

Master Journal List Clarivate Analytics

When people should go to the book stores, search launch by shop, shelf by shelf, it is in point of fact problematic. This is why we give the ebook compilations in this website. It will entirely ease you to see guide **Master Journal List Clarivate Analytics** as you such as.

By searching the title, publisher, or authors of guide you in fact want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best place within net connections. If you mean to download and install the Master Journal List Clarivate Analytics , it is certainly simple then, before currently we extend the connect to buy and create bargains to download and install Master Journal List Clarivate Analytics appropriately simple!

Researching Communications - David Deacon 2021-05-20

The new edition of the highly respected Researching Communications is a comprehensive and authoritative guide to researching media and communication. Researching Communications, Third Edition is an invaluable guide to performing and analysing research tasks, introducing the major research methods, giving detailed examples of research analysis and practical step-by-step guidance in clear language. Written by highly regarded experts in the field, the third edition includes new sections on social media analysis, digital research methods and comparative research, as well as updated case studies, international examples and details of recent developments in media and communication studies. Undergraduate and postgraduate media and communication students will find Researching Communications an invaluable resource at all stages of their course.

Research Handbook on Motivation in Public Administration - Stazyk, Edmund C. 2022-03-17

This cutting-edge Research Handbook brings together international scholars to provide a comprehensive overview of motivation within and beyond the field of public administration. Discussing the implications of contemporary research for theory and practice, it offers suggestions for the development of future research in the field.

Measuring Research - Cassidy R. Sugimoto 2018

Policy makers, academic administrators, scholars, and members of the public are clamoring for indicators of the value and reach of research. The question of how to quantify the impact and importance of research and scholarly output, from the publication of books and journal articles to the indexing of citations and tweets, is a critical one in predicting innovation, and in deciding what sorts of research is supported and whom is hired to carry it out. There is a wide set of data and tools available for measuring research, but they are often used in crude ways, and each have their own limitations and internal logics. Measuring Research: What Everyone Needs to Know(R) will provide, for the first time, an accessible account of the methods used to gather and analyze data on research output and impact. Following a brief history of scholarly communication and its measurement -- from traditional peer review to crowdsourced review on the social web -- the book will look at the classification of knowledge and academic disciplines, the differences between citations and references, the role of peer review, national research evaluation exercises, the tools used to measure research, the many different types of measurement indicators, and how to measure interdisciplinarity. The book also addresses emerging issues within scholarly communication, including whether or not measurement promotes a "publish or perish" culture, fraud in research, or "citation cartels." It will also look at the stakeholders behind these analytical tools, the adverse effects of these quantifications, and the future of research measurement.

Critical Contributions of the Orbitofrontal Cortex to

Behavior - Geoffrey Schoenbaum 2011

The past ten years have witnessed intense research on the function of orbitofrontal cortex. As a result, the orbitofrontal cortex has been assigned roles in a number of human behaviors and emotions, from tasks such as assessing economic value and making decisions to the emotional states of regret and uncertainty. Orbitofrontal dysfunction has also been implicated in a variety of human disease states, including addiction, depression and bipolar, obsessive-compulsive, and attention deficit disorders. Despite an enormous increase in our knowledge about this region, we still do not have an account of the contributions that the orbitofrontal cortex makes across different circuits to support human behavior, nor do we understand how changes in this structure or its connectivity may contribute to disease states. This volume explores areas of research that are critical to move the field beyond a circuit-centric view of the orbitofrontal cortex to define the roles this area plays in human behavior and mental health.

Subject Classification System - United States. Army Air Forces. Matériel Command. Air Documents Division 1946

The Web of Knowledge - Eugene Garfield 2000

This new ASIST monograph is the first to comprehensively address the history, theory, and practical applications of citation analysis, a field which has grown from Garfield's seed of an idea, and to examine its impact on scholarly research forty years after its inception. In bringing together the analyses, insights, and reflections of more than thirty-five leading lights, editors Cronin and Atkins have produced both a comprehensive survey of citation indexing and its applications and a beautifully-realized tribute to Eugene Garfield and his vision, in honor of his seventy-fifth birthday.

