Old Testament Textual Criticism - Ellis R. Brotzman
2016-07-19

A Readable, Updated Introduction to Textual Criticism
This accessibly written, practical introduction to Old Testament textual criticism helps students understand the discipline and begin thinking through complex issues for themselves. The authors combine proven expertise in the classroom with cutting-edge work in Hebrew textual studies. This successful classic (nearly 25,000 copies sold) has been thoroughly expanded and updated to account for the many changes in the field over the past twenty years. It includes examples, illustrations, an updated bibliography, and a textual commentary on the book of Ruth.

How Old Is the Universe? - David A. Weintraub 2011
"Tells the story of how astronomers solved one of the most compelling mysteries in science and, along the way, introduces readers to fundamental concepts and cutting-edge advances in modern astronomy"--From publisher description.

OLD TESTAMENT VOL 4 THE PROPHETS - Nicholas King
2013-05-01

Reports of Patent, Design, and Trade Mark Cases - 1901

Life on the Cutting Edge - Sal Rachele 1994-01-01
Are you tired of the same old stuff (S.O.S.)? Do you long for something fresh and exciting? Then perhaps this book is for you. It takes a no-nonsense look at what is really happening. It addresses the issues you and I are facing right now.

Railway Engineering and Maintenance of Way - 1918

Cutting Edge Gardening in the Intermountain West - Marcia Tatroe 2007

A guide to gardening in the Intermountain West, which includes parts of Washington, Oregon, Idaho, Nevada, Utah, Colorado, Arizona, New Mexico, Montana, Kansas, Nebraska, North Dakota, South Dakota, and Wyoming.

Railway Maintenance Engineer - 1918

Engineering News and American Contract Journal - 1903

Te Linde's Operative Gynecology - Victoria Handa
2019-05-20

Te Linde's Operative Gynecology, Twelfth Edition, remains your authoritative resource on the comprehensive perioperative care of gynecologic patients. New features in this edition include a primer on anesthesia, a chapter on positioning for pelvic surgery, a practical review of pediatric gynecology, and a section on the use of surgical instruments. All chapters have been updated to reflect contemporary gynecologic practice and the

latest minimally invasive surgical approaches. New illustrations are included and each chapter includes step-by-step descriptions of surgical techniques. Today's best surgeons and teachers offer a readable, intuitive, and concise reference for trainees as well as the experienced gynecologist.

Production at the Leading Edge of Technology - Bernd-Arno Behrens 2021-09-04

This congress proceedings provides recent research on leading-edge manufacturing processes. The aim of this scientific congress is to work out diverse individual solutions of "production at the leading edge of technology" and transferable methodological approaches. In addition, guest speakers with different backgrounds will give the congress participants food for thoughts, interpretations, views and suggestions. The manufacturing industry is currently undergoing a profound structural change, which on the one hand produces innovative solutions through the use of high-performance communication and information technology, and on the other hand is driven by new requirements for goods, especially in the mobility and energy sector. With the social discourse on how we should live and act primarily according to guidelines of sustainability, structural change is gaining increasing dynamic. It is essential to translate politically specified sustainability goals into socially accepted and marketable technical solutions. Production research is meeting this challenge and will make important contributions and provide innovative solutions from different perspectives.

Contemplating Dis/Ability in Schools and Society - David J. Connor 2018-07-15

This book chronicles the life of an inclusive educator through eight different stages of his career, from classroom teacher to college professor. Analysis of this rich narrative reveals complexities of how both the field of education's knowledge base and existing educational systems impact lives of children, teachers, and researchers.

Intelligent Computing Paradigm and Cutting-edge Technologies - Lakhmi C. Jain 2020-01-02

This book discusses fundamental and high-level concepts relating to intelligent computing and communications in the context of distributed computing, big data, high performance computing and the Internet of Things. It is becoming increasingly important to develop adaptive, intelligent, computing-centric, energy-aware, secure and privacy-aware mechanisms in high-performance computing and IoT applications. Serving as a useful guide for researchers and practitioners working in the field of information technology and computer science, the book also appeals to beginners wanting to learn more about the better computing paradigm. In addition, it provides a platform for researchers, engineers, academics and industry professionals from around the globe to share their research findings.

