Teaching by Principles - H. Douglas Brown 1994

ESL/EFL teachers and trainees will welcome this methodology text, which considers all practical classroom techniques and activities in terms of solid foundation stones of research on second language acquisition. -- Readers develop an overall approach to language teaching from which their classroom practices can emerge. -- The text has user-friendly, readable prose, interactive end-of-chapter exercises for discussion and action, and end-of-chapter recommendations for further reading.

Learning Online with Games, Simulations, and Virtual Worlds - Clark Aldrich 2009-10-01

Jossey-Bass Guides to Online Teaching and Learning Learning Online with Games, Simulations, and Virtual Worlds Strategies for Online Instruction Clark Aldrich Learning Online with Games, Simulations, and Virtual Worlds The infusion of games, simulations, and virtual worlds into online learning can be a transforming experience for both the instructor and the student. This practical guide, written by education game expert Clark Aldrich, shows faculty members and instructional designers how to identify opportunities for building games, simulations, and virtual environments into the curriculum; how to successfully incorporate these interactive environments to enhance student learning; and how to measure the learning outcomes. It also discusses how to build institutional support for using and financing more complex simulations. The book includes frameworks, tips, case studies and other real examples, and resources. Praise for Learning Online with Games, Simulations, and Virtual Worlds "Clark Aldrich provides powerful insights into the dynamic arena of games, simulations, and virtual worlds in a simultaneously entertaining and serious manner as only he can. If you are involved with educating anyone, from your own children to classrooms full of students, you need to devour this book." — Karl Kapp, assistant director, Institute for Interactive Technologies, Bloomsburg University "At a time when the technologies for e-learning are evolving faster than most people can follow, Aldrich successfully bridges the perceptual gap between virtual worlds, digital games, and educational simulations, and provides educators with all they really need to use this technology to enhance and enrich their e-learning experiences." — Katrin Becker, instructor, Department of Computer Science and Information Systems, Mount Royal College, and adjunct professor of education, University of Calgary "I consider this a must-read for anyone engaged in or contemplating using these tools in their classrooms or designing their own tools." — Rick Van Sant, professor of learning and technology, Ferris State University

Course in General Linguistics - Ferdinand de Saussure 1986

Reconstructed from lecture notes of his students, these are the best records of the theories of Ferdinand De Saussure, the Swiss linguist whose theories of language are acknowledged as a primary source of the twentieth century movement known as Structuralism.

The Psychology of Language - Timothy Jay 2003

A comprehensive survey of classic and cutting edge research, this book shows how people comprehend, produce, and acquire language--and represents how powerful language processes are, and the importance of language in everyday life. It looks at emotional aspects of language processing in social contexts, and demonstrates not just "what language is" but also "what language does." Chapter topics cover brain and language; speech perception; words and word recognition; sentence processing; speech production; writing and reading

processes; figurative speech and thought; language development: phonology, lexicon, grammar, emergence, emotion, and embodiment; language and thought in a social context; applied psycholinguistics; and language delay and disorders. For anyone who uses language--and wants to understand its emotional implications in different social settings.

Improving Adult Literacy Instruction - National Research Council 2012-08-27

More than an estimated 90 million adults in the United States lack the literacy skills needed for fully productive and secure lives. The effects of this shortfall are many: Adults with low literacy have lower rates of participation in the labor force and lower earnings when they do have jobs, for example. They are less able to understand and use health information. And they are less likely to read to their children, which may slow their children's own literacy development. At the request of the U.S. Department of Education, the National Research Council convened a committee of experts from many disciplines to synthesize research on literacy and learning in order to improve instruction for those served in adult education in the U.S. The committee's report, *Improving Adult Literacy Instruction: Options for Practice and Research*, recommends a program of research and innovation to gain a better understanding of adult literacy learners, improve instruction, and create the supports adults need for learning and achievement. *Improving Adult Literacy Instruction: Developing Reading and Writing*, which is based on the report, presents an overview of what is known about how literacy develops the component skills of reading and writing, and the practices that are effective for developing them. It also describes principles of reading and writing instruction that can guide those who design and administer programs or courses to improve adult literacy skills. Although this is not intended as a "how to" manual for instructors, teachers may also find the information presented here to be helpful as they plan and deliver instruction.

Communication and Learning - Paul Witt 2016-09-12

In this volume, leading scholars from the fields of communication, educational psychology, and international education address what is known about the strategic role of interpersonal communication in the teaching/learning process. Instruction often involves spoken communication that carries information from teacher to learner, and in these instances the teacher's skillful and strategic use of language has a measurable impact on learning outcomes. Thus, the cumulative findings of instructional communication research are instrumental in maximizing the efficiency and effectiveness of both teaching and learning. Major sections of this volume include: Historical and Theoretical Foundations Instructor Characteristics and Behaviors Student Characteristics and Outcomes Pedagogy and Classroom Management Teaching and Learning Communication Across the Life-span This handbook serves researchers, professors, and graduate students by surveying the collective findings of research and experience concerning the intentional activity of teaching and learning.