Citation Indexing, Its Theory and Application in Science, Technology, and Humanities - Eugene Garfield 1983

A conceptual view of citation indexing; A historical view of citation indexing; The design and production of a citation index; The application of citation indexing to the patent literature; The citation index as a search tool; A science management tool; Citation analysis as a method of historical research into science; Mapping the structure of science; Citation analysis of scientific journals; Perspective on citation analysis of scientists.

PUBLICAȚIILE SERIALE ȘTIINȚIFICE ROMÂNEȘTI ÎN CERCETAREA CONTEMPORANĂ - GABRIELA JURUBIȚĂ 2021-01-01

Volumul de față este prima lucrare monografică românească asupra revistelor științifice apărute la noi. Rolul și importanța acestui tip de publicație, într-o epocă în care trebuie revalorificată în permanență informația, ca resort al descoperirilor și progresului, sunt analizate cu acribie de autoare plecând chiar de la apariția acestui suport de date științifice până în epoca stakeholder-ilor.

Perspectives on Academic Persian - Abbas Aghdassi

2021-09-17

This book focuses on the idea of Academic Persian in the growing competition of many Middle Eastern languages to produce and highlight their academic discourse. Similar to academic English, most West Asian languages including Persian, Turkish, and Arabic are developing new styles and genres to produce academic texts. The book addresses a major question: "What is academic Persian?" Intended for researchers, experts, analysts, policy-makers, and students in Persian, Iranian studies, and Islamic studies, as well as Near Eastern languages and Middle Eastern cultures and languages, the book includes numerous technical contributions on the emerging markets involving west Asian languages. Since indexing, abstracting, crawling, metrics, citations, and visibility are becoming hot issues for academics, service providers (e.g., publishers) and policy-makers (e.g., university heads), a knowledge of academic Persian will help readers to grasp what Persian, and other similar languages, require in academic markets.

European Journal of Tourism Research - 2022-07-01

The European Journal of Tourism Research is an open-access academic journal in the field of tourism, published by Varna University of Management, Bulgaria. Its aim is to provide a platform for discussion of theoretical and empirical problems in tourism. Publications from all fields, connected with tourism such as tourism management, tourism marketing, tourism sociology, psychology in tourism, tourism geography, political sciences in tourism, mathematics, tourism statistics, tourism anthropology, culture and tourism, heritage and tourism, national identity and tourism, information technologies in tourism and others are invited. Empirical studies need to have either a European context or clearly stated implications for the European tourism industry. The journal is open to all researchers. Young researchers and authors from Central and Eastern Europe are encouraged to submit their contributions. The journal is indexed in Scopus and Clarivate Analytics' Emerging Sources Citation Index. There are no charges for publication. The editorial team welcomes your submissions to the European Journal of Tourism Research.

-

Predatory Publishing - Jingfeng Xia 2021-12-24

Predatory Publishing introduces and examines many forms of unethical and unprofessional publishing, whilst also analyzing its tactics and impact on scholarly communication. Covering all aspects of predatory publishing, including topics such as predatory journals, hijacked publications, alternative metrics, and fraudulent conferences, the book considers the sociocultural, geopolitical, and technical impact of predatory behaviors. Demonstrating that predatory publishing has taken advantage of the open access movement, the author highlights the negative impact such publishing practices have had on science discovery and dissemination around the world. Efforts to counter unethical and destructive conduct, such as journal blacklists, peer-review sting operations, the implementation of the strict journal selection criteria by the Directory of Open Access Journals, and government regulations in some countries, are also fully described. Predatory Publishing is a useful resource for every researcher, practitioner, and student in the global scholarly community. Individuals can expect to get a whole picture of the practice by reading this book, and decision-makers will find it informative to support their decisions. This book will be of interest to those studying and working in the fields of publishing, library and information science, communication science, economics, and higher education. People in other fields, particularly biomedical sciences, will also find it useful.