Frontiers in Chemistry: Rising Stars - Steve Suib
2020-04-17

The Frontiers in Chemistry Editorial Office team are delighted to present the inaugural "Frontiers in

Chemistry: Rising Stars" article collection, showcasing the high-quality work of internationally recognized researchers in the early stages of their independent careers. All Rising Star researchers featured within this collection were individually nominated by the Journal's Chief Editors in recognition of their potential to influence the future directions in their respective fields. The work presented here highlights the diversity of research performed across the entire breadth of the chemical sciences, and presents advances in theory, experiment and methodology with applications to compelling problems. This Editorial features the corresponding author(s) of each paper published within this important collection, ordered by section alphabetically, highlighting them as the great researchers of the future. The Frontiers in Chemistry Editorial Office team would like to thank each researcher who contributed their work to this collection. We would also like to personally thank our Chief Editors for their exemplary leadership of this article collection; their strong support and passion for this important, community-driven collection has ensured its success and global impact. Laurent Mathey, PhD Journal Development Manager

ON THE CUTTING EDGE - J.J. Luepke 2013-01-02

Josie Buchannon is once again thrust into the dual role of detective and bait as she helps the FBI with a kidnapping case in New York City. This crafty advertising agent chaperones her bridesmaids and gives the FBI another Josie Special Plan to help capture the villain.

Railway Track and Structures - 1918

Equipment Improvement Report and Maintenance Digest (US Army Tank-Automotive Command) - 1985

The Cutting Edge - David Lansky 2013-11-25

The Cutting Edge, a satirical novel in two parts, presents a clear-sighted critique of the current state of academia. Set in a SUNY campus, diary entries that may or may not have been written by a student depict an environment marked by a series of contradictions guaranteed to discourage intellectual growth: a school mission statement that voices a commitment to social justice, academic freedom and a Student Code of Conduct that prohibits student demonstrations; administrative decisions to spy on students; a campus police force bent on uncovering student crime and collective punishment for residents living in dorms that are rarely cleaned; rising tuition costs coupled with declining academic standards leaving students up to their elbows in debt and ill-prepared for employment in a declining economy. Fortunately, there is a lone voice in the wilderness, a Professor who—despite knowing that he's teaching after the death of the book—continues to lay out an analysis of contemporary life where prisons, shopping malls and Walmart stores blight the landscape and barbarians run the universities. He wages the good fight for the rights of students against an administration that resembles a constitutional monarchy and budget cuts that ultimately lead to his death, yet his is the last voice the reader hears as the novel ends. In the second part of the novel, his memoir, we get the Professor's delineation of all that's wrong in present-day life. Without giving too much away, suffice it to say that finance capital, real estate speculation, and the postmodern condition are discussed. —Dawn Esposito, St. John's University

The Cutting Edge is a novel of powerful imagination, rollicking humour, profound insight and deep political commitment. The novel is divided into two parts. The first is The College Essays of Jenny Delight. No one is quite sure who Jenny is. It is an obvious pseudonym since there is no student by this name at the college she attends. It is a hilarious section laced with social and personal insight as Jenny tries to understand the

world around her, often using categories she's learning, sometimes the most abstract categories available, and infusing them with vivid meaning. The second section, Bill of Sale, is the posthumously-discovered manuscript of Sociology Professor Fred Snyder. It is a harrowing account of very vulnerable and often screwed-up people who are totally against their society. It is a section revealing, with extraordinary power, the ruthlessness of contemporary capitalism and its relentless destructive force. The Cutting Edge is one hell of a book! —Robert Roth, author of Health Proxy

At once funny and dead serious, The Cutting Edge tells it like it is about the situation of public higher education in the early 21st-century United States. Sociology professor Fred Snyder—nostalgic for the era of Marcuse and the New Left, eternally at war with the college administration, committed to the ethical and political development of his students—is a wonderful creation. Skillfully narrated from several overlapping points of view, this satirical novel cuts to the chase in its astute portrayal of the connections between contemporary capitalism and the working-class college experience. —Barbara Foley, Rutgers University

