My Life with Jacqueline Kennedy - Mary Gallagher 2014-04-05

Few books in publishing history created such excitement in advance of publication as My Life with Jacqueline Kennedy. A small portion of the book, appearing in serial form, produced a wave of press speculation throughout the world and whetted the anticipation of readers everywhere for the whole story. And only by reading the complete book can the complexities of the former Jacqueline Kennedy's personality and life be fully understood. This book reveals Jacqueline Kennedy as a real person -- as a wife, as a mother, as a seeker of perfection in art and life. And, it describes her brilliant refurbishing of The White House, where Mary worked closely with her

in the Family Quarters. For the light it sheds on crucial years in American history and on Jacqueline Kennedy, this book is unique. It takes us back to Camelot and shows the real woman beneath the goddess-figure the world's idolatry made her. Nearly a half-century has passed since the original publication of *MyLife with Jacqueline Kennedy* in 1969; therefore, its reissuance at this time is deemed appropriate for the benefit of all future generations in their overall understanding of this historical, interesting Kennedy Era.

Make Cakes Not War - Judy Horacek 2007-09

Your concern about global warming has been placed in a queue and will be answered by the first available government that gives a damn . . ." -Judy Horacek * Within the frame of a single panel, cartoonist Judy Horacek explores the tiny tragedies, daily miracles, and bewildering absurdities of our contemporary existence. More About Make Cakes Not War Judy Horacek tackles themes of female empowerment, environmental responsibility, and social justice, along with dishwashing and talking animals, in her stateside debut. From pertinent and profound to silly and surreal, *Make Cakes Not War* is filled with witty, instantly recognizable reflections of our own anxieties, delusions, excesses, and experiences. Horacek forces us to confront our realities, ranging from the perfect tropical sunset spoiled by the lack of decent mobile phone reception to a Gandhi-quoting panel that asks,

"What difference does it make to the dead, the orphans, and the homeless, whether the mad destruction is wrought under the name of totalitarianism or the holy name of liberty or democracy?" Author's web site:

The Sustainability Mindset Principles - Isabel Rimanoczy 2020-11-30

As we increase our awareness of the planetary challenges and how they intersect with the discipline or profession we choose to focus on, we have put our attention on the external forces and impacts. What remains untouched however is the set of beliefs, values, assumptions, mental processes, and paradigms that we hold and share: our mindset. But how do we change a mindset? This book is the first to introduce the 12 Principles for a Sustainability Mindset, presenting educators with a framework that makes it easy to include them into teaching plans and lessons of any discipline. Written in a very clear and practical way, the book provides examples, checklists, tips, and tools for professionals and educators. It transforms the development of a much-needed mindset for sustainability into an accessible, fun and intuitive task. The book is written with educators from a variety of disciplines in mind, including but not limited to management educators, coaches, and trainers. Consumer Preferences and Acceptance of Food Products - Derek V. Byrne 2020-12-01

The acceptance and preference of the sensory properties of foods are among the most important criteria determining food choice. Sensory perception and our response to food products, and finally food choice itself, are affected by a myriad of intrinsic and extrinsic factors. The pressing question is, how do these factors specifically affect our acceptance and preference for foods, both in and of themselves, and in combination in various contexts, both fundamental and applied? In addition, which factors overall play the largest role in how we perceive and behave towards food in daily life? Finally, how can these factors be utilized to affect our preferences and final acceptance of real food and food products from industrial production and beyond for healthier eating? A closer look at trends in research showcasing the influence that these factors and our senses have on our perception and affective response to food products and our food choices is timely. Thus, in this Special Issue collection “Consumer Preferences and Acceptance of Food Products”,

we bring together articles which encompass the wide scope of multidisciplinary research in the space related to the determination of key factors involved linked to fundamental interactions, cross-modal effects in different contexts and eating scenarios, as well as studies that utilize unique study design approaches and methodologies.

The New Division of Labor - Frank Levy

2012-11-26

As the current recession ends, many workers will not be returning to the jobs they once held--those jobs are gone. In *The New Division of Labor*, Frank Levy and Richard Murnane show how computers are changing the employment landscape and how the right kinds of education can ease the transition to the new job market.

The book tells stories of people at work--a high-end financial advisor, a customer service

representative, a pair of successful chefs, a cardiologist, an automotive mechanic, the author Victor Hugo, floor traders in a London financial exchange. The authors merge these stories with insights from cognitive science, computer science, and economics to show how computers are enhancing productivity in many jobs even as they eliminate other jobs--both directly and by sending work offshore. At greatest risk are jobs that can be expressed in programmable rules--blue collar, clerical, and similar work that requires moderate skills and used to pay middle-class wages. The loss of these jobs leaves a growing division between those who can and cannot earn a good living in the computerized economy. Left unchecked, the division threatens the nation's democratic institutions. The nation's challenge is to recognize this division and to prepare the population for the high-wage/high-skilled jobs that are rapidly growing in number--jobs involving extensive problem solving and interpersonal communication. Using detailed examples--a second grade classroom, an IBM managerial training program, Cisco Networking Academies--the authors describe how these skills can be taught and how our adjustment to the computerized workplace can begin in earnest.

Tacky - Rax King 2021-11-02

An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column "Store-Bought Is Fine" Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to "good" taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue,

vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in "You Wanna Be On Top," Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with clarity, heartfelt honesty, and Rax King's trademark humor.
