

Nccn Guidelines For Kidney Cancer V 2 2018 Web

As recognized, adventure as with ease as experience roughly lesson, amusement, as competently as accord can be gotten by just checking out a books **Nccn Guidelines For Kidney Cancer V 2 2018 Web** in addition to it is not directly done, you could assume even more approaching this life, a propos the world.

We have the funds for you this proper as without difficulty as simple way to get those all. We allow Nccn Guidelines For Kidney Cancer V 2 2018 Web and numerous books collections from fictions to scientific research in any way. along with them is this Nccn Guidelines For Kidney Cancer V 2 2018 Web that can be your partner.

Upper Urinary Tract Urothelial Carcinoma - Michael Grasso III 2015-07-03

Upper Urinary Tract Urothelial Carcinoma was at one time felt to be a somewhat rare entity. With the success of various treatments for bladder urothelial carcinoma, the incidence of this disease in the uretere and kidney is rising. Many medical subspecialists encounter these complex patients and a multimodality treatment plan is often required for care.

Staging Laparoscopy - P. Hohenberger 2012-12-06

Included here is a discussion of the pathophysiological aspects and risks of laparoscopic staging (such as trocar metastases) on the basis of international experience.

Rare Genitourinary Tumors - Lance Pagliaro 2016-06-28

Rare Genitourinary Tumors offers the reader an up-to-date discussion of the less common neoplasms affecting the urinary tract and reproductive organs. Each authoritative chapter provides an in-depth discussion that is frequently not found in other urologic oncology textbooks. A valuable reference for urologists, oncologists, and those in specialty training, this volume provides ready access to information on etiology, incidence, risk factors, diagnosis, prognosis, insights from molecular pathology and, where applicable, data from clinical trials. The practical treatment guidelines included for each tumor type are written by experts and fully referenced.

Chemotherapy and Immunotherapy in Urologic Oncology - Edouard J. Trabulsi 2020-09-29

This book is designed to familiarize clinical practitioners in systemic therapy options and medical management of urologic malignancies including prostate cancer, bladder and upper tract urothelial carcinoma, and renal cell carcinoma. Organized by organ system, the text highlights new therapies such as novel forms of androgen deprivation, cytotoxic chemotherapy, immune check point and immunomodulatory agents, and targeted therapies. Written by experts in the field, the book also reviews current chemotherapy and immunotherapy regimens for genitourinary malignancies and discusses indications, outcomes, and toxicities, as well as clinical trial concepts. Each of the book's chapters offers a bulleted box of clinical pearls on the particular role of the APP. **Chemotherapy and Immunotherapy in Urologic Oncology: A Guide for the Advanced Practice Provider** is a resource for urologists, uro-radiologists, medical clinicians and family practitioners alike, familiarizing its audiences with systemic therapy regimens for urologic malignancies, as well as their expected outcomes and side effects.

NCCN Guidelines for Patients® Kidney Cancer - National Comprehensive Cancer Network® (NCCN®) 2019-06-18

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network® (NCCN®), comes this essential guide to Kidney Cancer. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients® are packed with the latest information and resources. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions. Topics include: Kidney cancer basics, Testing for kidney cancer, Kidney cancer staging, Kidney cancer treatment, Treatment guide: Stage I, Treatment guide: Stage II, Treatment guide: Stage III, Treatment guide: Stage IV, and Making treatment decisions. Let this authoritative handbook be your guide!

Management of Bladder Cancer - Badrinath R. Konety 2014-11-17

Management of bladder cancer provides a single, comprehensive reference source that incorporates all the latest information regarding bladder cancer. The text covers epidemiology and natural history of bladder

cancer as well as latest findings regarding the genetics and molecular biology of the disease. Diagnostic and staging evaluation of both non-muscle invasive and invasive bladder cancer is discussed. The text incorporates chapters summarizing new findings regarding markers for the diagnosis of bladder cancer and new diagnostic techniques to enhance traditional methods such as cystoscopy. Risk stratified treatment of non muscle invasive bladder cancer including various approaches to intravesical therapy are reviewed. Current guideline based approaches to management and new data regarding diagnosis and prognostication of muscle invasive bladder cancer is analyzed and summarized. The application of chemotherapy for muscle invasive and advanced disease is discussed and the evidence based application of multimodality therapy highlighted. Finally, gaps in current knowledge and areas for future research are highlighted. Ongoing important clinical trials which could imminently yield significant new knowledge is discussed. Authored by experts in their respective fields, *Management of Bladder Cancer* will serve as a easy and complete reference source for clinicians, researchers, individuals in training, allied health professionals and medical students in the fields of Urology, Medical Oncology, Radiation Oncology, Basic and Translational Science and Epidemiology.