The Cutting Edge is at once a meeting of teachers and students under conditions of critical hilarity, and a deeply empathetic portrait of where the commitment to re-craft our learning environments in line with their most abiding promise might lead us if we attend closely as the author does to the poignancy of the stories all around us. It rewards readers with an insightful view on a delicate landscape often overlooked. —Randy Martin, New York University

Intelligent Computing Paradigm and Cutting-edge

Technologies - Margarita N. Favorskaya 2021-04-21

This book aims to bring together Researchers, Scientists, Engineers, Scholars and Students in the areas of computer engineering and information technology, and provides a forum for the dissemination of original research results, new ideas, Research and development, practical experiments, which concentrate on both theory and practices, for the benefit of the society. The book also provides a premier interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Computer Science and Information Technology in the context of Distributed computing, Big data, High performance computing, Internet-of-Things, and digital pedagogy. It is becoming increasingly important to develop adaptive, intelligent computing-centric, energy-aware, secure and privacy-aware mechanisms in high performance computing and IoT applications. This book aspires to convey researchers' experiences, to present excellent result analysis, future scopes, and challenges facing the field of computer science, information technology, telecommunication, and digital pedagogy. This book aims to attract researchers and practitioners who are working in Information Technology and Computer Science. This book is about basics and high level concepts regarding intelligent computing paradigm, communications, and digital learning process. The book serves as a useful guide for Undergraduates, Postgraduates and Research Scholar in the field of Computer Science, Information Technology, and Electronics Engineering. We believe that this volume not only presents novel and interesting ideas but also will stimulate interesting discussions from the participants and inspire new ideas.

The Old Testament - Nicholas King 2012

The Histories, the penultimate volume of Nicholas King's translation of the Old Testament, contains Joshua, Judges, Ruth, 1 and 2 Samuel, 1 and 2 Kings, 1 and 2 Chronicles, Ezra and Nehemiah, plus the added bonus (since he is translating the LXX, or Septuagint, or Greek

translation of the Old Testament) of the little-known books of Tobit, Judith, Ester, 1 and 2 Maccabees. ... Back cover.

Cutting Edge Therapies for Cancer in the 21st Century - Pier Paolo Claudio 2014-04-23

Cancer is a broad group of diseases involving unregulated cell growth with elevated death rates as more people live in old age with mass lifestyle changes occurring in the world. The causes of cancer are diverse, complex, and still only partially understood. The chances of surviving the disease vary remarkably by the type and location of the malignancy and the extent of disease at the start of treatment. Early cancer detection is proving to be a valid approach. Cancer can be detected in a number of ways, including the presence of certain signs and symptoms, screening tests, or medical imaging. Cancer therapy is dynamically changing and revision and change in patient management is constant as our knowledge increases. Cancer is routinely treated with chemotherapy, radiation therapy and surgery. Tailored cancer targeted therapy is becoming an emerging objective of today. In this book, a constructive group of cancer research experts bring the reader their shared vision, to give an extensive and realistic view of individual tumors such as breast, oral, prostate, gastric, and neuroendocrine tumors. New and contemporary terms and concepts in genetics and epigenetics, diet, anticancer treatments, and anticancer drug delivery systems are introduced in this volume. This reference highlights present experimental strategies and key findings that enhance our understanding of cancer and of future therapies. This eBook is aimed at a broad audience of undergraduates, medical students, PhDs, cancer researchers, and also cancer patient families with the goal to conceive a curiosity about the subjects presented that will hopefully lead to further studies.

Cutting-Edge 3D Printing - Karen Latchana Kenney 2018

What if people could make toys, foods, or even body parts using a computer printer? They can! Modern programmers and scientists have figured out a way to make three-dimensional versions of almost anything they can design on a computer. This title covers the latest, greatest advances in 3D printing, from how it works to how it's used in homes, schools, and workplaces. Accessible language, up-to-date photos, and a high-interest STEM topic make this a great choice for eager and reluctant readers alike.

