Microsoft Sharepoint 2013 Complete Self-Assessment Guide - Gerardus Blokdyk 2018-01-05

What are all of our Microsoft Sharepoint 2013 domains and what do they do? Is the Microsoft Sharepoint 2013 organization completing tasks effectively and efficiently? Is the Microsoft Sharepoint 2013 process severely broken such that a re-design is necessary? At what point will vulnerability assessments be performed once Microsoft Sharepoint 2013 is put into production (e.g., ongoing Risk Management after

implementation)? How will variation in the actual durations of each activity be dealt with to ensure that the expected Microsoft Sharepoint 2013 results are met? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role... In EVERY company, organization and department. Unless you are talking a one-time, single-use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?'
