*Les pompiers pyromanes* - Pascal Boniface 2016-05-04

On remarque aujourd'hui sous le feu des projecteurs nombre de pseudo-intellectuels et autres "experts" qui, omniprésents dans les médias et sous couvert de combattre le racisme, nourrissent l'islamophobie et l'antisémitisme en France. En instrumentalisant ces thématiques à des fins personnelles et en ne mettant pas toutes les formes de discrimination sur le même plan, ils font le jeu des extrêmes. Pascal Boniface dessine ici sans concession le portrait de ces pompiers pyromanes qui mettent en danger les valeurs de la République.

*The Alawis of Syria* - Michael Kerr 2015-01-12

Throughout the turbulent history of the Levant the 'Alawis - a secretive, resilient and ancient Muslim sect - have aroused suspicion and animosity, including accusations of religious heresy. More recently they have been tarred with the brush of

political separatism and complicity in the excesses of the Assad regime, claims that have gained greater traction since the onset of the Syrian uprising and subsequent devastating civil war. The contributors to this book provide a complex and nuanced reading of Syria's 'Alawi communities -from loyalist gangs (Shabiha) to outspoken critics of the regime. Drawing upon wide-ranging research that examines the historic, political and social dynamics of the 'Alawi and the Syrian state, the current tensions are scrutinised and fresh insights offered. Among the themes addressed are religious practice, social identities, and relations to the Ba'ath party, the Syrian state and the military apparatus. The analysis also extends to Lebanon with a focus on the embattled 'Alawi community of Jabal Mohsen in Tripoli and state relations with Hizballah amid the current crisis.

**How Everything Can Collapse** - Pablo Servigne 2020-03-27

What if our civilization were to collapse? Not many centuries into the future, but in our own lifetimes? Most people recognize that we face huge challenges today, from climate change and its potentially catastrophic consequences to a plethora of socio-political problems, but we find it hard to face up to the very real possibility that these crises could produce a collapse of our entire civilization. Yet we now have a great deal of evidence to suggest that we are up against growing systemic instabilities that pose a serious threat to the capacity of human populations to maintain themselves in a sustainable environment. In this important book, Pablo Servigne and Raphaël Stevens confront these issues head-on. They examine the scientific evidence and show how its findings, often presented in a detached and abstract way, are connected to people's ordinary experiences - joining the dots, as it were, between the Anthropocene and our everyday lives. In so doing they provide a valuable guide that will help everyone make sense of the new and potentially catastrophic situation in which we now find ourselves. Today, utopia has changed sides: it is the utopians who believe that everything can continue as before, while realists put their energy into making a transition and building local resilience. Collapse is the horizon of our generation. But collapse is not the end - it's the beginning of our future. We will reinvent new ways of living in the world and being attentive to ourselves, to other human beings and to all our fellow creatures.

The Climate Coup - Mark Alizart 2021-05-20

Inaction by governments in the face of climate change is often attributed to a lack of political will or a denial of the seriousness of the situation, but as Mark Alizart argues in this provocative

book, we shouldn't exclude the possibility that part of the reluctance might be motivated by cynicism and even sheer evil: for some people, there are real financial and political benefits to be gained from the chaos that will ensue from environmental disaster. The climate crisis creates its winners - individuals who orchestrate environmental chaos and bet on the collapse of the world as they bet on declining share values. In the face of this veritable 'carbofascist' coup targeting humanity, modifying our behaviour as individuals won't suffice. We must train our critical attention on those financial and political actors who speculate on catastrophe and, in the light of this, we must rethink the strategy of ecological activism. This is a war to win, not a crisis to overcome.

