The Force Is With Us - Thomas Walker 2014-03-17

Inspired by encounters with his son from beyond the grave, Tom Walker went searching for answers. He discovered that paranormal phenomena

have not only been exhaustively studied, but that scientific evidence exists to support it. He uncovered numerous scientific studies involving telepathy, clairvoyance, precognition, and psychokinesis, as well as government-funded scientists who proved their validity. Through his research, Walker eventually came to the belief that there is a force in the world that makes things happen. The force, an energy field that permeates the universe, forms and sustains all things, and is

the basis behind paranormal phenomena and alternative forms of healing. He describes his provocative conclusions in this book. Making compelling connections between ideas like the Great Void and “dark matter,” between Ch’i and quantum fields, Walker argues that it is our connection with the higher planes of consciousness — the fundamental quantum reality— that truly makes up the world.

The Stargate Conspiracy - Lynn Picknett
2001-09-01

In recent years, alternative historians have gained remarkable insight into the mysteries of ancient Egypt—but according to Lynn Picknett and Clive Prince, their discoveries tie into a dangerous conspiracy nearly fifty years in the making. At the center of this conspiracy is a group of respected, powerful individuals who believe that the ancient Egyptian gods are really extraterrestrials who will soon return to earth. The conspirators have intimate and exclusive knowledge of this momentous second coming—but they insist on keeping it to themselves. What could be the purpose of such a conspiracy? Why are the conspirators so desperate to keep their information a secret? And what does it

mean for mankind? In this riveting, well-researched book, Picknett and Price offer compelling evidence that the conspiracy exists—and expose the insidious motivations of the individuals and organizations behind it....

Children of a Living Universe - Paul Von Ward
2014-04-01

Children of a Living Universe is a call to action unlike any other you may have encountered. According to cultural historian and cosmologist Paul Von Ward, the time has come for human beings to reassess just about everything we believe about our ancestry and global past. Drawing upon forgotten prehistory, clues from the world's esoteric traditions, and new research in consciousness, Von Ward asserts we are more powerful beings than either science or religion has led us to believe. He exhorts us to embrace a bold, new model of human existence, one that explains our celestial origins,

multidimensional capacities, and destiny as conscious co-creators of a self-learning and self-correcting universe. With insight and clarity, Von Ward envisions that the discovery of our true legacy will inspire a global renaissance of inner knowing and unprecedented social progress. He sees humanity assuming its place as part of a universal community of conscious beings, and fulfilling our potential to serve as galactic leaders. Children of a Living Universe is a brilliant guide to this new and essential process in human spiritual evolution. Previously published as Our Solarian Legacy. Journal of Proceedings of the ... SECRET MARS - M. J. Craig 2020-01-01
Why has NASA not announced to the world the greatest scientific discovery ever made in the

history of space exploration? Do you want to know what has really been discovered by the orbiters and rovers on the planet Mars? While scientists spend billions of dollars confirming that microbes live in the Martian soil, people sitting at home on their computers studying the Mars images are making far more astounding discoveries... they have found the possible archaeological remains of an extraterrestrial civilization. Hard to believe? Well, this challenging book invites you to take a look at the astounding pictures yourself and make up your own mind. Secret Mars presents over 160 incredible images taken by American and European spacecraft that reveal possible evidence of a civilization that once lived and may still live, on the planet Mars... powerful evidence that scientists are ignoring! This is the complete revised edition from the original 2013 publication in Britain. A visual and fascinating book!

Revoked - Allison Frankel 2020

"[The report] finds that supervision -- probation and parole -- drives high numbers of people, disproportionately those who are Black and brown, right back to jail or prison, while in large part failing to help them get needed services and resources. In states examined in the report, people are often incarcerated for violating the rules of their supervision or for low-level crimes, and receive disproportionate punishment following proceedings that fail to adequately protect their fair trial rights."-

The Mars Mystery - Graham Hancock 2010-08-11

An asteroid transformed Mars from a lush planet with rivers and oceans into a bleak and icy hell. Is Earth condemned to the same fate, or can we protect ourselves and our planet from extinction? In his most riveting and revealing book yet, Graham Hancock examines the evidence that the barren

Red Planet was once home to a lush environment of flowing rivers, lakes, and oceans. Could Mars have sustained life and civilization? Megaliths found on the parched shores of Cydonia, a former Martian ocean, mirror the geometrical conventions of the pyramids at Egypt's Giza necropolis. Especially startling is a Sphinx-like structure depicting a face with distinguishable diadem, teeth, mouth and an Egyptian-style headdress. Might there be a connection between the structures of Egypt and those of Mars? Why does NASA continue to dismiss these remarkable anomalies as "a trick of light"? Hancock points to the intriguing possibility that ancient Martian civilization is communicating with us through the remarkable structures it left behind. In exploring the possible traces left by the Martian civilization and the cosmic cataclysm that may have ended it, *The Mars Mystery* is both an illumination of our ancient past and a warning--that we still

have time to heed--about our ultimate fate.

