He founded Guiding Light Consultants with his wife and co-author Indu Khatri. Indu Khatri is a bestselling author and principle content designer for Guiding Light's corporate training programs and executive coaching.

Knowledge-base Assisted Database Retrieval Systems - Xu Wu 1996

This book discusses the application of some Artificial Intelligence (AI) technologies to database systems. The integration of AI technology and database management has developed into an important research topic, and many AI methods, such as logic

programming, natural language understanding, knowledge-bases, etc., have been applied to the development of intelligent database systems capable of deduction, natural language query understanding, cooperative query answering, and substantial query guidance. In this book, the authors review some knowledge-base assisted database access techniques, incorporating techniques to form a new kind of database front-end. The results of these applications are summarized and explained.

Best's Life Insurance Reports Upon All Legal Reserve Companies Transacting Business in the United States and Canada, and Fraternal Societies and Assessment Associations Operating in the United States - 1951

You Must Learn Nlp - Dr. Heidi Heron PsyD 2017-12-05

Curious about NLP? Want to know how it can help you? This book answers the most pressing questions we receive about Neuro Linguistic Programming and takes you on a journey that highlights how you can use NLP in personal development, communication, business, health and other aspects of life. With NLP you can improve your leadership skills, create better

relationships, become a better parent and friend and even work with others as a coach or therapist. In fact, whatever area of your life needs improvement NLP will give you the tools that you can easily learn to make massive changes in your life. This book is written by Dr. Heidi Heron PsyD and Laureli Blyth, NLP Master Trainers with the Worldwide Institutes of NLP (www.nlpworldwide.com). They have a great passion for sharing NLP globally while also helping to empower, enlighten and enhance the world with NLP one person at a time. Based on their blog of the same name and written in their signature conversational style, this book gives you 156 reasons why you really Must Learn NLP.

Win-Win Influence: How to Enhance Your Personal and Business Relationships (with NLP) - Roger R. W. Ellerton 2012

You can get anything in the world that you want, if you help somebody else get something they want. —Zig Zigler Whether you are a parent, son/daughter, friend, employee, manager or salesperson, you are constantly influencing others to accept you, your ideas, products or services. Those who masterfully present themselves and their ideas in a win-win manner, get ahead. Those who do not, may reap short-term gains and eventually fail in their objective. Influence is critical in leadership, negotiation, teamwork, sales, resolving family issues and getting others to buy into your ideas. Follow and practice the concepts, tips and processes described in this book and improve your influence results with anyone in a manner that achieves a win-win outcome. The emphasis is on expanding your influence skills and results in everyday situations. For example, through this book, you will learn how to: Enhance your personal and business relationships. Create the career you want. Become a stronger negotiator. Enjoy the family life you desire. Create healthy work environments. Be who you choose to be. Whether you realize it or not, you are constantly influencing other people's thoughts. You do this through your actions as well as your inactions. One of the best, if

not the best, communication models is neuro-linguistic programming (NLP), which forms a fundamental part of this book. How important is the ability to influence others? No matter whether you are a businessperson, teacher, parent, stay-at-home spouse, employee or manager, dealing with people is probably the most important activity you undertake throughout the course of your day. A number of years ago, research sponsored by the Carnegie Foundation for the Advancement of Teaching and later confirmed at the Carnegie Institute of Technology discovered that even in engineering, about 15 percent of one's financial success is due to one's technical knowledge and about 85 percent is due to interpersonal skills. If you are ready to be the difference that makes the difference in creating better results in your life, grab a copy and let's get started!

Reclamation Reform Act of 1979 - United States. Congress. Senate. Committee on Energy and Natural Resources. Subcommittee on Energy Research and Development 1979

Analytics of Life - Mert Damlapinar 2019-11-11

Analytics of Life provides the reader with a broad overview of the field of data analytics and artificial intelligence. It provides the layperson an understanding of the various stages of artificial intelligence, the risks and powerful benefits. And it provides a way to look at big data and machine learning that enables us to make the most of this exciting new realm of technology in our day-to-day jobs and our small businesses. Questions you can find answers* * What is artificial intelligence (AI)? * What is the difference between AI, machine learning and data analytics? * Which jobs AI will replace, which jobs are safe from data analytics revolution? * Why data analytics is the best career move? * How can I apply data analytics in my job or small business? Who is this book for? * Managers and business professionals * Marketers, product managers, and business strategists * Entrepreneurs, founders and startups team members