The Indian Textile Journal - 1924

The God of Old - Greg Forbes 2000-10-01

This book is a study of the parables unique to the Third Gospel, aiming in particular to establish a link between Luke's choice of these parables and his overall purpose in writing. In comparison to the synoptic kingdom parables, one distinguishing feature of the Lukan parables is their more personal portrait of the character and the nature of God himself. Luke's desire is to demonstrate to his readers, whoever they are, that in Christianity the realization of the Jewish hope has occurred. The parables promote this idea by offering both continuity (OT) and contrast (contemporary Judaism) in their portrait of God. Thus, as well as operating in a parenetic sense, the parables also help to legitimize Luke's argument regarding fulfillment.

Cutting-Edge Medicine - Connie Goldsmith 2007-01-01

Imagine that you have a deadly infection, and your doctor gives you medicine made from lizard spit. Or a dog attack destroys your face, so doctors peel it off and stitch on a transplant. Or you wake up from surgery only to find leeches feasting on you. Or to battle your cancer, doctors insert tiny tools that race through your blood stream to zap the tumor. Where are you? Ancient Egypt? Frankenstein's lab? Another planet? No, you're on Earth in the twenty-first century, and this is cutting-

edge medicine! This book explains the many amazing ways new medical techniques are helping people live longer, healthier lives

Cutting-Edge Decoupage - Nathalie Mornu 2007

Decoupage has always been one of the easiest, most effective ways to transform old, worn, or simply uninspired objects into one-of-a-kind masterpieces. And this cool, graphic guide gives the craft a fresh twist! Colorful and unabashedly contemporary, with innovative techniques and unexpected materials, these 30 projects end the decoupage doldrums. Every design delivers sophisticated results on such unusual surfaces as a discarded window and the blades of a table fan, and the unique embellishments include illustrations downloaded from the Internet; color photocopies of fabrics; and designs bleached into colored vellum. Retro fashion clippings transform a vintage hatbox into spectacular luggage fit for the most discriminating traveler. Ordinary children's chairs become punchy polka-dotted showpieces with a touch of paint and decoupage circles. Every effect is fantastic. "A Selection of the Crafter's Choice Book Club."

Perspectives on Israelite Wisdom - John Jarick

2015-12-03

This collection of essays examines the wisdom traditions of the Old Testament from a variety of angles. The slipperiness of the concept of 'wisdom literature', the transmission of 'wise' advice for living, rabbinic and patristic approaches to the Bible's wisdom traditions, and cutting-edge modern perspectives on such Old Testament books as Proverbs, Job, and Ecclesiastes are all to be found here. In the tradition of the renowned previous volumes from the Oxford Old Testament Seminar - King and Messiah in Israel and the Ancient Near East (1998), In Search of Pre-Exilic Israel (2004), Temple and Worship in Biblical Israel (2005), and Prophecy and Prophets in Ancient Israel (2010)-this new volume again brings the scholarship of the Oxford Seminar, here focused on the rich subject of Old Testament wisdom traditions, to an international readership.

Cutting Edge: The Siren's Song #1 - Francesco Dimitri 2020-11-11

Tomb Raider meets The League of Extraordinary Gentlemen in brand new series by renowned fantasy author and award-winning Italian artist. Brought together by a clandestine corporation, the world's greatest minds are set a challenge of epic proportions: the dodecaathlon. Unlikely alliances are made in order to fulfill the quest, and uncover the mysterious truth behind it all. But as the conspiracy is unveiled, how many will survive...?

Finding the Champion Within - Bruce Jenner 1999-04

One of the world's greatest athletes provides a plan, useful to anyone, for personal growth. Using the decathlon as a metaphor for development, Jenner offers a powerful success strategy--one that he has molded over a lifetime.