Research and Social Work in Time and Place - Ian Shaw 2023-02-24

This volume, which brings together chapters and journal articles published by renowned academic Ian Shaw, focusses on the practice/research relationship within social work – a theme that has preoccupied much of his writing over the last forty or more years. These pieces show the academic development of his understanding of the complexity and challenge of that relationship, as well as the shifts which have occurred in it over time. Divided into four sections • Forming Professional Practice • Forming Social Work Research • Chicago, Sociology and Social Work • Critical Tributes and Debates and comprised of 31 chapters, it will be of interest to all scholars of social work, and allied subjects including sociology, allied health, social policy and disability studies.

Proceedings of Third International Conference on Computing, Communications, and Cyber-Security - Pradeep Kumar Singh 2022-07-02

This book features selected research papers presented at the Third International Conference on Computing, Communications, and Cyber-Security (IC4S 2021), organized in Krishna Engineering College (KEC), Ghaziabad, India, along with Academic Associates; Southern Federal University, Russia; IAC Educational, India; and ITS Mohan Nagar, Ghaziabad, India, during October 30–31, 2021. It includes innovative work from researchers, leading innovators, and professionals in the area of communication and network technologies, advanced computing technologies, data analytics and intelligent learning, the latest electrical and electronics trends, and security and privacy issues.

Journal of Biological Standardization - 1980

Health Sciences Collection Management for the Twenty-First Century - Susan K. Kendall 2018-01-15

In Health Sciences Collection Management for the Twenty-First Century, readers learn about best practices and also the big picture and the deeper changes that affect decision making. Chapter contributors and stories about different libraries' experiences provide unique perspectives to topics and demonstrate the thoughtfulness of today's health sciences collection management librarians.

Demystifying Scholarly Metrics: A Practical Guide - Marc W. Vinyard 2022-02-25

Both librarians and professors can be overwhelmed by the bewildering number of scholarly metrics. This user-friendly book demystifies them, helping librarians become familiar with scholarly metrics and giving them the confidence to assist faculty at their institutions. It also equips faculty authors with the knowledge to evaluate journals and use metrics to track their scholarly impact. Several controversies exist in the scholarly metrics landscape, including a disagreement between the proponents of altmetrics and traditional bibliometrics. Even more contentious debates are breaking out over predatory journals and open access publishing. Authors Mark Vinyard and Jaimie Beth Colvin, who successfully launched a faculty publishing initiative, explain which aspects of metrics are truly essential to grasp, and they place these numbers in context. They help readers identify the metrics that are the best fit for their scholarship and give librarians and professors the tools to make smart decisions in this changing scholarly metrics landscape.

Accounting Journals: Scopus, Web of Science, SCImago - Liudmyla Shkulipa 2020-03-09

This book is a full guidebook among more than 218 accounting international journals with an evaluation of 3,000 publications for over the last two years. It aims to help readers for selecting an appropriate journal for publishing own research in the international arena or to find the required topic for conducting further

investigating or to be informed about so large-scale science as accounting. Here a reader will find detailed information about accounting journals in terms of Scopus, Web of Science and SCImago databases. In addition, there are highlighted accounting journals in terms of IFRS and blockchain concentration in accounting researches nowadays. The relevant aims and scope of each journal are also presented. Anyway, this book is an indispensable assistant for students while getting the "Accounting" specialization, as well as teachers and scientists while conducting empirical researches in the practice and theory of the accounting field.

Scientific Babel - Michael D. Gordin 2015-04-13

English is the language of science today. No matter which languages you know, if you want your work seen, studied, and cited, you need to publish in English. But that hasn't always been the case. Though there was a time when Latin dominated the field, for centuries science has been a polyglot enterprise, conducted in a number of languages whose importance waxed and waned over time—until the rise of English in the twentieth century. So how did we get from there to here? How did French, German, Latin, Russian, and even Esperanto give way to English? And what can we reconstruct of the experience of doing science in the polyglot past? With Scientific Babel, Michael D. Gordin resurrects that lost world, in part through an ingenious mechanism: the pages of his highly readable narrative account teem with footnotes—not offering background information, but presenting quoted material in its original language. The result is stunning: as we read about the rise and fall of languages, driven by politics, war, economics, and institutions, we actually see it happen in the ever-changing web of multilingual examples. The history of science, and of English as its dominant language, comes to life, and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices, but also of the possibilities of the polyglot, and the losses that the dominance of English entails. Few historians of science write as well as Gordin, and Scientific Babel reveals his incredible command of the literature, language, and intellectual essence of science past and present. No reader who takes this linguistic journey with him will be disappointed.

