Fragrant - Mandy Aftel 2014-10-16

Winner of the 2016 Perfumed Plume Award The “Alice Waters of American natural perfume” (indieperfume.com) and author of the Art of Flavor celebrates our most potent sense, through five rock stars of the fragrant world Mandy Aftel is widely acclaimed as a trailblazer in natural perfumery. Over two decades of sourcing the finest aromatic ingredients from all over the world and creating artisanal fragrances, she has been an evangelist for the transformative power of scent. In *Fragrant*, through five major players in the epic of aroma, she explores the profound connection between our sense of smell and the appetites that move us, give us pleasure, make us fully alive. Cinnamon, queen of the Spice Route, touches our hunger for the unknown, the exotic, the luxurious. Mint, homegrown the world over, speaks to our affinity for the familiar, the native, the authentic. Frankincense, an ancient incense ingredient, taps into our longing for transcendence, while ambergris embodies our unquenchable curiosity. And exquisite jasmine exemplifies our yearning for beauty, both evanescent and enduring. In addition to providing a riveting initiation into the history, natural history, and philosophy of

scent, *Fragrant* imparts the essentials of scent literacy and includes recipes for easy-to-make fragrances and edible, drinkable, and useful concoctions that reveal the imaginative possibilities of creating with—and reveling in—aroma. Vintage line drawings make for a volume that will be a treasured gift as well as a great read.

Perfumes - Luca Turin 2010-08-06

'I've long wished perfumery to be taken seriously as an art, and for scent critics to be as fierce as opera critics, and for the wearers of certain "fragrances" to be hissed in public, while others are cheered. This year has brought *Perfumes: The Guide* by Luca Turin and Tania Sanchez, which I breathed in, rather than read, in one delighted gulp.' Hilary Mantel, *Guardian* *Perfumes: The Guide* is the culmination of Turin's lifelong obsession and rare scientific flair and Sanchez's stylish and devoted blogging about every scent that she's ever loved and loathed. Together they make a fine and utterly persuasive argument for the unrecognised craft of perfume-making. Perfume writing has certainly never been this honest, compelling or downright entertaining.

Perfume Legends II - Michael Edwards 2019-09-24

Essence and Alchemy - Mandy Aftel 2011-04-01

An artisan perfumer reveals a lost art and its mysterious, sensual history. For centuries, people have taken what seems to be an instinctive

pleasure in rubbing scents into their skin. Perfume has helped them to pray, to heal, and to make love. And as long as there has been perfume, there have been perfumers, or rather the priests, shamans, and apothecaries who were their predecessors. Yet, in many ways, perfumery is a lost art, its creative and sensual possibilities eclipsed by the synthetic ingredients of which contemporary perfumes are composed, which have none of the subtlety and complexity of essences derived from natural substances, nor their lush histories. *Essence and Alchemy* resurrects the social and metaphysical legacy that is entwined with the evolution of perfumery, from the dramas of the spice trade to the quests of the alchemists to whom today's perfumers owe a philosophical as well as a practical debt. Mandy Aftel tracks scent through the boudoir and the bath and into the sanctums of worship, offering insights on the relationship of scent to sex, solitude, and the soul. Along the way, she imparts instruction in the art of perfume compositions, complete with recipes, guiding the reader in a process of transformation of materials that continues to follow the alchemical dictum *solvo et coagula* (dissolve and combine) and is itself aesthetically and spiritually transforming.

The Company I Keep - Leonard A. Lauder 2020-11-17

In his much-anticipated memoir, *The Company I Keep: My Life in Beauty*, Chairman Emeritus and former CEO of The Estée Lauder Companies Leonard A. Lauder shares the business and life lessons he learned as well as the adventures he had while helping transform the mom-and-pop business his mother founded in 1946 in the family kitchen into the beloved brand and ultimately into the iconic global prestige beauty company it is today. In its infancy in the 1940s and 50s, the company comprised a handful of products, sold under a single brand in just a few prestigious department stores across the United States. Today, The Estée Lauder Companies constitutes one of the world's leading manufacturers and marketers of prestige skin care, makeup, fragrance and hair care products. It comprises more than 25 brands, whose products are sold in over 150 countries and territories. This growth and success was led by Leonard A. Lauder, Estée Lauder's oldest son, who envisioned and

