European Transport Policy and Sustainable Mobility - Jonas Akerman 2000-10-26

It is now widely accepted that transport is becoming increasingly unsustainable and that strong policy intervention is required to reduce both the growth in transport demand and the environmental costs of transport. This book challenges conventional approaches to transport by moving away from trend based analysis towards the use of scenarios to identify alternative sustainable transport futures. It both summaries the development of EU transport policy and presents a critique. The policy context is widened to include the global changes taking place in economics, society and technology. It develops new methodologies for policy making for the next 25 years.

This text reviews the literature on crafting survey instruments, and provides both general principles governing question-writing and guidance on how to develop a questionnaire.

Family Upheaval - Mikkel Rytter 2013-06-30

Pakistani migrant families in Denmark find themselves in a specific ethno-national, post-9/11 environment where Muslim immigrants are subjected to processes of non-recognition, exclusion and securitization. This ethnographic study explores how, why, and at what costs notions of relatedness, identity, and belonging are being renegotiated within local families and transnational kinship networks. Each entry point concerns the destructive-productive constitution of family life, where neglected responsibilities, obligations, and trust lead not only to broken

relationships, but also, and inevitably, to the innovative creation of new ones. By connecting the micro-politics of the migrant family with the macro-politics of the nation state and global conjunctures in general, the book argues that securitization and suspicion-launched in the name of "integration"-escalate internal community dynamics and processes of family upheaval in unpredicted ways.

The Transition from Work to Retirement - Organisation for Economic Co-operation and Development 1995

Discrimination in Labor Markets - Orley Ashenfelter
2015-03-08

This volume contains revised versions of the papers presented in 1971 at the Princeton University Conference on Discrimination in Labor Markets, and the formal discussions of them. This paper is by Kenneth Arrow, winner of the Nobel Prize in Economics, who lays the theoretical foundations of the economic analysis of discrimination in labor markets. Finis Welch discusses the relationship between schooling and labor market discrimination. Orley Ashenfelter's paper presents a method for estimating the effect of an important institution—trade unionism—on the wages of black workers relative to whites. Ronald Oaxaca provides a framework for measuring the extent of discrimination against women. Finally, Phyllis Wallace examines public policy on discrimination and suggests strategies for public policy in this area. Originally published in 1974. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in

durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Fear and Loathing in Las Vegas - Hunter S. Thompson
2010-09-29

50th Anniversary Edition • With an introduction by Caitly Weaver, acclaimed New York Times journalist This cult classic of gonzo journalism is the best chronicle of drug-soaked, addle-brained, rollicking good times ever committed to the printed page. It is also the tale of a long weekend road trip that has gone down in the annals of American pop culture as one of the strangest journeys ever undertaken. Also a major motion picture directed by Terry Gilliam, starring Johnny Depp and Benicio del Toro.

Mental Health and Work: Australia - OECD 2015-12-07

This report on Australia is the ninth and last in a series of reports looking at how the broader education, health, social and labour market policy challenges identified in Sick on the Job? Myths and Realities about Mental Health and Work (OECD, 2012) are being tackled in a number of OECD countries.

The Democratic Corporation - Russell L. Ackoff
1994-06-30

We all know that American business needs fixing, and there is no shortage of prescriptions: imitate the Japanese, or follow the example of successful firms, or practice right-sizing. But these approaches do not work very well, says Russell Ackoff, because they only attack the problem piecemeal--and it is the entire system of American business that is flawed. In this revolutionary new book by a widely respected business thinker and