NCCN Guidelines for Patients® Bone Cancer - National Comprehensive Cancer Network® (NCCN®) 2020-12-14

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network (NCCN) comes this essential guide to bone cancer. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: the bone, testing for bone cancer, treating bone cancer, chondrosarcoma, chordoma, Ewing sarcoma, giant cell tumor of the bone, osteosarcoma, and making treatment decisions. Let this authoritative handbook be your guide!

Pediatric Lymphomas - Howard J. Weinstein 2007-01-20

This is a comprehensive textbook of Hodgkin's and non-Hodgkin's lymphomas written by leaders in the field of childhood lymphomas. It includes clinical, pathologic and molecular biology of each subtype of lymphoma. The pathology chapters are comprehensive and include excellent photographs. The book is at the level of subspecialists in pediatric hematology and oncology, radiation oncology, pediatric surgery and hematopathology.

High-Risk Cutaneous Squamous Cell Carcinoma - Chrysalynne D. Schmults 2016-04-29

This book is a cutting-edge resource that provides clinicians with the up-to-date practical knowledge required in order to manage SCC patients optimally. It summarizes newly available information relating to the definition of high-risk SCC, its pathophysiologic underpinnings, and its management. New prognostic information and staging systems are summarized that enable high-risk tumors to be defined more precisely than ever before. Many helpful tips are provided on the practical management of challenging cases, including multiple tumors/field cancerization, high-risk tumors, nodal metastases, and unresectable disease. The authors are all acknowledged experts in the emerging field of high-risk and advanced SCC.

NCCN Guidelines for Patients® Mycosis Fungoides/ Sézary Syndrome - National Comprehensive Cancer Network® (NCCN®) 2021-03-04

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network (NCCN) comes this essential guide to Mycosis Fungoides/Sézary Syndrome. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN

Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: MF/SS basics, Testing for MF/SS Treating MF/SS, Stage 1A, Stage 1B and 2A, Stage 2B, Stage 3, Stage 4, Large-cell transformation, Making treatment decisions, Words to know, NCCN Contributors, NCCN Cancer Centers, Let this authoritative handbook be your guide! *Central Nervous System Cancers* - Oncology Nursing Society 2011

Considered one of the most devastating and frightening of all cancers, cancers of the central nervous system (CNS) attack the complex organs that control not only the CNS but also the peripheral nervous system and many of the voluntary and involuntary body systems, with 20% to 40% of CNS cancers metastasizing to the brain. Site-Specific Cancer Series: Central Nervous System Cancers, a new volume in the Series edited by Deborah Hutchinson Allen and Laurie L. Rice, details the cancers of the brain and spinal cord. Chapters examine issues such as anatomy and physiology of the brain and spine, patient assessment, pathology, histology, and molecular markers of primary brain tumors, and adult and pediatric cancers of the brain and spinal cord. Other issues include treatment modalities (surgical treatments, chemotherapy, and radiotherapy), as well as pediatric therapeutic modalities, symptom management and psychological issues, and the current state of evidence-based practice. You can use this new volume as a guide to treating your patients and to providing sensitive and realistic care that optimizes the quality of life and permits a sense of hopefulness to prevail when many patients with type of cancer feel only pain and fear.

NCCN Guidelines for Patients® Cervical Cancer - National Comprehensive Cancer Network® (NCCN®) 2021-12-13

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network (NCCN) comes this essential guide to Cervical Cancer. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Cervical cancer basics, Testing and staging, Types of treatment, Treatment for common types, Treatment, for neuroendocrine carcinoma of the cervix (NECC) Survivorship, Making treatment decisions, Words to know, NCCN, Contributors, NCCN Cancer Centers. Let this authoritative handbook be your guide!

Malignant Pleural Mesothelioma - Ken O'Byrne 2006

NCCN Guidelines for Patients® Bladder Cancer - National Comprehensive Cancer Network® (NCCN®) 2019-06-25

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network® (NCCN®), comes this essential guide to Bladder Cancer. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients® are packed with the latest information and resources. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions. Topics include: Bladder cancer basics, Staging bladder cancer, Treatments for bladder cancer, Non-muscle-invasive bladder cancer, Muscle-invasive bladder cancer, Metastatic bladder cancer, and Making treatment decisions. Let this authoritative handbook be your guide!

