*Glencoe Writer's Choice* - 2001

State-adopted textbook, 2001-2007, Grade 7.

*Rebuilding the Natural Environment, Grade 10* -

Carla C. Johnson 2022-05-17

What if you could challenge your tenth graders to think about how innovation can make the world a better place for humans, while finding ways to sustain progress and conserve resources? With this volume in the STEM Road Map Curriculum Series, you can! *Rebuilding the Natural Environment* outlines a journey that will steer your

students toward authentic problem solving while grounding them in integrated STEM disciplines.

Like the other volumes in the series, this book is designed to meet the growing need to infuse real-world learning into K–12 classrooms. This interdisciplinary, four-lesson module uses project- and problem-based learning to help students connect their existing knowledge about energy production and its effects on the natural environment to create innovations in renewable sources of energy based on research evidence.

Working in teams, students will design an innovative way to meet society's energy needs

and develop a pitch to market their innovation, focusing on how the innovation will optimize human experiences while being mindful of the natural environment. To support this goal, students will do the following:

- Understand several forms of renewable, sustainable energy sources.
- Apply their understanding of how alternators are used to generate electricity in lab experiments, as well as explain how tools such as windmills and dams are used to operate them.
- Describe how electricity is generated in photovoltaic cells.
- Calculate the amount of electricity consumed by several household items

and consider this consumption when determining the average monthly energy consumption of households around the world in comparison to U.S. households.

- Understand how fossil fuels have been used in the production of electricity and the impact they have had on the world's economy, humans' quality of life, and the earth.
- Identify several hindrances to the creation of new energy sources as well as ideas to counter them.
- List several factors that can be used to motivate people from all walks of life to use renewable and sustainable energies.
- Create a fictional company that uses renewable energies. The

STEM Road Map Curriculum Series is anchored in the Next Generation Science Standards, the Common Core State Standards, and the Framework for 21st Century Learning. In-depth and flexible, *Rebuilding the Natural Environment* can be used as a whole unit or in part to meet the needs of districts, schools, and teachers who are charting a course toward an integrated STEM approach.

[Ultimate Phrasal Verb Book](#) - Carl W. Hart

2017-03-08

Updated to reflect questions found on the most recent ESL tests, this book presents 400 common

phrasal verbs as they are used in everyday English. Phrasal verbs are verbs combined with prepositions or adverbs. Familiarity with phrasal verbs and understanding their use as nouns (breakup, showoff, etc.) or adjectives (spaced-out, broken-down, stressed-out, and many others) is essential to ESL students. Updated information includes: the most commonly used phrasal verbs; activities and examples that reflect our current technology and the world around us; an expanded introduction for the teacher with a thorough breakdown and explanation of phrasal verbs; and, a discussion of separable and

inseparable phrasal verbs in Unit I, and more.

This book's hundreds of examples in context and hundreds of exercises will be extremely useful to ESL students who are preparing for TOEFL or who simply wish to improve their English.
