sale of this book go to support on elderly disabled person.

Mental Health Policy And

Practice Across Europe -

Knapp, Martin 2006-12-01

This book maps the current state of policy, service provision and funding for mental health care across Europe, taking into account the differing historical contexts that have shaped both the development and the delivery of services.

Polyelectrolytes - Visakh P. M.

2014-09-03

This book offers a valuable reference source to graduate and post graduate students, engineering students, research scholars polymer engineers from industry. The book provides the reader with current developments of theoretical models describing the

thermodynamics polyelectrolytes as well as experimental findings. A particular emphasis is put on the rheological description of polyelectrolyte solutions and hydrogels.

ACI Advanced Monitoring and Troubleshooting - Sadiq Memon
2020-05-30

ACI Advanced Monitoring and Troubleshooting provides a solid conceptual foundation and in-depth technical knowledge for monitoring and troubleshooting virtually any problem encountered during testing, deployment, or operation of Cisco Application Centric Infrastructure (ACI) infrastructure. Authored by leading ACI support experts at

Cisco, it covers all you'll need to keep your ACI deployment working optimally. Coverage includes: Core ACI concepts and components, including Nexus 9000 Series platforms, APIC controllers, and protocols In-depth insight into ACI's policy model ACI fabric design options: single and multiple data centers, stretched vs. multiple fabrics, and multi-pod/multi-site Automation, orchestration, and the cloud in ACI environments ACI topology and hardware/software specifications End host and network connectivity VMM integration Network management configuration, including SNMP, AAA, and SPAN Monitoring ACI

fabrics and health Getting immediate results through the NX-OS command line interface Troubleshooting use cases: fabric discovery, APIC, management access, contracts, external connectivity, leaf/spine connectivity, end-host connectivity, VMM problems, ACI multi-pod/multi-site problems, and more

PeopleSoft for the Oracle DBA - David Kurtz 2012-03-02

PeopleSoft for the Oracle DBA, Second Edition stands on the boundary between the PeopleSoft application and the Oracle database. This new edition of David Kurtz's book is freshly revised, showing how to tame the beast and manage

Oracle successfully in a PeopleSoft environment. You'll learn about PeopleSoft's Internet architecture and its use of Oracle's Tuxedo Application Server. You'll find full coverage of key database issues such as indexing, connectivity, and tablespace usage as they apply to PeopleSoft. Kurtz also provides some of the best advice and information to be found anywhere on managing and troubleshooting performance issues in a PeopleSoft environment. The solid coverage of performance troubleshooting is enough by itself to make PeopleSoft for the Oracle DBA a must-have book for any Oracle Database

administrator working in support of a PeopleSoft environment.

Explains PeopleSoft's technical architecture as it relates to

Oracle Database Demonstrates how to instrument and measure the performance of PeopleSoft

Provides techniques to troubleshoot and resolve performance problems

Global ocean science report - UNESCO 2017-07-04

The Global Ocean Science Report (GOSR) assesses for the first time the status and trends in ocean science capacity around the world. The report offers a global record of how, where, and by whom ocean science is conducted: generating knowledge, helping

to protect ocean health, and empowering society to support sustainable ocean management in the framework of the United Nations 2030 Agenda. The GOSR identifies and quantifies the key elements of ocean science at the national, regional and global scales, including workforce, infrastructure and publications. It is the first collective attempt to systematically highlight opportunities as well as capacity gaps to advance international collaboration in ocean science and technology. This report is a resource for policy-makers, academics and other stakeholders seeking to harness the potential of ocean

science to address global challenges. A comprehensive view of ocean science capacities at the national and global levels takes us closer to developing the global ocean science knowledge needed to ensure a healthy, sustainable ocean.

The Fabrica of Andreas Vesalius

- Dániel Margócsy 2018-05-23

The current work provides bibliographic information, a worldwide census, ownership records, and a description of the annotations in all the copies of Vesalius' Fabrica. It reconstructs the travels of the Fabrica across the globe since 1543 and its annotated readership.

Metaheuristics - El-Ghazali

Talbi 2009-05-27

A unified view of metaheuristics

This book provides a complete background on metaheuristics

and shows readers how to design and implement efficient

algorithms to solve complex optimization problems across a

diverse range of applications, from networking and

bioinformatics to engineering design, routing, and scheduling.

