*No Shelf Required* - American Library Association 2011

Sue Polanka brings together a variety of professionals to share their expertise about e-books with librarians and publishers. Providing forward-thinking ideas while remaining grounded in practical information that can be implemented in all kinds of libraries, the topics explored include an introduction to e-books and their different types, an overview of their history and development, e-book technology, why e-books are good for learning, and how librarians can market them to a wide range of users.--[back cover]

**Being Lakota** - Larissa Petrillo 2007-12-01

In Libreville, the capital of the African nation of Gabon, the colonial past has evolved into a present indelibly marked by colonial rule and ongoing French influence. This is especially evident in areas as essential to life as food. In this complex, hybrid culinary culture of Libreville, croissants are as readily available as plantains. Yet this same culinary diversity is accompanied by high prices and a scarcity of locally made food that is bewildering to residents and visitors alike.; A staggering two-thirds of the country's food is imported from outside Gabon, making Libreville's cost of living comparable to that of Tokyo and Paris. In this compelling study of food culture and colonialism, Jeremy Rich explores how colonial rule intimately shaped African life and how African townspeople developed creative ways of coping with colonialism as European expansion threatened African self-sufficiency. From colonization in the 1840s through independence, Libreville struggled with problems of food scarcity resulting from the legacy of Atlantic slavery, the violence of colonial conquest, and the rise of the timber export industry.; Marriage disputes, racial tensions, and worker unrest often centered on food, and townspeople employed varied tactics to combat its scarcity. Ultimately, imports emerged as the solution and have had a lasting impact on Gabon's culinary culture and economy. Fascinating and informative, *A Workman Is Worthy of His Meat* engages a new avenue of historical inquiry in examining the culture of food as part of the colonial experience and resonates with the questions of globalization dominating culinary economics today.

**To the Ends of the Earth** - Michael A. G. Haykin 2014-05-31

Calvinist missionaries. If you think that sounds like an oxymoron, you're not alone. Yet a close look at John Calvin's life and writings reveals a man who was passionate about the spread of the gospel and the salvation of sinners. From training pastors at his Genevan Academy to sending missionaries to the jungles of Brazil, Calvin consistently sought to encourage and equip Christians to take the good news of salvation to the very ends of the earth. In this carefully researched book, Michael Haykin and Jeffrey Robinson clear away longstanding stereotypes related to the Reformed tradition and Calvin's theological heirs, highlighting the Reformer's neglected missional vision and legacy.

**Access Technology for Blind and Low Vision Accessibility** - Yue-Ting Siu 2020

"Access Technology for Blind and Low Vision Accessibility, the second edition of 2008's Assistive Technology for Students Who Are Blind or Visually Impaired: A Guide to Assessment, uses clear language to describe the range of technology solutions that exists to facilitate low vision and nonvisual access to print and digital information. Part 1 gives teachers, professionals, and families an overview of current technologies

including refreshable braille displays, screen readers, 3D printers, cloud computing, tactile media, and integrated development environments. Part 2 builds on this foundation, providing readers with a conceptual and practical framework to guide a comprehensive technology evaluation process. As did its predecessor, Access Technology for Blind and Low Vision Accessibility is focused on giving people who are blind or visually impaired equal access to all activities of self-determined living, allowing them to be seamlessly integrated within their home, school, and work communities"--

Amy Tan - Mary Ellen Snodgrass 2015-01-24

In the mid-1980s, Amy Tan was a successful but unhappy corporate speechwriter. By the end of the decade, she was perched firmly atop the best-seller lists with *The Joy Luck Club*, with more popular novels to follow. Tan's work—once pigeonholed as ethnic literature—resonates with universal themes that cross cultural and ideological boundaries, and prove wildly successful with readers of all stripes. Tender, sincere, complex, honest and uncompromising in its portrayal of Chinese culture and its affect on women, Amy Tan's work earned her both praise and excoriation from critics, adoration from fans, and a place as one of America's most notable modern writers. This reference work introduces and summarizes Amy Tan's life, her body of literature, and her characters. The main text is comprised of entries covering characters, dates, historical figures and events, allusions, motifs and themes from her works. The entries combine critical insights with generous citations from primary and secondary sources. Each entry concludes with a selected bibliography. There is also a chronology of Tan's family history and her life. Appendices provide an overlapping timeline of historical and fictional events in Tan's work; a glossary of foreign terms found in her writing; and a list of related writing and research topics. An extensive bibliography and a comprehensive index accompany the text.

