Disciple IV - Abingdon Press 2005-05

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

B Is for Bad Cinema - Claire Perkins 2014-03-01

Considers films that lurk on the boundaries of acceptability in taste, style, and politics. B Is for Bad Cinema continues and extends, but does not limit itself to, the trends in film scholarship that have

made cult and exploitation films and other "low" genres increasingly acceptable objects for critical analysis. Springing from discussions of taste and value in film, these original essays mark out the broad contours of "bad" - that is, aesthetically, morally, or commercially disreputable - cinema. While some of the essays share a kinship with recent discussions of B movies and cult films, they do not describe a single aesthetic category or represent a single methodology or critical agenda, but variously approach bad cinema in terms of aesthetics, politics, and cultural value. The volume covers a range of issues, from the aesthetic and industrial mechanics of low-budget production through the terrain of audience responses and cinematic affect, and on to the broader moral and ethical implications of the material. As a result, B Is for Bad Cinema takes an interest in a variety of film examples - overblown Hollywood blockbusters, faux pornographic works, and European art house films - to consider those that lurk on the boundaries of acceptability.

Optimization for Machine Learning - Suvrit Sra 2012

An up-to-date account of the interplay between optimization and machine learning, accessible to students and researchers in both communities. The interplay between optimization and machine learning is one of the most important developments in modern computational science. Optimization formulations and methods are proving to be vital in designing algorithms to extract essential knowledge from huge volumes of data. Machine learning, however, is not simply a consumer of optimization technology but a rapidly evolving field that is itself generating new optimization ideas. This book captures the state of the art of the interaction between optimization and machine learning in a way that is accessible to researchers in both fields. Optimization approaches have enjoyed prominence in machine learning because of their wide applicability and attractive theoretical properties. The increasing complexity, size, and variety of today's machine learning models call for the reassessment of existing assumptions. This book starts the process of reassessment. It describes the resurgence in novel contexts of established frameworks such as first-order methods, stochastic approximations, convex relaxations, interior-point methods, and proximal methods. It also devotes attention to newer themes such as regularized optimization, robust optimization, gradient and subgradient methods, splitting techniques, and second-order methods. Many of these techniques draw inspiration from other fields, including operations research, theoretical computer science, and subfields of optimization. The book will enrich the ongoing cross-fertilization between the machine learning community and these other fields, and within the broader optimization community.

Optimum-Path Forest - Alexandre Xavier Falcao 2022-01-17

Optimum-Path Forest: Theory, Algorithms, and Applications was first published in 2008 in its supervised and unsupervised versions with applications in medicine and image classification. Since then, it has expanded to a variety of other applications such as remote sensing, electrical

and petroleum engineering, and biology. In recent years, multi-label and semi-supervised versions were also developed to handle video classification problems. The book presents the principles, algorithms and applications of Optimum-Path Forest, giving the theory and state-of-the-art as well as insights into future directions. Presents the first book on Optimum-path Forest Shows how it can be used with Deep Learning Gives a wide range of applications Includes the methods, underlying theory and applications of Optimum-Path Forest (OPF)

The Omega Prize - S. L. Millward 2010

This is a story which will make your heart sing - a story for all the family to read together. Young Judy discovers an unexpected package in her grandfather's old study. She has never met her grandfather (Poppy) as he died before she was born, but Judy is the one to unearth the puzzle which Poppy left for his family. To find the treasure which Poppy left, the family must first solve every riddle which he wrote on a beautiful scroll, and carefully wrapped in a a rich purple velvet bag. Unless they solve the puzzles, they won't find the treasure. See if you can solve the puzzles before the family does. What has Poppy left them as an inheritance? Have fun with the story and enjoy the Omega Prize at the end.

The Wish (A Roald Dahl Short Story) - Roald Dahl 2012-09-13

The Wish is a short, sharp, chilling story from Roald Dahl, the master of the shocking tale. In The Wish, Roald Dahl, one of the world's favourite authors, tells a sinister story about the darker side of human nature. Here, an imaginative boy plays a game that quickly gets out of hand . . . The Wish is taken from the short story collection *Someone Like You*, which includes seventeen other devious and shocking stories, featuring the wife who serves a dish that baffles the police; a curious machine that reveals the horrifying truth about plants; the man waiting to be bitten by the venomous snake asleep on his stomach; and others. 'The absolute master of the twist in the tale.' (Observer) This story is also available as a Penguin digital audio download read by the sublime Stephen Mangan. Roald Dahl, the brilliant and worldwide acclaimed author of *Charlie and the Chocolate Factory*, *James and the Giant Peach*, *Matilda*, and many more classics for children, also wrote scores of short stories for adults. These delightfully disturbing tales have often been filmed and were most recently the inspiration for the West End play, *Roald Dahl's Twisted Tales* by Jeremy Dyson. Roald Dahl's stories continue to make readers shiver today.

Aesthetics and the Philosophy of Art - Peter Lamarque 2018-09-13

For over fifty years, philosophers working within the broader remit of analytic philosophy have

developed and refined a substantial body of work in aesthetics and the philosophy of art, curating a core foundation of scholarship which offers rigor and clarity on matters of profound and perennial interest relating to art and all forms of aesthetic appreciation. Now in its second edition and thoroughly revised, *Aesthetics and the Philosophy of Art—The Analytic Tradition: An Anthology* captures this legacy in a comprehensive introduction to the core philosophical questions and conversations in aesthetics. Through 57 key essays selected by leading scholars Peter Lamarque and Stein Haugom Olsen, this anthology collects modern classics as well as new contributions on essential topics such as the identification and ontology of art, interpretation, values of art, art and knowledge, and fiction and the imagination. New to this edition are selections which treat aesthetic experience more widely, including essays on the aesthetics of nature and aesthetics in everyday life. Other carefully-chosen pieces analyze the practice and experience of specific art forms in greater detail, including painting, photography, film, literature, music, and popular art such as comics. This bestselling collection is an essential resource for students and scholars of aesthetics, designed to foster a foundational understanding of both long-standing and contemporary topics in the field.

The Middle Voice - Suzanne Kemmer 1993-01-01

This book approaches the middle voice from the perspective of typology and language universals research. The principal aim is to provide a typologically valid characterization of the category of middle voice in terms of which it can be incorporated in a cognitively-based theory of human language. The term "middle voice" has had a wide range of applications in the linguistic literature of this century. The main thesis in this volume is that there is a coherent, though complex, semantic category of middle voice in human language, which receives grammatical instantiation in many languages. The author claims there is a semantic property crucial to the nature of the middle, which she terms "relative elaboration of events", that serves as a parameter along which the reflexive and the middle can be situated as semantic categories intermediate in transitivity between one-participant and two-participant events, and which differentiates reflexive and middle from one another. In this area, most analyses deal with one language and/or are limited to Indo-European languages. This work deals with a subset of middle-marking languages that was chosen so as to observe the highest possible number of different middle systems showing significant independent diachronic development.

Knowledge Graph - Guilin Qi 2022-10-24

This book provides a systematic and comprehensive overview of knowledge graph, covering all aspects including the theoretical foundations, key techniques and methodologies, and various typical applications. Special focus is given to the practical methods for knowledge graph construction and management, especially methods for constructing knowledge graphs from texts and from Encyclopedia, and methods for knowledge fusion and reasoning. It can serve as reference book for researchers and students new to knowledge graph. From this book, the readers will learn how to construct large-scale knowledge graphs from different sources, how to manage multiple knowledge graphs and do reasoning with a knowledge graph. Some basic knowledge on discrete mathematics, probability and statistics, data structure, and databases is required to understand the book content well.