**On Some Deficiencies in Our English Dictionaries** - Richard Chenevix Trench 2018-03-21

Excerpt from *On Some Deficiencies in Our English Dictionaries: Being the Substance of Two Papers, Read Before the Philological Society, Nov; 5, and Nov; 19, 1857* Spong' is now a Suffolk, or, it may be, an East Anglian, word. Halliwell deals with it as thus provincial, and rightly describes it as an irregular narrow and projecting part of a field corresponding, therefore, very nearly to the 'sling, ' 'slang, ' or 'slinget, ' of some of our Midland counties. Our Dictionaries know nothing of it; nor should they take note of it on the score of its present provincial existence; but they should on the ground that it once had free course in our literary English, being often used by Fuller. Once more, take the verb 'to hazle.' Halliwell and Wright explain it rightly as the first process in drying washed linen, and assign to it also East Anglia as the region where it is current; but it was once not East Anglian, but English, as a noble passage, of which I cite a few words, from a great but little-known divine, will prove }z Then, once more, the verb to flait, ' signifying to scare, to terrify, and standing in the same relation to 'flit' that fugare' does to fugere' - this may be, as our glossaries tell us, a word of the North Country now; but it was

a word of the whole country once, and as such should have found place not in our glossaries alone, but in our Dictionaries no less.<sup>3</sup> To hopple' (the word is not in Richardson), Todd gives as a northern word, and without example. Supposing he was right in saying so, he had no business to give it at all; but he is not; for it is employed by Henry More.' Dozzled' our archaic glossaries assign to the Eastern Counties. **The Society of Equals** - Pierre Rosanvallon 2013-11-15  
Society's wealthiest members claim an ever-expanding share of income and property--a true counterrevolution, says Pierre Rosanvallon, the end of the age of growing equality launched by the American and French revolutions. Just as significant, driving this contemporary inequality has been a loss of faith in the ideal of equality itself.

**Constructive Ergonomics** - Pierre Falzon 2014-09-26  
The goal for ergonomics has always been to adapt work, work environments, and machines to humans. But is this goal still sufficient? Does it satisfy the needs of the individual or of societies and organizations as they operate now? Constructive Ergonomics provides an answer to these questions. Rooted both in the academic world and in the world of p

**Next American Nation** - Michael Lind 2010-06-15

Are we now, or have we ever been, a nation? As this century comes to a close, debates over immigration policy, racial preferences, and multiculturalism challenge the consensus that formerly grounded our national culture. The question of our national identity is as urgent as it has ever been in our history. Is our society disintegrating into a collection of separate ethnic enclaves, or is there a way that we can forge a coherent, unified identity as we enter the 21st century? In this "marvelously written, wide-ranging and thought-provoking"\* book, Michael Lind provides a comprehensive revisionist view of the American past and offers a concrete proposal for nation-building reforms to strengthen the American future. He shows that the forces of nationalism and the ideal of a trans-racial melting pot need not be in conflict with each other, and he provides a practical agenda for a liberal nationalist revolution that would combine a new color-blind liberalism in civil rights with practical measures for reducing class-based barriers to racial integration. A stimulating critique of every kind of orthodox opinion as well as a vision of a new "Trans-American" majority, The Next American Nation may forever change the way we think and talk about American identity. \*New York Newsday

**After Charlie Hebdo** - Gavan Titley 2017-11-15  
As the world looked on in horror at the Paris terror attacks of January and November 2015, France found itself at the centre of a war that has split across nations and continents. The attacks set in motion a steady creep towards ever more repressive state surveillance, and have fuelled the resurgence of the far right across Europe and beyond, while leaving the left dangerously divided. These developments raise profound questions about a number of issues central to contemporary debates, including the nature of national identity, the limits to freedom of speech, and the role of both traditional and social media. After Charlie Hebdo brings together an international range of scholars to assess the social and political impact of the Paris attacks in Europe and

beyond. Cutting through the hysteria that has characterised so much of the initial commentary, it seeks to place these events in their wider global context, untangling the complex symbolic web woven around 'Charlie Hebdo' to pose the fundamental question - how best to combat racism in our supposedly 'post-racial' age?

[Sunken City](#) - Marta Barone 2022-05-12

'A very powerful and moving book' Margaret Drabble 'What an extraordinary voice! I was captivated from the first page and I know Marta's unique voice will stay with me for a long time. Bravissima!' Tomasz Jedrowski, author of *Swimming in the Dark* Newly-bereaved, bookish and lonely in Turin, a young woman sets out to chronicle her father's secret lives - and her struggle to accept his loss. She is startled to discover that the gentle, mercurial doctor was sentenced to jail in 1986 for membership of an armed band. Her father, L.B., lived through the Years of Lead, a time of unrest when extreme factions of left and right took hostages, set bombs and murdered their countrymen. Unable to move on before she can understand her family's past, she goes in search of him - and ultimately of herself too - the only way she knows how, by reading everything she can ... Through her search for the truth, a very different picture starts to emerge.