pioneer in the fields of operations research and systems thinking, Ackoff underscores the urgent need to overhaul the kinds of systems found in America, from our business schools to our boardrooms. And he shows how firms can break out of the mold--and leapfrog the competition in today's volatile economy. To give managers insight into the concept of organizations, Ackoff shows how they have been viewed since the Renaissance: first as machines, later as organisms, and today as social systems. As social systems, companies produce and distribute wealth and raise our standard of living. They are also responsible for facilitating and encouraging the development of the larger systems that contain them and all their stakeholders. The quality of worklife within an organization is key. Work has to be challenging and enjoyable if workers are to give it their full commitment, and Ackoff outlines major ways to achieve this goal. Along the way, Ackoff explodes a number of fashionable business notions. He asserts that firms that try to imitate successful competitors are doomed to play catch-up forever. He attacks the idea of continuous improvement, showing that it has failed to make quantum leaps in quality, and he demonstrates how to re-orient the pursuit of quality. After revealing the weakness in many current practices, Ackoff describes three organizational schemes that will lead to success. In the Circular Organization, a democratic hierarchy, everyone participates directly or indirectly in decisions that affect their work. In the Internal Market Economy, organizations treat their different parts like a collection of firms doing business with each other--which promotes cooperation and eliminates wasteful internal competition. And with the Multidimensional Organization, a company becomes so powerful and flexible

that continuous adaptation can happen without reorganization. Ackoff caps off the book with an incisive critique of business schools, describing how they must be transformed to turn out the leaders we need for the competitive American organization of the 21st century. Enabling managers to understand the profound interrelationships in the American economy and to tap into them for success, *The Democratic Corporation* is a major work by an innovative thinker that is certain to cause ripples throughout the business community.
Information Technology and Changes in Organizational Work - W.J. Orlikowski 1996

Many organisations are using an increased range of information technologies to support a variety of new organisational practices and organisational forms. The book aims to investigate the integration of information technologies into work places and their effect on work and work-life. Issues include changes in: the nature, quantity and quality of work; power relations; privacy; and aspects of organisational culture. The book also considers the social process of shifting from present organisational structures and practices to new ones.
Youth Unemployment and Social Exclusion in Europe - Torild Hammer 2003-07-30

This important new book presents the findings of the first comparative study of unemployed youth in Europe using a large and original data set. It addresses some of the key questions around the issue including: How do young people cope with unemployment? Does unemployment lead to social exclusion of young people, implying a withdrawal from society, financial deprivation and social isolation? Drawing on a research sample of over 17000 young unemployed people in ten European countries, the book examines how different welfare strategies and

labour market policies in different countries influence the risk of social exclusion among unemployed youth.

Transnational Polish Families in Norway - Krystyna Slany 2018

This book provides timely insights into the lives of Polish migrants who have been settling in Norway with their partners and children, especially over the last decade. It brings together Polish and Norwegian scholars who shed light on the key areas of migrant family practices in the transnational space. The contributors critically assess social capital of those living mobile lives, discuss the role of institutions, as well as engage with the broad problematics of caring - both with regard to migrant children raised in Norway, and the elderly kin members left behind in Poland. Further, the authors tackle the question of the possibilities and constrains of integration, pointing to several areas of policy implications of transnationalism for both Poland and Norway.

Et terskelnivå for norsk - 1987-01-01

Stress and Quality of Working Life - Ana Maria Rossi 2017-07-01

Work-related stress is costly not only to employees, but also to organizations and society. For example, it is estimated that work-related stress, depression, and anxiety costs British employers £1,035 per employee and that workplace stress costs the US economy up to \$300 billion annually. However, elevated levels of stress often cannot be changed, and, if demands were not placed on employees, employee learning, organizational innovation, and societal economic growth would be hindered. Consequently, it is vital that occupational health practitioners, employees, employers and

researchers strive to better understand and manage workplace stress, such that employee health and well-being can be improved. This book can assist organizations and individuals as they encounter workplace stress. This edition highlights research done by 25 authors across 12 chapters that challenges how work stress is viewed and assessed. Additionally, a number of social and psychological influences on the stress experience are examined. Our beliefs and expectations of stress and its results, whether helpful or hurtful, can have a profound influence on our stress experiences. Also, the way that we approach our work (e.g., job crafting) or the treatment we receive from others (e.g., with dignity) can either mitigate or exacerbate any harmful or beneficial effects of stress. Moreover, how we assess the psychological (e.g., burnout and well-being) or physiological (e.g., cortisol) outcomes of stress are meaningful, and the proper diagnosis of stress (e.g., stress surveys) underlies our understanding. We hope that the findings reported in these chapters and the insights of these scholars will provide ways for you and/or your organization to improve the health and well-being of employees.

