Open-Economy Macroeconomics - Helmut Frisch 2016-07-27

The integration of market economies is one of the most remarkable features of international economics, which has important implications for macroeconomic performance in open economies. Equally important is the declining relevance of the real versus the monetary theory dichotomy. These papers focus on those aspects of monetary policy which relate to credibility and non-neutrality; the domestic adjustment to foreign shocks; the interdependence of open economies and their strategic interactions. An important section is also devoted to the innovative modelling of exchange rate dynamics.

Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

Sustainable Use and Management of Natural Resources - European Environment Agency 2005

This reports focuses on a handful of natural resources: fisheries, forestry, water, fossil fuels, metals and construction minerals, and land use. It examines the driving forces of resource consumption: population and economic growth; and the pattern of development, covering technological level, economic structure and the pattern of production and consumption. European patterns of resource use are described, in both renewable and non-renewable resources. The policy responses are outlined, including the environmental impact of the important common agricultural policy, the common fisheries policy, regional development and transport and energy policies. There is a need for more policy integration to develop a coherent and efficient policy for ensuring a more sustainable use of resources. A final section on outstanding questions illustrates the problem of differing priorities amongst the various stakeholders, and presents some of the important and controversial issues which have emerged in the debate in recent years.

Developing Core Literacy Proficiencies, Grade 12 - Odell Education 2016-09-15
The Developing Core Literacy Proficiencies program is an integrated set of English Language Arts/Literacy units spanning grades 6-12 that provide student-centered instruction on a set of literacy proficiencies at the heart of the Common Core State Standards (CCSS). Reading Closely for Textual Details Making Evidence-Based Claims Making Evidence-Based Claims about Literary Technique (Grades 9-12) Researching to Deepen Understanding Building Evidence-Based Arguments The program approaches literacy through the development of knowledge, literacy skills, and academic habits. Throughout the activities, students develop their literacy along these three paths in an integrated, engaging, and empowering way. Knowledge: The texts and topics students encounter in the program have been carefully selected to expose them to rich and varied ideas and perspectives of cultural significance. These texts not only equip students with key ideas for participating knowledgeably in the important discussions of our time, but also contain the complexity of expression necessary for developing college- and career-ready literacy skills. Literacy Skills: The program articulates and targets instruction and assessment on twenty CCSS-aligned literacy skills ranging from “making inferences” to “reflecting critically.” Students focus on this set of twenty skills throughout the year and program, continually applying them in new and more sophisticated ways. Academic Habits: The program articulates twelve academic habits for students to develop, apply, and extend as they progress through the sequence of instruction. Instructional notes allow teachers to introduce and discuss academic habits such as “preparing” and “completing tasks” that are essential to students’ success in the classroom. The program materials include a comprehensive set of instructional sequences, teacher notes, handouts, assessments, rubrics, and graphic organizers designed to support students with a diversity of educational experiences and needs. The integrated assessment system, centered around the literacy skills and academic habits, allows for the coherent evaluation of student literacy development over the course of the year and vertically across all grade levels.
