Learn Data Mining Through Excel - Hong Zhou 2020-06-13

Use popular data mining techniques in Microsoft Excel to better understand machine learning methods. Software tools and programming language packages take data input and deliver data mining results directly, presenting no insight on working mechanics and creating a chasm between input and output. This is where Excel can help. Excel allows you to work with data in a transparent manner. When you open an Excel file, data is visible immediately and you can work with it directly. Intermediate results can be examined while you are conducting your mining task, offering a deeper understanding of how data is manipulated and results are obtained. These are critical aspects of the model construction process that are hidden in software tools and programming language packages. This book teaches you data mining through Excel. You will learn how Excel has an advantage in data mining when the data sets are not too large. It can give you a visual representation of data mining, building confidence in your results. You will go through every step manually, which offers not only an active learning experience, but teaches

you how the mining process works and how to find the internal hidden patterns inside the data. What You Will Learn Comprehend data mining using a visual step-by-step approach Build on a theoretical introduction of a data mining method, followed by an Excel implementation Unveil the mystery behind machine learning algorithms, making a complex topic accessible to everyone Become skilled in creative uses of Excel formulas and functions Obtain hands-on experience with data mining and Excel Who This Book Is For Anyone who is interested in learning data mining or machine learning, especially data science visual learners and people skilled in Excel, who would like to explore data science topics and/or expand their Excel skills. A basic or beginner level understanding of Excel is recommended.

Learn Excel 2016 Essential Skills with the Smart Method - Mike Smart
2018-01-17

This book is suitable for both Excel beginners and seasoned experts. In this Excel 2016 book you'll learn how to use and apply advanced Excel skills to construct a robust Excel business application that would be well beyond the powers of most advanced Excel users. Even if you only have very basic Excel skills, the book is designed in such a way that you'll be able to construct a complex, polished professional Excel 2016 application. In constructing this project you'll discover new and interesting ways to use many of Excel 2016's more powerful and complex features. This book will teach you best-practice when applying your Excel skills to large real-world projects. This book won't only teach you Excel skills. You'll also learn a best-practice design and development methodology that will stand you in good stead when working on future Excel projects. What you will learn Most Excel tutorials and reference books teach how to use individual Excel features but don't show how you can combine them into a robust and complex Excel application. In this book you will combine 80 key Excel skills to produce a single advanced Excel application. Here are just a few of the skills you'll use: Create a custom color set. Use custom formats. Use Spin Button and Check Box form controls. Define named ranges and named cells. Use the Name Manager to view, delete and edit range names. Create a drop-down list using a list validation. Use and understand

the practical use of over 20 Excel functions including VLOOKUP, COUNTIF, DAY, MONTH, DATE, IFERROR, CHAR, IF, IFERROR, LEN, MOD, ROW, TEXT and WEEKDAY. Understand date serial numbers. Understand precedence rules. Format date serial numbers using a custom format. Create a formula-driven conditional format. Use the conditional format Rules Manager. Calculate the correct date (in any year) for Martin Luther King Day, President's Day, Labor Day, Columbus Day, Thanksgiving Day, New Year's Day, Independence Day, Christmas Day and Veterans Day, Easter Sunday and Memorial Day. Use structured table references. Concatenate text. Calculate the phases of the moon using Synodic Months and the MOD function. Create user-friendly validation error messages. Use Smart Tags. Lock cells, hide columns, hide entire worksheets and protect worksheets to prevent users from making unwanted changes. Companies who have taken Smart Method courses include: AOL Time Warner, The United States Army, Daimler Chrysler, Motorola, HSBC, Barclays, American Express, Allied Irish Banks, Imperial Tobacco, Volvo, The BBC, British Petroleum, The Foreign and Commonwealth Office, Unilever, The Institute of Chartered Accountants, The Ministry of Defence, Keele University, Deutsche Bank, HBOS, Transport For London, The Performing Rights Society, Scottish Power, The Office of the Parliamentary Ombudsman, BAE Systems, RBS, The British Museum, The National Gallery, Pokerstars, Marks & Spencer, Virgin, O2, BMW... and many, many others.

Learn Excel 2019 Essential Skills with the Smart Method - Mike Smart 2018-12-14

This book is very, very different to any other computer book you have ever read. The Smart Method provides an entirely new and better way to learn Excel. Both IT professionals and absolute beginners will love this book because it avoids needless technical jargon and concisely explains everything you need in a simple, no-nonsense way.

Learn Excel 365 Essential Skills with The Smart Method - Mike Smart
2021-01-14

You will repeatedly hear the same criticism of most Excel books: "you have to already know Excel to understand the book". This book is different. If you have no previous exposure to Excel 365, and your only computer skill is using a web browser, you'll have absolutely no problems working through the lessons. Everything is concisely described in a way that absolutely any student, of any age or ability, can easily understand. This Essential Skills book makes it easy for absolutely anybody to very rapidly learn Excel 365 to a standard that will greatly impress most employers because it doesn't confuse by teaching skills that are not common in the workplace. Our Excel 365 Expert Skills book comprehensively teaches the rarer Excel skills that less than 10% of Excel users typically master (and many office workers will not have a need for). Here are some other reasons that you should choose this book to learn Excel 365: It covers the Excel 365 edition of Excel: This book is specifically written for Excel 365. Excel 365 has now evolved into a very different product than Excel 2019. It is not possible to learn Excel 365 features using an Excel 2019 book. It is up-to-date: This book is the fourth edition covering the new Excel 365 Jan 2021 semi-annual version. A new Excel 365 semi-annual version is released every six months (in January and July) and automatically updated to your computer. We then publish a new edition of this book to support the latest update. This means that new features are covered and the screen grabs will exactly match what you see on your screen. It can be very frustrating to try to learn Excel 365 using an out-of-date book. Smart Method books are #1 best sellers: Every Smart Method Excel book (and there have been twenty-two of them starting with Excel 2007) has been an Amazon best seller in its category. This provides you with the confidence that you are using a best-of-breed resource to learn Excel. It is the book of choice for teachers. As well as catering for those wishing to learn Excel by self-study, Smart Method books have long been the preferred choice for Excel teachers as they are designed to teach Excel and not as reference books. Books follow best-practice adult teaching methodology with clearly defined objectives for

each learning session and an exercise to confirm skills transfer. With single, self-contained lessons, the books cater for any teaching or self-learning period. Many learners have learned Excel by setting aside just a few minutes each day to complete a single lesson. Others have worked through the entire book in a single day. Companies who have taken Smart Method courses include: The United States Army, Daimler Chrysler, Time Warner, Motorola, HSBC, Barclays, American Express, Allied Irish Banks, Imperial Tobacco, Volvo, Unilever, BMW, Virgin, The BBC, British Petroleum, The Foreign and Commonwealth Office, The Institute of Chartered Accountants, The Ministry of Defence, Keele University, Deutsche Bank, HBOS, Transport For London, The Performing Rights Society, Scottish Power, The Office of the Parliamentary Ombudsman, BAE Systems, RBS, The British Museum, The National Gallery, Pokerstars, Virgin, O2, BMW... and many, many others.
