Color Measurement - David L. MacAdam 2013-06-05

Reviews and use of the first edition as the textbook for a senior-division university course indicated the need for a number of corrections and clarifications. Although no new topics have been introduced, the new edition should be more clear and useful. A novelty in the Notes and Sources Appendix should facilitate reference from the notes back to the text. For that purpose, the page number of the text to which each note refers is indicated in square brackets following the serial number of the note. The FMC1 color-difference formula has been substituted everywhere for the Friele-MacAdam formula, including the reference to the sources in Note 52. The FMC1 formula was actually used in the investigations reviewed in Sects. 8.3 and 8.4. The Friele-MacAdam formula given on page 151 of the first edition, which I thought was equivalent to the FMC1, was erroneous and should not be used. The formulas for the geodesic chromaticity diagram,

on p. 153 of the first edition, were based on observations by 14 normal observers (last reference in Note 51). They have been replaced by the formulas based on the observations of PON, for consistency with all other formulas and discussions in the book. Figure 8.29 in the first edition was based on the PON data and on the formulas printed below it in the new edition. Therefore, Fig. 8.29 is unchanged.

Flexible Packaging - Chris Ellison 2018-12-05

Flexible packaging today has one of the highest growth rates across all printing sectors, achieving an annual global growth of close to five percent. Important trends include smaller run lengths, a requirement for multi-versions and variations, personalization and a growing interest in adding in-line value – all undoubted opportunities for narrow- and mid-web label converters (using both flexo and digital technology) to capture a growing portion of the flexibles market. Jobs with the shortest run sizes are in pouches of any kind, as well as in single serve and one-dose packs and sachets. These are key areas where label converters can most readily enter the flexible packaging market. Indeed, narrower and mid-web conventional and digital printing has effectively opened up the market to a whole range of new customers who have never previously had a solution for short-run flexible packaging orders. But it

Tram Windows - 2019-07-06

Different subjects appear in different windows, waves of light pass through each window uniquely and only once per instant of time. Different impressions in light pass through or reflect off the surface of each windows. There are different expressions on people's faces, different gestures or reactions to the fact that they are being photographed, if they are in fact aware that they are being photographed, and different aspects of their awareness. Some subjects appear to be consciously turning away from the camera, others appear completely unaware of the camera's presence, others stare back through the graffitied windows, and others still into the black void of the lens. All subjects whether conscious of it or not, whether consenting or not are providing an impression composed in reflected light, of being, in that instant.

Image Control - Patrick Nathan 2021-08-17

Susan Sontag meets Hanif Abdurraqib in this fascinating exploration of the unexpected connections between how we consume images and the insidious nature of Fascism. Images come at us quickly, often without context. A photograph of Syrian children suffering in the wake of a chemical attack segues into a stranger's pristine Instagram selfie. Before we can react to either, a new meme induces a laugh and a share. While such constant give and take might seem innocent, even entertaining, this barrage of content numbs our ability to examine critically how the world, broken down into images, affects us. Images without context isolate us, turning everything we experience into mere transactions. It is exactly this alienation that leaves us vulnerable to fascism—a reactionary politics that is destroying not only our lives and our nations, but also the planet's very ability to sustain human civilization. Who gets to control the media we consume? Can we intervene, or at least mitigate the influence of constant content? Mixing personal anecdotes with historical and political criticism, *Image Control* explores art, social media, photography, and other visual mediums to understand how our culture and our actions are manipulated, all the while building toward the idea that if fascism emerges as aesthetics, then so too can anti-fascism. Learning how to ethically engage with the world around us is the first line of defense we have against the forces threatening to tear that world apart.

