Oxford IB Diploma Programme: Economics Course Book - Jocelyn Blink
2020-02-27

This comprehensive and engaging text, developed in cooperation with the IB, follows the new curriculum for first assessment in 2022. With accessible, engaging lessons students will actively relate economics to real-world issues and the global economy. The international examples and case studies encourage students to analyse economics in terms of present-day challenges and concerns. Conceptual links are provided to help students understand the over-arching big questions that relate economics to the multi-faceted challenges of the world economy including how it works and changes over time. Through inquiry-based tasks and links to TOK and ATL activities students will gain a deep understanding of economics. Practice activities will develop the skills required to succeed in the IB assessment including exam-style questions and data response questions. Clear explanations will help students achieve assessment success. About the Series: Oxford's IB Diploma Course Books are essential resource materials designed in cooperation with the IB to provide students with extra support through their IB studies. Course Books provide advice and guidance on specific course assessment requirements, mirroring the IB philosophy and providing opportunities for critical thinking.

The Oxford Handbook of Information and Communication Technologies - Robin Mansell 2007

The production and consumption of information and communication technologies (or ICTs) are becoming deeply embedded within our societies. The influence and implications of this have an impact at a macro level, in the way our governments, economies, and businesses operate, and at a micro level in our everyday lives. This handbook is about the many challenges presented by ICTs. It sets out an intellectual agenda that examines the implications of ICTs for individuals, organizations, democracy, and the economy. Explicitly interdisciplinary, and combining empirical research with theoretical work, it is organised around four themes covering the knowledge economy; organizational dynamics, strategy, and design; governance and democracy; and culture, community and new media literacies. It provides a comprehensive resource for those

working in the social sciences, and in the physical sciences and engineering fields, with leading contemporary research informed principally by the disciplines of anthropology, economics, philosophy, politics, and sociology.

Psychology - Alexey Popov 2017-12-28

Comprehensively updated for the latest syllabus, for first teaching September 2017, and developed directly with the IB, the second edition of this popular Psychology Course Book provides thorough coverage of all core and optional units at Standard and Higher Level, as well as assessment preparation support. The

IB English A: Literature Course Book is available in print, online and as a print and online pack.

The Oxford Handbook of Postwar European History - Dan Stone 2012-05-17

The postwar period is no longer current affairs but is becoming the recent past. As such, it is increasingly attracting the attentions of historians. Whilst the Cold War has long been a mainstay of political science and contemporary history, recent research approaches postwar Europe in many different ways, all of which are represented in the 35 chapters of this book. As well as diplomatic, political, institutional, economic, and social history, the *The Oxford Handbook of Postwar European History* contains chapters which approach the past through the lenses of gender, espionage, art and architecture, technology, agriculture, heritage, postcolonialism, memory, and generational change, and shows how the history of postwar Europe can be enriched by looking to disciplines such as anthropology and philosophy. The Handbook covers all of Europe, with a notable focus on Eastern Europe. Including subjects as diverse as the meaning of 'Europe' and European identity, southern Europe after dictatorship, the cultural meanings of the bomb, the 1968 student uprisings, immigration, Americanization, welfare, leisure, decolonization, the Wars of Yugoslav Succession, and coming to terms with the Nazi past, the thirty five essays in this Handbook offer an unparalleled coverage of postwar European history that offers far more than the standard Cold War framework. Readers will find self-contained, state-of-the-art analyses of major subjects, each written by acknowledged experts, as well as stimulating and novel approaches to newer topics. Combining empirical rigour and adventurous conceptual analysis, this Handbook offers in one substantial volume a guide to the numerous ways in which historians are now rewriting the history of postwar Europe.

IB Chemistry Course Book - Sergey Bylikin 2014-01

The most comprehensive match to the new 2014 Chemistry syllabus, this completely revised edition gives you unrivalled support for the new concept-based approach, the Nature of science. Chemodynamics - Louis J. Thibodeaux 1979-07-26

Reviews existing knowledge in the natural and engineering sciences to determine the rates, lifetimes, routes, and reservoirs of chemicals moving through the environment and to estimate the level of exposure to susceptible living and nonliving targets. Uses simple models and ideas as guides in constructing integrated environmental and ecosystem models for simulating chemical movement and fate. Coverage includes phase equilibrium and transport processes; the interphase and intraphase transport process; movement of inorganic and organic chemicals across the air-water interface; desorption of chemicals from the mud-water interface; volatilization of pesticides from air-soil surfaces; and vertical distribution of dissolved, reactive chemicals in stratified waterbodies. Includes numerous problems from current literature and appendices with

chemical, physical, transport, and environmental data.

IB Physics Course Book - Michael Bowen-Jones 2014-01

The most comprehensive match to the new 2014 Chemistry syllabus, this completely revised edition gives you unrivalled support for the new concept-based approach, the Nature of science. The only DP Chemistry resource that includes support directly from the IB, focused exam practice, TOK links and real-life applications drive achievement.

Geography, Year 1 - Bob Digby 2016-07-17

Please note this title is suitable for any student studying: Exam Board: Edexcel Level: A Level Year 1 and AS Subject: Geography First teaching: September 2016 First exams: June 2018 A student-friendly and engaging textbook for the Edexcel GCE A Level Year 1 and AS specifications. It has been specially written to match the demands of the 2016 specifications and has been endorsed for Edexcel. The coverage of key geographical concepts and processes is accessible and clear, and all students will be engaged by the interesting, up-to-date examples and case studies - while the rigour, detail, and depth required by the specifications is retained throughout. Clearly-written objectives open each section, setting out for students what they need to learn, and high-quality photos, maps, and diagrams aid explanations. Motivating activities, exam-style questions, and coverage of the required skills are strong features. The book is completed with a glossary for each chapter and a full index. Answer guidance for the activities is available on Kerboodle (school purchase only).
