Double Yoke - Buchi Emecheta 2018

"Set on the campus of a Nigerian university, Double Yoke tells the story of Nko and Ete Kamba, a young undergraduate couple that must confront the conflicting demands of tradition and modernity. Nko pursues an education despite the resistance and rigid attitudes of those, like her husband, who feel that a woman's identity is defined through marriage. Her desire for an education severely tests her husband's love for her, and they both struggle with choices that are neither clear-cut nor perfect. Nko must further contend with unscrupulous professors who attempt to take advantage of her tenuous role as a woman in a male-dominated environment. In Double Yoke, Emecheta candidly portrays the status of women in emerging African nations and captures the urgency and complexity of the dilemmas they face."--Back cover.

The Fall of the University of Cape Town - David Benatar 2021-11-09

Destructive forces have been eroding the University of Cape Town, Africa's leading university. This book tells the sad, true tale of what has been transpiring. It is a saga of lunacy, criminality, pandering, and identity politics. The mad and the bad - the deranged, deluded, the depraved - have been granted endless latitude in bullying and abusing others. The decline began in 2015 with the Rhodes Must Fall protest that resulted in the offending statue's removal within a month, and which spawned similar protests abroad. Emboldened by their local success, the protestors issued new and ever-increasing demands later that year and then again in 2016 and 2017. Their methods also became criminal - including intimidation, assault, and arson. The university leadership capitulated to this behaviour, and this fostered a broader and now pervasive toxic environment within the institution. These developments offer important lessons for universities around the world that are yielding to the forces of a faux "progressivism".

Examining the Phenomenon of "Teaching Out-of-field" - Linda Hobbs 2019-01-01

This book identifies and surveys the major themes around 'out-of-field teaching', that is, teaching subjects or year levels without a specialization. This has been an issue in many countries for some time, yet until recently there has been little formal research and poor policy responses to related problems. This book arises out of collaborations between members of an international group of researchers and practitioners from Australia, Germany, Ireland, England, South Africa, Indonesia and the United States. Cross-national comparisons of ideas through case studies, descriptions of practice and research data interrogates the experiences, practices, and contexts relating to out-of-field teaching. In particular, the book considers the phenomenon of out-of-field teaching in relation to national policy contexts, local school leadership practices, professional development. The book represents an essential contribution on a highly topical issue that has implications for quality and equitable education around the globe.

The Dream House - Craig Higginson 2016-04

A farmhouse is being reproduced a dozen times, with slight variations, throughout a valley. Three small graves have been dug in the front garden, the middle one lying empty. A woman in a wheelchair sorts through boxes while her husband clambers around the old demolished buildings, wondering where the animals have

gone. A young woman - called 'the barren one' behind her back - dreams of love, while an ageing headmaster contemplates the end of his life. At the entrance to the long dirt driveway, a car appears and pauses - pointed towards the house like a silver bullet, ticking with heat. So begins *The Dream House*, Craig Higginson's riveting and unforgettable novel set in the Midlands of KwaZulu-Natal. Written with dark wit, a stark poetic style and extraordinary tenderness, this is a story about the state of a nation and a deep meditation on memory, ageing, meaning, family, love and loss. This updated 2016 edition contains new content, with Craig Higginson exploring the background to *The Dream House*, his varied experiences in a farmhouse in KwaZulu-Natal and the subsequent and poignant motivations for this moving novel.

Leonardo Pisano (Fibonacci) - L. E. Sigler 2014-06-28

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.
