Small Acts - Paul Gilroy 1993
Straddling the field of popular cultural forms, Paul Gilroy shows how the African diaspora born from slavery has given rise to a web of intimate social relationships in which African-American, Caribbean and now black English

elements combine.
Fools, Frauds and Firebrands - Roger Scruton 2019-04-23
A devastating critique of modern left-wing thinking from a leading political philosopher. In *Fools, Frauds and Firebrands*, philosopher Roger Scruton, one of the leading

critics of leftist orientations in modern Western civilization, examines the thinkers who have been most influential on the attitudes of the New Left. What does the Left look like today, he asks, and how has it evolved? Is there any foundation for resistance to its agenda without religious faith? Scruton begins with a ruthless analysis of New Leftism and concludes with a critique of the key strands in its thinking. He conducts a reappraisal of such major left-wing thinkers as: E. P. Thompson, Ronald Dworkin, R. D. Laing, Jurgen Habermas, Gyorgy Lukacs, Jean-Paul Sartre, Jacques Derrida, Slavoj Zizek, Ralph Milliband and Eric Hobsbawm. Scruton's exploration of these important issues is written with skill, perception and at all times with pellucid clarity. In addition to assessments of these thinkers' philosophical and political contributions, the book contains a biographical and bibliographical section summarizing their careers and most important writings.

Greening the Academy - Samuel Fassbinder 2012-12-30

This is the academic Age of the Neoliberal Arts. Campuses—as places characterized by democratic debate and controversy, wide ranges of opinion typical of vibrant public spheres, and service to

the larger society—are everywhere being creatively destroyed in order to accord with market and military models befitting the academic-industrial complex. While it has become increasingly clear that facilitating the sustainability movement is the great 21st century educational challenge at hand, this book asserts that it is both a dangerous and criminal development today that sustainability in higher education has come to be defined by the complex-friendly “green campus” initiatives of science, technology, engineering and management programs. By contrast, *Greening the Academy: Ecopedagogy Through the Liberal Arts* takes the standpoints of those working for environmental and ecological justice in order to critique the unsustainable disciplinary limitations within the humanities and social sciences, as well as provide tactical reconstructive openings toward an empowered liberal arts for sustainability. *Greening the*

Academy thus hopes to speak back with a collective demand that sustainability education be defined as a critical and moral vocation comprised of the diverse types of humanistic study that will benefit the well-being of our emerging planetary community and its numerous common locales.

After Empire - Paul Gilroy
2004

'After Empire' explores Britain's failure to come to terms with the loss of its empire and pre-eminent global standing. It shows that what we make of the country's postcolonial opportunity will influence the future of Europe and the viability of race as a political category.

How to Be Idle - Tom
Hodgkinson 2013-07-30

Yearning for a life of leisure? In 24 chapters representing each hour of a typical working day, this book will coax out the loafer in even the most diligent and schedule-obsessed worker. From the founding editor of the celebrated magazine about the freedom and fine art of doing nothing, *The Idler*, comes not

simply a book, but an antidote to our work-obsessed culture. In *How to Be Idle*, Hodgkinson presents his learned yet whimsical argument for a new, universal standard of living: being happy doing nothing. He covers a whole spectrum of issues affecting the modern idler—sleep, work, pleasure, relationships—bemoaning the cultural skepticism of idleness while reflecting on the writing of such famous apologists for it as Oscar Wilde, Robert Louis Stevenson, Dr. Johnson, and Nietzsche—all of whom have admitted to doing their very best work in bed. It's a well-known fact that Europeans spend fewer hours at work a week than Americans. So it's only befitting that one of them—the very clever, extremely engaging, and quite hilarious Tom Hodgkinson—should have the wittiest and most useful insights into the fun and nature of being idle. Following on the quirky, call-to-arms heels of the bestselling *Eat, Shoots and Leaves: The Zero Tolerance Approach to Punctuation* by