* Consultants, advisors and educators * Almost anybody who has an interest in the future According to an article by Cade Metz in The New York Times, "Researchers say computer systems are learning from lots and lots of digitized books and news articles that could bake old attitudes into new technology." Oxford University professor Nick Bostrom argues that if machine brains surpassed human brains in general intelligence, then this new superintelligence could become extremely powerful - possibly beyond our control. MIT professor Max Tegmark describes and illuminates the recent, ground-breaking advances in Artificial Intelligence and how it might overtake human intelligence. As Oxford University economist Daniel Susskind points out, technological progress could bring about unprecedented prosperity, solving one of humanity's oldest problems: how to make sure that everyone has enough to live on. Distinguished AI researcher and professor of computer science at UC Berkeley, Russell Stuart suggests that we can rebuild AI on a new foundation, according to which machines are designed to be inherently uncertain about the human preferences they are required to satisfy. Industry experts claim that AI will have a negative impact on blue-collar jobs, but Mert predicts that Americans and Europeans will experience a strong impact on white-collar jobs as well. And Mert also provides research results and a clear description of which jobs will be affected and how soon, which jobs could be enhanced with AI. Analytics of Life also provides solutions and insight into some of the most profound changes to come in human history.

Law of Attraction - Michael J. Losier 2007-06-11

The Secret opened the world to the power of positive thinking. Now, Law of Attraction will guide you through every step toward getting the life you've always desired -- and deserved. Have you noticed that sometimes what you need just falls into place? Perhaps you've met the perfect client or life partner merely by being at the right place at the right time. On the other hand,

there are some people who find themselves in one terrible relationship after another or who seem unable to shake off their bad luck. These experiences are evidence of a very powerful force. It's called the Law of Attraction, and right now it's attracting people, jobs, situations, and relationships to you. The Law of Attraction can be defined as: I attract to my life whatever I give my attention, energy, and focus to, whether positive or negative. Now, with this book, readers can learn how to use the Law of Attraction deliberately and integrate it into their daily life. By doing this, they will attract all they need to do, know, and have so they can get more of what they want and less of what they don't want. With its easy-to-follow 3-step formula (Identify Your Desire, Give Your Desire Attention, and Allowing), complete with tips, tools, exercises, and scripts, Law of Attraction shows readers how to: Attract their ideal mate and ideal relationships Increase wealth and abundance Improve their business with more customers, clients, and referrals Discover their ideal job, true calling, or career and more!

Actuarial Aspects of Individual Life insurance and Annuity Contracts, 3rd Edition - Albert Easton, FSA, MAAA 2014-06-01 Actuarial Aspects of Individual Life Insurance and Annuity Contracts provides a comprehensive overview of the features and financial aspects of traditional, indexed, and variable products and their related rider benefits. Product development, pricing, financial reporting methods, and regulatory requirements are addressed for all products, including those with derivative-based guarantees. This provides an introduction to actuarial techniques and the relationships among various financial values for the student and provides a comprehensive summary of current practices on more recent products for the experienced actuary. Spreadsheets are available on the ACTEX website to demonstrate profit testing alternatives.

Natural Language Processing for Online Applications - Peter Jackson 2007

This text covers the technologies of document retrieval, information extraction, and text categorization in a way which highlights commonalities in terms of both general principles and practical concerns. It assumes some mathematical background on the part of the reader, but the chapters typically begin with a non-mathematical account of the key issues. Current research topics are covered only to the extent that they are informing current applications; detailed coverage of longer term research and more theoretical treatments should be sought elsewhere. There are many pointers at the ends of the chapters that the reader can follow to explore the literature. However, the book does maintain a strong emphasis on evaluation in every chapter both in terms of methodology and the results of controlled experimentation.