**Library Services for Adults in the 21st Century** - Elsie Okobi 2013-12-28

Public librarians are directly responsible for providing a large proportion of the American population with access to the Internet and guidance in obtaining important government information. Effectively servicing today's adult library users is already a pressing need, and will only become a larger priority as the nation's population ages. *Library Services for Adults in the 21st Century* is for library science students interested in working with adults in public libraries. As the first text dedicated to adult library services to be published since 1991, this title has been sorely needed and much anticipated. This book will provide a model for training public librarians for the specific challenges of providing adult services. Part I provides a survey of the history and development of adult services. Part II addresses planning and tools for service development. Part III examines the different types of services for adults and best practices, while Part IV presents training methods.

**Computers Helping People with Special Needs** - Joachim Klaus 2011-04-05

The introduction to the 1st International Conference on Computers for Handicapped Persons (Vienna, 1989) by Amin Tjoa (University of Vienna) and Roland Wagner (University of Linz) finished with the following mission statement on the "Future Direction on Computers for Handicapped Persons": "The different themes show that a lot of problems are solved by the usage of computer technology for helping handicapped persons, for instance for the blind and visually handicapped. A consequence of the discussed themes there are two directions which should be done in the next years. One direction is obvious. The tools must be improved and research and development work should be extended to all groups of handicapped (even if they are numerically not so large as for instance the blind or visually handicapped persons).

On the other side in the area of social implications there is an increasing demand on social science studies on overall computer use among disabled persons. Because sources are in principle missing today about disabled persons work tasks, research in this field must begin by trying to survey this aspect. Particular attention should be paid to the extent and character of computer use among the handicapped in work life. There are a lot of questions, which should be answered during the next years for reaching the aim of rehabilitation." Fifteen years later the 9th International Conference on Computers Helping People with Special Needs (Paris, 2004) offered a comprehensive and deepened view on general awareness, special research and individual applications concerning disabled people and their participation in our society.

*Open Access* - Peter Suber 2012-07-20

A concise introduction to the basics of open access, describing what it is (and isn't) and showing that it is easy, fast, inexpensive, legal, and beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary opportunity when we make our work "open access": digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.

*Nurse-midwifery* - Laura Elizabeth Ettinger 2006

Today, nurse-midwives have assumed a larger role in mainstream health care than before, yet they are still marginalized. As in the past, nurse-midwives' futures will depend on continuing changes in American attitudes about childbirth, health care, and women professionals as well as on their own ability to adapt to the changes. The history of the profession suggests that nurse-midwives will continue to navigate in

difficult waters in a middle space between the mainstream and the margins of medicine and between the nursing profession and midwifery traditions.

**Thunder Dog** - Michael Hingson 2012-08-06

Faith. Trust. Triumph. "I'm sorry," the doctor said. "He is permanently and totally blind. There is nothing we can do for him." George and Sarah Hingson looked at each other, devastated. Their six-month-old son, Michael was a happy, strawberry blond baby boy, healthy and normal in every way except one. When the Hingsons switched on a light or made silly faces, Michael did not react. Ever. "My best suggestion is that you send him to a home for the blind," the doctor continued. "He will never be able to do anything for himself." Forty-seven years later, a yellow Labrador retriever puppy was born in the whelping unit of Guide Dogs for the Blind in San Rafael, California. The puppy's name was Roselle. On September 11, 2001, she saved Michael's life. This is Roselle's story too. —From the Introduction Every moment in Michael Hingson's and Roselle's lives seemed to lead up to this day. When one of four hijacked planes flew into the World Trade Center's north tower on September 11, 2001, Michael Hingson, a district sales manager for a data protection and network security systems company, was sitting down for a meeting. His guide dog, Roselle, was at his feet. Paired for twenty-one months, man and dog spent that time forging a bond of trust, much like police partners who trust their lives to each other. Michael couldn't see a thing, but he could hear the sounds of shattering glass, falling debris, and terrified people flooding around him and Roselle. However, Roselle sat calmly beside him. In that moment, Michael chose to trust Roselle's judgment and not to panic. They were a team. Thunder Dog is a story that will forever change your spirit and your perspective. It illuminates Hingson's lifelong determination to achieve parity in a sighted world and how the rare trust between a man and his guide dog can inspire an unshakable faith in each one of us.