*Shift Or Rift* - Gustav Lindstrom 2003

**City of Man** - Michael Gerson 2010-10-01

An era has ended. The political expression that most galvanized evangelicals during the past quarter-century, the Religious Right, is fading. What's ahead is unclear. Millions of faith-based voters still exist, and they continue to care deeply about hot-button issues like abortion and gay marriage, but the shape of their future political engagement remains to be formed. Into this uncertainty, former White House insiders Michael Gerson and Peter Wehner seek to call evangelicals toward a new kind of political engagement -- a kind that is better both for the church and the country, a kind that cannot be co-opted by either political

party, a kind that avoids the historic mistakes of both the Religious Left and the Religious Right. Incisive, bold, and marked equally by pragmatism and idealism, Gerson and Wehner's new book has the potential to chart a new political future not just for values voters, but for the nation as a whole.

**Assessing Maritime Disputes in East Asia** - Barthelemy Courmont 2017-04-28

Combining practical and theoretical approaches, this book addresses the political, legal and economic implications of maritime disputes in East Asia. The maritime disputes in East Asia have multiplied over the past few years, in parallel with the economic growth of the countries in the region, the rise of nationalist movements, fears and sometimes fantasies regarding the emergence of the People's Republic of China (PRC) as a global power, increasing military expenses, as well as speculations regarding the potential resources in various disputed islands. These disputes, however, are not new and some have been the subject of contention and the cause of friction for decades, if not centuries in a few cases. Offering a robust analysis, this volume explores disputes through the different lenses of political science, international law, history and geography, and introduces new approaches in particular to the four important disputes concerning Dokdo/Takeshima,

Senkaku/Diaoyu, Paracels and Spratlys. Utilising a comparative approach, this book identifies transnational trends that occur in the different cases and, therefore, at the regional level, and aims to understand whether the resurgence of maritime disputes in East Asia may be studied on a case by case basis, or should be analysed as a regional phenomenon with common characteristics. This book will be of interest to students of Asian Politics, Maritime Security, International Security, Geopolitics and International Relations in general.

1001 Battles That Changed the Course of History - R. G. Grant

**Parasuicide** - Norman Kreitman 1977

*Image and Reality of the Israel-Palestine Conflict* - Norman G. Finkelstein 2016-03-15

This acclaimed study surveys the dominant popular and scholarly images of the Israel-Palestine conflict. Finkelstein opens with a theoretical discussion of Zionism, locating it as a romantic form of nationalism that assumed the bankruptcy of liberal democracy. He goes on to look at the demographic origins of the Palestinians, with particular reference to the work of Joan Peters, and develops critiques of the influential studies of both Benny Morris and Anita Shapira. Reviewing the diplomatic history with Aban Eban's oeuvre as his foil, Finkelstein closes by demonstrating that the casting of Israel as the innocent victim of Arab aggression in the June 1967 and October 1973 wars is not supported by the documentary record. This new edition critically reexamines dominant popular and scholarly images in the light of the current failures of the peace process.

The Economy of Africa - Philippe Hugon 2004

*La France, le Rwanda et le génocide des Tutsi (1990-1994)* - Vincent Duclert 2021

**DEFEATING JIHADIST TERRORISM** - Jacques Baud  
2022-11-07

Since the early 1990s, terrorism and its victims have increased exponentially. Without any action strategy or exit solution, through political and military incompetence, stupidity and ideological blindness, Western interventions have only contributed to its development. We eliminate terrorists, but not terrorism. The solution lies in a more holistic, more subtle, more intelligent and less dogmatic approach. Terrorism is not an ideology. It is a method that takes many forms, including jihadist terrorism. Each form of terrorism is fought with a specific strategy. Based on the original texts of jihadist strategists as well as on their own analyses of attacks in France, Belgium, Great Britain and the United States, Jacques Baud explains the reasons for Western failure. He uses the analyses of Western intelligence services to decipher the mechanisms of jihadist terrorism, in order to extract strategies of action likely to avoid it or to fight it effectively and durably. The author is a former head of Swiss strategic intelligence and former head of UN peace operations doctrine. In the course of his missions in Africa and Central Asia, the author has had several encounters with jihadists in the field.