Nccn Guidelines for Patients - National Comprehensive Cancer Network 2017-07-28

[KIDNEY CANCER ASSOCIATION NCCN AUTHORIZED GERMAN VERSION] From 27 leading cancer centers united under the National Comprehensive Cancer Network(r) (NCCN(r)), comes this essential guide to Kidney Cancer. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients(r) are packed with the latest information, treatment innovations, and resources about Kidney Cancer. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions. Let this authoritative handbook be your guide! Part 1-Kidney cancer basics: Explains where kidney cancer starts and how it spreads. Part 2-Testing for kidney cancer: Describes the tests used to find and confirm kidney cancer. Part 3-Cancer staging: Explains how doctors rate the extent of kidney cancer in your body. Part 4-Overview of cancer treatments: Describes the types of treatments that may be used for kidney cancer. Part 5-Treatment guide: Presents the recommended course of action from diagnosis

to after cancer treatment. Part 6-Making treatment decisions: Offers tips for getting a treatment plan that meets all your needs. A complete glossary with dictionary and acronyms completes this book.

Kidney Cancer - Primo N. Lara 2015-06-10

Kidney Cancer: Principles and Practice is a comprehensive and interdisciplinary textbook that encompasses all clinically relevant aspects of the disease. This new edition has been extensively updated and includes brand new material covering the most recent developments in kidney cancer diagnosis and therapy. The user-friendly and clinically oriented content of the book guarantees that it will be of great interest to a wide range of medical professionals, and every effort has been made to ensure that contributions are both easy to understand and directly related to patient care. Content presentation departs from the usual dense chapter format featuring a lengthy series of paragraphs. Instead, each chapter contains several boxed sections, including one that summarizes essential "take home points" for the busy clinician and another that presents a patient-oriented case highlighting the clinical application of elements discussed in that chapter. In addition, accessible original images, illustrations, and diagrams (some in full color) are used to simplify particularly complex material. This book will be of value for clinicians, researchers, residents, fellows, students, and knowledgeable lay people. The contributors comprise an international group of authors with expertise in kidney cancer epidemiology, molecular biology, pathology, diagnosis, clinical features, staging, prognostic and predictive factors, surgery, systemic therapy, and emerging investigational approaches, among others.

Invasive Bladder Cancer - PierFrancesco Bassi 2007-07-29

Invasive bladder tumors affect the muscle wall, and have a propensity to metastasize and spread to other areas of the body, and are more likely to be fatal. This book presents state-of-the-art diagnoses and treatments available for bladder cancer that has metastasised into the body. A thorough review of current practice is presented in a full color volume with more than 40 tables and 50 illustrations. The book offers a comprehensive review of the subject, covering epidemiology, screening, diagnostic factors, surgery, chemotherapy and post-operative monitoring. Most chapters are jointly written by a basic researcher and a clinician.

Urological Pathology - Mahul B. Amin 2013-11-14

Knowledge in the field of urologic pathology is growing at an explosive pace. Today's pathologists, specialists, and residents require a comprehensive and authoritative text that examines the full range of urological diseases and their diagnosis. Written by recognized leaders and educators in the field, the text provides readers with a detailed understanding of all diagnostic aspects of urological disease. Inside this unique resource, readers will explore a broad spectrum of practical information—including etiology, diagnostic criteria, molecular markers, differential diagnosis, ancillary tests, and clinical management. This is sure to be the new definitive text for urological pathology!

Cancer-Associated Thrombosis - Alok A. Khorana 2007-09-26

Showcasing the expertise of top-tier specialists who contributed to the newly released guidelines for the care of thrombosis in cancer patients, this exciting guide was written and edited by members of the American Society of Clinical Oncology panel, (ASCO), on the prevention and treatment of cancer-associated thrombosis, among others, and provides

Analysing Survival Data from Clinical Trials and Observational Studies - Ettore Marubini 2004-07-02

A practical guide to methods of survival analysis for medical researchers with limited statistical experience. Methods and techniques described range from descriptive and exploratory analysis to multivariate regression methods. Uses illustrative data from actual clinical trials and observational studies to describe methods of analysing and reporting results. Also reviews the features and performance of statistical software available for applying the methods of analysis discussed.