It presents the main design questions for all families of metaheuristics and clearly

illustrates how to implement the algorithms under a software

framework to reuse both the design and code. Throughout

the book, the key search

components of metaheuristics are considered as a toolbox for: Designing efficient metaheuristics (e.g. local search, tabu search, simulated annealing, evolutionary algorithms, particle swarm optimization, scatter search, ant colonies, bee colonies, artificial immune systems) for optimization problems

Designing efficient metaheuristics for multi-objective optimization problems

Designing hybrid, parallel, and distributed metaheuristics

Implementing metaheuristics on sequential and parallel machines Using many case studies and treating design and implementation independently,

this book gives readers the skills necessary to solve large-scale optimization problems quickly and efficiently. It is a valuable reference for practicing engineers and researchers from diverse areas dealing with optimization or machine learning; and graduate students in computer science, operations research, control, engineering, business and management, and applied mathematics.

International Business

Negotiations - Pervez N. Ghauri
2003-09-30

Provides an understanding about the impact of culture and communication on international business negotiations. This work explores the problems

faced by Western managers while doing business abroad and offers guidelines for international business negotiations. It also focuses on an important aspect of international business: negotiations.

Neurology and Psychiatry of Women - Mary Angela O'Neal

2019-02-14

This comprehensive resource covers a range of women's health issues and their intersection with neurologic and psychiatric disease. Chapters feature high quality, integrated information based on leading-edge research on gender-specific care and are grouped by reproductive years,

pregnancy and health, and aging. Emerging science regarding sex differences in neurological and psychiatric illnesses, including anxiety, reproductive health, conversion disorders, depression and ethical issues in pregnancy, stroke risk factors, and successful aging strategies are covered along with clinical application of this knowledge to the delivery of care. In addition, in those medical problems that afflict both men and women, authors will point out the different risks, prevalence, presentations, and responses to treatments or outcomes in women. Written by renowned experts in the field, this

textbook will thoroughly address the educational needs of physicians, nurse practitioners, and physician assistants in the areas of neurology, psychiatry, internal medicine, and obstetrics and expanding their understanding of concerns unique to female patients.

Comorbidity of Mental and Physical Disorders - N.

Sartorius 2014-12-01

Risk Budgeting - Neil D.

Pearson 2011-08-31

Covers the hottest topic in investment for multitrillion pension market and institutional investors Institutional investors and fund managers understand they must take risks to generate

superior investment returns, but the question is how much. Enter the concept of risk budgeting, using quantitative risks measurements, including VaR, to solve the problem. VaR, or value at risk, is a concept first introduced by bank dealers to establish parameters for their market short-term risk exposure. This book introduces VaR, extreme VaR, and stress-testing risk measurement techniques to major institutional investors, and shows them how they can implement formal risk budgeting to more efficiently manage their investment portfolios. Risk Budgeting is the most sophisticated and advanced read on the subject

out there in the market.

Molecular Modeling in Drug

Design - Rebecca Wade

2019-03-26

Since the first attempts at structure-based drug design about four decades ago, molecular modelling techniques for drug design have developed enormously, along with the increasing computational power and structural and biological information of active compounds and potential target molecules. Nowadays, molecular modeling can be considered to be an integral component of the modern drug discovery and development toolbox. Nevertheless, there are still many methodological

challenges to be overcome in the application of molecular modeling approaches to drug discovery. The eight original research and five review articles collected in this book provide a snapshot of the state-of-the-art of molecular modeling in drug design, illustrating recent advances and critically discussing important challenges. The topics covered include virtual screening and pharmacophore modelling, chemoinformatic applications of artificial intelligence and machine learning, molecular dynamics simulation and enhanced sampling to investigate contributions of molecular flexibility to

drug–receptor interactions, the modeling of drug–receptor solvation, hydrogen bonding and polarization, and drug design against protein–protein interfaces and membrane protein receptors.

Autophagy - Daniel Klionsky
2003-12-15

Starting in the early 1970s, a type of programmed cell death

called apoptosis began to receive attention. Over the next three decades, research in this area continued at an accelerated rate. In the early 1990s, a second type of programmed cell death, autophagy, came into focus. Autophagy has been studied in mammalian cells for many years. The recen