**Memoirs of War, 1914-15** - Marc Bloch 1989-01-27

Great historians have seldom described the notable events in which they themselves participated. Marc Bloch - author of *Feudal Society*, the classic study of medieval social systems and co-founder of the influential French historical journal *Annales* - is an exception. In his powerful memoir *The Strange Defeat*, he analysed the fall of France in 1940 from the viewpoint of combatant as well as historian. And in his *Memoirs of War, 1914-15*, here in its first English translation (originally published in hard covers in 1980 by Cornell University Press), Bloch left a

keen and affecting account of his earliest experience of war. Carole Fink's introduction includes a brief biography of Bloch, discusses the effect of the war upon his intellectual development, and assesses his achievements as a historian. Though Bloch survived the savage trench warfare of the First World War, he was shot by a Gestapo firing squad in 1944 for his participation in the Resistance. Trenchant, inspiring, and tersely written, *Memoirs of War, 1914-15* is a monument to a great scholar and fierce patriot.

[La simulation numérique](#) - Jean-François Sigrist 2019-01-01

La modélisation numérique s'impose comme une technique d'importance majeure. Elle participe fortement à l'innovation du secteur industriel en répondant aux objectifs de maîtrise des risques techniques et de performance économique. Si les cursus d'ingénieurs intègrent aujourd'hui des formations qui lui sont dédiées, la simulation numérique reste cependant peu connue de certains secteurs économiques, et moins encore du grand public. Elle change pourtant la pratique de nombreuses disciplines scientifiques et dialogue avec l'informatique, la science des données et l'intelligence artificielle. Agrémenté d'une riche iconographie, d'exemples concrets et d'entretiens, cet ouvrage didactique examine les principes et les enjeux de la simulation numérique, cet « art de la prédiction » mal connu.

*Pioneer Europe?* - Laure Delcour 2008

This study looks at the European Neighbourhood Policy (ENP) as a capability test for the European Union (EU) to become a coherent and influential international actor. The resulting picture is an ambivalent EU, experimenting policies with civilian means rather than pursuing a clearly defined finalité. Prefaced by Jacques Rupnik, the book gathers empirical and theoretical contributions to analyze the intermingled policy ideas, actors, and levels of the ENP. It will be of interest to students and scholars of European studies, international relations, and foreign policy analysis. \* "a most valuable contribution to our understanding

of ENP as a defining moment for the future of the European project and EU's role as an actor on the international scene." - Jacques Rupnik, research director, CERI/Sciences Po Paris  
*It's Time to Fight Dirty* - David Faris 2018-04-10

It's time to do more than protest The American electoral system is clearly falling apart—as evidenced by the 2016 presidential election. In *It's Time to Fight Dirty*, David Faris offers accessible, actionable strategies for American institutional reform which don't require a constitutional amendment, and would have a lasting impact on our future. With equal amounts of playful irreverence and persuasive reasoning, Faris describes how the Constitution's deep democratic flaws constantly put progressives at a disadvantage, and lays out strategies for "fighting dirty" though obstructionism and procedural warfare: establishing statehood for D.C. and Puerto Rico; breaking California into several states; creating a larger House of Representatives; passing a new voting rights act; and expanding the Supreme Court. The Constitution may be the world's most difficult document to amend, but David Faris argues that many of America's democratic failures can be fixed within its rigid confines—and, at a time when the stakes have never been higher, he outlines a path for long-term, progressive change in the United States.