Lynne Truss, *How to Be Idle* rallies us to an equally just and no less worthy cause: reclaiming our right to be idle. **Confronting Modernity in the Cinemas of Taiwan and Mainland China** - Tonglin Lu 2002

This book examines the formation of cultural identity in Taiwan and mainland China through paradigmatic films. *Mediatization and Sociolinguistic Change* - Jannis Androutsopoulos 2014-09-04 This is the first volume to focus on the role of media in processes of linguistic change, one of the most contested issues in contemporary sociolinguistics. Its 17 chapters and five section commentaries present cutting-edge research from variationist and interactional sociolinguistics, media linguistics, language ideology research, and minority language studies. The volume advances our understanding of linguistic change in a mediatized world in three ways. First, it introduces the notions of sociolinguistic change and mediatization to

create a broader theoretical framing than the one offered by 'the media' and 'language change'. Second, it takes the discussion beyond the notions of 'influence' and 'effect' and the binary distinction of 'media' vs. 'community language'. Third, it examines the relation of sociolinguistic change and mediatization and from five complementary viewpoints: media influence on linguistic structure; media engagement in interaction; change in mass and new media language; language-ideological change; and the role of media for minority languages. Bringing these strands of sociolinguistic scholarship together, this volume examines their shared references and common lines of thinking.

(Re-)Framing the

Arab/Muslim - Silke Schmidt
2014-10-31

Media depictions of Arabs and Muslims continue to be framed by images of camels, belly dancers, and dagger-wearing terrorists. But do only Hollywood movies and TV news have the power to frame public

discourse? This interdisciplinary study transfers media framing theory to literary studies to show how life writing (re-)frames Orientalist stereotypes. The innovative analysis of the post-9/11 autobiographies »West of Kabul, East of New York«, »Letters from Cairo«, and »Howling in Mesopotamia« makes a powerful claim to approach literature based on a theory of production and reception, thus enhancing the multi-disciplinary potential of framing theory.

Necroculture - Charles Thorpe
2016-06-24

In this book, the author draws on Karl Marx's writings on alienation and Erich Fromm's conception of necrophilia in order to understand these aspects of contemporary culture as expressions of the domination of the living by the dead under capitalism. Necroculture is the ideological reflection and material manifestation of this basic feature of capitalism: the rule of dead capital over living labor. The author argues that

necroculture represents the subsumption of the world by vampire capital.

Sylvia Wynter - Katherine McKittrick 2014-12-08

The Jamaican writer and cultural theorist Sylvia Wynter is best known for her diverse writings that pull together insights from theories in history, literature, science, and black studies, to explore race, the legacy of colonialism, and representations of humanness.

Sylvia Wynter: On Being Human as Praxis is a critical genealogy of Wynter's work, highlighting her insights on how race, location, and time together inform what it means to be human. The contributors explore Wynter's stunning reconceptualization of the human in relation to concepts of blackness, modernity, urban space, the Caribbean, science studies, migratory politics, and the interconnectedness of creative and theoretical resistances. The collection includes an extensive conversation between Sylvia Wynter and Katherine McKittrick that delineates

Wynter's engagement with writers such as Frantz Fanon, W. E. B. DuBois, and Aimé Césaire, among others; the interview also reveals the ever-extending range and power of Wynter's intellectual project, and elucidates her attempts to rehistoricize humanness as praxis.

Questions of Cultural Identity - Stuart Hall 1996-04-04

Why and how do contemporary questions of culture so readily become highly charged questions of identity? The question of cultural identity lies at the heart of current debates in cultural studies and social theory. At issue is whether those identities which defined the social and cultural world of modern societies for so long - distinctive identities of gender, sexuality, race, class and nationality - are in decline, giving rise to new forms of identification and fragmenting the modern individual as a unified subject. Questions of Cultural Identity offers a wide-

ranging exploration of this issue. Stuart Hall firstly outlines the reasons why the question of identity is so compelling and yet so problematic. The cast of outstanding contributors then interrogate different dimensions of the crisis of identity; in so doing, they provide both theoretical and substantive insights into different approaches to understanding identity.