Mapping Social Relations - Marie Campbell 2004

This is a book about a distinctive methodological approach inspired by one of Canada's most respected scholars, Dorothy Smith. Institutional ethnography aims to answer questions about how everyday life is organized. What is conventionally understood as "the relationship of micro to macro processes" is, in institutional ethnography, conceptualized and explored in terms of ruling relations. The authors suggest that institutional ethnographers must adopt a particular research stance, one that recognizes that people's own

knowledge and ways of knowing are crucial elements of social action and thus of social analysis. Specific attention to text analysis is integral to the approach as is a sensitive to gender relations. Institutional ethnography is remarkably well suited to the human service curriculum and the training of professionals and activists. Its strategy for learning how to understand problems existing in everyday life appeals to many researchers who are looking for guidance on how to take practical action. At the same time, the highly elaborated theoretical foundation of institutional ethnography is difficult to deal with in the brief time most students are in the classroom. The authors successfully tackle the issue of teaching and applying institutional ethnography. Campbell and Gregor have been testing out instructional methods and materials for many years. MAPPING SOCIAL RELATIONS is the product of that effort.

Local Justice - Jon Elster 1992-05-14

The well-being of individuals routinely depends on their success in obtaining goods and avoiding burdens distributed by society. Local Justice offers the first systematic analysis of the principles and procedures used in dispensing "local justice" in situations as varied as the admission of students to college, the choice of patients for organ transplants, the selection of workers for layoffs, and the induction of men into the army. A prominent theorist in the field of rational choice and decision making, Jon Elster develops a rich selection of empirical examples and case studies to demonstrate the diversity of procedures used by institutions that mete out local justice. From this revealing material Elster fashions a conceptual framework for understanding why institutions make these

crucial allocations in the ways they do. Elster's investigation discloses the many complex and varied approaches of such decision-making bodies as selective service and adoption agencies, employers and universities, prison and immigration authorities. What are the conflicting demands placed on these institutions by the needs of applicants, the recommendations of external agencies, and their own organizational imperatives? Often, as Elster shows, methods of allocation may actually aggravate social problems. For instance, the likelihood that handicapped or minority infants will be adopted is further decreased when agencies apply the same stringent screening criteria—exclusion of people over forty, single parents, working wives, and low-income families—that they use for more sought-after babies. Elster proposes a classification of the main principles and procedures used to match goods with individuals, charts the interactions among these mechanisms of local justice, and evaluates them in terms of fairness and efficiency. From his empirical groundwork, Elster builds an innovative analysis of the historical processes by which, at given times and under given circumstances, preferences become principles and principles become procedures. Local Justice concludes with a comparison of local justice systems with major contemporary theories of social justice—utilitarianism, John Rawls's A Theory of Justice, Robert Nozick's Anarchy, State, and Utopia—and discusses the "common-sense conception of justice" held by professional decision makers such as lawyers, economists, and politicians. The difference between what we say about justice and how we actually dispense it is the illuminating principle behind Elster's book. A perceptive and cosmopolitan study,

Local Justice is a seminal work for all those concerned with the formation of ethical policy and social welfare—philosophers, economists, political scientists, health care professionals, policy makers, and educators.
Civic Engagement in Scandinavia - Lars Skov Henriksen
2018-10-09

Since the 1990's, a number of studies have documented a remarkable high and stable amount of popular engagement in civic organizations in Denmark, Norway and Sweden. Often these countries have been considered deviant cases against the proliferating decline of social capital studies. However, despite great international interest in the Scandinavian region, the volume argues that the civil societies and the civic engagement of these countries remain poorly understood. Most interest in the Scandinavian welfare models addresses the balance between state and market, but under communicates the role played by civil society and popular engagement in associations and voluntary organizations. The contributions offer a coherent portrait of stability and change in formal and informal forms of civic engagement over the past 25 years as well as offering contextualized knowledge of the history and institutional design in which Scandinavian civil societies are embedded.