Information Literacy in the Workplace - Serap Kurbanoglu 2018-01-25

This book constitutes the refereed post-conference proceedings of the 5th European Conference on Information Literacy, ECIL 2017, held in Saint Malo, France, in September 2017. The 84 revised papers included in this volume were carefully reviewed and selected from 358 submissions. The papers cover a wide range of topics in the field of information literacy and focus on information literacy in the workplace. They are organized in the following topical sections: workplace information literacy, employability and career readiness; data literacy and research data management; media literacy; copyright literacy; transliteracy, reading literacy, digital literacy, financial literacy, search engine literacy, civic literacy; science literacy; health information literacy; information behavior; information literacy in higher education; information literacy in K-12; information literacy instruction; information literacy and libraries; and theoretical framework.

Open Access - Peter Suber 2012-07-20

A concise introduction to the basics of open access, describing what it is (and isn't) and showing that it is easy, fast, inexpensive, legal, and beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary opportunity when we make our work "open access": digital, online, free of charge, and free of most copyright and licensing restrictions.

Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold.

Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.
Annales Bogorienses - 1998

Bulletin of the American Geographical and Statistical Society - American Geographical and Statistical Society 1852

Nonlinear Analysis - Th M Rassias 1988-01-01

Contents: Fixed Point Theory and Nonlinear Problems (Th Rassias)Global Linearization Iterative Methods and Nonlinear Partial Differential Equations III (M Altman)On Generalized Power Series and Generalized Operational Calculus and Its Application (M Al-Bassam)Multiple Solutions to Parametrized Nonlinear Differential Systems from Nielsen Fixed Point Theory (R Brown)The topology of Ind-Affine Sets (P Cherenack)Almost Approximately Polynomial Functions (P Cholewa)Cohomology Classes and Foliated Manifolds (M Craioveanu & M Puta)Bifurcation and Nonlinear Instability in Applied Mathematics (L Debnath)The Stability of Weakly Additive Functional (H Drljevic)Index Theory for G-Bundle Pairs with Applications to Borsuk-Ulam Type Theorems for G-Sphere Bundles (E Fadell & S Hussein)Nonlinear Approximation and Moment Problem (J S Hwang & G D Lin)Periods in Equicontinuous Topological Dynamical Systems (A Iwanik et al.)Continuation Theorems for Semi-Linear Equations in Banach Spaces: A Survey (J Mawhin & K Rybakowski)On Contractifiable Self-Mappings (P Meyers)Normal Structures and Nonexpansive Mappings in Banach Spaces (J Nelson et al.): Survey on Uniqueness and Classification Theorems for Minimal Surfaces (Th Rassias)Contractive Definitions (B Rhoades)On KY Fan's Theorem and Its Applications (S Singh)Fixed Points of Amenable Semigroups of Differentiable Operators (P Soardi)Research Problems on Nonlinear Equations (Th Rassias) Readership: Mathematicians and applied scientists. Keywords:Nonlinear Analysis;Nonlinear Partial Differential Equations III;Polynomial Functions;Cohomology Classes;Foliated Manifolds;Topological Dynamical Systems;Minimal Surfaces;Differentiable Operators;Nonlinear Equations
Eugene Garfield 1925-2017 - Antonella De Robbio 2017-04-01

Garfield's greatest contribution to science was the Science Citation Index (SCI). It is a system that used to chart connections between pieces of scientific literature. It is not only an intellectual achievement, but also an information-engineering marvel covering millions of records, from numerous subject fields and communicated over worldwide networks. These databases became the foundation of the online research tool called the Web of Knowledge. And it has now become accessible electronically via the Web of Science. Garfield enabled information retrieval to scale up basically creating the entire information science field, as we know it today. His life and work will surely inspire generations of scientists in advancing the frontiers of human knowledge. This is Informatics Studies 4(2), which is Eugene Garfield Memorial Issue. It gives a bird's eye

view of Garfield's life and work and consist of an 80 page interview of Garfield published in print for the first time presenting his views on impact of information systems in scientific research, NGOs, the future of Open Access, current research, and Big science which can guide academic administrators, science policy makers in governments and scientists.