*China's Offensive in Europe* - Philippe Le Corre 2016-05-17

A portrait of China's new economic passion toward Europe. For years China's international investment interests focused on a search for natural resources in Africa, Asia, and Latin America. Recently China's focus has shifted to Europe as well as the United States, and to new fields as diverse as real estate, energy, hospitality, transportation, and heavy industry. Chinese foreign investment is expected to grow throughout Europe in the years to come. For instance, the financial crisis centered in Greece and the fall of the euro have helped China and some of its corporations create a new partnership within the European Union, working to expand the country's power through finance and infrastructure. *China's Offensive in Europe* studies the trends, sectors, and target countries of Chinese investments in Europe. It looks at cases of outbound investment trajectories and journeys by some key Chinese private and state-owned companies. It also takes a look at European perceptions of China, a country with a very different history and very different traditions from the Western world. Philippe Le Corre and Alain Sepulchre examine how China's presence in Europe can serve as a benchmark to other developed economies—especially the United States, which is also seeing a rise in Chinese investments.

**Je t'aimais bien tu sais** - Pascal Boniface 2017-01-26

La France, au sommet de la popularité internationale au début du xxi<sup>e</sup> siècle, apparaît aujourd'hui comme ayant perdu de sa singularité et de son attractivité. Comment en est-on arrivé là ? Sa politique étrangère serait-elle rentrée dans le rang ? Ses débats internes renverraient-ils, en dehors de ses frontières,

l'image d'un pays intolérant ? Pascal Boniface va à contre-courant des vents dominants et démontre pourquoi il est nécessaire et comment il est possible de redorer le blason de la nation France. Pascal Boniface (@PascalBoniface) est le directeur et fondateur de l'IRIS (Institut de relations internationales et stratégiques ; [www.iris-france.org](http://www.iris-france.org) ; @InstitutIRIS), l'un des principaux think tanks français de géopolitique. Il est enseignant à l'Institut d'études européennes de l'université Paris-VIII. Il a rédigé plus d'une soixantaine d'ouvrages sur les questions stratégiques.

**Translation and Meaning** - Marcel Thelen 2016

**Fraud and Carbon Markets** - Marius-Christian Frunza 2013-04-17

The VAT Carousel Fraud has seriously undermined the financial integrity of the European Union Emissions Trading Scheme (EU ETS). This timely book is the first to give an overview of fraud in the carbon market. Written by a former broker, it presents unique material on the carbon fraud mechanics and analyses the missing trader fraud (VAT fraud) on European carbon allowances markets with a focus on financial and organised crime issues. *Fraud and Carbon Markets: The Carbon Connection* assesses the weaknesses of the Kyoto Protocol and environmental markets, using statistics as a forensic tool on the capital markets. It describes specific cases, the court investigations and various mechanisms. It addresses issues of money laundering and international fraud on capital markets, such as stock manipulation, by exploring the financial mechanisms of the fraud, their impact on the market behaviour and the consequences on their econometric features. Researchers and students in climate change policy, environmental finance, financial law, organised

crime, forensic statistics, financial regulation and risk management as well as financial regulators and policy makers will find this book of great interest.

**Vaincre le terrorisme djihadiste** - Jacques Baud 2022-11-07  
Il y a trente ans (soit avant la première guerre en Irak), environ 500 attentats faisaient 350 morts par an. Aujourd'hui, après d'interminables guerres contre le terrorisme, le nombre d'attentats a été multiplié par 30 et le nombre de victimes par 100. Partout où nos forces sont engagées, le terrorisme se développe : soit nous déchaînons des rivalités communautaires (comme en Libye et dans le Sahel), soit nous cherchons à renverser des gouvernements (comme en Syrie ou en Irak) soit nous générons des mouvements de résistance (comme dans le Sahel et en Afghanistan). En se basant sur les textes originaux des stratèges du terrorisme djihadiste, sur les analyses après action établies par l'État Islamique lui-même après les attentats en France, en Grande-Bretagne et aux États-Unis, le livre examine la problématique du terrorisme et du djihadisme afin d'en expliquer les mécanismes, d'en extraire des stratégies d'action et de vaincre ce fléau. Jacques Baud a été membre du renseignement stratégique suisse. Spécialiste des pays de l'Est et chef de la doctrine des opérations de la paix des Nations Unies, il a été engagé dans des négociations avec les plus hauts responsables de l'armée et du renseignement russes juste après la chute de l'URSS. Au sein de l'OTAN, il a suivi la crise ukrainienne de 2014 puis a participé à des programmes d'assistance à l'Ukraine. Auteur de *L'Affaire Navalny*, *Poutine : maître du jeu ?* et *Operation Z* aux éditions Max Milo.