NCCN Guidelines for Patients® Myelodysplastic Syndromes - National Comprehensive Cancer Network® (NCCN®) 2021-01-11

[OFFICIAL CURRENT VERSION] From the National

Comprehensive Cancer Network (NCCN) comes this essential guide to Myelodysplastic Syndromes. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: MDS basics, Testing for MDS, Treating MDS, MDS outlook, Anemia, Low-risk MDS, High-risk MDS, MDS/MPN overlap, Making treatment decisions, Words to know, NCCN Contributors, NCCN Cancer Centers, Let this authoritative handbook be your guide!

Adenocarcinoma of the Esophagogastric Junction - Paul M. Schneider 2010-08-02

Among malignant tumors, adenocarcinomas of the esophagogastric junction show the highest increase in incidence over the past three decades in Western industrialized countries. This special volume, with contributions from experts in the field, covers all aspects of the disease. Etiology, pathogenesis, classification, and clinical staging are discussed, and there is special emphasis on state of the art treatment techniques. The latter range from endoscopic mucosal resections or limited surgical resections for early cancers to multimodality treatment options for locally advanced tumors. Emerging quality issues in surgical management are addressed. Detailed attention is also paid to other important recent developments, including molecular response prediction, early metabolic response evaluation by PET and PET-CT, the diagnosis of micrometastases, and the use of sentinel node technology. This volume will be of interest to all clinicians concerned with the diagnosis and management of this malignancy.

NCCN Guidelines for Patients® Small Cell Lung Cancer - National Comprehensive Cancer Network® (NCCN®) 2021-09-30

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network (NCCN) comes this essential guide to Small Cell Lung Cancer. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Lung cancer basics, Lung cancer staging, Tests for lung cancer, Initial treatment, Surveillance and subsequent treatment, Making treatment decisions, Words to know, NCCN Contributors, NCCN Cancer Centers. Let this authoritative handbook be your guide!

Hepatobiliary Cancer - Paul H. Sugarbaker 2013-03-09

When one deals with cancer, the hepatobiliary malignancies present a challenge to the oncologists that can be characterized as a series of unsolved clinical and biological dilemmas. Liver metastases from colorectal and other gastrointestinal malignancies, hepatocellular carcinoma, cholangiocarcinoma, and gall bladder cancer present an array of problems but have two features in common. These are high morbidity and mortality with an overall poor result from treatment. Why is it that hepatobiliary cancer carries with it such a dismal prognosis? First of all, these diseases present, for the most part, in an advanced state. To this point in time the oncologist has had no help from early diagnosis or screening. Only the occasional patient followed by ultrasound or a tumor marker has the disease diagnosed in an asymptomatic state. By the time these diseases become symptomatic, curative treatment options have usually disappeared. Evolution has placed the liver in a protected position in order to avoid injury to the soft parenchyma. As with many other internal organs, the nerve supply is extremely limited. These two anatomic features result in a great lack of early warning signs of cancer.

Ending Medical Reversal - Vinayak K. Prasad 2019-05-14

They outline a comprehensive plan to reform medical education, research funding and protocols, and the process for approving new drugs that will ensure that more of what gets done in doctors' offices and hospitals is truly effective.

Genitourinary Cancers - Siamak Daneshmand 2018-08-31

This book addresses the most pressing current questions in the management of urologic malignancies. The rapid advances in imaging and molecular markers are placed into a clinical context, with explanation of their effects on prognosis and treatment planning. Similarly, progress in immunotherapy is carefully examined, focusing in particular on the role of immune checkpoint inhibitors in both early- and late-stage urologic

malignancies. Looking beyond the improvements in minimally invasive techniques for urologic cancers, the impacts of care coordination pathways and enhanced recovery after surgery protocols are reviewed. Readers will also find enlightening discussion of the decision algorithm for the treatment of early-stage, high-grade bladder cancer, taking into account evidence on the most advanced treatment options and the circumstances in which surgery may need to be expedited. The penultimate chapter discusses the Cancer Genome Atlas project for bladder cancer, and the book closes by considering contemporary medical and surgical management of testicular cancer.

