readers with an outstanding introduction to the fundamentals of ceramics, with a distinct focus on solid-state physics and chemistry. Author Michel Barsoum offers introductory coverage that presents equations derived from first principles with an emphasis on the physics of the problem. While keeping the mathematics fairly simple (there's nothing more complicated than differentiation and integration), he covers enough of the fundamentals to a level deep enough to allow readers to continue their education by delving - without too much difficulty - into the most recent literature.

Latin for the New Millennium: Level 2: student text - Milena Minkova 2009-10-15

"Latin for the New Millennium, Levels 1 and 2 is a complete introductory course to the Latin language, suitable for both high school and college students, consisting of two volumes, each accompanied by a teacher's manual and students' workbooks. The strategy employed for

teaching and learning incorporates the best of both the reading approach and the more abstract grammatical method. The choice of vocabulary in each chapter reflects ancient authors commonly studied for the AP Latin examinations. There are exercises designed for oral use, as well as a substantial core of more conventional exercises in each chapter. The readings, pictures, and supplementary inserts on cultural information illuminate Roman life, civilization, Roman history, and mythology, as well as the continuing use of Latin after antiquity and its vigorous literary tradition in such periods as the Middle Ages and Renaissance. Each chapter also includes derivatives, the influence of Latin vocabulary on English, and selected proverbs or common Latin sayings. *Latin for the New Millennium Level 3* builds on the strong foundation of Levels 1 and 2 and provides students an in-depth experience of Caesar, Catullus, Cicero, Horace, Ovid, and Vergil as well as of the Renaissance writer Erasmus. This text provides students an introduction to

unadapted Latin literature and builds their literary analysis skills."--adapted from publisher website.
