No System - Vinca Petersen 1999
No System is Vinca Petersen's photographic document of her life as a modern nomad. She tells us in her introduction, "Different people's lives are based around different things, ours is based around music. "For the last few years she has been traveling with a group of young people through Europe, organizing illegal musical events and raves. Living between cities in old vans and buses, they scavenge for abandoned structures, often on the cusp between urban and rural areas, where they can dance to loud techno music. The photographs present a fascinating look at modern tribal life, where technology-driven equipment and music, discarded industrial frameworks, and a nomadic lifestyle, rooted in ancient history, all come together.

2009-09-03

Annie and Duncan are a mid-thirties couple who have reached a fork in the road, realising their shared interest in the reclusive musician Tucker Crowe (in Duncan's case, an obsession rather than an interest) is not enough to hold them together any more. When Annie hates Tucker's 'new release', a terrible demo of his most famous album, it's the last straw - Duncan cheats on her and she promptly throws him out. Via an internet discussion forum, Annie's harsh opinion reaches Tucker himself, who couldn't agree more. He and Annie start an unlikely correspondence which teaches them both something about moving on from years of wasted time. Nick Hornby's compelling new novel, four years after *A Long Way Down*, is about the nature of creativity and obsession, and how two lonely people can gradually find each other.

Why the Garden Club Couldn't Save Youngstown - Sean Safford 2009-01-31

In this book, Sean Safford compares the recent history of Allentown, Pennsylvania, with that of Youngstown, Ohio. Allentown has seen a noticeable rebound over the course

of the past twenty years. Facing a collapse of its steel-making firms, its economy has reinvented itself by transforming existing companies, building an entrepreneurial sector, and attracting inward investment. Youngstown was similar to Allentown in its industrial history, the composition of its labor force, and other important variables, and yet instead of adapting in the face of acute economic crisis, it fell into a mean race to the bottom. Challenging various theoretical perspectives on regional socioeconomic change, *Why the Garden Club Couldn't Save Youngstown* argues that the structure of social networks among the cities' economic, political, and civic leaders account for the divergent trajectories of post-industrial regions. It offers a probing historical explanation for the decline, fall, and unlikely rejuvenation of the Rust Belt. Emphasizing the power of social networks to shape action, determine access to and control over information and resources, define the contexts in which problems are viewed, and enable collective action in the face of externally generated crises, this book points toward present-day policy prescriptions for the ongoing plight of mature industrial regions in the U.S. and abroad.

The Modern Procession - Francis Alÿs 2004

On the morning of Sunday, June 23, 2002, 100 participants gathered at The Museum of Modern Art in midtown Manhattan, along with a 12-person Peruvian brass band, and a horse, dogs, and numerous palanquins, atop which sat replicas of three masterpieces from the museum's collection--Picasso's "Les Femmes d'Alger (O. J. R. Version O), Duchamp's ready-made "Bicycle Wheel" and a Giacometti--and a living representative of contemporary art, Kiki Smith. Three hours later they ended their procession at the museum's new temporary home, in Queens. Along the way, which ran from 11 West 53 Street, over the Queensboro Bridge, and up Queens Boulevard, the procession absorbed 100 additional participants, and enacted a very public spectacle--part saint's day procession and part secular celebration--of the museum's historic move to MoMA QNS.

Networked Collaborative Learning - Guglielmo Trentin 2010-01-20

The sustainability of Networked Collaborative Learning (NCL) is a key topic of discussion amongst the institutions where it has been or may potentially be introduced. In order to determine the extent of NCL's sustainability, the added value university education may yield by adopting collaborative learning strategies must be quantified. In turn, an understanding of the implications NCL produces in terms of design and management is gained. After comparing NCL with other Technology Enhanced Learning (TEL) approaches and discussing the possible reasons for adopting it, a multidimensional model for the sustainability of NCL is proposed. The model is characterized by four dimensions: pedagogical approaches, e-teacher professional development, instructional design models and valuation/assessment approaches. Each of these dimensions is examined on the basis of the author's direct experience gained through applying NCL to his university teaching. Delineates a framework for NCL sustainability Provides an instructional design model for NC Describes an original approach to the evaluation of collaborative learning processes

