Restructuring Family Policies - Maureen Baker
2006-01-01

Recent years have seen significant changes in the social policies of many liberal welfare-states; this is especially true of social programs for families with children. Increasingly, governments are making

family policy trade-offs, reducing support for some families but improving it for others. Why are such trade-offs occurring, and how do governments differ in their approach to family social policy? This study addresses these questions by examining the political, demographic, and socio-

economic factors influencing the restructuring of family-related programs in OECD countries. Adopting a feminist political economy approach, Maureen Baker shows that while some governments encourage their citizens to see children as 'future resources,' and promote strong support for reproductive health programs, child welfare services, women's refuges, subsidized childcare, and pay equity, others make these claims while simultaneously reducing family incomes through the deregulation of labour markets and restrictions on income support. Ultimately, Baker demonstrates that nation states with the best outcomes for families offer a variety of social supports, which are increasingly important as global markets reduce economic security for some families while improving the financial situation of others. This study also explores strategies employed by states to

incorporate or resist international pressures, and the reasons why some states tenaciously defend their family policy traditions while others restructure according to international guidelines. Drawing from nation-based research, cross-national studies, and international data bases, *Restructuring Family Policies* successfully integrates mainstream academic debates about restructuring welfare states with feminist research findings and current policy concerns. *Wine, Society, and Globalization* - G. Campbell 2007-12-25 This collection of essays comprises a number of case studies from key wine-growing regions and countries around the world. Putting Family First -
Harald Bauder 2019

"When migrants reach their new home, we often interpret their settlement and integration as an individual process driven largely by the labour market. But family plays a crucial role. Putting Family First is the fruit of a four-year academic-community partnership to investigate the experience of immigrant families settling in Greater Toronto. Contributors explore the integration trajectory of immigrant families, from newcomers' initial reception to their deep involvement in and attachment to their receiving society. Chapters examine the interrelated themes of the policy environment, children and youth,

gender, labour markets and work, and community supports, making insightful connections between concepts such as neoliberalism, resilience, and social capital. Putting Family First applies rigorous academic research to solve practical problems, illustrating how the family context can be mobilized to facilitate the successful integration of newcomers and offering important guidance to practitioners and policy-makers in Canada and beyond."--

Developing, Delivering,

Counseling Practices
Through a Culturally
Affirming Lens - Brant-

Rajahn, Sarah N.

2022-05-06

Systemic oppression continues to disenfranchise students at the intersections of race, ethnicity, gender identity, sexual orientation, immigrant status, religion, ableism, and economic status. Because of this, school counselors are called to function as advocates and change agents, but often find themselves underprepared to address these oppressive systems in schools. It is vital that school counselors are provided resources that enable them to increase their preparedness and allow them to address oppressive practices within schools as well as work with diverse populations using culturally affirming and antiracist practices. Developing, Delivering,

and Sustaining School Counseling Practices Through a Culturally Affirming Lens informs culturally affirming and antiracist professional practice and advocacy work by school counselors. It serves as a learning tool that better prepares school counselors to address the needs of marginalized students and work as effective change agents to disrupt systemic oppression in school settings. Covering topics such as professional identity, racial trauma, and social justice, this book serves as a dynamic resource for school counselor educators, school counselors-in-training, school counselors, directors, supervisors, district leaders and administration, researchers, and academicians as they implement antiracist, social justice, and culturally affirming practices in school settings and academia. *Individuals and Families* - Maureen Holloway 2019

Martha was not yet two, but in 1960s Ontario there was little community acceptance or support for raising children with intellectual disabilities at home. Anthropological Perspectives on Children as Helpers, Workers, Artisans, and Laborers -

David F. Lancy

2017-12-12

The study of childhood in academia has been dominated by a mono-cultural or WEIRD (Western, educated, industrialized, rich, and democratic) perspective. Within the field of anthropology, however, a contrasting and more varied view is emerging. While the phenomenon of children as workers is ephemeral in WEIRD society and in the literature on child development, there is ample cross-cultural and historical evidence of children making vital contributions to the family economy. Children's "labor" is of great interest to researchers, but widely treated as extra-cultural—an aberration that must be controlled. Work as a central

component in children's lives, development, and identity goes unappreciated. Anthropological Perspectives on Children as Helpers, Workers, Artisans, and Laborers aims to rectify that omission by surveying and synthesizing a robust corpus of material, with particular emphasis on two prominent themes: the processes involved in learning to work and the interaction between ontogeny and children's roles as workers. *Families* - Maureen Baker 1990

