Through It All IN THE HOLLOW OF HIS HAND - Samuel M. Smith 2011-12-05

Through It All, IN THE HOLLOW OF HIS HAND ... the real-life story of dangers, great and small, that author Samuel M. Smith faced but through which he was protected by the hand of God. A Bible college student on

summer break in 1955, he was attacked by his father in the middle of the night. His mother was already killed and everyone including Samuel, believed his father had done it because he was being unfaithful. Why did he attack Samuel? This was the first of five life-threatening personal attacks he suffered. Then, stabbed, 1969, by someone he helped and still has the scar. He was also protected from a teenage gang, with tire irons 1969 for getting a friend to go to church, and gunpoint robberies, 1968, while taxicab driving in Chicago and gunpoint robbery, 1984, while taxicab driving in Honolulu. He has done short-term missionary work in the Philippines; T'bilisi, Republic of Georgia, and Moscow and St. Petersburg, Russia. He has written over 100 Total Gospel tract titles — some translated in up to eleven languages. Married to Virginia Quilates, from the Philippines, they have four sons, three of whom are preteen. Through it all, he has been in the hollow of God's hand! It has been a truly exciting adventure learning to lean on Jesus and trust Him completely. His mission, to publish the gospel, as Jesus Christ and His original Apostles would preach and teach today.

How to Build Max-Performance Mitsubishi 4G63t Engines - Robert Bowen 2008-12

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.
