Metalogicon - J. B. Hall 2013

John of Salisbury has long been celebrated as one of the foremost humanists of the twelfth-century renaissance, an erudite correspondent, legal expert, historian, poet, diplomat and political thinker, and clerk to two successive archbishops of Canterbury, Theobald and Thomas Becket. His *Metalogicon*, ostensibly a defence of the role of logic and of Aristotle's *Organon* in the educational syllabus of the day, makes a powerful argument for an educational system of real practical utility for society, one whose intellectual coherence and rigour should underpin political morality and rational governance. As such, it has been seen to stand alongside the more famous *Policraticus* as an integral part of the intellectual contribution of one of Europe's great political theorists. Based on John's own experiences as a student and a teacher, the treatise offers unique evidence of the educational system of twelfth-century Paris at a critical stage in the early development of the schools, and of the earliest reception of the Aristotelian texts of the 'new logic'. It is also an important contribution to the tradition of pedagogical and educational thought, with its unique attention to teaching methods and its belief in the purpose of education both for the formation of the person and for the good of society. The treatise has been accorded an important place in many modern scholarly debates, including those on the origins of the universities, on medieval philosophy and on medieval humanism. This new translation is based on the edition of J.B. Hall, auxiliata K.S.B. Keats-Rohan, which appeared in *Corpus Christianorum Continuatio Mediaevalis* as *Iohannes Saresberiensis - Metalogicon* (CCCM 98), and so makes available to the student and general reader for the first time a translation of a text of this important work established on modern critical principles. References to the corresponding pages of the *Corpus Christianorum* edition are provided in the margins of this translation. Professor J.B. Hall is Hildred Carlile Professor of Latin Emeritus, University of London. Apart from John of Salisbury, he has published books on the textual criticism of Claudian, Ovid and Statius. Dr Julian P. Haseldine is Senior Lecturer in Medieval History at the University of Hull. He has edited the letters of Peter of Celle and published widely on medieval friendship and friendship networks.

Abbot Suger and Saint-Denis - Paula Lieber Gerson 1986

"Suger, abbot of the French abbey of Saint-Denis, lived from 1081 to 1151. This book of essays about his life and achievements grew out of a symposium sponsored by the International Center of Medieval Art and by Columbia University ... For the symposium, twenty-three medieval scholars from all parts of the world, representing a wide range of humanistic disciplines, were brought together to discuss the varied nature of Suger's activities. Suger has been best known for his contributions as a patron of art and architecture ... As the essays in this volume devoted to Suger's political activities and historical writings demonstrate, he was, in addition to being a brilliantly innovative patron of architecture, an important architect of the French state. Only by

bringing together differing humanistic perspectives on Suger and Saint-Denis has it been possible to achieve, for the first time, a fully rounded appreciation of a man who was, at the same time, a patron of the arts and literature, a politician who adroitly used his ecclesiastical position to enhance the growth and power of the monarchy, and a churchman consistently devoted to the promotion of the cult of Saint-Denis, the patron saint of his abbey and of France"-- From publisher's description.

Assassination Generation - Lieutenant Colonel Dave Grossman 2016-11-15

The author of the 400,000-copy bestseller *On Killing* reveals how violent video games have ushered in a new era of mass homicide--and what we must do about it. Paducah, Kentucky, 1997: a 14-year-old boy shoots eight students in a prayer circle at his school. Littleton, Colorado, 1999: two high school seniors kill a teacher, twelve other students, and then themselves. Utoya, Norway, 2011: a political extremist shoots and kills sixty-nine participants in a youth summer camp. Newtown, Connecticut, 2012: a troubled 20-year-old man kills 20 children and six adults at the elementary school he once attended. What links these and other horrific acts of mass murder? A young person's obsession with video games that teach to kill. Lt. Col. Dave Grossman, who in his perennial bestseller *On Killing* revealed that most of us are not "natural born killers" - and who has spent decades training soldiers, police, and others who keep us secure to overcome the intrinsic human resistance to harming others and to use firearms responsibly when necessary -- turns a laser focus on the threat posed to our society by violent video games. Drawing on crime statistics, cutting-edge social research, and scientific studies of the teenage brain, Col. Grossman shows how video games that depict antisocial, misanthropic, casually savage behavior can warp the mind -- with potentially deadly results. His book will become the focus of a new national conversation about video games and the epidemic of mass murders that they have unleashed.

The Naturalist and His 'beautiful Islands' - David Russell Lawrence 2014-10-28

'I know no place where firm and paternal government would sooner produce beneficial results than in the Solomons ... Here is an object worthy indeed the devotion of one's life'. Charles Morris Woodford devoted his working life to pursuing this dream, becoming the first British Resident Commissioner in 1897 and remaining in office until 1915, establishing the colonial state almost singlehandedly. His career in the Pacific extended beyond the Solomon Islands. He worked briefly for the Western Pacific High Commission in Fiji, was a temporary consul in Samoa, and travelled as a Government Agent on a small labour vessel returning indentured workers to the Gilbert Islands. As an independent naturalist he made three successful expeditions to the islands, and even climbed Mt Popomanaseu, the highest mountain in Guadalcanal. However, his natural history collection of over 20,000 specimens, held by the British Museum of Natural History, has not been comprehensively examined. The British Solomon Islands Protectorate was established in order to control the Pacific Labour Trade and to counter possible expansion by French and German colonialists. It remaining an impoverished, largely neglected protectorate in the Western Pacific whose economic importance was large-scale copra production, with its copra considered the second-worst in the world. This book is a study of Woodford, the man, and what drove his desire to establish a colonial protectorate in the Solomon Islands. In doing so, it also addresses ongoing issues: not so much why the independent state broke down, but how imperfectly it was put together in the first place.

The Rejection of Consequentialism - Samuel Scheffler 1994-08-11

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.
