## *Indian Social Work* - Bishnu Mohan Dash 2020-10-06

This book provides multiple frameworks and paradigms for social work education which integrates indigenous theories and cultural

practices. It focuses on the need to diversify and reorient social work curriculum to include indigenous traditions of service, charity and volunteerism to help social work evolve as a profession in India. The volume analyzes the history of social work education in India and how the discipline has adapted and changed in the last 80 years. It emphasizes the need for the Indianization of social work curriculum so that it can be applied to the socio-cultural contours of a diverse Indian society. The book delineates strategies and methods derived from meditation, yoga, bhakti and ancient Buddhist and Hindu philosophy to prepare social work practitioners with the knowledge, and skills, that will support and enhance their ability to work in partnership with diverse communities and indigenous people. This book is essential reading for teachers, educators, field practitioners and students of social work, sociology, religious studies, ancient philosophy, law and social entrepreneurship. It will also interest policy makers and those associated with civil society organizations.

Tacky - Rax King 2021-11-02

An irreverent and charming collection of deeply personal essays about the joys of low pop culture and bad taste, exploring coming of age in the 2000s in the age of Hot Topic, Creed, and frosted lip gloss—from the James Beard Award-nominated writer of the Catapult column "Store-Bought Is Fine" Tacky is about the power of pop culture—like any art—to imprint itself on our lives and shape our experiences, no matter one's commitment to "good" taste. These fourteen essays are a nostalgia-soaked antidote to the millennial generation's obsession with irony, putting the aesthetics we hate to love—snakeskin pants, Sex and the City, Cheesecake Factory's gargantuan menu—into kinder and sharper perspective. Each essay revolves around a different maligned (and yet, Rax would argue, vital) cultural artifact, providing thoughtful, even romantic meditations on desire, love, and the power of nostalgia. An essay about the gym-tan-laundry exuberance of Jersey Shore morphs into an excavation of grief over the death of her father; in "You Wanna Be On Top," Rax writes about friendship and early aughts girlhood; in another, Guy Fieri helps her heal from an abusive relationship. The result is a collection that captures the personal and generational experience of finding joy in caring just a little too much with

clarity, heartfelt honesty, and Rax King's trademark humor. A VINTAGE ORIGINAL

*Project for a Revolution in New York* - Alain Robbe-Grillet 2012-09-04

Part prophecy and part erotic fantasy, this classic tale of otherworldly depravity features New York itself—or a foreigner's nightmare of New York—as its true protagonist. Set in the towers and tunnels of the quintessential American city, Alain Robbe-Grillet's novel turns this urban space into a maze where politics bleeds into perversion, revolution into sadism, activist into criminal, vice into art—and back again. Following the logic of a movie half-glimpsed through a haze of drugs and alcohol, *Project for a Revolution in New York* is a Sadean reverie that bears an alarming resemblance to the New York, and the United States,

that have actually come into being.

**Perspectives on Mathematics** - Dennis Almeida 1995

UNESCO on the Ground - Michael Dylan Foster 2015-10-12

For nearly 70 years, the United Nations Educational, Scientific and Cultural Organization (UNESCO) has played a crucial role in developing policies and recommendations for dealing with intangible cultural heritage. What has been the effect of such sweeping global policies on those actually affected by them? How connected is UNESCO with what is happening every day, on the ground, in local communities? Drawing upon six communities ranging across three continents—from India, South Korea, Malawi, Japan, Macedonia and China—and focusing on festival, ritual, and dance, this volume illuminates the complexities and challenges faced by those who find themselves drawn, in different ways, into UNESCO's orbit. Some struggle to incorporate UNESCO recognition into their own local understanding of tradition; others cope with the fallout of a failed intangible cultural heritage nomination. By exploring locally, by looking outward from the inside, the essays show how a normative policy such as UNESCO's intangible cultural heritage policy can take on specific associations and inflections. A number of the key questions and themes emerge across the case studies and three accompanying commentaries: issues of terminology; power struggles between local, national and international stakeholders; the value of international recognition; and what forces shape selection processes. With examples from around the world, and a balance of local experiences with broader perspectives, this volume provides a unique comparative approach to timely questions of tradition and change in a rapidly globalizing world.

