Managing Trust in Strategic Alliances - T. K. Das 2018-12-01

Managing Trust in Strategic Alliances is a volume in the book series Research in Strategic Alliances that focuses on providing a robust and comprehensive forum for new scholarship in the field of strategic alliances. In particular, the books in the series cover new views of interdisciplinary theoretical frameworks and models, significant practical problems of alliance organization and management, and emerging areas of inquiry. The series also includes comprehensive empirical studies of selected segments of business, economic, industrial, government, and non-profit activities with wide prevalence of strategic alliances. Through the ongoing release of focused topical titles, this book series seeks to disseminate theoretical insights and practical management information that should enable interested professionals to gain a rigorous and comprehensive understanding of the field of strategic alliances. Managing Trust in Strategic Alliances contains contributions by leading scholars in the field of strategic alliance research. The 10 chapters in this volume deal with significant issues relating to the management of trust in strategic alliances. These issues include the role of trust in value creation and appropriation, the dialectics of trust, control, and risk in multilateral

R&D alliances, protecting trustworthiness in open and closed alliance networks, balancing trust and distrust, trust and cost disclosure, trust and control, foreign partner's trust in international strategic alliances, a multilevel approach to trust, trust in service supply networks, and trust-building in public-private strategic alliances. The chapters contain empirical as well as conceptual treatments of the selected topics, and collectively present a wide-ranging review of the noteworthy research perspectives on managing trust in strategic alliances.

Digitization of the Management Accounting Function - Oliver Holtkemper

2020-10-27

This book analyzes the impact of digitization on management accounting in five manufacturing companies. It is one of the first in-depth empirical studies on the intersection of management accounting and digitization. The study suggests that there are two archetypes of digitization of the management accounting function. The first archetype emphasizes top-down-driven changes that aim to enhance efficiency, such as conducting tasks with a higher degree of automation in a leaner structure with fewer resources. The second archetype is strongly driven and initiated by employees in the management accounting function (bottom-up). The focus is on improving the use of data by applying innovative analytics methods, integrating additional sources of data, and benefiting from new technologies like artificial intelligence. The results of the study also indicate that digitization of the management accounting function is mostly in line with the overall company strategy.

Bank Regulation - Anna-Karin Stockenstrand 2017-01-20

Bank Regulation: Effects on Strategy, Financial Accounting and Management Control discusses and problematizes how regulation is affecting bank strategies as well as their financial accounting and management control systems. Following a period of bank de-regulation, the new millennium brought a drastic change, with many new regulations. Some of these are the result of the financial crisis of 2008-2009. Other regulations, such as the introduction in 2005 of International Financial Reporting Standards (IFRS) for quoted companies in the EU, can be

related to the introduction of a new global accounting regime. It is evident from annual reports of banks that the number of new regulations in recent years is high and that they cover many different functional areas. The objectives of these regulations are also ambitious; to improve governance and control, contributing to a high level of financial stability for banks. These objectives are obviously of great concern for an industry that directly and indirectly affects the financial situation not only of individuals and organizations but also nation states. Considering the importance of banks in society, it is of little surprise that the attention of both scholars and practitioners has been directed towards how banks comply with new regulations and if the intended objectives of the regulations are met. This book will be of great value to all those interested in financial stability matters (practitioners, policy-makers, students, academics), as well as to accounting and finance scholars.

academics, Capital Budgeting Valuation offers a variety of perspectives and a rich interplay of ideas related to this important financial discipline.

Dr Kazuo Inamori's Management Praxis and Philosophy - Kimio Kase 2022-08-30

This book offers a meditation on the links between philosophy and its implementation, interpreting why and how a leader's "philosophy" strengthens his action predicated on the purposeful vision of life; and discusses the a hypothesis that performance control in management may be driven by transcendental and intrinsic motivations, contrasting with the traditional management control theory. It construes how Inamori's management philosophy disciplines accounting and finance management towards putting its basic tenets into practice. Examining, in particular, the history of Kyocera, the authors provide a contemplative look at a human centric philosophy, which will be of interest to scholars of management, corporate executives, and economists with a philosophical bent.