The Soft Edge - Rich Karlgaard 2014-03-24

What Does it Take to Get Ahead Now—And Stay There? High performance has always required shrewd strategy and superb execution. These factors remain critical, especially given today's unprecedented business climate. But Rich Karlgaard—Forbes publisher, entrepreneur, investor, and board director—takes a surprising turn and argues that there is now a third element that's required for competitive advantage. It fosters innovation, it accelerates strategy and execution, and it cannot be copied or bought. It is found in a perhaps surprising place—your company's values. Karlgaard examined a variety of enduring companies and found that they have one thing in common; all have leveraged their deepest values alongside strategy and execution, allowing them to fuel growth as well as weather hard times. Karlgaard shares these stories and identifies the five key variables that make up every organization's "soft edge": Trust: Northwestern Mutual has built a \$25 million dollar revenue juggernaut on trust, the foundation of lasting success. Learn how to create an environment that engenders trust and propels high performance. Smarts: In most technical fields your formal education quickly becomes out of date. How do you keep up? Learn how the Mayo Clinic, Stanford University women's basketball team, and others stay on top by relentlessly pursuing an advantage through smarts. Teamwork: Since collaboration and innovation are a must in the global economy, effective teamwork is vital. Learn how global giant FedEx stays focused and how nimble Nest Labs relies on lean teams with cognitive diversity. Taste: Clever product design and integration are proxies for intelligence because they make customers feel smart. But taste goes further into deep emotional engagement. Specialized Bicycles calls it "the elusive spot between data truth and human truth." How can you consistently make products or services that trigger these emotional touch points? Story: Companies that achieve lasting success have an enduring and emotionally appealing story. What's your company's story? How do you tell it your way? Gain the ability to create a powerful narrative in a world where outsiders often exercise the louder voice.

Australia Reimagined - Hugh Mackay 2018-04-24

'When it comes to our future, misplaced optimism is as dangerous as blind faith. What is needed is the courage to face the way things are, and the wisdom and imagination to work out how to make things better.' Australia's unprecedented run of economic growth has failed to deliver a more stable or harmonious society. Individualism is rampant. Income inequality is growing. Public education is under-resourced. The gender revolution is stalling. We no longer trust our major institutions or our political leaders. We are more socially fragmented, more anxious, more depressed, more overweight, more medicated, deeper in debt and increasingly addicted - whether to our digital devices, drugs, pornography or 'stuff'. Yet esteemed social researcher Hugh Mackay remains optimistic. Twenty-five years ago, he revolutionised Australian social analysis with the publication of *Reinventing Australia*. Now he takes another unflinching look at us and offers some compelling proposals for a more compassionate and socially cohesive Australia. You might not agree with everything he suggests, but you'll find it hard to get some of his ideas out of your head. Argued with intelligence and passion, this book is essential reading for everyone who loves Australia enough to want to make it a better place for us all.

Environmental Performance and Sustainable Labeling - Michael Charles Fairley 2014

The Romance of Letterpress - James Cryer, IV 2021-04-15

This is the story of Wal Cryer, a freshly-minted letterpress printer from Sydney. In November 1913, at the tender age of 21, he packed his bags and jumped on board a steamer to try his luck working his way across America as a printer. It is a story about what society looked like at that time: that uniquely fragile era just before the Great War, which hovered tentatively on the brink of modernity, when, if you ventured out onto the road you could be trampled to death by a horse, or run over by a car. It is also a story with a romantic undercurrent, as he left behind a fiancé in Sydney, to whom he sent a veritable treasure-trove of postcards as he wended his way across the Mid-west, facing both unemployment queues and tough bosses - and getting work in Chicago before heading to New York and then via several ships back to Australia when the war broke out. (There is also the mysterious "L" which we will touch upon, ever so discreetly.) It is, therefore, the story of a collision of two cultures (America's and Australia's), which could not have been more different and which still are today! Finally, it is the story of how printing at that time

was beginning to penetrate into the nooks and crannies of people's everyday lives, in ways both amusing and pervasive, that we now take for granted today. None of this would have been brought to light, however, if it wasn't for a remarkable discovery - not only the diary itself, tucked away in a long-forgotten cupboard, but also a much-battered album bulging with post-cards. This then is a look down a time-tunnel, 1914 under a microscope! There is, however, yet another deeper theme underpinning all this - what is the nature of the relationship we have with our grandparents?
