*Confronting South Korea's Next Crisis* - Jaejoon Woo 2022

South Korea's economic miracle is a well-known story. However, today Korea is confronting a new set of internal and external risks, which may foreshadow the next crisis. The Korean economy has been struggling with the faltering growth momentum and the rise of unprecedented socio-

economic problems over recent years well before the pandemic crisis. After abrupt downshifts to markedly slower growth in the early 2000s, economic growth has continued to decelerate. Koreans are grappling with slow income growth, all time-high household debt, high youth unemployment, inequality, and social polarization. Politics is in disarray and is incapable of directing social discourse for the common good. Rapid population aging along with the world's lowest fertility rates stokes fears of Japanification. Simultaneously, disruptive technologies and fast-changing business environment such as the rise of China clash with a range of long-standing structural problems. The contemporary challenges are radically different from those seen in the

early stages of industrialization. There are multiple risks that threaten to self-perpetuate low or stagnant growth over the next decade or so, if not an outright financial crisis. Motivated by these latest developments, this book seeks to provide a timely and in-depth analysis of key current issues and foreseeable challenges of the economy, with a provocative reassessment of its future. Based on extensive new empirical works, it examines the underlying causes of the socio-economic problems. In a constructive spirit, it puts in perspective what would constitute critical elements of ideal policy solutions and the direction of the future government's role.

## **The Inconvenient**

**Generation** - Minhua Ling  
2019-10-22

After three decades of massive rural-to-urban migration in China, a burgeoning population of over 35 million second-generation migrants living in its cities poses a challenge to socialist modes of population management and urban governance. In *The Inconvenient Generation*, Minhua Ling offers the first longitudinal study of these migrant youth from middle school to the labor market in the years after the Shanghai municipal government partially opened its public school system to them. Drawing on multi-sited ethnographic data, Ling follows the trajectories of dozens of children coming of age at a time of competing economic and social imperatives, and its everyday

ramifications on their sense of identity, educational outcomes, and citizenship claims. Under policies and practices of segmented inclusion, they are inevitably funneled through the school system toward a life of manual labor.

Illuminating the aspirations and strategies of these young men and women, Ling captures their experiences against the backdrop of a reemergent global Shanghai.

Barton 2015-05-15

The hits keep coming for the American legal profession. Law schools are churning out too many graduates, depressing wages, and constricting the hiring market. Big Law firms are crumbling, as the relentless pursuit of profits corrodes their core business model.

Modern technology can now handle routine legal tasks like drafting incorporation papers and wills, reducing the need to hire lawyers; tort reform and other regulations on litigation have had the same effect. As in all areas of today's economy, there are some big winners; the rest struggle to find work, or decide to leave the field altogether, which leaves fewer options for consumers who cannot afford to pay for Big Law. It would be easy to look at these enormous challenges and see only a bleak future, but Ben Barton instead sees cause for optimism. Taking the long view, from the legal Wild West of the mid-nineteenth century to the post-lawyer bubble society of the future, he offers a close analysis of the legal market to predict how lawyerly creativity

and entrepreneurialism can save the profession. In every seemingly negative development, there is an upside. The trend towards depressed wages and computerized legal work is good for middle class consumers who have not been able to afford a lawyer for years. The surfeit of law school students will correct itself as the law becomes a less attractive and lucrative profession. As Big Law shrinks, so will the pernicious influence of billable hours, which incentivize lawyers to spend as long as possible on every task, rather than seeking efficiency and economy. Lawyers will devote their time to work that is much more challenging and meaningful. None of this will happen without serious upheaval, but all of it will ultimately restore the health of the faltering

profession. A unique contribution to our understanding of the legal crisis, the unconventional wisdom of Glass Half Full gives cause for hope in what appears to be a hopeless situation.

**Accounting Thought and Practice Reform** - Frank Clarke 2018-10-09

Raymond John Chambers was born just over a century ago on 16 November 1917. It is more than fifty years since his first classic, *Accounting, Evaluation and Economic Behavior*, was published, more than forty since *Securities and Obscurities: Reform of the Law of Company Accounts* (republished in 1980 as *Accounting in Disarray*) and over twenty since the unique *An Accounting Thesaurus: Five Hundred Years of Accounting*. They are drawn upon extensively in this biography of Chambers' intellectual contributions, as are other of his published works. Importantly, we also analyze archival correspondence not previously examined.

While Chambers provided several bibliographical summaries of his work, without the benefits of reviewing and interspersing the text with correspondence materials from the Chambers Archive this study would lack an appreciation of the impact of his early childhood, and nuances related to his practical (including numerous consultancies) and academic experiences. The 'semi-biographical narrative' codifies article and editorial length exercises by the authors drawing on parts of the archive related to theory development, measurement and communication. Other parts are also examined. This allows us to respond to those critics who claim his reforms were naive. They further reveal a man of theory and practice, whose theoretical ideas were

solidly grounded on observations from his myriad interests and experiences. Many of his practical experiences have not been examined previously. This approach and the first book-length biography differentiates this work from earlier analyses of Chambers' contribution to the accounting literature. We provide evidence to support the continued push for the reforms he proposed to accepted accounting thought and practice to ensure accounting is the serviceable technology so admired by Pacioli, Da Vinci and many other Renaissance pioneers. It will be of interest to researchers, educators, practitioners and regulators alike.