Principles of Pragmatics - Geoffrey N. Leech 2016-02-17

Over the years, pragmatics - the study of the use and meaning of utterances to their situations - has become a more and more important branch of linguistics, as the inadequacies of a purely formalist, abstract approach to the study of language have become more evident. This book presents a rhetorical model of pragmatics: that is, a model which studies linguistic communication in terms

of communicative goals and principles of 'good communicative behaviour'. In this respect, Geoffrey Leech argues for a rapprochement between linguistics and the traditional discipline of rhetoric. He does not reject the Chomskian revolution of linguistics, but rather maintains that the language system in the abstract - i.e. the 'grammar' broadly in Chomsky's sense - must be studied in relation to a fully developed theory of language use. There is therefore a division of labour between grammar and rhetoric, or (in the study of meaning) between semantics and pragmatics. The book's main focus is thus on the development of a model of pragmatics within an overall functional model of language. In this it builds on the speech act theory of Austin and Searle, and the theory of conversational implicature of Grice, but at the same time enlarges pragmatics to include politeness, irony, phatic communion, and other social principles of linguistic behaviour.

Neuropsikolinguistik - Rozaida Abdul Rauf 2021-10-08

Neuropsikolinguistik merupakan bidang yang menyelidik dan memerikan proses neurologi dan psikologi, yang memungkinkan manusia menguasai dan menggunakan bahasa. Revolusi sains kognitif telah mendorong para penyelidik daripada pelbagai latar belakang untuk menyelidik representasi dan pemrosesan bahasa. Buku ini mempersembahkan teks peringkat pengantar dan terkini untuk membiasakan pembaca dengan konsep teras dan pelbagai topik dalam bidang neuropsikolinguistik. Kursus dalam bidang psikolinguistik dan neurolinguistik telah diangkat sebagai kursus peringkat sarjana dan pascasiswazah, yang kini menunjukkan peningkatan pendaftaran yang signifikan oleh sarjana yang berminat dalam kedua-dua bidang neurosains kognitif ini. Perbincangan buku ini sesuai dijadikan rujukan bagi semua peringkat kursus dalam bidang psikolinguistik dan neurolinguistik, termasuk kursus yang lebih umum dalam bidang sains kognitif, neurosains, kecelaruan bahasa, bahasa dan pemikiran, persepsi, penghasilan pertuturan dan lain-lain. Dengan mempermudah akses kepada lebih daripada setengah abad penyelidikan saintifik dan linguistik, buku ini diharap dapat memberikan manfaat kepada semua yang berminat dalam mengkaji hubungan antara representasi, pemrosesan bahasa dan otak.

THE EARLY GRADE READING ASSESSMENT - Amber K. Gove
2011-09-28

The Early Grade Reading Assessment (EGRA) measures students' progress towards reading. EGRA gauges early literacy skills through a 15-minute individual oral assessment of five fundamental reading skills. RTI worked with education experts to develop the EGRA in 2006, and it has been piloted and implemented in more than 40 countries. This volume aims to take stock of the substantial amount of information and experience generated through the use of EGRA, and to share this knowledge with practitioners, policymakers, and international donors. Chapters cover not only particular applications of the instrument but also put EGRA in the context of broader issues and developments in literacy and education.

The Act of Writing - Eric Gould 1989

Assessing Writing - Sara Cushing Weigle 2002-05-27

The assessment of language learners is having a growing impact in English language teaching and applied linguistics. A formal evaluation of students writing abilities is important for language teachers in order to assess the pedagogical needs of their students. While there has been a considerable body of work undertaken on assessing the writing abilities of native speakers, the issues surrounding the assessment of second language learners writing abilities are still emerging. At present, no one volume has explored these issues and their implications for language teaching practitioners wishing to evaluate their students writing. This book outlines in an accessible manner the major tenets of research in the field and provide language teachers with guidelines to design and develop suitable writing assessment tasks for their students.

The Functional-notional Approach - Mary Finocchiaro 1983

Language Acquisition - Susan Foster-Cohen 2009-07-16

This book provides a snapshot of the field of language acquisition at the beginning of the 21st Century. It represents the multiplicity of approaches that characterize the field and provides a review of current topics and debates, as well as addressing some of the connections between sub-fields and possible future directions for research.

