How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide - Alan Wang 2020-11-13

This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. Table of Contents Introduction Section One: Windows Configuration Chapter 1: AlwaysInstallElevated Section Two: Domain Controller Chapter 2: Zerologon Section Three: Windows Service Chapter 3: Service - Insecure File Permission Chapter 4: Service - Unquoted Path Chapter 5: Service - Bin Path Chapter 6: Service - Registry Chapter 7: Service - DLL Hijacking Section Four: Scheduled Tasks Chapter 8: Scheduled Tasks Section Five: Windows Registry Chapter 9: Autorun Chapter 10: Startup Applications Section Six: Windows Kernel Chapter 11: Kernel - EternalBlue Chapter 12: Kernel - MS15-051 Chapter 13: Kernel - MS14-058 Section Seven: Potato Exploits Chapter 14: Juicy Potato Chapter 15: Rogue Potato Section Eight: Password Mining Chapter 16: Password Mining - Memory Chapter 17: Password Mining - Registry Chapter 18: Password Mining - SiteList Chapter 19: Password Mining - Unattended Chapter 20: Password Mining - Web.config Section Nine: UAC Bypass Chapter 21: User Account Control Bypass For more information, please visit <http://www.howtopassoscp.com/>.

Farm Tractors -ECS-Bind-Up - Lee Klancher 2003-09-01

Chronicling the development of the farm tractor and its tremendous impact on farm productivity in the 20th century, this book showcases the most popular makes of farm tractors, all beautifully photographed at work, or pulling various implements that enable them to do the work of several teams of horses.

John Deere Shop Manual: Models 50 60 & 70 - Editors of Haynes Manuals 1956-06-01

With a Haynes manual, you can do-it-yourself...from simple maintenance to basic repairs. Haynes writes every book based on a complete teardown of the vehicle, where we learn the best ways to do a job and that makes it quicker, easier and cheaper for you. Haynes books have clear instructions and hundreds of photographs that show each step. Whether you are a beginner or a pro, you can save big with a Haynes manual! This manual features complete coverage for your John Deere Tractor Models 50, 60 and 70, covering: Routine maintenance Tune-up procedures Engine repair Cooling and heating Air conditioning Fuel and exhaust Emissions control Ignition, brakes Suspension and steering Electrical systems, and Wiring diagrams

Design and Operation of Heat Exchangers and their Networks - Wilfried Roetzel 2019-10-04

Design and Operation of heat Exchangers and Their Networks presents a comprehensive and detailed analysis on the thermal design methods for the most common types of heat exchangers, with a focus on their networks, simulation procedures for their operations, and measurement of their thermal performances. The book addresses the fundamental theories and principles of heat transfer performance of heat exchangers

and their applications and then applies them to the use of modern computing technology. Topics discussed include cell methods for condensers and evaporators, dispersion models for heat exchangers, experimental methods for the evaluation of heat exchanger performance, and thermal calculation algorithms for multi-stream heat exchangers and heat exchanger networks. Includes MATLAB codes to illustrate how the technologies and methods discussed can be easily applied and developed. Analyses a range of different models, applications, and case studies in order to reveal more advanced solutions for industrial applications. Maintains a strong focus on the fundamental theories and principles of the heat transfer performance of heat exchangers and their applications for complex flow arrangement.

Understanding Racial and Ethnic Differences in Health in Late Life - National Research Council 2004-09-08

As the population of older Americans grows, it is becoming more racially and ethnically diverse. Differences in health by racial and ethnic status could be increasingly consequential for health policy and programs. Such differences are are not simply a matter of education or ability to pay for health care. For instance, Asian Americans and Hispanics appear to be in better health, on a number of indicators, than White Americans, despite, on average, lower socioeconomic status. The reasons are complex, including possible roles for such factors as selective migration, risk behaviors, exposure to various stressors, patient attitudes, and geographic variation in health care. This volume, produced by a multidisciplinary panel, considers such possible explanations for racial and ethnic health differentials within an integrated framework. It provides a concise summary of available research and lays out a research agenda to address the many uncertainties in current knowledge. It recommends, for

instance, looking at health differentials across the life course and deciphering the links between factors presumably producing differentials and biopsychosocial mechanisms that lead to impaired health.

Harvard Business Review Family Business Handbook - Josh Baron 2021-01-26

Navigate the complex decisions and critical relationships necessary to create and sustain a healthy family business—and business family. Though "family business" may sound like it refers only to mom-and-pop shops, businesses owned by families are among the most significant and numerous in the world. But surprisingly few resources exist to help navigate the unique challenges you face when you share the executive suite, financial statements, and holidays. How do you make the right decisions, critical to the long-term survival of any business, with the added challenge of having to do so within the context of a family? The HBR Family Business Handbook brings you sophisticated guidance and practical advice from family business experts Josh Baron and Rob Lachenauer. Drawing on their decades-long experience working closely with a wide range of family businesses of all sizes around the world, the authors present proven methods and approaches for communicating effectively, managing conflict, building the right governance structures, and more. In the HBR Family Business Handbook you'll find: A new perspective on what makes family businesses succeed and fail A framework to help you make good decisions together Step-by-step guidance on managing change within your business family Key questions about wealth, unique to family businesses, that you can't afford to ignore Assessments to help you determine where you are—and where you want to go Stories of real companies, from Marchesi Antinori to Radio Flyer Chapter summaries you can use to reinforce what you've learned Keep this comprehensive guide with you to help you build, grow, and position your family business to thrive across generations. HBR Handbooks provide ambitious professionals with the frameworks, advice, and tools they need to excel in their careers. Crap CVs - Jenny Crompton 2014-10-09

Application for Employment I refer to the recent death of the Technical Manager at your company and hereby apply for the replacement of the deceased manager. Each time I apply for a job, I get a reply that there is no vacancy but in this case I have caught you red-handed and you have no excuse because I even attended the funeral to be sure that he was truly dead and buried before applying. Attached to my letter is a copy of my CV and his death certificate. Crap CVs is a hilarious compilation of the worst job applications imaginable, including overly-honest cover letters, embarrassing typos, mortifying personal revelations, awkward interview questions, misplaced self-confidence, self-aggrandizing gibberish, blatant truth-twisting and, of course, outright lies.