effected this expansion during a remarkable 60-year tenure, including leading the company as CEO and Chairman. In this captivating personal account complete with great stories as only he can tell them, Mr. Lauder, now known as The Estée Lauder Companies' "Chief Teaching Officer," reflects on his childhood, growing up during the Great Depression, the vibrant decades of the post-World War II boom, and his work growing the company into the beauty powerhouse it is today. Mr. Lauder pays loving tribute to his mother Estée Lauder, its eponymous founder, and to the employees of the company, both past and present, while sharing inside stories about the company, including tales of cutthroat rivalry with Charles Revson of Revlon and others. The book offers keen insights on honing ambition, leveraging success, learning from mistakes, and growing an international company in an age of economic turbulence, uncertainty, and fierce competition.

The Perfume Handbook - N. Groom 2012-12-06

In 1948 I was posted, as a Political Officer, to a remote part of south-west Arabia on the edge of the great desert called the Empty Quarter. In valleys made fertile by seasonal flood-waters lay the remains of an ancient civilization. I found inscriptions and the ruin sites of towns, palaces and temples. Almost buried under the sand dunes were the tumbled walls of a great city. From here, two thousand years before, huge camel caravans had trudged their way along 1600 miles of burning sand and rocks to Petra and Gaza, burdened with a most precious cargo - frankincense, myrrh and other perfume materials for the courts, temples and perfume shops of Rome. My book *Frankincense and Myrrh* delved into the details of this romantic trade and led to a broader interest in the perfumes of ancient times. Then, researching on behalf of a perfume house into the Arab contribution to perfumery, I came across the collection of perfume recipes assembled by the Arab philosopher-scientist Yaqub al-Kindi, which have never been translated into English (some, which I have translated myself, are now included in an appendix to this book). I realized that in that work I had found key evidence to demonstrate how the medieval Arab perfume makers had been the bridge in perfume history between ancient and modern times. Perfumery

could now be seen as an art with a continuous history of development since the dawn of civilization.

Select Pieces - Benjamin Franklin 1804

Perfumery - Steve Van Toller 2013-04-17

THE SENSE OF SMELL The nose is normally mistakenly assumed to be the organ of smell reception. It is not. The primary function of the nose is to regulate the temperature and humidity of inspired air, thereby protecting the delicate linings of the lungs. This is achieved by the breathed air passing through narrow passageways formed by three nasal turbinates in each nostril. The turbinates are covered by spongy vascular cells which can expand or contract to open or close the nasal pathways. The olfactory receptors, innervated by the 1st cranial nerve, are located at the top of the nose. There are about 50 million smell receptors in the human olfactory epithelia, the total size of which, in humans, is about that of a small postage stamp, with half being at the top of the left and half at the top of the right nostril. The receptive surfaces of olfactory cells are ciliated and extend into a covering layer of mucus. There is a constant turnover of olfactory cells. Their average active life has been estimated to be about 28 days.

Neurobiology of Sensation and Reward - Jay A. Gottfried 2011-03-28

Synthesizing coverage of sensation and reward into a comprehensive systems overview, Neurobiology of Sensation and Reward presents a cutting-edge and multidisciplinary approach to the interplay of sensory and reward processing in the brain. While over the past 70 years these areas have drifted apart, this book makes a case for reuniting sensation and reward by highlighting the important links and interface between the two. Emphasizing the role of reward in reinforcing behaviors, the book begins with an exploration of the history, ecology, and evolution of sensation and reward. Progressing through the five senses, contributors explore how the brain extracts information from sensory cues. The chapter authors examine how different animal species predict rewards, thereby integrating sensation and reward in learning, focusing on effects in anatomy, physiology, and behavior. Drawing on empirical research, contributors build on the themes of the book to present insights into the human sensory rewards of perfume, art, and music, setting the scene for further cross-disciplinary collaborations that bridge the neurobiological interface between sensation and reward.

