*The Mist in the Mirror* - Susan Hill 2014-02-11

A chilling, classically-inspired ghost story from Susan Hill, our reigning mistress of spine-tingling fiction. For the last twenty years Sir James Monmouth has journeyed all over the globe in the footsteps of his hero, the great pioneering traveler Conrad Vane. In an effort to learn more about Vane's early life—and his own—Sir James sets off for the remote Kittiscar Hall on a cold and rainy winter night. But he soon begins to feel as though something is warning him away at every turn; there are the intense feelings of being watched and the strange apparitions of a sad little boy. And as he learns more about his hero's past, he discovers that they are only the beginning, for Kittiscar Hall is hiding terrible secret that will bind their lives together in ways he could never have imagined.

*Can Christians Prove the Resurrection?* - Chris Sandoval 2010

Christian apologists like Josh McDowell, Norman Geisler, and William Lane Craig have claimed that the Resurrection of Jesus is the best-proved fact of history. As they tell the story, the original eyewitnesses of the risen Jesus sacrificed their lives for their faith, and people who knew Jesus during his lifetime would have challenged any errors in their testimony. Allegedly, these and many other lines of historical evidence prove the Resurrection beyond a reasonable doubt. In *Can Christians Prove the Resurrection?*, the traditional Christian arguments for the Resurrection are analyzed and critiqued. In reality, we do not know how most of the apostles met their fates, and religious sects like the Kimbanguists and Hasidic

Jews have likewise proclaimed miracles and produced martyrs within the lifetimes of eyewitnesses who should have been able to set the record straight. These and many other lines of evidence raise copious reasonable doubts regarding the claims of the apologists, as this book demonstrates. Once all the relevant evidence is examined, it becomes clear that there is little likelihood that Jesus of Nazareth arose from the dead or that the Resurrection ever took place.

**Advances In ME/CFS Research and Clinical Care** - Kenneth J. Friedman 2019-11-25

In 2015, the Institute of Medicine (USA) issued a report critical of the research effort and clinical care for ME/CFS (Myalgic Encephalomyelitis/Chronic Fatigue Syndrome) formerly known as Chronic Fatigue Syndrome (CFS) and Chronic Fatigue Immune Deficiency Syndrome (CFIDS). While worldwide investigation into the cause and nature of ME/CFS remains disproportionately small, and treatment remains symptomatic and controversial, modest research continues in all aspects of this disease: epidemiology, possible infectious origins and other triggers, possible involvement of genetics, metabolism, and microbiome, influence of co-morbid conditions, and more. Treatment of patients consists of providing symptomatic relief.

Guidance in doing so is provided for the clinician. School-age children require not only treatment but, as revealed in a 25-year retrospective study, continued engagement with peers and social activity. This e-book explores the breadth and depth of current ME/CFS research and clinical care. Its impact for other chronic, complex illnesses should not be overlooked.

Yet, inexplicably, in the light of astonishing intellectual and technological advancement, Man's progress has been halted in one crucial area: he still indulges the primitive beast within and makes war upon his neighbors. In this remarkable, shocking and absolutely compelling work, Bramley presents disturbing evidence of an alien presence on Earth -- extraterrestrial visitors who have conspired to dominate Humankind through violence and chaos since the beginning of time...a conspiracy which continues to this very day.

**Grandma Gatewood Hikes the Appalachian Trail** - Jennifer Thermes 2018-05-08

Emma Gatewood's life was far from easy. In rural Ohio, she managed a household of 11 kids alongside a less-than-supportive husband. One day, at age 67, she decided to go for a nice long walk . . . and ended up completing the Appalachian Trail. With just the clothes on her back and a pair of thin canvas sneakers on her feet, Grandma Gatewood hiked up ridges and down ravines. She braved angry storms and witnessed breathtaking sunrises. When things got particularly tough, she relied on the kindness of strangers or sheer luck to get her through the night. When the newspapers got wind of her amazing adventure, the whole country cheered her on to the end of her trek, which came just a few months after she set out. A story of true grit and girl power at any age, Grandma Gatewood proves that no peak is insurmountable.

**Handbook of Psychocardiology** - Marlies Alvarenga 2017-11-11

This handbook brings together the full weight of contemporary evidence bearing on what is now commonly termed "psycho-cardiology". It focuses on the role of psycho-social factors in the genesis and clinical management of cardiovascular disease (CVD). The book constitutes a critically reviewed compendium of current knowledge in the area, coupled with guides to evidence-based best practice in the field of psycho-cardiology. The following categories are covered: Social/demographic risk for CVD, Personality and CVD risk, Stress and CVD risk, Psychopathology (particularly affective disorders) and CVD risk, The psychological management of those with clinical CVD, Psychology in the prevention of CVD. The book integrates the evidence into a compelling argument that clinicians, researchers and those in public health will discount the role of psychological factors in regard to CVD at their own peril. And importantly for clinicians charged with the care of patients with CVD, the book poses the argument that failure to recognize the links between psychological factors and CVD may well be at the considerable peril of those patients under their care.

The Weiser Field Guide to Cryptozoology includes a brief history of the field and surveys all the creatures for which any credible amount of research exists—as well as giving tips on how to spot these creatures and cautionary advice on how to interact with them. **American Nationalisms** - Benjamin E. Park 2018-01-11

America was born in an age of political revolution throughout the Atlantic world, a period when the very definition of 'nation' was transforming.

Benjamin E. Park traces how Americans imagined novel forms of nationality during the country's first five decades within the context of European discussions taking place at the same time.

Focusing on three case studies - Massachusetts, Pennsylvania, and South Carolina - Park examines the developing practices of nationalism in three specific contexts. He argues for a more elastic connection between nationalism and the nation-state by demonstrating that ideas concerning political and cultural allegiance to a federal body developed in different ways and at different rates throughout the nation. *American Nationalisms* explores how ideas of nationality permeated political disputes, religious revivals, patriotic festivals, slavery debates, and even literature.

**Stages of Evil** - Robert Lima 2005-01-01

By examining examples of alchemy, astronomy, demonology, exorcism, fairies, vampires, witchcraft, hauntings, and voodoo in prominent plays, *Stages of Evil* explores American and European perceptions of occultism from medieval times to the modern age.

This open access book chronicles the rise of a new scientific paradigm offering novel insights into the age-old enigmas of existence. Over 300 years ago, the human mind discovered the machine code of reality: mathematics. By utilizing abstract thought systems, humans began to decode the workings of the cosmos. From this understanding, the current scientific paradigm emerged, ultimately discovering the gift of technology. Today, however, our island of knowledge is surrounded by ever longer shores of ignorance. Science appears to have hit a dead end when confronted with the nature of reality and consciousness. And whether they be demonic possession or an unsolved murder, the unknown has always haunted our dreams. From the hit podcast *Unexplained* comes a volume perfectly crafted for the curious, the cynical, and the not-easily-frightened. Richard Maclean Smith is the expert in the unknown, and humbly offers up ten tales of real-life events that continue to evade explanation. With these chilling stories comes the missing key: a connection to our own beliefs in science, superstition, and perception. What can a case of demonic possession teach us about free will? What can a cursed box show us about the act of storytelling? What can a supposed instance of reincarnation tell us about developing a concept of the self? Perhaps some things are just better left unexplained...