Research Methodology and Scientific Writing - C. George Thomas 2021-03-28

This book presents a guide for research methodology and scientific writing covering various elements such as finding research problems, writing research proposals, obtaining funds for research, selecting research designs, searching the literature and review, collection of data and analysis, preparation of thesis, writing research papers for journals, citation and listing of references, preparation of visual materials, oral and poster presentation in conferences, and ethical issues in research. Besides introducing library and its various features in a lucid style, the latest on the use of information technology in retrieving and managing information through various means are also discussed in this book. The book is useful for students, young researchers, and professionals.

Nanoscale Photonic Imaging - Tim Salditt 2020-06-09

This open access book, edited and authored by a team of world-leading researchers, provides a broad overview of advanced photonic methods for nanoscale visualization, as well as describing a range of fascinating in-depth studies. Introductory chapters cover the most relevant physics and basic methods that young researchers need to master in order to work effectively in the field of nanoscale photonic imaging, from physical first principles, to instrumentation, to mathematical foundations of imaging and data analysis. Subsequent chapters demonstrate how these cutting edge methods are applied to a variety of systems, including complex fluids and biomolecular systems, for visualizing their structure and dynamics, in space and on timescales extending over many orders of magnitude down to the femtosecond range. Progress in nanoscale photonic imaging in Göttingen has been the sum total of more than a decade of work by a wide range of scientists and mathematicians across disciplines, working together in a vibrant collaboration of a kind rarely matched. This volume presents the highlights of their research achievements and serves as a record of the unique and remarkable constellation of contributors, as well as looking ahead at the future prospects in this field. It will serve not only as a useful reference for experienced researchers but also as a valuable point of entry for newcomers.

Scholarly Communication and Bibliometrics - Christine L. Borgman 1990-09

Techniques of mathematical and statistical analysis of books and other media of communication are applied to such works as research reports and scientific journals. About half of the 15 articles are from a special issues of Communication research 16(5), 1989. Annotation copyright Book News, Inc. Portland, Or.

Clinical Pharmacy and Therapeutics - Roger Walker 2003

A practical guide for the treatment of common diseases, this updated edition includes the very latest information. It covers the treatment of disease by drug therapy and uses case studies to illustrate the application of the principles discussed

Scripting Computer-Supported Collaborative Learning - Frank Fischer 2007-04-08

Theoretically, the term "script" appears to be rather ill-defined. This book clarifies the use of the term "script" in education. It approaches the term from at least three perspectives: cognitive psychology perspective, computer science perspective, and an educational perspective. The book provides learners with scripts that support them both in

communication/coordination and in higher-order learning.
Fast Facts: Comprehensive Genomic Profiling - Bernardo L. Rapoport 2020-10-20

Cancer is a multifaceted disease in which genetic changes induce uncontrolled tumor growth. Genomic characterization of cancer is now leading to better diagnostic, prognostic and predictive biomarkers, and effective individualized management. 'Fast Facts: Comprehensive Genomic Profiling' provides a crash course in the science, methods and application of genomic profiling. Assuming only the most basic knowledge – or memory – of cell biology, the authors provide an overview of DNA and RNA biology and next-generation sequencing. This sets in context the descriptions of prognostic and predictive biomarkers for different cancer types and genomic-based treatments. Finally, but importantly, some of the practicalities of gaining and interpreting genomic information are described. Whether you need a primer or a refresher, this short colorful book demystifies this complex subject. Contents: • Genetic mutations and biomarkers • Understanding next-generation sequencing • Elements of comprehensive genomic profiles • Role in precision oncology • Predictive and prognostic biomarkers • Overcoming barriers to genotype-directed therapy

Communication Theory and Application in Post-Socialist Contexts - Maureen C. Minielli 2022-03-14

Communication Theory and Application in Post-Socialist Contexts serves as a resource for anyone on the quest of diversifying and globalizing communication studies. It captures significant communication tendencies in several post-socialist countries and situates these tendencies within communication theory and application in a wide array of areas.