Blood of Tyrants - Logan Beirne 2014-12-02

Blood of Tyrants reveals the surprising details of our Founding Fathers' approach to government and this history's impact on today. Delving into forgotten—and often lurid—facts of the Revolutionary War, Logan Beirne focuses on the nation's first commander in chief, George Washington, as he shaped the very meaning of the United States Constitution in the heat of battle. Key episodes of the Revolution illustrate how the Founders dealt with thorny wartime issues: How do we protect citizens' rights when

the nation is struggling to defend itself? Who decides war strategy? When should we use military tribunals instead of civilian trials? Should we inflict harsh treatment on enemy captives if it means saving American lives? Beirne finds evidence in previously unexplored documents such as General Washington's letters debating the use of torture, an eyewitness account of the military tribunal that executed a British prisoner, Founders' letters warning against government debt, and communications pointing to a power struggle between Washington and the Continental Congress. Vivid stories from the Revolution set the stage for Washington's pivotal role in the drafting of the Constitution. The Founders saw the first American commander in chief as the template for all future presidents: a leader who would fiercely defend Americans' rights and liberties against all forms of aggression. Pulling the reader directly into dramatic scenes from history,

Blood of Tyrants fills a void in our understanding of the presidency and our ingenious Founders' pragmatic approach to issues we still face today. *Against Race* - Paul Gilroy 2000 He argues that the triumph of the image spells death to politics and reduces people to mere symbols."--BOOK JACKET.

Beside You in Time - Elizabeth Freeman 2019-09-06
In *Beside You in Time* Elizabeth Freeman expands biopolitical and queer theory by outlining a temporal view of the long nineteenth century. Drawing on Foucauldian notions of discipline as a regime that yoked the human body to time, Freeman shows how time became a social and sensory means by which people assembled into groups in ways that resisted disciplinary forces. She tracks temporalized bodies across many entangled regimes—religion, secularity, race, historiography, health, and sexuality—and examines how those bodies act in relation to those regimes. In analyses of the use of rhythmic

dance by the Shakers; African American slave narratives; literature by Mark Twain, Pauline Hopkins, Herman Melville, and others; and how Catholic sacraments conjoined people across historical boundaries, Freeman makes the case for the body as an instrument of what she calls queer hypersociality. As a mode of being in which bodies are connected to others and their histories across and throughout time, queer hypersociality, Freeman contends, provides the means for subjugated bodies to escape disciplinary regimes of time and to create new social worlds.

Art on My Mind - Bell Hooks
1995

Author addresses the deplorable absence of discourse on black artists.

How to be a conservative -
Roger Scruton 2014-09-11
What does it mean to be a conservative in an age so sceptical of conservatism? How can we live in the presence of our 'canonized forefathers' at a time when their cultural,

religious and political bequest is so routinely rejected? With soft left-liberalism as the dominant force in Western politics, what can conservatives now contribute to public debate that will not be dismissed as pure nostalgia? In this highly personal and witty book, renowned philosopher Roger Scruton explains how to live as a conservative in spite of the pressures to exist otherwise. Drawing on his own experience as a counter-cultural presence in public life, Scruton argues that while humanity might survive in the absence of the conservative outlook, it certainly won't flourish. How to be a conservative is not only a blueprint for modern conservatism. It is a heartfelt appeal on behalf of old fashioned decencies and values, which are the bedrock of our weakened, but still enduring civilization.