Your Blueprint, Life by Design - Roland Byrd 2011-03-01

Is there something you'd change about yourself or your life if you could? Of course there is! We all have at least one thing we'd change! So what's stopping you? NLP and Manipulation - James Jones 2021-08-21

Want to Finally Have the Courage to Break Free of Other People's Negative Influence over You While Using the Same Manipulation Techniques to Get the Life You Deserve? Every single day, most of your life choices are being covertly manipulated and influenced by someone in one way or another. While manipulation is not necessarily a bad thing, people can use it either offensively or defensively to get what they want. If you're on the receiving end of manipulation, you may benefit from knowing all the cues to watch out for. This way, you will be able to protect yourself whenever you're being manipulated in a damaging, limiting way. In the same vein, if you're looking for ways to open up multiple opportunities that will change your life for the better, manipulation comes in handy as well. Successful people from all over the world have benefitted from using proven manipulation techniques to flip the odds in their favor... and this book will help you achieve the same results! In "NLP and Manipulation" by expert behavioralist James Jones, empaths like you will discover all the field-tested methods that successful people use to make things go the way they want them to. With the help of the Dark Psychology secrets found in this book, you will be able to unlock the secrets of the mind, effectively read body language, and influence people using hypnosis, covert mind games, and other forms of persuasion. Over the course of this life-changing guide, you will: Free yourself from the manipulation of others, both present and past, using proven data Swiftly use unconscious manipulation and turn your bad karma into good luck Quickly learn how to spot manipulation before you become entangled in its web Efficiently use reverse psychology using the 5 most

important tips Easily cure your phobia by applying simple, step-by-step NLP mind control techniques Implement the 10 most effective methods that successful people use to get their way And so much more! "NLP and Manipulation" is one of the most practical guides on how to manipulate people in the market! We don't want to lie to you — this book does not come with a personal teacher. However, while this practical guide deals with technical topics, it is made extremely simple so that beginners like you will be able to effortlessly learn and apply all the crucial tips and tricks gradually. "NLP and Manipulation" is written in a way that gives beginners like you as much theoretical knowledge and practical tools on how to read people and direct everyone and the environment around you in any way you want. We suggest reading it several times, if necessary, and practice each chapter individually, instead of reading it all in one go without elaborating on the crucial concepts. Even if you are a complete beginner or have absolutely no idea how to influence others to your advantage, "NLP and Manipulation" will make it exceptionally easy for you to learn and apply all the manipulation techniques that will help you analyze people and give you the life you've always wanted! Buy Now and Start Living the Life of Your Dreams Today!

Law of Connection - Michael J. Losier 2009-06-01

Married couples...dating couples...parents and children...teachers and students...office workers...management and staff...business to business... There is a simple solution to improving your communication and building better, healthier relationships. It's called Law of Connection. Make it work for you! Are there certain people you cannot seem to communicate with--at home, at work, or in your community? You say one thing, they hear something different. You simply do not understand one another, and you cannot explain why. The only thing you are certain of is that the lack of connection leads to disappointment, frustration, and conflict. Now in LAW OF CONNECTION, Michael J. Losier gives

you the key to successful communication. Using the principles of Neuro-Linguistic Programming (NLP), you will soon master the few simple skills needed to create better understanding with people in every aspect of your life. With tips, tools, exercises, and scripts to guide you, you will discover: --the three conditions for connecting --techniques for calibrating your conversations --four easy methods for effective communication --tips for creating positive rapport in all kinds of situations --a special section for teachers, trainers, and anyone who makes group presentations. Bring LAW OF CONNECTION home to your family and introduce it into your workplace. Watch and listen as communication improves wherever you are, and your relationships become fuller, richer, and free of conflict.

More Than a Lawyer - Andreea Serban 2020-04-08

Alina and Andreea Serban are lawyers, entrepreneurs, coaches, and psychologists, paving the way for an elevated existence as a lawyer. They are the best selling authors of 2 books, "Unique and Different" and "More Than A Lawyer," and developed the Unique Lawyer System to help lawyers elevate themselves, as well as their practice. The innovative and integrative approach to balance innately creates stronger client relationships and genuinely successful careers so that you too can live an extraordinary life as a unique lawyer. Law School prepared you for a job, we take you higher and help you elevate yourself and your practice. The essence of the "More than a Lawyer" book, is to encourage attorneys to become aware of the fact that they have to become first responsible for the quality of their own life (being guided by

values such as happiness, success, health, and vitality). "A good lawyer knows this can become an elevated lawyer? "More than a Lawyer " shows you how!"

