Test Automation Using Hp Unified Functional Testing - Navneesh Garg 2014

Test Automation using HP Unified Functional Testing (UFT) 11.5, is the first book released globally on HP UFT 11.5, which is the latest and enhanced version of the HP test automation tool, Quick Test Professional (QTP). This UFT book has been designed with the objectives of simplicity and ease of understanding. This book is recommended both for those who are beginning to learn test automation (using QTP) and for advanced

automation users. Another major highlight of this book is that you will be learning on our custom developed web based application instead of windows based flight reservation application that comes by default with HP QTP/UFT. This application with enhanced test scenarios will bring you very close to real-time automation using HP QTP/UFT. With author's huge experience as corporate trainer on HP QTP/UFT, this book follows a unique training based approach instead of a regular text book approach. As a step by step guide, it guides the student through every step of the exercises with the help of snapshots. The book also covers the most common interview questions and answers for HP QTP/UFT. It covers new features of HP UFT 11.5 and also covers aspects of Integration of HP QTP/UFT with HP ALM (Quality Center) platform. It also discusses how to use VBscript in and working working with advanced scripting concepts in QTP/UFT. Author Navneesh Garg, has been a QTP/UFT expert, automation architect and corporate trainer on QTP/UFT for last 14+ years. He has worked on QTP versions, QTP 6.0, QTP 8.0, QTP.9.0, QTP 9.5,

QTP10.0, QTP11.0 and UFT 11.5 for more than 10 years. Quotes from reviewers "A great hands-on guide on mastering automation using the new Unified Functional Testing(HP UFT) automation tool. An example custom build web based application used throughout the book ensures a quick grasp of key concepts. This book with its real life examples, is sure to benefit a novice beginner as well as seasoned automation professionals looking to step up to HP UFT 11.5, highly recommended" - S. Constancio "Outstanding book on HP QuickTest Professional (HP QTP). Rather than a text book approach, a training based approach to explain UFT features is an amazing concept. Also learning the tool over web based application is fabulous as we have complete web based application environment" - Philip Smith

This lexicon provides scholars and students of Greek civilization with a list, supported by evidence, of personal names known from literature, inscriptions, papyri, vases, coins, and other objects dating from the earliest period to the 7th century A.D. It promises to replace the mid-19th-century work of Pape and Benseler and offer fresh impetus to a wide range of historical and literary research. Produced under the auspices of

the British Academy, the complete lexicon will be published in six volumes.

Water (R718) Turbo Compressor and Ejector Refrigeration / Heat Pump Technology - Milan N. Šarevski 2016-02-03

Water (R718) Turbo Compressor and Ejector

Refrigeration/Heat Pump Technology provides the latest information on efficiency improvements, a main topic in recent investigations of thermal energy machines, plants, and systems that include turbo compressors, ejectors, and refrigeration/heat pump systems. This, when coupled with environmental concerns, has led to the application of eco-friendly refrigerants and to a renewed interest in natural refrigerants. Within this context, readers will find valuable information that explores refrigeration and heat pump systems using natural refrigerants, polygeneration systems, the energy efficiency of thermal systems, the utilization of low temperature waste heat, and cleaner production. The book also examines the technical, economic, and environmental reasons of R718 refrigeration/heat pump systems and how they are competitive with traditional systems, serving as a valuable reference for engineers who work in the design and construction of thermal plants and systems, and those who wish to specialize in the use of R718 as a refrigerant in these systems. Describes existing novel

Digital Health Innovation for Consumers, Clinicians, Connectivity and Community - A. Georgiou 2016-08-25

In the last few decades, health informaticians have established the knowledge base and practical expertise to facilitate the development of ever-more capable technical systems, increased connectivity, expanded access and the greater mobility of e-health and information management systems, and we have witnessed the evolution from simple computer-based records to systems allowing intra-organisational, national, and even international communication and information exchange. This book presents 20 of the papers delivered at the 24th Australian National Health Informatics Conference (HIC 2016), held in Melbourne, Australia in July 2016. The primary theme of the 2016 conference is Digital Health Innovation for Consumers, Clinicians, Connectivity and Community. The papers included here reflect this theme, and highlight the cutting edge research evidence, technology updates and innovations that are fuelling the digital transformation of the healthcare sector. They cover a wide spectrum of fields and encompass major theoretical concepts, examples of key applications of new technologies and important new developments in the field of health informatics. The book provides a current overview of trends in health informatics, and will be of interest to all those involved in the planning, design, implementation and delivery of healthcare today.

New Frictional Resistance Law for Smooth Plates - F. Schultz-Grunow 1941

From measurements in the free boundary layer of a plate the laws governing the velocity distribution and a new

resistance law are derived which, by increasing Reynolds number $Re(\text{sub } x)$ afford lower resistance values than the logarithmic law. The transverse velocities, the shearing stress, and the mixing path profiles were also defined.

New Trends in Computational Vision and Bio-inspired Computing - S. Smys 2020-09-27

This volume gathers selected, peer-reviewed original contributions presented at the International Conference on Computational Vision and Bio-inspired Computing (ICCVBIC) conference which was held in Coimbatore, India, on November 29-30, 2018. The works included here offer a rich and diverse sampling of recent developments in the fields of Computational Vision, Fuzzy, Image Processing and Bio-inspired Computing. The topics covered include computer vision; cryptography and digital privacy; machine learning and artificial neural networks; genetic algorithms and computational intelligence; the Internet of Things; and biometric systems, to name but a few. The applications discussed range from security, healthcare and epidemic control to urban computing, agriculture and robotics. In this book, researchers, graduate students and professionals will find innovative solutions to real-world problems in industry and society as a whole, together with inspirations for further research.