Postcolonial Melancholia -
Paul Gilroy 2005
In *Postcolonial Melancholia*, Paul Gilroy continues the conversation he began in his

landmark study of race and nation, 'There Ain't No Black in the Union Jack, ' by once again departing from conventional wisdom to examine-and defend-multiculturalism within the context of a post-9/11 "politics of security." Gilroy adapts the concept of melancholia from its Freudian origins and applies it to the social pathology of neoimperialist politics. His unorthodox analysis pinpoints melancholic reactions not only in the hostility and violence directed at blacks, immigrants, and aliens but also in an inability to value the ordinary, unruly multiculturalism that has evolved organically and unnoticed in urban centers. Drawing on seminal discussions of race by Frantz Fanon, W. E. B. DuBois, and George Orwell, Gilroy goes beyond the idea of mere tolerance and proposes that it is possible to celebrate multiculturalism and live with otherness without becoming anxious, fearful, or violent. The Politics of Panem - Sean P. Connors 2014-09-24

The Hunger Games trilogy is a

popular culture success.

Embraced by adults as well as adolescents, Suzanne Collins's bestselling books have inspired an equally popular film franchise. But what, if anything, can reading the Hunger Games tell us about what it means to be human in the world today? What complex social and political issues does the trilogy invite readers to explore? Does it merely entertain, or does it also instruct? Bringing together scholars in literacy education and the humanities, The Politics of Panem: Challenging Genres examines how the Hunger Games books and films, when approached from the standpoint of theory, can challenge readers and viewers intellectually. At the same time, by subjecting Collins's trilogy to literary criticism, this collection of essays challenges its complexity as an example of dystopian literature for adolescents. How can applying philosophic frameworks such as those attributable to Socrates and Foucault to the Hunger Games trilogy deepen

our appreciation for the issues it raises? What, if anything, can we learn from considering fan responses to the Hunger Games? How might adapting the trilogy for film complicate its ability to engage in sharp-edged social criticism? By exploring these and other questions, *The Politics of Panem: Challenging Genres* invites teachers, students, and fans of the Hunger Games to consider how Collins's trilogy, as a representative of young adult dystopian fiction, functions as a complex narrative. In doing so, it highlights questions and issues that lend themselves to critical exploration in secondary and college classrooms.

Without Guarantees - Stuart Hall 2000-08-17

Stuart Hall's retirement from the Open University in 1997 provided a unique opportunity to reflect on an academic career which has had the most profound impact on scholarship and teaching in many parts of the world. From his early work on the media, through his influential re-working of

Gramsci for the analysis of Britain in the late 1970s, through his considered debates on Thatcherism and more recently on "race" and new ethnicities, Hall has been an inspirational figure for generations of academics. He has helped to make universities places where ideas and social commitment can exist alongside each other. This collection invites a wide range of academics who have been influenced by Stuart Hall's writing to contribute not a memoir or a eulogy but an engaged piece of social, cultural or historical analysis which continues and develops the field of thinking opened up by Hall. The topics covered include identity and hybridity, history and post-colonialism, pedagogy and cultural politics, space and place, globalization and economy, modernity and difference.

W. E. B. Du Bois's Data Portraits - The W.E.B. Du Bois Center at the University of Massachusetts Amherst 2018-11-06

The colorful charts, graphs,

and maps presented at the 1900 Paris Exposition by famed sociologist and black rights activist W. E. B. Du Bois offered a view into the lives of black Americans, conveying a literal and figurative representation of "the color line." From advances in education to the lingering effects of slavery, these prophetic infographics—beautiful in design and powerful in content—make visible a wide spectrum of black experience. W. E. B. Du Bois's Data Portraits collects the complete set of graphics in full color for the first time, making their insights and innovations available to a contemporary imagination. As Maria Popova wrote, these data portraits shaped how "Du Bois himself thought about sociology, informing the ideas with which he set the world ablaze three years later in *The Souls of Black Folk*."

[The WEIRDest People in the World](#) - Joseph Henrich

2020-09-08

A New York Times Notable Book of 2020 A Bloomberg Best

Non-Fiction Book of 2020 A Behavioral Scientist Notable Book of 2020 A Human Behavior & Evolution Society Must-Read Popular Evolution Book of 2020 A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you're rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe

during the last few centuries? In *The WEIRDest People in the World*, Joseph Henrich draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, *The WEIRDest People in the World* explores how culture, institutions, and psychology

shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Includes black-and-white illustrations.