Springer Handbook of Science and Technology Indicators - Wolfgang Glänzel 2019-10-30

This handbook presents the state of the art of quantitative methods and models to understand and assess the science and technology system. Focusing on various aspects of the development and application of indicators derived from data on scholarly publications, patents and electronic communications, the individual chapters, written by leading experts, discuss theoretical and methodological issues, illustrate applications, highlight their policy context and relevance, and point to future research directions. A substantial portion of the book is dedicated to detailed descriptions and analyses of data sources, presenting both traditional and advanced approaches. It addresses the main bibliographic metrics and indexes, such as the journal impact factor and the h-index, as well as altmetric and webometric indicators and science mapping techniques on different levels of aggregation and in the context of their value for the assessment of research performance as well as their impact on research policy and society. It also presents and critically discusses various national research evaluation systems. Complementing the sections reflecting on the science system, the technology section includes multiple chapters that explain different aspects of patent statistics, patent classification and database search methods to retrieve patent-related information. In addition, it examines the relevance of trademarks and standards as additional technological indicators. The Springer Handbook of Science and Technology Indicators is an invaluable resource for practitioners, scientists and policy makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance.

Asian Social Work - Ian Shaw 2019-09-16

The countries of East and Southeast Asia, taken as a whole, display a laboratory of social and political conditions, with individual countries presenting a variety of political, cultural and social characteristics. Some with one-party state systems,

others with stable liberal democracies and yet others with more fragile democratic systems. As such the region presents a unique opportunity to examine the relationship between diverse national environments and social work education regimes. In this book, social work educators and theorists from around East and Southeast Asia provide accounts of the social work programs within the higher education systems of their respective countries and compare them to those of their neighbours. This is the first book to offer a structured account of how social work and social work education have emerged and finds their present place in the historical, economic, political, urban/rural and higher education contexts of Southeast Asia and East Asia. Experts from the region assess the extent to which these countries' systems possess a collective coherence, while examining the diversity among them.

Getting Your Manuscript Published in An International Journal: Advice & Tips - Joko Gunawan 2019-08-19

Buku ini memuat nasehat dan tips untuk publikasi pada jurnal International. Isi buku ini terdiri dari 14 bab antara lain: Klasifikasi Jurnal Ilmiah; Mengenal Scopus, Web of Science, PubMed, DOAJ, & Google Scholar; Perbedaan Journal Articles, Proceedings, & Book of Abstract; Tipe-Tipe Artikel Yang Bisa Dipublikasikan; Cara melihat Journal Ranking : Quartile & Tier; Choosing the Right Journal; Formatting Abstract, Main Article, Citation & Reference; Title Page, Covering Letter, & Copyright; Penulisan Original Research Article; Penulisan Review Article; Etika Publikasi; Rejection; Langkah-Langkah Submit Artikel Yang Sudah Direvisi (setelah mendapat feedback dari Editors dan Reviewers); dan Last Tips.

Surviving and Thriving in Postgraduate Research - Ray Cooksey 2019-06-27

This handbook provides an in-depth exploration of the entire journey of postgraduate research in the social and behavioural sciences, from enrolment to its culmination in the form of a thesis, dissertation or portfolio, and beyond. It is written in an accessible and example-rich style, offering practical and concrete advice in virtually all areas. It also includes references to additional resources and websites, and each chapter features key recommendations for improving the postgraduate research experience. The book addresses not only research-related aspects (e.g. supervisors; selecting your guiding assumptions; contextualising, framing and configuring research; reviewing literature; sampling; writing proposals; ethics and academic integrity; selecting a data gathering strategy; surviving your thesis/dissertation/portfolio examination; and publishing), but also questions concerning how to integrate, manage, and balance the research journey in the context of the postgraduate student's broader life-world (e.g. skill development and supervisor relations; effective time and project management; a healthy work-life balance; maintaining motivation; and dealing with criticism). The book adopts an explicitly pluralist perspective on postgraduate research, moving beyond mixed methods thinking, and offers concrete examples from postgraduate students' real-world experiences.

