From Palestine to America - Taher Dajani 2008

Taher Dajani remembers playing soccer with his neighborhood friends in his idyllic city of Jaffa, Palestine. But on April 24, 1948, when Taher was fourteen, his carefree lifestyle came to an abrupt end. His family, with little money and few possessions, escaped the city by sea in a crowded fishing trawler as Zionist militia encircled Jaffa. Taher's father believed the family was in danger, so overnight they became refugees. The family took refuge in Syria and later in Libya, which enabled them to rebuild their lives. They experienced grief at leaving a place they loved and felt a great sense of loss and displacement, but with perseverance the Dajanis began anew. From Palestine to America describes the family's experiences and their determination. Taher Dajani writes this memoir about his new life after leaving his beloved Jaffa—from his days as a college student in Chicago to his work with the central bank in Libya—and his position with the International Monetary Fund in Washington DC. Even though it has been sixty years since the Dajani family were forced to flee Palestine, they remember their heritage and roots, and Jaffa, Palestine, will forever be in their hearts.

Visual Thinking - Colin Ware 2010-07-27

Visual Thinking brings the science of perception to the art of design. Designers increasingly need to present information in ways that aid their audience's thinking process. Fortunately, results from the relatively new science of human visual perception provide valuable guidance. In this book, Colin Ware takes what we now know about perception, cognition, and attention and transforms it into concrete advice that designers can directly apply. He demonstrates how designs can be considered as tools for cognition - extensions of the viewer's brain in much the same way that a hammer is an extension of the user's hand. The book includes hundreds of examples, many in the form of integrated text and full-color diagrams. Experienced professional designers and students alike will learn how to maximize the power of the information tools they design for the people who use them. Presents visual thinking as a complex process that can be supported in every stage using specific design techniques Provides practical, task-oriented information for designers and software developers charged with design responsibilities Includes hundreds of examples, many in the form of integrated text and full-color diagrams Steeped in the principles of "active vision, which views graphic designs as cognitive tools

The Four Stroke Dirt Bike Engine Building Handbook - Paul Olesen 2015

The Brothers Grimm Spectaculathon - Don Zolidis 2007

Two narrators attempt to recreate all 209 of the fairy tales of the Brothers Grimm in a wild, fast-paced extravaganza. To make it more difficult, they attempt to combine them into one gigantic fable using Rapunzel, Rumpelstiltskin, Hansel and Gretel, Snow White, Sleeping Beauty, Cinderella and other more obscure stories like Lean Lisa and The Devil's Grandmother.

Ultimate Harley Davidson - Hugo Wilson

2013-10-01

Updated for a new generation of bike lovers, *Ultimate Harley Davidson* is a visually stunning and comprehensive history of Harley-Davidson that charts the company and its bikes decade by decade. From the moment the first model rolled out of a backyard shed in Milwaukee, through Harley's postwar golden age, to the sought-after bikes that distinguish the company today, *Ultimate Harley-Davidson* presents seventy of the most beautiful and coveted Harleys of all time. Whether it's the 1911 V-Twin or the 1999 X1 Lightning, the seventy Harley-Davidson bikes examined are presented in minute detail, with close-ups of the engines and in-depth technical specifications.