Sickness, Disability and Work: Breaking the Barriers A Synthesis of Findings across OECD Countries - OECD

Each chapter presents in-depth reviews of specific topics, describing the current state of knowledge and identifying the most productive new directions for future research. Representing both traditional and emerging perspectives, this multi-disciplinary and truly international volume will serve as a seminal resource for students and scholars.

EBOOK: Nordic Health Care Systems: Recent Reforms and Current Policy Challenges - Jon Magnussen 2009-09-16

"The book is very valuable as actual information about the health systems in the Nordic countries and the changes that have been made during the last two decades. It informs well both about the similarities within the 'Nordic Health Model' and the important differences that exist between the countries." Bo Könberg, County Governor, Former Minister of Health and Social Insurance in Sweden (1991-94) "This book is a rich, interesting and very useful document. I have been looking, for example, today for precise information on political governing which is not displayed anywhere else. It will be of importance in many aspects!" Johan Calltorp MD PhD, Professor of Health Policy and Management, The Nordic School of Public Health, Gotenburg "The publishing of this book about the Nordic health care systems is a major event for those interested not only in Nordic health policy and health systems but also for everybody interested in comparative health policy and health systems. It is the first book in its kind. It covers the four 'large' Nordic countries, Denmark,

Norway, Sweden and Finland, and does so in a very systematically comparative way. The book is well organized, covers 'everything' and is analytically sophisticated." Ole Berg, Institute of Health Management and Health Economics, University of Oslo, Norway This book examines recent patterns of health reform in Nordic health care systems, and the balance between stability and change in how these systems have developed. The health systems in Norway, Denmark, Sweden and Finland are investigated through detailed comparisons along a variety of policy-driven parameters. The following themes are explored: Politicians, patients, and professions Financing, production, and distribution The role of the primary health sector The role of public health Internal management mechanisms Impact of the European Union The book probes the impact of these topics and then contrasts the development across all four, allowing the reader to gain a sense of perspective both on the individual countries as well as on the region as a whole. The editors also explore the extent to which a Nordic Health Care Model exists, and the degree to which that model will continue to help explain the future direction of health policy-making in these four countries. An additional chapter on recent developments in Iceland completes the work.

Virksomheders indsats for udsatte unge (Företags insatser för utsatta unga) - DAMVAD 2014-01-21

Arbejdsløsheden blandt unge er betydelig større end den generelle arbejdsløshed i de nordiske lande. En voksende gruppe af unge i Norden har risiko for ikke at komme ind

på arbeidsmarkedet – ikke blot som ung, men også i deres voksne liv. Flere og flere virksomheder tager et ansvar i forhold til at hjelpe de unge nærmere en plads på arbeidsmarkedet. Ofte kan virksomheden være vejen til at komme videre i uddannelse eller få læreplads for en ung arbeidsløs. Virksomhederne kan tilbyde de utsatte unge noget andet end fx en sagsbehandler eller et skoleophold kan. De unge får bl.a. mulighet for at prøve sig selv af i forbindelse med forskjellige arbeidsopgaver og brancher, og de lærer noget om ansvar, samarbejde og arbeidsmarkedskultur. Denne undersøgelse kortligger eksempler på best practice for virksomheders innsatser for at sikre, at utsatte unge med svak forankring på arbeidsmarkedet kommer i beskæftigelse eller uddannelse. Kortlægningen ser på praksis i de fem nordiske lande: Danmark, Norge, Sverige, Finland og Island. De udvalgte cases har alle til formål at sikre utsatte unges integration på arbeidsmarkedet

Social Psychology and Health - Wolfgang Stroebe 1995
This text discusses major topics of health psychology from a social psychological perspective. It addresses two major factors detrimental to health and well-being, namely health-impairing behaviours and stressful life events, and argues for an integrative approach to reduce risk factors.