Harrison's Manual of Oncology - Bruce Chabner 2007-11-11

The full spectrum of oncology medications -- backed by the authority of Harrison's! From today's leading clinicians in cancer care comes this comprehensive yet portable guide to the major chemotherapeutic and supportive care agents in oncology. Full of never-before-published content, this invaluable clinical companion features numerous tables and a concise, outline-oriented text, making it ideal for reference at a glance. Features:: A complete overview of all medications used in cancer care, including hormonal agents and biologic response modifiers Tables and templated format clearly highlight each drug and its companion regimen Clinically relevant and prescriptive approach emphasizes precise dosing regimens and potential combinations for tailoring multi-drug regimens Section on supportive and palliative care A review of high-dose therapy and bone marrow transplant Content that goes beyond the treatment of primary or metastatic disease to encompass the treatment of all therapeutic complications

NCCN Guidelines for Patients® - National Comprehensive Cancer Network® (NCCN®) 2017-05-23

[OFFICIAL CURRENT VERSION] From the 27 leading cancer centers united under the National Comprehensive Cancer Network® (NCCN®), comes this essential guide to Kidney Cancer. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients® are packed with the latest information, treatment innovations, and resources about Kidney Cancer. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions. Let this authoritative handbook be your guide!Part 1-Kidney cancer basics: Explains where kidney cancer starts and how it spreads.Part 2-Testing for kidney cancer: Describes the tests used to find and confirm kidney cancer.Part 3-Cancer staging: Explains how doctors rate the extent of kidney cancer in your body.Part 4-Overview of cancer treatments: Describes the types of treatments that may be used for kidney cancer.Part 5-Treatment guide: Presents the recommended course of action from diagnosis to after cancer treatment.Part 6-Making treatment decisions: Offers tips for getting a treatment plan that meets all your needs.A complete glossary with dictionary and acronyms completes this book.

Anaemia in Cancer - Carsten Bokemeyer 2004-11

Hypofractionated and Stereotactic Radiation Therapy -

Orit Kaidar-Person 2018-07-31

This handbook summarizes the data and techniques for hypofractionation and stereotactic radiation in a clinically-accessible way. Hypofractionated radiation therapy, which consists of larger-dose radiation treatments that are given over a shorter time period compared to conventional radiation fraction sizes, is used to treat a variety of cancers, including prostate, breast, lung, and colorectal. Conventional radiation therapy and hypofractionated radiation therapy have different effectiveness rates for cancer treatment and have different impacts on normal tissues in terms of causing toxicity. There is a significant and growing body of literature on the use of different dosing regimens to treat a variety of cancers and radiation oncologists need to keep up with the various dosing schedules, the effect of each regimen on cancer control in different cancers, and how the different schedules affect each organ in terms of toxicity. The book thus provides concise information ranging from commonly-used dose-fractionation schemes for hypofractionated and stereotactic body radiotherapy to simulation and treatment specifications to published safety and efficacy data. Chapters additionally examine the biological rationales for the efficacy of

hypofractionated radiation; present clinical studies that demonstrate the efficacy and safety of hypofractionated radiation treatment in a variety of cancers; and describe the advances in technology that have allowed hypofractionated radiation to be safely given. This is an ideal guide for radiation oncology clinicians and trainees.

Stereotactic Body Radiation Therapy - Simon S. Lo
2012-08-28

Stereotactic body radiation therapy (SBRT) has emerged as an important innovative treatment for various primary and metastatic cancers. This book provides a comprehensive and up-to-date account of the physical/technological, biological, and clinical aspects of SBRT. It will serve as a detailed resource for this rapidly developing treatment modality. The organ sites covered include lung, liver, spine, pancreas, prostate, adrenal, head and neck, and female reproductive tract. Retrospective studies and prospective clinical trials on SBRT for various organ sites from around the world are examined, and toxicities and normal tissue constraints are discussed. This book features unique insights from world-renowned experts in SBRT from North America, Asia, and Europe. It will be necessary reading for radiation oncologists, radiation oncology residents and fellows, medical physicists, medical physics residents, medical oncologists, surgical oncologists, and cancer scientists.

NCCN Guidelines for Patients® Stomach Cancer - National Comprehensive Cancer Network® (NCCN®) 2021-08-23

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network (NCCN) comes this essential guide to Bladder Cancer. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Bladder basics, Testing, Staging, Treatment, Non-muscle invasive, Muscle invasive, Metastatic (stage 4B), Making treatment decisions, Words to know, NCCN Contributors, NCCN Cancer Centers. Let this authoritative handbook be your guide!