**Wikijunior Big Cats** -

Condensed Chaos - Phil Hine 2009-11

This book provides a practical introduction to Chaos Magic, one

of the fastest growing areas of Western Occultism. Through it you can change your circumstances, live according to a developing sense of personal responsibility, effect change around you, and stop living as a helpless cog in some clockwork universe. All acts of personal/collective liberation are magical acts. Magic leads us into exhilaration and ecstasy; into insight and understanding; into changing ourselves and the world in which we participate. Through magic we may come to explore the possibilities of freedom.

**Invented Religions** - Carole M. Cusack 2016-05-06

Utilizing contemporary scholarship on secularization, individualism, and consumer capitalism, this book explores religious movements founded in the West which are intentionally fictional: Discordianism, the Church of All Worlds, the Church of the SubGenius, and Jediism. Their continued appeal and success, principally in America but gaining wider audience through the 1980s and 1990s, is chiefly as a result of underground publishing and the internet. This book deals with immensely popular subject matter: Jediism developed from George Lucas' Star Wars films; the Church of the Flying Spaghetti Monster, founded by 26-year-old student Bobby Henderson in 2005 as a protest against the teaching of Intelligent Design in schools; Discordianism and the Church of the SubGenius which retain strong followings and participation rates among college students. The Church of All Worlds' focus on Gaia theology and environmental issues makes it a popular focus of attention. The continued success of these groups of Invented Religions provide a unique opportunity to explore the nature of late/post-modern religious forms, including the use of fiction as part of a bricolage for spirituality, identity-formation, and personal orientation.

**Twelve Years a Slave** - Solomon Northup 2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I

remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

**Mathematical Knowledge: Its Growth Through Teaching** - Alan Bishop 2013-11-27

In the first BACOMET volume different perspectives on issues concerning teacher education in mathematics were presented (B. Christiansen, A. G. Howson and M. Otte, Perspectives on Mathematics Education, Reidel, Dordrecht, 1986). Underlying all of them was the fundamental problem area of the relationships between mathematical knowledge and the teaching and learning processes. The subsequent project BACOMET 2, whose outcomes are presented in this book, continued this work, especially by focusing on the genesis of mathematical knowledge in the classroom. The book developed over the period 1985-9 through several meetings, much discussion and considerable writing and redrafting. Our major concern was to try to analyse what we considered to be the most significant aspects of the relationships in order to enable mathematics educators to be better able to handle the kinds of complex issues facing all mathematics educators as we approach the end of the twentieth century. With access to mathematics education widening all the time, with a multitude of new materials and resources being available each year, with complex cultural and social interactions creating a fluctuating context of education, with all manner of technology becoming more and more significant, and with both informal education (through media of different kinds) and non formal education (courses of training etc. ) growing apace, the nature of formal mathematical education is increasingly needing analysis.

**Card & Magic Tricks** - Diagram Group 2008

The world of magic is shrouded in mystery...until now! Little Giant ♦ Encyclopedia: Card & Magic Tricks reveals some of the basic secrets of conjuring and illusion. It begins with 30 pages of

card handling methods that any beginner will find worthwhile. The magical card section features 83 mathematical tricks using special props and novelties, and you'll also find 66 magical sleights of hand using coins, silks and handkerchiefs, string, rope, and paper. There's even a section on how to get the truly "magical" effects that will have your audience shaking their heads in disbelief and calling for more.

*Religious Individualisation* - Martin Fuchs 2019-12-16

This volume brings together key findings of the long-term research project 'Religious Individualisation in Historical Perspective' (Max Weber Centre for Advanced Cultural and Social Studies, Erfurt University). Combining a wide range of disciplinary approaches, methods and theories, the volume assembles over 50 contributions that explore and compare processes of religious individualisation in different religious environments and historical periods, in particular in Asia, the Mediterranean, and Europe from antiquity to the recent past. Contrary to standard theories of modernisation, which tend to regard religious individualisation as a specifically modern or early modern as well as an essentially Western or Christian phenomenon, the chapters reveal processes of religious individualisation in a large variety of non-Western and pre-modern scenarios. Furthermore, the volume challenges prevalent views that regard religions primarily as collective phenomena and provides nuanced perspectives on the appropriation of religious agency, the pluralisation of religious options, dynamics of de-traditionalisation and privatisation, the development of elaborated notions of the self, the facilitation of religious deviance, and on the notion of dividuality.