*Les pompiers pyromanes* - Pascal Boniface 2015-06-25  
Il faut combattre avec la même vigueur toutes les formes de

racisme. La lutte contre l'islamophobie passe par la lutte contre l'antisémitisme. La lutte contre l'antisémitisme passe par la lutte contre l'islamophobie. C'est justement ce que ne font pas les pompiers pyromanes. Ils contribuent à dresser les communautés les unes contre les autres tout en mettant en accusation ceux qui réclament des droits égaux pour tous les enfants de la République. Comment expliquer l'omniprésence médiatique de quelques pseudo-intellectuels, journalistes, experts, dont l'imposture a été maintes fois démontrée ? Pascal Boniface met ici à nu ces pompiers pyromanes et nous révèle comment ils instrumentalisent les maux qu'ils prétendent combattre afin de servir leurs propres intérêts. Un texte choc et pragmatique pour déciller les yeux de chacun sur ces personnalités qui contribuent à dresser les communautés les unes contre les autres. Pascal Boniface, fondateur et directeur de l'IRIS (Institut de Relations Internationales et Stratégiques) enseigne à l'Institut d'études européennes de l'Université Paris 8 et est auteur d'une cinquantaine d'ouvrages dont *Les intellectuels faussaires* (Éditions Jean-Claude Gawsewitch, 2011).

**Brother Tariq** - Caroline Fourest 2010-06

The name of Tariq Ramadan is well known in the West. Thanks to his urbane manner and articulate way of expressing himself - in a number of languages - this Swiss-born academic is a regular contributor to television and radio features dealing with Islam (and Islamism) and the West. In England, his reputation as a "moderate" has won him praise - and even an invitation from the Prime Minister to serve on the government's task force on preventing extremism. Meanwhile, as the grandson of Hassan al-Banna, founder of the Muslim Brotherhood, Ramadan enjoys a

certain status in Islamic circles - a kind of ambassador for his grandfather's brand of political Islam. So who is the real Tariq Ramadan and what does he stand for? In this incisive and insightful study of the man, well-known French writer and journalist Caroline Fourest dissects the public pronouncements of Tariq Ramadan. Drawing on his numerous books, articles and speeches as sources, she demonstrates with chilling clarity that the West has been beguiled by Ramadan's doublespeak. Tariq Ramadan is slippery. He says one thing to his faithful Islamist followers and something else entirely to his Western audience. His choice of words, the formulations he uses - even his tone of voice - vary, chameleon-like, according to his audience. In most people, this would be merely funny or irritating, but Tariq Ramadan is too influential a figure to be dismissed so lightly. Caroline Fourest does an incalculable service. In this long-overdue English translation of *Brother Tariq* she proves, once and for all, that Tariq Ramadan is not to be trusted. Ramadan has been portrayed as the Martin Luther King of Islam. This study reveals that he is a far more sinister character at the forefront of a militant and reactionary Islam.

[An Imaginary Racism](#) - Pascal Bruckner 2018-11-26

'Islamophobia' is a term that has existed since the nineteenth century. But in recent decades, argues Pascal Bruckner in his

controversial new book, it has become a weapon used to silence criticism of Islam. The term allows those who brandish it in the name of Islam to 'freeze' the latter, making reform difficult. Whereas Christianity and Judaism have been rejuvenated over the centuries by external criticism, Islam has been shielded from critical examination and has remained impervious to change. This tendency is exacerbated by the hypocrisy of those Western defenders of Islam who, in the name of the principles of the Enlightenment, seek to muzzle its critics while at the same time demanding the right to chastise and criticize other religions. These developments, argues Bruckner, are counter-productive for Western democracies as they struggle with the twin challenges of immigration and terrorism. The return of religion in those democracies must not be equated with the defence of fanaticism, and the right to religious freedom must go hand in hand with freedom of expression, an openness to criticism, and a rejection of all forms of extremism. There are already more than enough forms of racism; there is no need to imagine more. While all violence directed against Muslims is to be strongly condemned and punished, defining these acts as 'Islamophobic' rather than criminal does more to damage Islam and weaken the position of Muslims than to strengthen them.
