DIY Outdoor Wood Projects for Beginners - Allan Ford, MD 2020-11-20

Wood has always been mankind's favorite building material, but it has always had one major problem. Because it is an organic material, wood will always rot, whether sooner or later. That's a natural problem, but the modern world has provided an elegant and convenient solution. Nothing quite equals the satisfaction of building a project that adds charm and personality to your yard. If it is a memorable design and built well, even a small planter, trellis, or other feature will be a nice touch that makes your outdoor space more of a pleasure to use. Special details that complement the house or landscape can help to unify your outdoor space. A home-made project tailored to your space can tie it all together, adding your personal signature in a satisfying way. Who knows? Maybe one day your project may become a treasured heirloom. Natural wood (and bamboo, though it is technically a grass) is the ideal material for a modest do-it-yourself project. Whether stained or left alone to turn a weathered gray, your new structure will effortlessly harmonize with leafy plants, colorful flowers, and nearby stone or brick surfaces. You also have the option of painting it a muted tone that barely asserts itself, or with bright colors that proudly announce its presence and make your yard a more whimsical place.

**I Can Do That - Furniture Projects** - Chad Stanton 2018-10-16

What do you do when you need furniture for a specific space or purpose in your home and nothing you find fits the bill? Build your own! This book is

comprised of 20 furniture projects based on the popular I Can Do That method presented in Popular Woodworking's ICDDT video series hosted by Chad Stanton. These projects look good, are well made, yet at the same time achievable for even a beginner with an inexpensive (but decent) set of tools. You'll find clear instructions with complete step-by-step photos, illustrations and cutting lists to help you every step of the way.