Dark Moon - Mary Bennett 2001

As the dust settles on the 30th anniversary of Apollo 11, information is now coming to light that throws into serious doubt the authenticity of the Apollo record. New evidence clearly suggests that NASA hoaxed the photographs taken on the surface of the Moon. These disturbing findings are supported by detailed analysis of the Apollo images by professional photographer David S Percy ARPS and physicist David Groves PhD. The numerous inconsistencies clearly visible in the Apollo photographic account are quite irrefutable. Recent research indicates that the errors evidenced in DARK MOON were deliberately planted by individuals determined to leave clues to the faking

in which they were unwillingly involved. DARK MOON is the answer to the question-did the Apollo missions really land a man on the Moon and return him alive and well to Earth, or is the record incorrect?

Braille Monitor - National Federation of the Blind
2017-12-13

Excerpt from Braille Monitor: Special Issue; May, 1959 The first move of the mcdaniel-boring faction following the 1958 convention took the form Of a purported rebuttal by mcdaniel to George Card's mild convention summary in the Monitor. The McDaniel piece contrived to revive and fight out all over again the very issues which had been decided by the convention. In an effort to con fine this acrimonious debate so far as possible within the boundaries of the Federation, the president declined to publish the mcdaniel re buttal in the Braille Monitor but instead circulated it to Federation

members in the form Of a special bulletin. Among other things, the mcdaniel rebuttal contained the amazing argument that the basic changes in the Federation which his faction sought could have been accomplished by the president and the executive committee alone without any need for consultation or consent by the convention. That argument was only the most obvious revelation in the paper that what the faction was agitating for was not more, but distinctly less, democ racy; not additional authority or responsibility for the membership and its delegates, but simply more power for the executive committee power which could, of course, be obtained only by taking policy-mak ing powers away from the convention and administrative powers away from the president. In releasing the mcdaniel rebuttal as a bulletin, the president wrote in his accompanying letter: Democracy indeed requires, as our critic seems to

say, enlightened and effective leadership. But leadership however enlightened can only be effective when other essentials of democracy are also present; and the most essential of these is the simple willingness to resolve the differences peaceably through the process of majority vote. It would be better, no doubt, if there could always be unanimous and perfect accord among us; but when there is not, it is indispensable to the very life of any democratic movement that those who find their views defeated should accept the decision in good faith and work together with their fellows in the common cause. No one who refuses to recognize and abide by the principle of majority rule should be permitted to invoke the name of democracy for his tactics of obstruction. For if those tactics should succeed the result would be not democracy, nor unity, nor effective leadership, but only anarchy and failure. About the Publisher

Prospective Memory - Jan Rummel 2019

Featuring contributions from world-leading experts, this book presents a timely overview of current theoretical, methodological, and applied issues in the field of prospective memory. The

authors explore how prospective memories are formed, how they are maintained over time, and how they are retrieved. This volume integrates our understanding of prospective memory and how it functions with related cognitive processes and themes, such as context memory, metamemory, working memory, and cognitive control.

Considering recent methodological advances in the field, such as the use of cognitive modeling, the book also covers individual differences in prospective memory abilities, their development across the life span, and their manifestations in naturalistic settings. The book also illustrates how the understanding of prospective memory can be integrated with other related research areas.

Prospective Memory is an invaluable resource for students and researchers of human memory.

Maps of the Ancient Sea Kings - Charles H. Hapgood 1966

Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt. Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century. Hapgood believes that they mapped all the continents. This would mean that the Americas were mapped thousands of years before Columbus.

Antarctica would have been mapped when its coasts were free of ice. Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene, Ice Age 'land bridge'.

Prospective Memory -

Remembering - Fergus Craik 2021-06-10

Memory is typically thought of as a set of neural representations - 'memory traces' - that must be found and reactivated in order to be experienced. It is often suggested that 'memory traces' are

represented by a hierarchically organized system of analyzers, modified, sharpened and differentiated by encounters with successive events.

Remembering: An activity of mind and brain is the magnum opus of one of the leading figures in the psychology of memory. It sets out Fergus Craik's current view of human memory as a dynamic activity of mind and brain. The author argues that remembering should be understood as a system of active cognitive processes, similar to (perhaps identical to) the processes underlying attending, perceiving and thinking. Thus, encoding processes are essentially viewed as the mental activities involved in perceiving and understanding, and retrieval is described as the partial reactivation of these same processes. This account proposes that episodic and semantic memory should be thought of as levels in a continuum of specificity rather than as separate systems of memory. In addition, the book

presents Craik's views on working memory and on age-related memory impairments. In the latter case the losses are attributed largely to a difficulty with the self-initiation of appropriate encoding and retrieval operations compensated, when needed, by support from the external environment. The development of these ideas is discussed throughout the book and illustrated substantially by experiments from the author's lab, but also by empirical and theoretical contributions from other researchers. A broad account of current ideas and findings in contemporary memory research, but viewed from the author's personal theoretical standpoint, **Remembering: An activity of mind and brain** will be essential for researchers, graduate and postdoctoral students working in the field of human memory.