**How to Read Donald Duck** - Ariel Dorfman 1991

The classic, critical and humorous study of cultural imperialism and children's literature; how the Disney fantasy world reproduces the "American Dream" fantasy world, and the disastrous effect of Disney comics and other "mass" cultural

merchandise on the development of the so-called "Third" World. In 1973 this work was banned and burned in Chile, and later the English edition was banned for more than a year by the US government. In comic book format with cartoon examples, introduction by David KUNZLE on the Disney world, a bibliography of left writings on cultural imperialism and the comics, and an appendix by John Shelton LAWRENCE on the book's US censorship and the legal-political issues involved in the right to criticize Disney

**The Book of Results** - Ray Sherwin 2006-03

THE BOOK OF RESULTS (HARDBACK EDITION) Casting sigils is a highly effective form of sorcery and Sherwin provides a sound overview of the process. He cuts through the cant, rhetoric and old-fashioned moral baggage associated with magical practice and shows us how to use sigils to influence the subconscious, bypassing the often contradictory and usually self-sabotaging internal dialogue of the conscious mind. Sherwin takes the process of working with sigils and develops it into a fully ritualised technique. He describes a daily regime that, at first glance, seems to owe more to Abra-Melin than to Chaos magick. Some may think he strips magic(k) of its mystery, romance and grandeur, if so you should look elsewhere if you are seeking enlightenment, union with the Divine, or fancy a chat with your Holy Guardian Angel. However, if like most of us, you simply want to create and fire a number of sigils to help you manifest your desires THE BOOK OF RESULTS provides the information you

need.

*Socialism and Communism* - Nikita Sergeevich Khrushchev 1963

**Losing Military Supremacy** - Andrei Martyanov 2018-06-04

"Martyanov explains why and how the US armed forces have lost the military supremacy they thought they once had and how Russia, which supposedly had been defeated in the Cold War, succeeded not only in catching up with USA, but actually surpassing it in many key domains such as long range cruise missiles, diesel-electric submarines, air defenses, electronic warfare, air superiority and many others. Andrei Martyanov's book is an absolute 'must read' for any person wanting to understand the reality of modern warfare and super-power competition." THE SAKER While exceptionalism is not unique to America, the intensity of their conviction and its global ramifications are. This view of its exceptionalism has led the US to grossly misinterpret—sometimes deliberately—the causative factors of key events of the past two centuries. Accordingly, the wrong conclusions have been derived, and very wrong lessons learned. Nowhere has this been more manifest than in American military thought and its actual application of military power. Time after time the American military has failed to match lofty declarations about its superiority, producing instead a mediocre record of military accomplishments. Starting from the Korean War the United States hasn't won a single war against a

technologically inferior, but mentally tough enemy. The technological dimension of American “strategy” has completely overshadowed any concern with the social, cultural, operational and even tactical requirements of military (and political) conflict. With a new Cold War with Russia emerging, the United States enters a new period of geopolitical turbulence completely unprepared in any meaningful way—intellectually, economically, militarily or culturally—to face a reality which was hidden for the last 70+ years behind the curtain of never-ending Chalabi moments and a strategic delusion concerning Russia, whose history the US viewed through a Solzhenitsified caricature kept alive by a powerful neocon lobby, which even today dominates US policy makers’ minds. Martyanov’s former Soviet military background enables deep insight into the fundamental issues of warfare and military power as a function of national power—assessed correctly, not through the lens of Wall Street “economic” indices and a FIRE economy, but through the numbers of enclosed technological cycles and culture, much of which has been shaped in Russia by continental warfare and which is practically absent in the US.

**The Theatre of Magick** - Ray Sherwin 2012-12-11

Ray Sherwin's long out-of-print classic from 1982, which is one of the earliest texts of the nascent Chaos Magic movement. It is the first book to explain and refine the now infamous sigil magic method of Austin Osman Spare.
