Marketing For Competitiveness: Asia To The World - In The Age Of Digital Consumers - Philip Kotler 2016-11-24

Asia is the most populated geographical region, with 50% of the world's inhabitants living there. Coupled that with the impressive economic growth rates in many Asian countries, the region provides a very attractive and lucrative market for many businesses, big and small and from all industries. In addition, Asia is also a dynamic market that significantly grows with developments in technology and digitalization. For example, a research by Google and Temasek shows that Southeast Asia is the world's fastest growing internet region. The internet economy in Southeast Asia is expected to grow by 6.5 times from US\$31 billion in 2015 to US\$197 billion in 2025. All these make it critical for marketers, whether domestic, regional or global,

to stay in touch if not ahead, in their understanding of what is happening in Asia from a marketing perspective and what Asia has to offer to the world. One phenomenon happening in the Asian market and which marketers should pay utmost attention to, is the rapidly unfolding digital revolution that has fundamentally transformed not just the extent but also the nature of competition. What makes it even more challenging and complicating is also how such a revolution impacts on consumer and business buying behavior. Disruptive technologies supported by this digital revolution have brought in new competitors and enabled existing competitors to surpass the conventional boundaries which we may be quite familiar with. Asian consumers have become more educated and connected and have embraced newer ways of selecting, buying and using products and services. In this book, the Father of Modern Marketing, Professor Philip Kotler has collaborated with two marketing experts from Asia, Hermawan Kartajaya from Indonesia and Hooi Den Huan from Singapore to publish a book on Marketing for Competitiveness: Asia to the World – In the Age of Digital Consumers. This book argues that marketing is no longer just vertical but has encompassed a new, more horizontal paradigm. In addition to many new concepts and frameworks, this book includes a plethora of real-world examples from various countries in Asia, which will help to shed light on how companies, both Asian and global, compete in Asia. Useful lessons can be drawn by all businesses in the world on how to win the mind, heart and spirit of the Asian consumer – digital and non-digital.

" *Brand Perception among Rural and Urban Consumers*" - Dr. Pramod H. Patil 2022-08-30

The Fast Moving Consumer Goods (FMCG) sector is a cornerstone of the Indian economy and it touches every aspect of human life. It is the fourth largest sector and an important contributor to the Indian economy. This industry is volume-driven and characterized by low margins; it mainly deals with the production, distribution, and marketing of consumer packaged goods and is therefore alternatively called the CPG (Consumer Packaged Goods) industry. The industry is also engaged in the operations, supply chain, and general management of these goods. The FMCG industry provides a wide range of consumables and, therefore, the amount of money circulated against FMCG products is also very high.

New Asian Emperors - George T. Haley
2012-11-26

Southeast Asia has a population of more than half a billion, yet its economy is dominated by about 40 families, most of Overseas Chinese descent. Their conglomerates span sectors as diverse as real estate, telecommunications, hotels, industrial goods, computers and sugar plantations. *New Asian Emperors* shows how and why Overseas Chinese companies continue to dominate the region and have extended their reach in East Asia, despite the Asian financial and SARS crises of the past decade. The authors base their conclusions on in-depth structured interviews spanning a decade with the often elusive Overseas Chinese CEOs including Li Ka-shing, Stan Shih, Victor Fung, Stephen Riady and Sukanto Tanoto, as well as on the strategic information that their companies use. The analysis of the *New Asian Emperors'* present-day management techniques and practices draws on the history, culture and philosophical perspectives of the Overseas Chinese in Southeast Asia. In the midst of today's global economic crisis, this book also takes a fresh look at the role and management practices of the Overseas Chinese as they continue to create some of Asia's wealthiest and most successful companies. *New Asian Emperors* explains: The sources and characteristics of Overseas Chinese management Whether Overseas Chinese management practices will spread in the same way that Japanese management did in the 1970s Whether Western management technologies have found themselves outmaneuvered in Asia's post-crisis arena The Overseas Chinese managers' strategies for the

informational black hole of Southeast Asia and what Western managers can learn from them *The New Asian Emperors'* unique strategic perspectives and management styles revealed through exclusive, in-depth interviews The implications for successfully co-operating and competing with the Overseas Chinese of Southeast Asia *New Asian Emperors* offers key insights into the Overseas Chinese and the important role that cultural roots play in their dominance of Southeast Asian business.

Ethical and Social Marketing in Asia - Bang Nguyen 2015-02-16

There is a growing interest in firms' adoption of ethical and social marketing approaches among academics and practitioners alike. Ethical Marketing is the application of ethics into the marketing process, and Social Marketing is a concept that seeks to influence a target audience for the greater social good. *Ethical and Social Marketing in Asia* examines this so-far unexplored area, investigating why differing cultures and consumption behaviours require different emphasis in different

markets. The diversity of the Asian countries provides a perplexing environment to the development and management of ethical and social marketing. The belief that bottom line profits is enough for a company, is often not favourably viewed by Asian countries emphasising collective, social and long term benefits for the people and country. Due to these interesting characteristics and complexities, the study of ethical and social marketing in Asia is a timely topic. The first chapters introduce Ethical Marketing in Asia, followed by case studies of how the approach is used across 14 diverse economies, geographically based on 'clusters'; North East, (China, Taiwan, Japan, South Korea), South East (Singapore, Malaysia, Thailand, Vietnam, Cambodia, the Philippines, Indonesia) and South Asia (India, Pakistan, Bangladesh). The second part discusses Social Marketing using the same sequence of regions and economies and the third part explores the unique link to Fairness Management in Asia, followed by a conclusion. explores the nature of ethical and social marketing from an Asian perspective discusses current ethical and social marketing researches and practices in different areas, industries, commercial and non-commercial sectors serves as an invaluable resource for marketing academics and practitioners requiring more than anecdotal evidence of different ethical and social marketing applications compares and contrasts unethical situations covering important aspects related to ethics, society and fairness includes an interesting mix of theory, research findings and practices
