How to Read Literature Like a Professor Revised - Thomas C. Foster
2014-02-25

A thoroughly revised and updated edition of Thomas C. Foster's classic guide—a lively and entertaining introduction to literature and literary basics, including symbols, themes, and contexts—that shows you how to make your everyday reading experience more rewarding and enjoyable. While many books can be enjoyed for their basic stories, there are often deeper literary meanings interwoven in these texts. *How to Read Literature Like a Professor* helps us to discover those hidden truths by looking at literature with the eyes—and the literary codes—of the ultimate professional reader: the college professor. What does it mean when a literary hero travels along a dusty road? When he hands a drink to his companion? When he's drenched in a sudden rain shower? Ranging from major themes to literary models, narrative devices, and form, Thomas C. Foster provides us with a broad overview of literature—a world where a road leads to a quest, a shared meal may signify a communion, and rain, whether cleansing or destructive, is never just a shower—and shows us how to make our reading experience more enriching, satisfying, and fun. This revised edition includes new chapters, a new preface, and a new epilogue, and incorporates updated teaching points that Foster has developed over the past decade.

Mathematics for Machine Learning - Marc Peter Deisenroth 2020-04-23
The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a

minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

Marcan Priority Without Q - John C. Poirier 2015-02-26

This book discusses the composition of the synoptic gospels from the perspective of the Farrer hypothesis, a view that posits that Mark was written first, that Matthew used Mark as a source, and that Luke used both Mark and Matthew. All of the articles in the volume are written in support of the Farrer hypothesis, with the exception of the final chapter, which criticizes these articles from the perspective of the reigning Two-Source theory. The contributors engage the synoptic problem with a more refined understanding of the options set before each of the evangelists pointing towards a deepened understanding of how works were compiled in the first and early second centuries CE. The contributors include Andris Abakuks, Stephen Carlson, Eric Eve, Mark Goodacre, Heather Gorman, John S. Kloppenborg, David Landry, Mark Matson, Ken Olson, Michael Pahl, Jeffrey Peterson, and John C. Poirier.

Composition and Rhetoric for the Four Years of High School and the First Year of College - Charles Elbert Rhodes 2013-09

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 edition. Excerpt: ... CHAPTER IX EXPOSITION Exposition is explanation. It will help to appreciate the importance of this form of discourse if we notice how commonly it is used. We at once think of textbooks and works on science and philosophy as expository. But such works constitute only a small part of expository literature. Even the story abounds in explanations of situations, in reflections upon the actions of the characters, and in interpretations of their actions and their sayings. Newspaper editorials are wholly expository, while fully half of what we call "news" is of the same class. When the traveling salesman and the clerk behind the counter attempt to sell goods, they use exposition; when the office clerks write business letters they are likewise expository. The preacher, the lecturer, the teacher, and the lawyer, all use more expository discourse than of all the other kinds combined. Even in ordinary conversation the same holds true. Whenever one answers questions beginning with "how" or "why," he uses exposition. It is the most practical form of discourse. The nature of exposition will be better understood if we compare it with the other forms of discourse. Narration deals with things in motion and in terms of time; description deals largely with things at rest, and in terms of space. Narration and description both deal with things that can be seen, heard, smelled, touched, and emotionally fe

A brief, flexible, and innovative alternative to the standard rhetorics, *Involved* offers a fresh approach to the traditional activities of undergraduate writing and teaches students that a successful education depends on the student's active involvement in reading and writing carefully, seeking meaning in assigned work, and sharing ideas with teachers and others.

Secondary Textbook Review - 1988
This book is intended as a resource for teachers and curriculum developers who select textbooks for secondary English courses. It includes a compilation of 32 factual textbook reviews obtained from the application of a review instrument, which was based on the California "Model Curriculum Standards: Grades Nine through Twelve, English Language Arts" and the "English-Language Arts

Framework for California Public Schools: Kindergarten through Grade Twelve." The instrument described in the book was applied to selected English composition/grammar and reading/literature textbooks. The book suggests that the resulting reviews can be used by teachers as a screening device to reduce the number of books they review and pilot studies they conduct; thus educators will have more time to do in-depth reviews of two or three textbooks which appear to match their course requirements and their students' academic needs. The book also states that the review instrument can be adapted by districts to reflect their own English objectives and test results. Every review in the book includes two parts and a publisher's description (which appears in the Appendix)--a section which depicts the extent to which the emphasis on content and process is given to each of the topics in the textbooks reviewed, and a section which includes topics on content and processes which might be found only in teachers' editions. The book does not make assessments regarding the quality of the books reviewed, but rather provides information which teachers may find useful in making quality judgments and selecting specific textbooks for English programs.