Recent Advancements in Smart Remote Patient Monitoring, Wearable Devices, and Diagnostics Systems - Zeshan, Furkh 2023-01-13

Different healthcare technologies have been in use for decades. These technologies are continuously evolving and changing the way medicine will be practiced in the future. These technologies allow medical practice from anywhere, at any time, and from any device. These technologies are mainly concerned with the resources, devices, and methods required to optimize the acquisition, storage, retrieval, processing, and use of information in health. Recent Advancements in Smart Remote Patient Monitoring, Wearable Devices, and

Diagnostics Systems provides relevant theoretical and practical frameworks, as well as the latest empirical research findings in the area. It provides insights and supports executives concerned with remote patient monitoring through wearable devices and diagnostics systems. Covering topics such as cloud computing, obesity monitoring systems, and photoacoustic imaging, this premier reference source is an essential resource for hospital administrators, medical technicians, healthcare professionals, medical students and educators, librarians, researchers, and academicians.

Handbook Bibliometrics - Rafael Ball 2020-12-07

Bibliometrics and altmetrics are increasingly becoming the focus of interest in the context of research evaluation. The Handbook Bibliometrics provides a comprehensive introduction to quantifying scientific output in addition to a historical derivation, individual indicators, institutions, application perspectives and data bases. Furthermore, application scenarios, training and qualification on bibliometrics and their implications are considered.

Most Influential Scholars in Criminology and Criminal Justice, 1986-2020 - Ellen G. Cohn 2023-03-28

This brief examines the influence and prestige of scholars and works in the field of criminology and criminal justice, as well as changes in influence and prestige over a period of 35 years, using citation analysis. Based on responses to prior research, most criminologists consider the results both fascinating and thought-provoking, although methods of measuring scholarly influence are also highly controversial. The brief includes 35 years of data (1986 through 2020) on the most-cited scholars and works in major American and international criminology and criminal justice journals, and provides an objective measure of scholarly influence and prestige. Appropriate for graduate students and researchers, it helps to document the intellectual development of criminology and criminal justice as a field of study.

Research Analytics - Francisco J. Cantu-Ortiz 2017-10-25

The growth of machines and users of the Internet has led to the proliferation of all sorts of data concerning individuals, institutions, companies, governments, universities, and all kinds of known objects and events happening everywhere in daily life. Scientific knowledge is not an exception to the data boom. The phenomenon of data growth in science pushes forth as the number of scientific papers published doubles every 9-15 years, and the need for methods and tools to understand what is reported in scientific literature becomes evident. As the number of academicians and innovators swells, so do the number of publications of all types, yielding outlets of documents and depots of authors and institutions that need to be found in Bibliometric databases. These databases are dug into and treated to hand over metrics of research performance by means of Scientometrics that analyze the toil of individuals, institutions, journals, countries, and even regions of the world. The objective of this book is to assist students, professors, university managers, government, industry, and stakeholders in general, understand which are the main Bibliometric databases, what are the key research indicators, and who are the main players in university rankings and the methodologies and approaches that they employ in producing ranking tables. The book is divided into two sections. The first looks at Scientometric databases, including Scopus and Google Scholar as well as institutional repositories. The second section examines the application of Scientometrics to world-class universities and the role that Scientometrics can play in competition among them. It looks at university rankings and the methodologies used to create these rankings. Individual chapters examine specific rankings that include: QS World University Scimago Institutions Webometrics U-Multirank

U.S. News & World Report The book concludes with a

discussion of university performance in the age of research analytics.