NCCN Guidelines for Patients® Survivorship Care for Healthy Living - National Comprehensive Cancer Network® (NCCN®) 2020-12-21

[OFFICIAL CURRENT VERSION] From the National Comprehensive Cancer Network (NCCN) comes this essential guide to Survivorship Care for Healthy Living. Based on clinical treatment guidelines used by doctors and oncology professionals around the world, these NCCN Guidelines for Patients help patients and caregivers talk with their doctors and make treatment decisions. Topics include: Survivorship, Physical activity, Food and supplements, Weight and metabolism, Preventing infections, Resources, Words to know, NCCN Contributors, NCCN Cancer Centers. Let this authoritative handbook be your guide!

WHO Classification of Tumours of the Urinary System and Male Genital Organs - International Agency for Research on Cancer 2016-02-02

WHO Classification of Tumours of the Urinary System and Male Genital Organs is the eighth volume in the 4th Edition of the WHO series on histological and genetic typing of human tumours. This authoritative, concise reference book provides an international standard for oncologists and pathologists and will serve as an indispensable guide for use in the design of studies monitoring response to therapy and clinical outcome. Diagnostic criteria, pathological features, and associated genetic alterations are described in a strictly disease-oriented manner. Sections on all recognized neoplasms and their variants include new ICD-O codes, epidemiology, clinical features, macroscopy, pathology, genetics, and prognosis and predictive factors. It contains numerous color photographs, MRIs, ultrasound images, CT scans, charts and references.

Nephron-Sparing Surgery - Krishna Sasidharan 2007-10-18

Despite the rising popularity of the minimally invasive laparoscopic option, open nephron-sparing surgery is still seen by many experts as the 'gold standard' for open surgery for kidney tumors and should remain the first choice for many patients. This challenges the idea that less-invasive therapies are always more desirable than open surgery. While laparoscopic nephron-sparing surgery may be a more attractive option for treating small, easily accessible kidney tumors, for large tumors this is not always the case. Nephron-sparing surgery is

a outstanding text that analyses all forms of surgery, open or laparoscopic, as well as providing a backdrop on renal cell carcinoma in general, and the complications and outcomes following surgery that both surgeon and patient will face. Featuring 100 colour photos, the text includes chapters on: Imaging renal masses: current status Open nephron-sparing surgery for renal cell carcinoma Minimally invasive approaches for renal cell carcinoma: an overview Laparoscopic partial nephrectomy Controversies in nephron-sparing surgery Renal cell carcinoma: long-term outcome following nephron-sparing surgery Dr Sasidharan and Professor Soloway have created a superb text covering all aspects of nephron-sparing surgery that should provide excellent guidance for all those who are just beginning to perform nephron-sparing surgery or act as an aide-memoire for those familiar with nephron-sparing surgery.

NCCN Guidelines for Patients® - National Comprehensive Cancer Network® (NCCN®) 2015-08-17

From the medical leaders of 26 of the world's most renowned cancer centers united under the National Comprehensive Cancer Network® (NCCN®), comes this essential guide to kidney cancer. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients® are packed with the latest information, treatment innovations, and resources about the diagnosis and treatment of kidney cancer. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions. Let this authoritative handbook be your guide! Part 1 - KIDNEY CANCER BASICS > Explains where kidney cancer starts and how it spreads. Part 2 - TESTING FOR KIDNEY CANCER > Describes the tests used to find and confirm kidney cancer. Part 3 - CANCER STAGING > Explains how doctors rate the extent of kidney cancer in your body. Part 4 - OVERVIEW OF CANCER TREATMENTS > Describes the types of treatments that may be used for kidney cancer. Part 5 - TREATMENT GUIDE > Presents the recommended course of action from diagnosis to after cancer treatment. Part 6 - MAKING TREATMENT DECISIONS > Offers tips for getting a treatment plan that meets all your needs. Part 7 - Glossary with dictionary and acronyms.

