I found her in our living room, bleeding and close to death, but alive. Barely. Until morning stole her last breath. The media called her killer the "Triangle Terror" ... and then forgot about her. But I never forgot—my murdered sister, and an investigation that led to my own resurrection from the dead. Twenty-two years ago, on a cold February night, Landon Worthington lost his father for the last time. After an armed robbery gone wrong, evidence and witness testimony pointed a shaky finger at Dan Worthington—deadbeat dad and alcoholic husband. But before the dust could settle over the conviction, Landon's preteen sister, Alexis, is murdered in their home, plunging Landon's life into further despair. Two decades and a cold case later, Landon is dogged by guilt over their estranged relationship and decides to confront his incarcerated father about what really happened the night of the robbery. But the years of lies are hard to unravel. And the biggest question of all haunts him: How does everything tie into his sister's murder? And so

begins Landon's journey to piece together the puzzle of secrets, lies, and truths that can free his father, avenge his sister, and perhaps save himself. A short story mystery perfect for fans of Robert Dugoni's *Third Watch* and Dean Koontz's *The Neighbor*. Read as a standalone or as the companion book to *A Secondhand Life*.

**Biology of Microorganisms on Grapes, in Must and in Wine** - Helmut König 2017-11-01

The second edition of the book begins with the description of the diversity of wine-related microorganisms, followed by an outline of their primary and energy metabolism. Subsequently, important aspects of the secondary metabolism are dealt with, since these activities have an impact on wine quality and off-flavour formation. Then chapters about stimulating and inhibitory growth factors follow. This knowledge is helpful for the growth management of different microbial species. The next chapters focus on the application of the consolidated findings of molecular biology and regulation the functioning of regulatory cellular networks, leading to a better understanding of the phenotypic behaviour of the microbes in general and especially of the starter cultures as well as of stimulatory and inhibitory cell-cell interactions during wine making. In the last part of the book, a compilation of modern methods complete the understanding of microbial processes during the conversion of must to

wine. This broad range of topics about the biology of the microbes involved in the vinification process could be provided in one book only because of the input of many experts from different wine-growing countries.

**Satchel** - Larry Tye 2010-05-04

NEW YORK TIMES BESTSELLER • The superbly researched, spellbindingly told story of athlete, showman, philosopher, and boundary breaker Leroy "Satchel" Paige "Among the rare biographies of an athlete that transcend sports . . . gives us the man as well as the myth."—The Boston Globe Few reliable records or news reports survive about players in the Negro Leagues. Through dogged detective work, award-winning author and journalist Larry Tye has tracked down the truth about this majestic and enigmatic pitcher, interviewing more than two hundred Negro Leaguers and Major Leaguers, talking to family and friends who had never told their stories before, and retracing Paige's steps across the continent. Here is

the stirring account of the child born to an Alabama washerwoman with twelve young mouths to feed, the boy who earned the nickname "Satchel" from his enterprising work as a railroad porter, the young man who took up baseball on the streets and in reform school, inventing his trademark hesitation pitch while throwing bricks at rival gang members. Tye shows Paige barnstorming across America and growing into the superstar hurler of the Negro Leagues, a marvel who set records so eye-popping they seemed like misprints, spent as much money as he made, and left tickets for "Mrs. Paige" that were picked up by a different woman at each game. In unprecedented detail, Tye reveals how Paige, hurt and angry when Jackie Robinson beat him to the Majors, emerged at the age of forty-two to help propel the Cleveland Indians to the World Series. He threw his last pitch from a big-league mound at an improbable fifty-nine. ("Age is a case of mind over matter," he said. "If you don't mind, it don't matter.") More than a fascinating account of a baseball odyssey, Satchel rewrites our history of the integration of the sport, with Satchel Paige in a starring role. This is a powerful portrait of an American hero who employed a shuffling stereotype to disarm critics and racists, floated comical legends about himself—including about his own age—to deflect inquiry and remain elusive, and in the process methodically built his own myth. "Don't look back," he famously said. "Something might be gaining on you." Separating the truth from the legend, Satchel is a remarkable accomplishment, as large as this larger-than-life man.