Global Guidelines for the Prevention of Surgical Site Infection - World Health Organization 2017-01-27

Surgical site infections are caused by bacteria that get in through incisions made during surgery. They threaten the lives of millions of patients each year and contribute to the spread of antibiotic resistance. In low- and middle-income countries, 11% of patients who undergo surgery are infected in the process. In Africa, up to 20% of women who have a caesarean section contract a wound infection, compromising their own health and their ability to care for

their babies. But surgical site infections are not just a problem for poor countries. In the United States, they contribute to patients spending more than 400 000 extra days in hospital at a cost of an additional US \$10 billion per year. No international evidence-based guidelines had previously been available before WHO launched its global guidelines on the prevention of surgical site infection on 3 November 2016, and there are inconsistencies in the interpretation of evidence and recommendations in existing national guidelines. These new WHO guidelines are valid for any country and suitable to local adaptations, and take account of the strength of available scientific evidence, the cost and resource implications, and patient values and preferences.

Art of War: The Articles of Sun Tzu - Sun Tzu 2020-09-23

Written in 500 BC, The Art of War, by Sun Tzu, is the foremost war strategy manuscript. This book will teach you when to battle, when not to battle, how to battle, how not to battle, and how to win every time you battle. Further key notions presented are: how to maintain an army, how to carry through a battle plan, how to gather intelligence, how to allocate resources, how to maintain high morale, how to weaken the enemy, how to deceive the opponent, and how to survive a battle. Several prevalent strategies shared by Sun Tzu are: - Battle if you are to win. - Let your plans be dark as night, and when you move, fall as a thunderbolt. - Appear weak when strong, and strong when weak. - Successful warriors win first and then war. Defeated soldiers war first and then seek to win. - All conflict is deception. - Move swift as wind and solid as wood. Attack like fire and remain motionless as a mountain. - Those who desire to battle must first consider the cost. The Art of War can be divided into three sections and the first two chapters, plus the last chapter, explore strategies of positional awareness. The second section highlights methods to expand. And the third section explores strategies to respond offensively and defensively. In the end, the strategies of Sun Tzu are basically an offensive-defensive order-maneuver before fighting, commit not until the opponent has revealed his hand, then deceive the enemy by engaging or attracting with one force while striking with another contingent. The Art of War is a valuable read for every war strategist and it is categorized under 13 headings. Use this knowledge wisely. - PRELIMINARY RECKONING - OPERATIONS OF WAR - THE ATTACK BY

The next stage was the launch of the "Day-Date", a perfected model which also indicates, with letters, the days of the week. The day and the date automatically change every evening at midnight. » These are the words of Roger Federer, a living tennis legend, about his Day-Date II: "The reason I like my Day-Date so much is because it is a legendary watch, elegant but with a certain spirit, with a touch of modernity added to its stylish black dial".

Six Memos for the Next Millennium - Italo Calvino 2013-04-04
Italo Calvino was due to deliver the Charles Eliot Norton lectures at Harvard in 1985-86, but they were left unfinished at his death. The surviving drafts explore the concepts of Lightness, Quickness, Multiplicity, Exactitude and Visibility (Constancy was to be the sixth) in serious yet playful essays that reveal Calvino's debt to the comic strip and the folktale. With his customary imagination and grace, he sought to define the virtues of the great literature of the past in order to shape the values of the future. This collection is a

brilliant précis of the work of a great writer whose legacy will endure through the millennium he addressed. Italo Calvino, one of Italy's finest postwar writers, has delighted readers around the world with his deceptively simple, fable-like stories. Calvino was born in Cuba in 1923 and raised in San Remo, Italy; he fought for the Italian Resistance from 1943-45. His major works include *Cosmicomics* (1968), *Invisible Cities* (1972), and *If on a winter's night a traveler* (1979). He died in Siena in 1985, of a brain hemorrhage.