Lipid Droplets - H. Robert Yang 2013-10-04

This new volume of Methods in Cell Biology looks at lipid droplets LDs, covering sections on analyses of LDs in model systems, cell/tissue-specific analyses of LDs and imaging and in vitro analyses of LD biogenesis and growth. Chapters are written by experts in the field. With cutting-edge material, this comprehensive collection is intended to guide researchers of LDs for years to come. Covers sections on analyses of lipid droplets (LDs) in model systems, cell/tissue-specific analyses of LDs and imaging, and in vitro analyses of LD biogenesis and growth Chapters are written by experts in the field Cutting-edge material

The Edinburgh Encyclopædia; Conducted by David Brewster, L. L. D. ... with the Assistance of Gentlemen Eminent in Science and Literature. In Eighteen Volumes. Volume 1 [-18] - 1830

The Cutting Edge - Ace Collins 2013-10-15

Leslie Rhoads may have grown up in a small town but is on the verge of becoming a supermodel in the Big Apple, when the 24-year-old is chosen to grace the cover of Style magazine and star in the controversial Passion Nights' perfume ads. But before she can step into the spotlight, Leslie is assaulted by a drug gang and disfigured with a broken scotch bottle. Without her perfect face, she is lost and no amount of surgery can ever make her what she once was. Now trying to hide her face from the world, Leslie encounters more trouble as she seeks to rebuild her life: unrequited love, thoughts of suicide, and her assailant out to finish the job. Little does she know that a young girl named Angel will turn it all around, showing Leslie the joy and potential in life and the fact that love truly is blind.

Keeping the Cutting Edge - Harold H. Payson 1983

Harold H. "Dynamite" Payson is a professional boatbuilder who specializes in light plywood construction, though in the past he build traditional plank-on-frame craft. Most of his boats-among them the famed Gloucester Light Dory and the Instant Boat series-are from the board of Philip C. Bolger. Many of the prototypes of Bolger's small boats have been built by Payson as part of their continuing association. Dynamite is a retired lobster fisherman, a saw sharpener, and the proprietor of H.H.Payson & Co., which offers boatbuilding plans for sale to the average boatbuilder. He is the author of Instant Boats, How to Build the Gloucester Light Dory, Go Build Your Own Boat!, Build the New Instant Boats, and a number of magazine articles. He lives and works in South Thomaston, Maine.

K and W Guide to Colleges for Students with Learning Differences - Marybeth Kravets 2016

"353 schools with programs or services for students with ADHD or learning disabilities"--Cover.

The Cutting Edge - Charles James Heatley 1986

Photos depict aircraft carrier activities and are accompanied by comments by crewmembers, and information about aircraft

Leadership Development in Emerging Market Economies -

Alexandre Ardichvili 2017-01-01

This edited volume provides an overview of the current state and indigenous practices of leadership development (LD) in a select group of emerging market economies, including BRICS, Southeast and East Asia, Middle East, Eastern Europe, and Africa. While some authors focus exclusively on LD in the business sector, others discuss such topics as LD in higher education, the role of higher education institutions in leadership development for managers and executives, the role of religious institutions, and LD in the government and public sectors. Further, chapters on Brazil, Malaysia, Russia, Thailand, South Africa and South Korea include case studies of LD in individual companies. These cases and examples can be used in discussions of indigenous LD practices in courses on international and cross-cultural HRD, HRM, and leadership and organization development. Readers will benefit from this unique view of indigenous practices and perspectives from a variety of disciplinary backgrounds: HRD, HRM, and management and leadership studies. It is an essential read for academic audiences who recognize leadership development as a dominant trend both in developed and emerging economies.

Surface Metrology for Micro- and Nanofabrication - Wei Gao 2020-10-30

Surface Metrology for Micro- and Nanofabrication presents state-of-the-art measurement technologies for surface metrology in fabrication of micro- and nanodevices or components. This includes the newest general-purpose scanning probe microscopes, and both contact and non-contact surface profilers. In addition, the book outlines characterization and calibration techniques, as well as in-situ, on-machine, and in-process measurements for micro- and nanofabrication. Provides materials scientists and engineers with an informed overview of the state-of-the-art in surface metrology Helps readers select and design the optimized surface metrology systems and carry out proper surface metrology practices in the fabrication of micro/nano-devices and components Assesses the best techniques for repairing micro-defects
