*Membrane Physiology* - Thomas E. Andreoli 2012-12-06  
*Membrane Physiology (Second Edition)* is a soft-cover book containing portions of *Physiology of Membrane*

*Disorders (Second Edition)*. The parent volume contains six major sections. This text encompasses the first three sections: *The Nature of Biological Membranes*, *Methods for Studying Membranes*, and *General Problems in Membrane Biology*. We hope that this smaller volume will be helpful to individuals interested in general physiology and the methods for studying general physiology.  
THOMAS E. ANDREOLI JOSEPH F. HOFFMAN  
DARRELL D. FANESTIL STANLEY G. SCHULTZ vii Preface to the Second Edition  
The second edition of *Physiology of Membrane Disorders* represents an extensive revision and a considerable expansion of the first edition. Yet the purpose of the second edition is identical to that of its predecessor, namely, to provide a rational analysis of

membrane transport processes in individual membranes, cells, tissues, and organs, which in turn serves as a frame of reference for rationalizing disorders in which derangements of membrane transport processes play a cardinal role in the clinical expression of disease. As in the first edition, this book is divided into a number of individual, but closely related, sections. Part V represents a new section where the problem of transport across epithelia is treated in some detail. Finally, Part VI, which analyzes clinical derangements, has been enlarged appreciably.

Marieb draws on her career as an A&P professor and her experience completing her nursing education; Hoehn relies on her medical education and award-winning classroom instruction--together, they explain anatomy & physiology concepts and processes in a meaningful and memorable way. In the most student-centric revision to date--the Ninth Edition presents information in smaller and more digestible bites,

making it easier to read and navigate. Clinical coverage has been increased throughout the text, as well. Note: Students should be able to register into MasteringA&P w/o an instructor's CourseID. However, if they want to join an instructor's course, they will need a Course ID, and the instructions clearly explain that.