Research on Judgment and Decision Making - William M. Goldstein 1997-06-13

This book offers an overview of recent research on the psychology of judgment and decision making, the field that investigates the processes by which people draw conclusions, reach evaluations, and make choices. An introductory, historically oriented chapter provides a way of viewing the overall structure of the field, its recent trends, and its possible directions. Subsequent

sections present significant recent papers by prominent researchers, organized to reveal the currents, connections, and controversies that animate the field. Current trends in the field are illustrated with papers from ongoing streams of research. The papers on "connections" explore memory, explanation and argument, affect, attitudes, and motivation. Finally, a section on "controversies" presents problem representation, domain knowledge, content specificity, rule-governed versus rule-described behavior, and proposals for radical departures and new beginnings in the field. Students and researchers in psychology who have an interest in cognitive processes will find this text to be rewarding reading.

Meeting the Challenge of Human Resource Management - Vernon D. Miller 2014-07-11

While communicating is a vital skill for managers at all organizational levels and in all functional areas, human resource managers are expected to be especially adept communicators, given the important interpersonal

component of their roles. Practitioners and scholars alike stand to benefit from incorporating an updated and more nuanced view of communication theory and practice into standard human resource management practices. This book compiles readings by thought leaders in human resource management and communication, exploring the intersection of interests, theories, and perspectives from the two fields to highlight new opportunities for research and practice. In addition to covering the foundations of strategic human resource management, the book: offers a critical review of the research literature on topics including recruitment, selection, performance management, compensation, and development uses a communication perspective to analyze the impact of corporate strategy on human resource systems investigates the key human resource management topic of the relationship between a company's human capital and its effectiveness directly discusses the implications of communication literature for human resource management practice Written at the cross-section of two established and critically linked fields, this book is a must-have for graduate human resource management and organizational communication students, as well as for high-level human resource management practitioners.

Collaborative Innovation in the Public Sector - Jacob Torfing 2016

Public sector innovation is important because the pressures of growing expectations from citizens, budget crunches, and a surge of complex governance problems cannot be solved by standard government solutions or increased funding. In order to innovate, government increasingly needs to collaborate with networks of partners across agency boundaries and especially with the nonprofit and private sectors to find new solutions.

This interaction within a network can enhance creative and effective governance solutions. In this book, Jacob Torfing closely examines the link between network-based collaborative governance and innovation, proposes a framework for the study of collaborative innovation, and discusses this approach in light of theoretical insights from other disciplines and from examples of public innovation drawn from the United States, Europe, and Australia. This book will move scholars closer to being able to develop a theory of collaborative innovation.

Mental Health and Work Sick on the Job? Myths and Realities about Mental Health and Work - OECD 2012-01-17
This report aims to identify the knowledge gaps and begin to narrow them by reviewing evidence on the main challenges and barriers to better integrating people with mental illness in the world of work.

Handbook on In-Work Poverty - Henning Lohmann
There has been a rapid global expansion of academic and policy attention focusing on in-work poverty, acknowledging that across the world a large number of the poor are 'working poor'. Taking a global and multi-disciplinary perspective, this Handbook provides a comprehensive overview of current research at the intersection between work and poverty.

