Problem povečevanja človeške energije [prva izdaja] - Nikola Tesla 2019

Poljudno-znanstveni traktat s polnim naslovom Problem povečevanja človeške energije s posebnim ozirom na pridobivanje energije Sonca, ki ga prvič predstavljamo v slovenskem prevodu, je Nikola Tesla objavil leta 1900 v junijski številki Century Magazine. V spisu je na podlagi spoznanj, pridobljenih na eksperimentalni postaji, ki jo je med 1899 in 1900 zgradil v Colorado Springsu, podal razloge za raziskave, ki so ga pripeljale do razvoja brezžičnega sistema prenosa električne energije. Ob predstavitvi svoje družbene teorije, teorije vojne in filozofije družbenotransformativnih tehnologij je raziskoval tudi možnosti izdelave »samogibnega toplotnega motorja«, ki bi vso pogonsko moč črpal neposredno iz okolja, ter predstavil izum prvega »teleavtomata«, daljinsko upravljane ladjice. Teslove raziskave so danes izjemno relevantne, saj je že tedaj prepoznal izkoriščanje fosilnih goriv kot problem eksponentne rasti v razmerju do neobnovljivih virov in intenzivno razvijal (še vedno ne popolnoma razumljene) samozadostne, trajnostne sisteme pridobivanja in distribucije energije, ki ne bi temeljili na »potrati in porabi kateregakoli materiala« ali na brutalni prevladi bogatih nad revnimi.

Spletna besedila in jezik na spletu - Mija Michelizza 2014-09-01

Cilj znanstvene monografije je čim celovitejši pregled nad tematiko spletnih besedil, čeprav je osrednja obravnava namenjena besedilom blogov inWikipedije, pri čemer je, kot se izkaže, nujna umestitev v širši okvir elektronskih besedil. V prvem poglavju so predstavljene okoliščine nastanka spleta ter njegova opredelitev v razmerju do interneta in drugih elektronskih medijev. V drugem poglavju sta predstavljena korpus in slovar v povezavi s spletom, predvsem glede na to, kaj so spletni korpusi, kakšno vlogo prevzemajo danes spletni iskalniki, ter glede na rabo spleta v slovaropisju. Tretji, najobsežnejši del pričujoče monografije obsega podrobnejšo analizo jezika in besedil, predvsem izbranega gradiva z blogov in Wikipedije.

— — — — — The goal of the monograph ('Web texts and language on the Web (the case of blogs and Wikipedia in the Slovenian language)') entitled Web texts and language on the Web (the case of blogs and Wikipedia in the Slovenian language) is to give an overview, as complete as possible, of the topic of web texts, although its main part is limited to blog and Wikipedia texts, where, as it turns out, there is a need for placing the topic into a broader context of electronic texts. The first chapter treats the circumstances of the formation of the Web and its definition in relation to the Internet and other electronic media. In the second chapter, corpus and dictionary are presented in relation to the Web, especially in terms of web corpora, the current role of web search engines is discussed, as well as the use of the Web in lexicography. The third and the largest part of the monograph includes a detailed analysis of Slovenian language and texts, especially of the selected material obtained from blogs and Wikipedia. *Bibliogr. 2014-08-08

This book presents a collection of reviews prepared for the conference "Atmosphere, Ionosphere, Safety," held in Kaliningrad, Russia, in July 2012. It provides the reader insight into the current developments in the following fields: physics of elementary processes; ionosphere dynamics; ball lightning and aerosol structures; as well as remote detection of the radioactive and highly toxic substances. The diversity

of scope presented offers readers an up-to-date overview of trends, questions and their solutions.