Management Accounting - Helen Thorne 2012-04-12

Sustainability Reporting, Ethics, and Strategic Management Strategies for Modern Organizations - Oncioiu, Ionica 2020-07-24

Current modern companies, which are also the key factors of a global economy, are subject to increasing pressures to conduct their business in an environmentally responsible manner, due to social and environmental problems. Improving long-term environmental performance can bring economic benefits to those companies that are innovative and environmentally sensitive, especially by integrating environmental information into their business strategies. Considering all the changes, sustainability reporting, management, and financial accounting becomes a powerful information tool for executives, managers, and employee teams to gain insights and make better decisions. Along with concepts such as ethical, controlling, auditing, management, and financial accounting, reporting provides value with the decision-making process. All these debates underline the major responsibility of users when configuring accounting and finance models and thereby in modelling business information. Sustainability Reporting, Ethics, and Strategic Management Strategies for Modern Organizations proposes an interdisciplinary perspective and explores various theoretical and practical approaches of ethical standards, management accounting, and their impact in the 21st century on different areas of activity. It contrasts external financial accounting for government regulators and the investment community with internal management accounting for managers to leverage for decision making. In addition, the book examines the role of management accounting and sustainability reporting from other points of view such as ethical standards, corporate social responsibility, creative accounting, green accounting, environmental indicators, e-accounting, KPI, lean accounting, controlling, auditing, reporting, etc., offering a number of new insights into management accounting. It is intended for chief financial officers, financial controllers, business analysts, financial planners, financial analysts, budgeting

managers, executives, managers, academicians, researchers, and students.

Australian National Bibliography - 1995

Service Supply Chain Systems - Tsan-Ming Choi 2016-04-14

Supply chain management is a well-developed area. The traditional supply chains are dynamic systems which include the forward and reverse flows of physical products and the related information and fund. However, a service supply chain is different because the real "product" may take the form of a "service" which implies that many traditionally cruc

Methodological issues in accounting research - Zahirul Hoque 2018-03-26

What is my theory? How do I choose a theory? Why and how should I employ a particular method for collecting the empirical data? These basic questions concern everyone involved in research. A research study can be a voyage of discovering or choice of theoretical perspective as well as gathering empirics or facts on a problem or situation. This book provides a good guideline as to why and how to choose a particular theory or method to study an organisational phenomenon such as accounting. All the chapters provide both retrospective and contemporary views by scholars in the field. Each chapter documents the latest developments and research in accounting and control systems and provides valuable insights into methodological perspectives in accounting research. This second edition has also introduced a number of new chapters covering strategy-management control as practice, grounded theory approach, institutional logic and rhetoric, social interaction theory, actor-network theory and practice theory. The book is primarily intended for research students and

academic researchers. It can also be used for undergraduate Honours course as well as postgraduate accounting and business methodology courses. Research organisations and consulting firms in accounting and business fields may also find this book useful. The principal aims of this second edition are (1) to update the chapters previously published in 2006 and (2) to introduce new chapters documenting recent developments in accounting research.

Research in Management Accounting - Ruhanita Maelah 2010-10-12

This book focuses on research in management accounting that uses Malaysia's business environment as the scope of study. The motivation to embark on this publication was due to the recognition that although management accounting has received increasing interest from various organizations including government, businesses and educators, published documents that report findings from research in management accounting undertaken in Malaysia are still limited. The objective of this book is to address the gap by providing readers with five research oriented articles on management accounting issues, namely Performance Measurement Design in Service Organizations; Management Accounting and Control Systems in the Service Sector; Activity Based Costing; Intellectual Capital and Management Accounting Practices; and Customer Focused Manufacturing Strategy and Performance Measurement Systems. The articles are written by a pool of active researchers in the area of

management accounting, and are expected to have high academic value. Each is complete with a literature review, methodology, data analysis and references. Even though this is the case, the articles have also been carefully chosen and edited for the general reader. This book is suitable as a reference for researchers, academics, managers, accountants, and policy makers.

A Study Of Performance Measurement In The Outsourcing Decision -

Ronan McIvor 2009-05-28

Outsourcing is a key issue for many organisations having moved from the contracting out of peripheral activities such as cleaning to more critical

areas such as design and marketing. This report is for managers and people in finance and accounting functions and takes a practical approach in developing a framework and then applying this framework in an actual organisation which makes it easier for practitioners to understand. • This report provides a framework which incorporates both qualitative and quantitative performance measures that can be used in the outsourcing process • This research is of value to commercial and public sector organisations as well as academics as it provides insights for organisations considering outsourcing that will enable them to assess service levels throughout the contract