Backstreets - Cecilie Høigård 1992
Backstreets is about prostitution. It allows the individuals who participate in it—prostitutes, pimps, and those who buy sexual services—to tell their own stories in their own words. Women, for example, explain why they become prostitutes and how they experience the daily sequence of "tricks." Men discuss why they become customers of prostitutes and what they get out of the experience. Pimps describe how they see themselves and the prostitutes upon whom they depend. The authors

have studied the prostitution market of Oslo for over ten years. Their research has involved extensive interviews with participants, observation of Oslo's prostitution district, personal interaction with prostitute women, and analysis of city police records. They conclude that prostitution is embedded in the gender relations of an economically stratified society and that those who experience prostitution over an extended period of time suffer deep emotional damage.
Glossary on Migration - International Organization for Migration 2004

It is increasingly acknowledged that migration issues need a co-ordinated approach, with discussions being undertaken at bilateral levels, as well as at regional and global levels. This publication seeks to establish a common understanding about the terms and concepts used in the field of migration, in order to establish a useful tool to help further international cooperation on this topic.

Slik blir du rik - Anne Linn Kumano-Ensby 2022-03-21
Hva ville vi bruke tiden til, om vi fikk råd til å jobbe mindre? Hva om vi slutter å kjøpe ting vi ikke trenger? Kan vi få pengene til å blomstre? Disse spørsmålene stilte ekteparet Kumano-Ensby seg i 2019. Et vanlig norsk par med to barn, jobb og gjeld, som dermed tok fatt på et prosjekt som skulle endre livene deres. Slik blir du rik er en håndbok som hjelper deg ut av hamsterhjulet og inn i en bærekraftig hverdag, der du har overskudd av tid og penger til å oppfylle flere av dine ønsker og behov. Dette er ikke en bok om å spare mest mulig, men om å investere de midlene du klarer å legge av. Mellom rådene som forklarer hvordan du blir rik, lærer du også å trives med et lavere forbruk - noe som er bra for både helsa, lommeboka og jorda vår. Boka

vil være nyttig for deg som sliter med forbruksgjeld, vil spare til egen bolig, har en drøm om å starte egen bedrift eller som ønsker å slippe å bruke halvparten av din våkne tid på jobb. På siden slikblirdurik.com finner du blant annet gratis maler for oppsett av budsjett, investeringer og matplaner. Studies in Labor Markets - Sherwin Rosen 2007-12-01
The papers in this volume present an excellent sampling of the best of current research in labor economics, combining the most sophisticated theory and econometric methods with high-quality data on a variety of problems. Originally presented at a Universities-National Bureau Committee for Economic Research conference on labor markets in 1978, and not published elsewhere, the thirteen papers treat four interrelated themes: labor mobility, job turnover, and life-cycle dynamics; the analysis of unemployment compensation and employment policy; labor market discrimination; and labor market information and investment. The Introduction by Sherwin Rosen provides a thoughtful guide to the contents of the papers and offers suggestions for continuing research.

Inductive Dependency Parsing - Joakim Nivre 2006-08-05
This book describes the framework of inductive

dependency parsing, a methodology for robust and efficient syntactic analysis of unrestricted natural language text. Coverage includes a theoretical analysis of central models and algorithms, and an empirical evaluation of memory-based dependency parsing using data from Swedish and English. A one-stop reference to dependency-based parsing of natural language, it will interest researchers and system developers in language technology, and is suitable for graduate or advanced undergraduate courses.

International Migration Law - 2004

Migration is increasingly being acknowledged as an issue that needs a global approach and coordinated responses. States are not only discussing migration issues at the bilateral level, but also regionally and lately in global arenas. A commonly understood language is indispensable for such coordination and international cooperation to be successful. This glossary attempts to serve as a guide to the mire of terms and concepts in the migration field, in an effort to provide a useful tool to the furtherance of such international cooperation and the common understanding of migration issues.

Project Psychology - Sharon De Mascia 2012

Sharon De Mascia's text uses human behaviour, established and emerging psychological models to provide perspectives on and tools for managing people in projects, including project team selection, people and team management, team cohesion, and much more.