Alien Intelligence and the Pathway to Mars - Mary

Bennett 2021-05-04

- Details how exploratory probes sent to Mars in the 1970s triggered a plethora of anomalous events, particularly crop circles (glyphs), and how these events are messages from ET intelligence to help us send a human mission to Mars
- Reveals how the anomalous Cydonia region of Mars fits the Golden Ratio Spiral and looks at links between Martian formations and Earth's ancient sites
- Illustrated throughout with color photographs, maps, and diagrams

In this full-color study based on 25 years of research, Mary Bennett explores the ancient and modern connections between Mars and Earth as well as how extraterrestrial intelligences are trying to assist us in constructing a viable spacecraft to take a human crew swiftly and safely to Mars. She details how exploratory probes sent to Mars in the 1970s triggered over three decades of anomalous yet

scientifically validated events, including crop circles, or crop glyphs. She explains how these formations, along with related events, encode advanced engineering concepts that offer solutions to the fundamental problems presently hindering long-haul crewed spaceflight--whether to the Moon, Mars, or beyond. Looking at the red planet itself, the author reveals the scientifically verifiable evidence pointing to intelligent design on the surface of Mars, specifically in the Cydonia region, which fits the Golden Ratio Spiral. She looks at the covert links between the Martian formations and Earth's ancient sites, such as the Avebury landscape in England and the Giza Complex. She describes how agencies concerned with space travel have been quietly mirroring areas of Mars through construction projects here on Earth, revealing that many of the ET messages have already been partially decoded. Taking you from a complex on

Mars to the Teotihuacán pyramids in Mexico, from phi ratios to the Pentagon, from the Great Pyramid to quantum computing, this exploration of the hidden influence of Mars shows that our abilities as a future space-faring species began in the ancient past and are now coming to fruition.

Ancient Aliens on Mars - Mike Bara 2013-10-02
New York Times best-selling author and Secret Space Program researcher Mike Bara brings us this lavishly illustrated volume on alien structures on Mars. Was there once a vast, technologically advanced civilization on Mars, and did it leave evidence of its existence behind for humans to find eons later? Did these advanced extraterrestrials vanish in a solar system-wide cataclysm of their own making, only to make their way to Earth and start anew? Was Mars once as lush and green as the Earth, and teeming with life? Did Mars once orbit a missing member of the solar system, a “Super

Earth” that vanished in a disaster that devastated life on Earth and Venus and left us only the asteroid belt as evidence of its once grand existence? Did the survivors of this catastrophe leave monuments and temples behind, arranged in a mathematical precision designed to teach us the Secret of a new physics that could lift us back to the stars? Does the planet have an automated defense shield that swallows up robotic probes if they wander into the wrong areas? And are the lights still on down there, deep below the sands of Mars, just waiting for us to uncover them? Mike Bara examines all these questions and more in this astounding book, full of fascinating information on the following topics: Mars as the Abode of Life What Happened to Mars? The True Colors of Mars The Message of Cydonia The Politics of Mars The Pathfinder Sphinx Mars Global Surveyor Discoveries Face it, It’s a Face Tons More!

Ancient Aliens - Philip Coppens 2014-12-15

Ancient civilizations generated many innovations that are difficult to explain, such as the remarkable mathematical accuracy of the pyramids of Giza, the man-made fertile soil of the Amazon known as terra preta, and massive stone monuments too heavy to move in Peru and Lebanon, among other places. Given that modern science cannot explain these mysterious phenomena, one theory holds that ancient aliens were responsible for them. This

volume examines the credibility of various paranormal hypotheses, giving readers the opportunity to explore the greatest puzzles of antiquity.

The Ancient Alien Question, 10th Anniversary Edition - Philip Coppens 2021-03-01

“ . . . an important and outstanding contribution.”

—Erich von Däniken, bestselling author of *Chariots of the Gods* “The Ancient Alien Question provides a captivating adventure around the world and sheds an interesting perspective on the Ancient Astronaut Theory.” —Giorgio A. Tsoukalos, producer of *Ancient Aliens: The Series* “Philip Coppens covers all the bases on this controversial topic. His research is thorough and he addresses each topic with a balanced overview that cuts through the jungle of confusion with a very sharp machete of reason.”

—David Hatcher Childress, author of *Technology of the Gods* The Ancient Alien Question reveals an

array of astonishing truths, including: A radically different understanding of the pyramids and how they were constructed The extraordinary stories behind monuments such as the Nazca lines and Puma Punku How extraterrestrials came to our planet and the evidence that supports this Analyzing the historical and archaeological evidence, Philip Coppens demonstrates that there is substantial proof that our ancestors were far more technologically advanced than currently accepted, and that certain cultures interacted with nonhuman intelligences. Our ancestors were clearly not alone. Fifty years after Erich von Däniken posed these questions in *Chariots of the Gods*, Coppens provides clear, concise answers to the great historical enigmas in an accessible, readable format. Your view of human history will never be the same again!