Listening to Spoken English - Gillian Brown 2017-09-19

For those who are familiar with the first edition, it will be convenient to have some indication of where the main changes lie. Chapter one has been largely rewritten to give an outline of current approaches to a model of comprehension of spoken language. Chapter two has a new initial section but otherwise remains as it was. Chapter three incorporates a new section on "pause" and how this interacts with rhythm, and rather more on the function of stress. Chapter four has an extended initial section but otherwise remains largely as it was. Chapter five on intonation contains several sections which have been rewritten to varying extents. Chapter six of the first edition has disappeared: in 1977, very little work had been published on "fillers" and it seemed worthwhile incorporating a chapter that sat rather oddly with the phonetic/phonological interests of the rest of the book. Not that there is a great industry of descriptions of the forms and functions of these and similar phenomena there seems no reason to retain this early but admittedly primitive account. The chapter on "paralinguistic vocal features", now chapter six, has some rewriting in the early part but considerable rewriting in the last sections. The final chapter on "teaching listening comprehension" has grown greatly in length. It still incorporates some material from the original chapter but most of it is completely rewritten.

Graphic Organizers for Reading Comprehension - Classroom Complete Press
2015-04-30

58 color reproducible graphic organizers to help your students comprehend any book or piece of literature in a visual way. Our graphic organizers enable readers to see how ideas fit together, and can be used to identify the strengths and weaknesses of your students' thought processes. Our graphic organizers are essential learning tools that will help your students construct meaning and understand what they are reading. They will help you observe your students' thinking process on what you read as a class, as a group, or independently, and can be used for assessment. They include: Story Maps, Plot Development, Character Webs, Predicting Outcomes, Inferencing, Foreshadowing, Characterization, Sequencing Maps, Cause-Effect Timelines, Themes, Story Summaries and Venn Diagrams.

Human Rights in Higher Education - Lindsey N. Kingston 2018-08-04

This book focuses on human rights education (HRE) in higher education, with an emphasis on supporting undergraduate education for social justice and global citizenship at the institutional, classroom, and community levels. Drawing from the work of human rights scholars and advocates at Webster University, Kingston begins a critical discussion about the potential of HRE on college campuses and beyond. Chapter contributors address the institutional issues inherent to building a "human rights campus," promoting just governance models, facilitating student research, and fostering inclusive campus communities. They further explore opportunities within the classroom by highlighting dynamic courses on global sustainable development and post-genocide reconciliation, as well as considering how to create trauma sensitive learning spaces and utilize photography as a human rights teaching tool. Finally, scholar-advocates detail how HRE can be expanded to include the broader community—including teaching critical criminology to aspiring police officers, facilitating community dialogue through academic conferences, and engaging in social justice work related to access to justice, domestic violence, and human trafficking.

Conversation Analysis - Numa Markee 2000-02-01

Conversation analysis is a methodology that originated over three decades ago as a sociolinguistic approach but has since been adopted by scholars in a variety

of other areas, including applied linguistics and communication. It is of great utility in second language acquisition research for its demonstrations of how micro-moments of socially distributed cognition instantiated in conversational behavior contribute to observable changes in the participants' states of knowing and using a new language. This volume describes the methodology in detail, discusses its relevance for current theories of SLA, and uses two extended examples of conversational analysis to show how learners succeed or fail at the job of learning the meaning of a word or phrase in conversational context. This book is one of several in LEA's Second Language Acquisition Research Series dealing with specific data collection methods or instruments. Each of these monographs addresses the kinds of research questions for which the method/instrument is best suited, its underlying assumptions, a characterization of the method/instrument and extended description of its use and problems associated with its use. For more information about these volumes, please visit LEA's Web site at www.erlbaum.com

[The Grieving Brain](#) - Mary-Frances O'Connor 2022-02-01

A renowned grief expert and neuroscientist shares groundbreaking discoveries about what happens in our brain when we grieve, providing a new paradigm for understanding love, loss, and learning. For as long as humans have existed, we have struggled when a loved one dies. Poets and playwrights have written about the dark cloak of grief, the deep yearning, how devastating heartache feels. But until now, we have had little scientific perspective on this universal experience. In *The Grieving Brain*, neuroscientist and psychologist Mary-Frances O'Connor, PhD, gives us a fascinating new window into one of the hallmark experiences of being human. O'Connor has devoted decades to researching the effects of grief on the brain, and in this book, she makes cutting-edge neuroscience accessible through her contagious enthusiasm, and guides us through how we encode love and grief. With love, our neurons help us form attachments to others; but, with loss, our brain must come to terms with where our loved ones went, or how to imagine a future that encompasses their absence. Based on O'Connor's own trailblazing neuroimaging work, research in the field, and her real-life stories, *The Grieving Brain* does what the best popular science books do, combining storytelling, accessible science, and practical knowledge that will help us better understand what happens when we grieve and how to navigate loss with more ease and grace.
