The Well-trained Mind - Susan Wise Bauer 2004
This book will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool

through high school. Two veteran home educators outline the classical pattern of education'he trivium'hich organizes learning around the maturing capacity of the child's mind:

the elementary school "grammar stage," the middle school "logic stage," and the high school "rhetoric stage." Using the trivium as your model, you'll be able to instruct your child in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. Newly revised and updated, *The Well-Trained Mind* includes detailed book lists with complete ordering information; up-to-date listings of resources, publications, and Internet links; and useful contacts.

Pluses and Minuses - Stefan Buijsman 2020-08-25

A guide to changing how you think about numbers and mathematics, from the prodigy

changing the way the world thinks about math. We all know math is important: we live in the age of big data, our lives are increasingly governed by algorithms, and we're constantly faced with a barrage of statistics about everything from politics to our health. But what might be less obvious is how math factors into your daily life, and what memorizing all of those formulae in school had to do with it. Math prodigy Stefan Buijsman is beginning to change that through his pioneering research into the way we learn math. *Pluses and Minuses* is based in the countless ways that math is engrained in our daily lives, and shows readers how math can actually be used to make problems easier to solve. Taking readers on a journey around the world to visit societies that have developed without the use of math, and back into history to learn how and why various disciples of mathematics were invented, Buijsman shows the vital importance of math, and how a better understanding of mathematics will give us a better understanding of the world

as a whole. Stefan Buijsman has become one of the most sought-after experts in math education after he completed his PhD at age 20. In *Plusses and Minuses*, he puts his research into practice to help anyone gain a better grasp of mathematics than they have ever had.
