Who's Afraid of Modern Art? - Daniel A. Siedell
2015-01-07

Modern art can be confusing and intimidating-- even ugly and blasphemous. And yet curator and art critic Daniel A. Siedell finds something else, something much deeper that resonates with the human experience. With over thirty essays on such diverse artists as Andy Warhol, Thomas Kinkade, Diego Velazquez, Robyn O'Neil, Claudia Alvarez, and Andrei Rublev, Siedell offers a highly personal approach to modern art that is informed by nearly twenty years of experience as a museum curator, art historian, and educator. Siedell combines his experience in the contemporary art world with a theological perspective that serves to deepen the experience of art, allowing the work of art to work as art and not covert philosophy or theology, or visual illustrations of ideas, meanings, and worldviews. *Who's Afraid of Modern Art?* celebrates the surprising beauty of art that emerges from and embraces pain and suffering, if only we take the time to listen. Indeed, as Siedell reveals, a painting is much more than meets the eye. So, who's afraid of modern art? Siedell's answer might surprise you.

Fort Worth's Legendary Landmarks - Byrd Williams 1995

Although Fort Worth has the trappings of any major metropolitan city - shopping malls, suburbs,

and office towers - it is enriched by the many buildings that reflect a colorful and diverse heritage shaped by the frontier, the railroad and other major industries, cattle drives and ranching, oil, and both the poverty of the Depression and the largesse of various benefactors. Presenting the city's most architecturally significant buildings, this volume focuses on historical buildings whose design and background reflect periods of the city's history, but whose stories are not always well known today. Fort Worth's legendary landmarks demonstrate the brick-and-mortar responses the community made to the forces that shaped its history.