The Effect of Children on Parents, Second Edition - Anne Marie Ambert 2014-05-22
Recognize the hidden costs and rewards of childrearing! *The Effect of Children on Parents, Second Edition*, thoughtfully explores the interactions by which parents and children change, develop, and sometimes affect each other negatively. Everyone knows that parents

influence their children, but few people consider the ways in which children affect their parents. The love, satisfaction, and fulfillment children offer can change parents' lives. So can the stress, worry, and financial drain. *The Effect of Children on Parents, Second Edition*, honestly confronts these long-neglected issues of family dynamics. Taking a unique interdisciplinary approach, this book describes in great detail, with jargon-free language the various aspects of children's effects on their parents. This second edition contains an abundance of fresh information, including nine entirely new chapters that deal with such complex topics as the effects on parents of children with emotional, behavioral, and delinquency problems. *The Effect of Children on Parents, Second Edition*, asks and answers essential questions on the parent-

child dynamic, including: what role does genetic inheritance play in children's responses to their parents? how do peers influence children and through them, their parents? what happens to parents when children are difficult or have emotional problems? what special considerations apply to minority or adoptive parents? how do adult children affect their aging parents? how does society support or undermine parents? what roadblocks prevent parents from being as effective as they would like to be? The Effect of Children on Parents, Second Edition, takes a brave look at this often ignored area of family dynamics, giving a richer, more complex, and ultimately more healing view of how humans interact in families. Professors, students, and experts in the fields of child development, family studies, and sociology of childhood and family will find this book a sophisticated tool in

their desire to better understand and help families and children.

While simultaneously evaluating its own methodological tools, this book will set current knowledge in the context of what has been previously studied as well as future research directions. It will examine inter-family relationships and politics as well as childrearing, education,

and family economics to provide a rounded and in-depth view.

Canadian Families Today

- David J. Cheal 2007

This exciting collection of original essays by prominent Canadian scholars examines issues and trends affecting family life in Canada. The text is organized in five parts. The first part, "Conceptualizing the Family," presents an overview of the sociology of the family in Canada: it explores various definitions of "family" from an anthropological perspective; examines family patterns in historical and cross-cultural contexts; provides an overview of the theoretical frameworks and research methodologies for family studies; and discusses Canadian demographic trends. The life cycle is the focus of the second part of this book. In Chapter 3, Rachel Ariss shows how social expectations and ideologies about intimacy shape how

individuals experience family formation. In "Parents and Children," Gillian Ranson introduces the dominant ideals of motherhood and fatherhood in Canada and demonstrates the extent to which parenting practices are shaped by social and economic contexts. Major changes in social practice and in the legal environment that have gone hand in hand with demographic changes to contribute to the episodic nature of spousal unions in Canada today. In Chapter 5, Craig McKie outlines the legal history of the family in Canada and explores how the introduction of Islamic laws (shariah) challenge the principle that newcomers to Canada are free to continue on in their beliefs and practices when these are not in fundamental conflict with Canadian law. Chapter 6 provides a timely examination of the issues that affect the "sandwich generation": coresidence with adult

children, the
''informalization'' of
care to aging parents,
intergenerational
ambivalence, and the
relationship between
midlife families and
social policy. As Lori
D. Campbell and Michael
P. Carroll note in their
chapter on older
Canadians, aging within
a family context has
become more complex and
diverse than ever
before. The changes that
have been occurring in
the form and structure
of families as a result
of greater longevity,
increased divorce,
remarriage, and
other socio-demographic
factors, allow increased
''intergenerational
exchange'' - the
exchange of support
between older and
younger generations. Part
III highlights the
economic inequalities
that exist among
families. As Andrea
Doucet notes, historical
circumstances have
contributed to strong
divisions in both paid
and unpaid work that are
linked to gender, class,
and ethnicity. Chapter 8

examines key issues in
the study of paid and
unpaid work, including:
the connections that
exist between paid and
unpaid work; how unpaid
work benefits the state;
the complexities
involved in measuring
unpaid work; the costs
of care; and why gender
differences in paid and
unpaid work matter. In
the following chapter,
Joseph H. Michalski
argues that family change
and demographic events
have had their impact on
income poverty, to the
extent that they
influence the types of
families and living
arrangements in which
Canadians share and pool
income. Diversity is the
unifying theme of Part
IV. In her article, In
''"I Do"'' Belong in
Canada: Same Sex
Relationships and
Marriage," Doreen M.
Fumia reveals the
insecure relationship
between sexual
minorities and
citizenship,
highlighting the
strategies used to
reproduce normalized
heterosexual notions of

marriage and to avoid confronting heterosexism. James S. Frideres stresses the importance of the family among aboriginal, immigrant, and visible minorities communities, as family members learn to cope with the dynamics of integration and adaptation to mainstream Canadian culture. In Chapter 11 he focuses on key issues affecting family life for these groups: intermarriage; gender roles in minority communities; social and economic demographics in comparison to 'mainstream' Canadians; differences in social structure and organization; and risk factors that affect Aboriginal, immigrant, and visible minority youth. In Chapter 12, Michelle K. Owen draws our attention to the impact that disability has on Canadian families; the role that gender plays in the lives of people with disabilities; the relationship between poverty and disability;

