**Content Area Reading and Literacy** - Donna E. Alvermann 2012

"Students and teachers have long appreciated the scope of topics and examples, the research-based information, and the accessible writing style presented by these three trusted authorities in the field of adolescent literacy. This seventh edition includes up-to-date information to help teachers address the literacy needs of English learners in their classrooms and today's culturally diverse student population, while also addressing new frameworks for reading and writing instruction, including a sociocultural perspective on teaching and learning and insights from the New Literacies. As in previous editions, this seventh edition is based on the assumption that, rather than just a mere add-on, "content literacy is integral to every discipline and special subject area, to the teachable moments that make less stellar ones tolerable, and, most important, to each student's motivation and engagement with learning." The ideas the authors present are backed by research, tested in real classrooms, and designed to help teachers apply what is useful to their own particular disciplines. The ideas they share-both new and from "--Publisher.

On Results of the Reform in Ethiopia's Language and Education Policies - Catherine Griefenow-Mewis 2009

This publication reflects the results of the Ethiopian education reform as well as the exceptional efforts that multiethnic Ethiopia undertakes in order to cope with the challenges arising from the population explosion. More than 55 per cent of the 77 million Ethiopians are under the age of 18 years. The great social and political changes started in Ethiopia at the beginning of the 1990s have resulted in the substitution of the educational system based on Amharic and English by one which uses a multilingual approach. According to the Ministry of Education 22 out of the 84 languages spoken in Ethiopia are now used as media of instruction in primary schools. The book presents the lectures delivered at the workshop "On the Results of the Reform in Ethiopia's Language and Education Policy" held at Addis Ababa University in April 2006 by Ethiopian education experts and a German research team. Their contribution has facilitated a subsumption into the historical context and has given insight into the analyses of the use of 8 Ethiopian languages in primary schools in different regions of the country.

Empowering Adolescent Girls in Developing Countries - Caroline Harper 2018-02-13

Adolescence is a pivotal time in a girl's life. The development of educational, physical, psychosocial, familial, political and economic capabilities enable girls to reach their full potential and contribute to the wellbeing of their families and society. However, progress is still significantly constrained by discriminatory gender norms and the related attitudes and practices which restrict girls' horizons, restrain their ambition and, if unfettered, allow exploitation and abuse. *Empowering Adolescent Girls in Developing Countries* explores the detrimental impact of discriminatory gender norms on adolescent girls' lives across very different contexts. Grounded in four years of in-depth research in Ethiopia, Nepal, Uganda and Viet Nam, the book adopts a holistic approach, recognising the inter-related nature of capabilities and the importance of local context. By exploring the theory of gendered norm change, contextualising and examining socialisation processes, the book identifies the patriarchal vested interests in power, authority and moral privilege, which combine in attempts to restrict and control girls' lives. Throughout the book, *Empowering Adolescent Girls in Developing Countries* demonstrates how efforts to develop more egalitarian gender norms can enable disadvantaged adolescent girls to change the course of their lives and contribute to societal change. Accessible and informative, the book is perfect for policy makers, think tanks, NGOs, activists, academics and students of gender and development studies.

**Atlas of the Ethiopian Rural Economy** - Tadesse, Mulugeta 2006-01-01

"One important impediment to improved policies and investments for poor and rural people in Africa has been a lack of data on actual conditions. To begin to help fill this data gap, the International Food Policy Research Institute (IFPRI) worked closely with Ethiopia's Central Statistical Agency to produce the Atlas of the Ethiopian Rural Economy. This Atlas gives a comprehensive view of rural Ethiopia in the areas of production, infrastructure, markets, natural resources, agroclimate, social indicators, institutions, and demographics. By giving a full and multilayered picture of conditions in rural Ethiopia, these maps should facilitate the design of interventions that can contribute to a path of sustained growth for the Ethiopian economy. They should also help policymakers and development practitioners target interventions to the people and communities who need them most." -- from Foreword by Joachim von Braun

**Getting Textbooks to Every Child in Sub-Saharan Africa** - Birger Fredriksen 2015-05-22

Textbooks play a key role in enhancing the quality of learning, especially in the context of low-income Sub-Saharan African (SSA) countries characterized by large class-size, poorly motivated and inadequately trained teachers, and short effective school years. There are also high rates of illiteracy among parents and few reading materials at home for the student to bank on. Despite extensive investments by governments, the World Bank and other development partners, the majority of students in primary and secondary schools in SSA still lack the benefit of access to textbooks and the key reason for this shortage is affordability: textbooks are generally much more costly in SSA than in other developing regions. The need to increase access to key learning resources is of particular urgency because most African countries experience low learning outcomes which in part contributes to a high drop-out rate. Only two-thirds of those who enter school reach the final grade and only about half of these master basic numeracy and literacy skills. And although quality improvement depends on many factors inside and outside the school, there is wide agreement that availability of textbooks is both an indispensable and a cost-effective way of improving the quality of the learning process. A recent World Bank study examined the actual costs of textbooks, the scope for cost reduction, the portion of a national budget countries allocate to teaching and learning materials (TLMs) and hurdles in the way of making textbooks available to student. Some interesting findings from the study - - The availability of affordable textbooks to all students could be dramatically improved by devoting an estimated 3 to 4 percent of the primary education budget and 6 to 7 percent of the secondary education budget - The production process †“ methods, copyright, length of print runs, effective procurement practices †“ rather than the production costs should be the target of cost saving strategies - The increased integration of ICTs into education in SSA can provide important opportunities for promoting availability of electronic TLMs but electronic TLMs are not a substitute for printed TLMs including textbooks
