Sams Teach Yourself CSS in 24 Hours - Kynn Bartlett 2002

Learning to apply CSS is the HTML Web publisher's next developmental step toward a professional and stable Web design. A prerequisite to learning higher-level languages like Javascript, Java, and Flash, CSS is gaining increasing support among major browsers, including Netscape, Internet Explorer (together 94% market share) and newcomers Opera, Mozilla and NeoPlanet, and backwards-compatibility with older browser versions and specialized browsers. The key to successful CSS implementation is in understanding how different browsers use and interpret CSS. This tutorial takes the unique position of teaching the reader how to make smart decisions about how and when to apply CSS, based on browser support and intended effects. In 24 straightforward, hourly lessons, the reader learns by accomplishing hands-on tasks that can be applied to his own site in every hour.

The Coding Workbook - Sam Taylor 2020-11-11

Build a website with your pencil! The Coding Workbook empowers you to teach students the basics of web development without a computer. This beginner-friendly introduction to web development enables anyone to build a website by writing out code by hand--no computer or internet required. It's a fun, hands-on approach to coding that teaches the basics of using the HTML and CSS programming languages (the language of web pages). You write the code in the pages of your workbook and then draw what it would look like in a web browser. TEACHERS: This has everything you need to teach an introductory web development class, and the pages are perforated! STUDENTS: Learn the basics of HTML and CSS to build your own custom website! Once you've finished the workbook you'll have the skills to easily build and launch a website. It's that easy! This exercise-filled workbook is packed with illustrations and progress quizzes, making it perfect for at-home learning or schools lacking sufficient computer or internet access. It has everything you need to teach a coding class or learn basic web programming yourself.