Policing the Crisis - Stuart Hall 1982

Magical Realism and Literature - Christopher

Warnes 2020-11-12

Magical realism can lay claim to being one of most recognizable genres of prose writing. It mingles the probable and improbable, the real and the fantastic, and it provided the late-twentieth century novel with an infusion of creative energy in Latin America, Africa, Asia, and beyond. Writers such as Alejo Carpentier, Gabriel García Márquez, Isabel Allende, Salman Rushdie, Ben Okri, and many others harnessed the resources of narrative realism to the representation of folklore, belief, and fantasy. This book sheds new light on magical realism, exploring in detail its global origins and development. It offers new perspectives of the history of the ideas behind this literary tradition, including magic, realism, otherness, primitivism, ethnography, indigeneity, and space and time.

Tocqueville and Democracy in the Internet Age - C. Jon

Delogu 2014-01-08

"Tocqueville and Democracy in the Internet Age is an introduction to Alexis de Tocqueville (1805-1859) and his monumental two-volume study Democracy in America (1835, 1840) that pays particular attention to the critical conversation around Tocqueville and contemporary democracy. It attempts to help us think better about democracy, and also perhaps to live better, in the Internet Age."--Publisher's description.

Character Constellations - Roel Smeets 2021-11-15

Fiction has a major social impact, not least because it co-shapes the image that society has of various social groups. Drawing on a collection of 170 contemporary Dutch-language novels, Character Constellations presents a range of data-driven, statistical models to study depictions of characters in terms of gender, race, ethnicity, class, age, sexuality, and other identity categories. Incorporating the tools of network analysis, each chapter highlights an aspect of fictional social networks that

affects the representation of social groups: their centrality, their communities, and their conflicts. While reading individual novels in light of emerging statistical patterns, combining the formal methods of social network analysis with the interpretive tools of narratology, this study shows how central societal themes such as (in)equality and emancipation, integration and segregation, and social mobility and class struggle are foregrounded, replicated, or distorted in the Dutch novel. Showcasing what character-based critiques of literary representation gain by integrating data-driven methods into the practice of critical close reading, *Character Constellations* contributes to societal debates on cultural representation and identity and the role

Greater Gotham - Mike Wallace 2017-09-04

In this utterly immersive volume, Mike Wallace captures the swings of prosperity and downturn, from the 1898 skyscraper-driven boom to the

Bankers' Panic of 1907, the labor upheaval, and violent repression during and after the First World War. Here is New York on a whole new scale, moving from national to global prominence -- an urban dynamo driven by restless ambition, boundless energy, immigrant dreams, and Wall Street greed. Within the first two decades of the twentieth century, a newly consolidated New York grew exponentially. The city exploded into the air, with skyscrapers jostling for prominence, and dove deep into the bedrock where massive underground networks of subways, water pipes, and electrical conduits sprawled beneath the city to serve a surging population of New Yorkers from all walks of life. New York was transformed in these two decades as the world's second-largest city and now its financial capital, thriving and sustained by the city's seemingly unlimited potential. Wallace's new book matches its predecessor in pure page-turning appeal and takes America's greatest city to

new heights.

"Worsley is a thoughtful, charming, often hilarious guide to life as it was lived, from the mundane to the esoteric." -The Boston Globe

In her brilliantly and creatively researched book, Lucy Worsley takes us through the bedroom, bathroom, living room, and kitchen, covering the history of each room and exploring what people actually did in bed, in the bath, at the table, and at the stove—from sauce stirring to breast-feeding, teeth cleaning to masturbating, getting dressed to getting married—providing a

compelling account of how the four rooms of the home have evolved from medieval times to today, charting revolutionary changes in society.

media criticism. As a whole, Volume 1 provides a panoramic view of Hall's fundamental contributions to cultural studies.
