The Discipline of Market Leaders - Michael Treacy 2007-03-20

Why is it that Casio can sell a calculator more cheaply than Kellogg's can sell a box of corn flakes? Why can FedEx "absolutely, positively" deliver your package overnight but airlines have trouble keeping track of your bags? What does your company do better than anyone else? What unique value do you provide to your customers? How will you increase that value next year? As customers' demands for the highest quality products, best services, and lowest prices increase daily, the rules for market leadership are changing. Once powerful companies that haven't gotten the message are faltering, while others, new and old, are thriving. In disarmingly simple and provocative terms, Treacy and Wiersema show what it takes to become a leader in your market, and stay there, in an ever more sophisticated and demanding world.

Singularity Sky - Charles Stross 2004-06-29

In a technologically suppressed future, information demands to be free in the debut novel from Hugo Award-winning author Charlie Stross. In the twenty-first century, life as we know it changed. Faster-than-light travel was perfected, and the Eschaton, a superhuman artificial intelligence, was born. Four hundred years later, the far-flung colonies that arose as a result of these events—scattered over three thousand years of time and a thousand parsecs of space—are beginning to rediscover their origins. The New Republic is one such colony. It has existed for centuries in self-imposed isolation, rejecting all but the most basic technology. Now, under attack by a devastating information plague, the colony must reach out to Earth for help. A battle fleet is dispatched, streaking across the stars to the rescue. But things are not what they seem—secret agendas and ulterior motives abound, both aboard the ship

and on the ground. And watching over it all is the Eschaton, which has its own very definite ideas about the outcome...