Target Pattern Recognition in Innate Immunity - Uday Kishore 2010-01-01

Target pattern recognition in innate immunity is responsible for the immediate, usually protective, responses shown against invading microorganisms, and it is the principal feature of self and non-self recognition by virtue of the recognition of structures on the microbial pathogens, which are not found on host cells. This is an area that has been very actively researched, over approximately the past 12 years, and therefore this volume provides a timely comprehensive, and up to date, summary of the types and range of cell surface, intracellular, and secreted, host proteins involved in the recognition of microbial products, and of the protective mechanisms triggered as a result of the recognition events. The Toll-like receptors, first described in *Drosophila* and now well-characterised on human cells, provide an excellent demonstration of the wide range of different microbial products recognised by this family of receptors and of the signalling pathways which are triggered thus leading to induction of inflammatory cytokines and the activation of genes producing antimicrobial products. In addition, several cell surface proteins involved in target pattern recognition have been described on the

surfaces of macrophages (macrophage mannose receptor and macrophage scavenger receptors), and on dendritic cells (DEC205), and to be involved with the uptake and clearance of whole microorganisms and polyanionic ligands. Pattern recognition is also utilised by intracellular receptors, with NOD-like receptors in the cytosol recognizing microbial molecules and activating the production of inflammatory cytokines or pathways that induce the production of inflammatory molecules. Secreted proteins, such as the pentraxins, which includes the acute phase reacting, C-reactive protein (CRP) and serum amyloid protein (SAP), and the collectins (mannan binding lectin, lung surfactant protein A and D) and ficolins can also readily recruit killing and clearance systems. Indeed, the serum complement system, which is one of the major defence systems in the bloodstream, is efficiently activated by CRP on its binding to the phosphocholine groups of microbial phospholipids—and the subsequent interaction of the bound CRP with C1q—to give classical pathway activation, or MBL, or ficolin, binding to arrays of mannose or N-acetylglucosamine residues, respectively, on the surfaces of microorganisms—to give lectin pathway activation. Also, in addition to the activation and clearance events associated with complement activation by some of the secreted pattern recognition receptors, it is accepted that all these pattern recognition receptors can generally accelerate the uptake and clearance of microbes via phagocytic cells. In view of the growing interest in the cross-talk between innate and adaptive immunity, a thorough understanding of the initial recognition and triggering events, mediated via innate immune receptors, as addressed in this volume, is clearly very useful in helping to also fully understand the mechanisms of activation and control of the adaptive immune system—and to allow a full assessment of the relative roles played by innate immunity and adaptive immunity against a particular infection in higher organisms.

Craig & Fred - Craig Grossi 2017-10-31

The uplifting and unforgettable true story of a US Marine, the stray dog he met on an Afghan battlefield, and how they saved each other and now travel America together, "spreading the message of stubborn positivity." In 2010, Sergeant Craig Grossi was doing intelligence work for Marine RECON—the most elite fighters in the Corps—in a remote part of Afghanistan. While on patrol, he spotted a young dog "with a big goofy head and little legs" who didn't seem vicious or run in a pack like most strays they'd encountered. After eating a piece of beef jerky Craig offered—against military regulations—the dog began to follow him. "Looks

like you made a friend," another Marine yelled. Grossi heard, "Looks like a 'Fred.'" The name stuck, and a beautiful, life-changing friendship was forged. Fred not only stole Craig's heart; he won over the RECON fighters, who helped Craig smuggle the dog into heavily fortified Camp Leatherneck in a duffel bag—risking jail and Fred's life. With the help of a crew of DHL workers, a sympathetic vet, and a military dog handler, Fred eventually made it to Craig's family in Virginia. Months later, when Craig returned to the U.S., it was Fred's turn to save the wounded Marine from Post-Traumatic Stress. Today, Craig and Fred are touching lives nationwide, from a swampy campground in a Louisiana State Park to the streets of Portland, Oregon, and everywhere in between. A poignant and inspiring tale of hope, resilience, and optimism, with a timeless message at its heart—"it is not what happens to us that matters, but how we respond to it"—Craig & Fred is a shining example of the power of love to transform our hearts and our lives.

An Introduction to Commercial Law - Richard Hyland 1999

This book provides the basis for a uniform introductory course to commercial law. [The authors] hope that these materials will be the basis

for a course that will be taken both by those who wish to become criminal prosecutors and those who plan to practice commercial law. With this book, instructors can provide a rigorous introduction to the conceptual problems raised by the practice of commercial transactions, both for the deal-maker and the litigator. The materials examine all of the basic substantive areas of the Code, but not with the goal of providing an overview or preparing students for the bar exam. Instead, [the authors] explore problems and cases in some depth ... -Pref.