Nccn Guidelines for Patients - National Comprehensive Cancer Network 2017-07-28

[KIDNEY CANCER ASSOCIATION NCCN AUTHORIZED SPANISH VERSION] From 27 leading cancer centers united under the National Comprehensive Cancer Network(r) (NCCN(r)), comes this essential guide to Kidney Cancer. Adapted from clinical treatment guidelines used by physicians and oncology professionals around the world, these NCCN Guidelines for Patients(r) are packed with the latest information, treatment innovations, and resources about Kidney Cancer. Each patient-friendly chapter prepares patients and caregivers to talk with their doctors and make treatment decisions. Let this authoritative handbook be your guide! Part 1-Kidney cancer basics: Explains where kidney cancer starts and how it spreads. Part 2-Testing for kidney cancer: Describes the tests used to find and confirm kidney cancer. Part 3-Cancer staging: Explains how doctors rate the extent of kidney cancer in your body. Part 4-Overview of cancer treatments: Describes the types of treatments that may be used for kidney cancer. Part 5-Treatment guide: Presents the recommended course of action from diagnosis to after cancer treatment. Part 6-Making treatment decisions: Offers tips for getting a treatment plan that meets all your needs. A complete glossary with dictionary and acronyms completes this book.

Clinical Radiation Oncology - Leonard L. Gunderson, MD, MS, FASTRO 2015-08-26

Perfect for radiation oncology physicians and residents needing a multidisciplinary, treatment-focused resource, this updated edition continues to provide the latest knowledge in this consistently growing field. Not only will you broaden your understanding of the basic biology of disease processes, you'll also access updated treatment algorithms, information on techniques, and state-of-the-art modalities. The consistent and concise format provides just the right amount of information, making *Clinical Radiation Oncology* a welcome resource for use by the entire radiation oncology team. Content is templated and divided into three sections -- Scientific Foundations of Radiation Oncology, Techniques and Modalities, and Disease Sites - for quick access to information. Disease Sites chapters summarize the most important issues on the opening page and include a full-

color format, liberal use of tables and figures, a closing section with a discussion of controversies and problems, and a treatment algorithm that reflects the treatment approach of the authors. Chapters have been edited for scientific accuracy, organization, format, and adequacy of outcome data (such as disease control, survival, and treatment tolerance). Allows you to examine the therapeutic management of specific disease sites based on single-modality and combined-modality approaches. Features an emphasis on providing workup and treatment algorithms for each major disease process, as well as the coverage of molecular biology and its relevance to individual diseases. Two new chapters provide an increased emphasis on stereotactic radiosurgery (SRS) and stereotactic body irradiation (SBRT). New Associate Editor, Dr. Andrea Ng, offers her unique perspectives to the Lymphoma and Hematologic Malignancies section. Key Points are summarized at the beginning of each disease-site chapter, mirroring the template headings and highlighting essential information and outcomes. Treatment algorithms and techniques, together with discussions of controversies and problems, reflect the treatment approaches employed by the authors. Disease Site Overviews allow each section editor to give a unique perspective on important issues, while online updates to Disease Site chapters ensure your knowledge is current. Disease Site chapters feature updated information on disease management and outcomes. Four videos accessible on Expert Consult include Intraoperative Irradiation, Prostate Brachytherapy, Penile Brachytherapy, and Ocular Melanoma. Thirty all-new anatomy drawings increase your visual understanding. Expert Consult eBook version included with purchase. This enhanced eBook experience allows you to search all of the text, figures, and references from the book on a

variety of devices.

Renal Tumors of Childhood - Kathy Pritchard-Jones
2015-02-04

This book provides a comprehensive overview of the biological basis of renal tumors in childhood and the clinical approaches to their treatment. Recent advances in our understanding of the molecular genetics of Wilms and other renal tumors are placed in their clinical context, including the differing treatment approaches of immediate surgery or pre-operative chemotherapy. The challenges in applying this knowledge to improve risk stratification and to incorporate biologically targeted agents into front-line therapy are discussed. All of the authors are experts from Europe and North America and the book has been written specifically as an easy reference for the practising clinician and the research scientist. It lays the basis for understanding the future direction of clinical and translational research to improve outcomes in patients with childhood renal tumors and will prove indispensable for those treating or researching into these diseases.

Image-Guided IMRT - Thomas Bortfeld 2006-05-28

Intensity-modulated radiation therapy (IMRT), one of the most important developments in radiation oncology in the past 25 years, involves technology to deliver radiation to tumors in the right location, quantity and time. Unavoidable irradiation of surrounding normal tissues is distributed so as to preserve their function. The achievements and future directions in the field are grouped in the three sections of the book, each suitable for supporting a teaching course. Part 1 contains topical reviews of the basic principles of IMRT, part 2 describes advanced techniques such as image-guided and biologically based approaches, and part 3 focuses on investigation of IMRT to improve outcome at various cancer sites.