To fill this gap, a group of scientists, types from the chemical point of view, to present to the reader the panorama of those molecules that stimulate the sense of smell. To make the picture complete, the chapters that are strictly chemical in content are preceded by several that introduce the topics of the physiology of the olfactory system, the current hypotheses on the mechanism of the sense of smell, and the structure-odor relationships in odorous molecules. There is also a treatment of analytical techniques which have become important to fragrance chemical research and testing.

The Perfume Lover - Denyse Beaulieu 2013-03-19

The Perfume Lover is a candid personal account of the process of composing a fragrance, filled with sensual scent descriptions, sexy tidbits, and historical vignettes. What if the most beautiful night in your life inspired a perfume? When Denyse Beaulieu was growing up near Montreal, perfume was forbidden in her house, spurring a childhood curiosity that became an intellectual and sensual passion. It is this passion she pursued all the way to Paris, where she now lives, and which led her to become a respected fragrance writer. But little did she know that it would also lead her to achieve a perfume lover's wildest dream: When Denyse tells famous perfumer Bertrand Duchaufour at L'Artisan Parfumeur of a sensual night spent in Seville under a blossoming orange tree, wrapped in the arms of a beautiful man, the story stirs his imagination and together they create a scent that captures the essence of that night. As their unique creative collaboration unfolds, the perfume-in-progress conjures intimate memories, leading Beaulieu to make sense of her life through scents. Throughout the book, she weaves the evocative history of perfumery into her personal journey, in an intensely passionate voice: the masters and the masterpieces, the myths and the myth-busting, down to the molecular mysteries that weld our flesh to flowers. Now, just to set your nostrils aquiver: Séville à l'aube is an orange blossom oriental with zesty, green and balsamic effects, with notes of petitgrain, petitgrain citronnier, orange blossom, beeswax, incense, and lavender, and is now available at fragrance outlets in the U.S.

The Restoration of Engravings, Drawings, Books, and Other Works on Paper - Max Schweidler 2006

Ever since its original publication in Germany in 1938, Max Schweidler's *Die Instandsetzung von Kupferstichen, Zeichnungen, Buchern usw* has been recognized as a seminal modern text on the conservation and restoration of works on paper. To address what he saw as a woeful dearth of relevant literature and in order to assist those who have 'set themselves the goal of preserving cultural treasures,' the noted German restorer composed a thorough technical manual covering a wide range of specific techniques, including detailed instructions on how to execute structural repairs and alterations that, if skilfully done, can be virtually undetectable. By the mid-twentieth century, curators and conservators of graphic arts, discovering a nearly invisible repair in an old master print or drawing, might comment that the object had been 'Schweidlerized.' This volume, based on the authoritative revised German edition of 1949, makes Schweidler's work available in English for the first time, in a meticulously edited and annotated critical edition. The editor's introduction places the work in its historical context and probes the philosophical issues the book raises, while some two hundred annotated

The Art of Perfumery - G. W. Septimus Piesse 2018-06-26

The Art of Perfumery And Methods of Obtaining the Odors of Plants by G.W. Septimus Piesse s. Among the nations of antiquity, an offering of perfumes was regarded as a token of the most profound respect and homage. Incense, or Frankincense, which exudes by incision and dries as a gum, from *Arbor-thurifera*, was formerly burnt in the temples of all religions, in honor of the divinities that were there adored. Many of the primitive Christians were put to death because they would not offer incense to idols. "Of the use of these luxuries by the Greeks, and afterwards by the Romans, Pliny and Seneca gives much information respecting perfume drugs, the method of collecting them, and the prices at which they sold. Oils and powder perfumery were most lavishly used, for even three times a day did some of the luxurious people anoint and scent themselves, carrying their precious perfumes with them to the baths in costly and elegant boxes called NARTHECIA." In the Romish Church incense is used in many ceremonies, and particularly at the solemn funerals of the hierarchy, and o We are delighted to publish this classic book as part of our extensive Classic Library collection.