and the increased incidence of physical and sexual abuse among people with a disability. The final part of the book is devoted to law and policy. In 'All in the Family: Violence Against Women, Children, and the Aged,' Aysan Sev'er examines the 'dark side of the family', where power differences can translate into mental, physical and/or sexual abuse, and even murder. She reviews the basic definitions of abuse and introduces theories that explain violence within intimate relationships. She then addresses possible interventions at the social and structural levels that may diminish the incidence of abuse. The role of the state in regulating family life is addressed in Chapter 14. Catherine Krull details the evolution of Canada's family policies within a liberal welfare state and examines the ideology and implications of a universal versus a

targeted approach to family policies. Krull argues that we need to appreciate why state intervention is necessary if we are to achieve gender equity and suggests that Quebec's progressive family policies should serve as a model for the rest of Canada. In the final chapter, Margrit Eichler takes a lighthearted look at the predictions that experts made regarding the future of the family from 1930 to 1975. After reviewing some predictions that were spectacularly wrong, and others that were surprisingly accurate, Eichler bravely makes her own predictions regarding the future of the family: she anticipates a modest trend towards three generation families as one response to economic uncertainties and political turmoil; a decrease in life expectancy; continuing low fertility with high immigration from third world countries; less homophobia; a continuing

slow erosion of strictly defined gender roles; and a continuing diversity of unions, including common law and legal marriages, opposite and same sex marriages. In short, families will continue to exist, some will prosper, others less so, and children will continue to be raised within family settings, which will probably be even more diverse than at present.

The Boomerang Age -

Barbara Mitchell

2017-07-05

* The Boomerang Age was named an Outstanding Academic Title of 2007 by Choice Magazine. Domestic changes are taking place in the lives of young adults in Western industrialized societies. Today's young people often experience less permanency and more movement in a variety of family-related roles, statuses, and living arrangements. Among the most prominent changes is the phenomenon of "boomerang kids," young adults returning to the parental home after their initial entrance into the adult world. The Boomerang Age, explores the implications of this

development in a changing sociocultural, economic, and demographic landscape. Mitchell begins by addressing definitional, conceptual, and measurement issues relevant to the "boomerang age." She then places the issues in historical perspective by considering trends in family organization--the nuclear family, marriage and divorce rates and fertility--over the past hundred years with emphasis on the 1950s family as a cultural benchmark. The book then turns to the contemporary trajectory of home leaving and returning, analyzing the "launch" and return phases with regard to economic factors, regional differences, and racial and ethnic backgrounds. Mitchell then explores the more personal dimensions of how a return to the family is complicated by partnership (marriage, divorce, cohabitation, homosexuality) and

parenthood among young couples. Moving outside the home, she looks at how public issues such as globalization, the decline of the welfare state, and various forms of social inequality affect the circumstances of young adulthood. Here Mitchell offers specific social policy recommendations pertaining to education, housing and dependency issues, childcare, and gender and racial equality. The book concludes by critically evaluating the advantages and drawbacks of two possible future scenarios: increased individualization in the pursuit of social g

This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters.

Rural Transformation and Newfoundland and Labrador Diaspora -

Amarjit Singh 2013-11-08
This book is endorsed by Dr. Clar Doyle in his preface to this book. Dr. Doyle is very well known locally. This book is about the contemporary life of grandparents in Newfoundland and Labrador - a geographically isolated and culturally unique rural region of Canada. The book can be used for courses in the areas of critical social work,

family studies, gerontology, nursing, rural development, critical pedagogy, and diaspora studies. Clar Doyle, Professor of Education, Memorial University of Newfoundland, and member of the Founding Scholars Advisory Board, The Paulo and Nita Freire International Project for Critical Pedagogy. "This book offers a platform not only to look in on the lives of vital grandparents but paints, in broad strokes, a mural of coming, changing, as well as challenging cultural and social settings.... In what the astute editors ...call "small nuanced studies" we find telling narratives of generational connections in the face of changing and challenging odds....This book does a great service to the concept of diaspora, as well as to the changing nature of that concept... This book elevates the status of grandparents by positioning them as

vital members of a complex and challenging society where their skills, gifts, and sheer presence are most formative.... As is strongly advocated in this book, it is essential that educators, curriculum developers, and teachers appreciate the place of grandparents in their students' lives."

Families, Labour and Love - Maureen Baker
2020-07-29

We think of our family life as very personal, but in fact it is shaped by influences well beyond our control. Families, Labour and Love identifies the ways in which family and personal life in three 'settler' societies - Australia, New Zealand and Canada - has been shaped by colonisation, immigration, globalisation, demographic changes, law and policy. Baker shows that these three countries, each a former colony, developed similar family trends and similar family policies. Strongly

gendered patterns of paid and unpaid work played a major role in family life. The family practices of indigenous people were largely overlooked, as were those of recent immigrant groups. However local conditions also produced significant differences in family experiences among the three countries. Richly illustrated with examples, comparative data and textual sources, *Families, Labour and Love* provides a broad-ranging analysis of the family which will appeal to students, researchers and policy-makers. Maureen Baker outlines with great clarity the diversity of families and the way in which they are shaped by historical and cultural forces. The focus on Australia, New Zealand and Canada is not only refreshing but throws into sharp relief the impact on contemporary families of the colonial experience, industrialisation, large scale immigration and