Self-Discipline, Nlp Guide, Emotional Intelligence - James Jones 2022-02-20

If You Want to Take Back Control Over Your Life & Relationships, then Keep Reading! Do you look at a successful person and wonder how they got to where they are? Do you envy how even-tempered and confident they are? Do you wish you had their charm and influence? Millions of people have regained control over their emotions and lives even though they thought it was impossible. And now you can, too! "Self-Discipline, NLP Guide, Emotional Intelligence" is made just for you! In this guide, you will learn how to master dark psychology and manipulation. So, if you want to influence people, improve your mindset, and improve your EQ, then keep reading! We all want a healthy amount of control in our daily lives. This is especially true if we suffer from addiction and depression or if we're constantly manipulated. But what if you can harness the power of the law of attraction and hypnosis? What if you become so influential that the universe has no choice but to submit to your bidding? What if you achieve a laser-sharp focus that you effortlessly tick off everything on your to-do list? It's all possible! All you need to do is do everything right. Now, you may think, "That's just not possible!" And you're right! It's impossible to do EVERYTHING right. But what successful people do is aim for what truly matters. And they make sure to focus their energy on executing them the best way possible! With "Self-Discipline, NLP Guide, Emotional Intelligence," you will learn proven methods successful people use to always get what they want. Using practical, evidence-based principles, you can effectively manipulate others, create stronger relationships, and succeed in life! When you get this uniquely practical guide, you'll see a lot of your bad luck go away. And things will slowly, but surely, fall into place. You'll learn that,

contrary to what you've learned in school, EQ is just as important (if not more) as IQ! Over the course of this comprehensive guide, you will: Learn the secret to high performance and fulfillment Master your emotions and put a permanent end to your addiction Overcome stress and depression using healthy and sustainable coping mechanisms Increase your emotional intelligence using just 5 steps Significantly boost your self-discipline in just 11 steps Apply the 5 most important things for reverse psychology to work Learn 10 proven methods that people use to manipulate others to get what they want Cure your phobia the easy, practical way using step-by-step NLP techniques And so much more! What sets this guide apart is its practicality. While it deals with highly technical topics, information is explained in simple and gradual terms. So, even if you have no psychology background, you can apply proven tips with ease! When you have this guide by your side, you're guaranteed to implement the right things in the right way! Are you ready to get everything you want out of life? Buy Now and Start Taking Control and Improving Your Life Today! **Practical Natural Language Processing** - Sowmya Vajjala 2020-06-17

Many books and courses tackle natural language processing (NLP) problems with toy use cases and well-defined datasets. But if you want to build, iterate, and scale NLP systems in a business setting and tailor them for particular industry verticals, this is your guide. Software engineers and data scientists will learn how to navigate the maze of options available at each step of the journey. Through the course of the book, authors Sowmya Vajjala, Bodhisattwa Majumder, Anuj Gupta, and Harshit Surana will guide you through the process of building real-world NLP solutions embedded in larger product setups. You'll learn how to adapt your solutions for different industry verticals such as healthcare, social media, and retail. With this book, you'll: Understand the wide spectrum of problem statements, tasks, and solution approaches within NLP Implement and evaluate different

NLP applications using machine learning and deep learning methods Fine-tune your NLP solution based on your business problem and industry vertical Evaluate various algorithms and approaches for NLP product tasks, datasets, and stages Produce software solutions following best practices around release, deployment, and DevOps for NLP systems Understand best practices, opportunities, and the roadmap for NLP from a business and product leader's perspective

Consulting with NLP - Lewis Walker 2002

Giving an overview of neuro-linguistic programming, this text takes the procedures through from initiating the session to gathering information, building the relationship and closing the session, with advice on special situations.

Analogical Modeling of Language - R. Skousen 1989-10-31

1. Structuralist Versus Analogical Descriptions ONE important purpose of this book is to compare two completely different approaches to describing language. The first of these approaches, commonly called structuralist, is the traditional method for describing behavior. Its methods are found in many diverse fields - from biological taxonomy to literary criticism. A structuralist description can be broadly characterized as a system of classification. The fundamental question that a structuralist description attempts to answer is how a general contextual space should be partitioned. For each context in the partition, a rule is defined. The rule either specifies the behavior of that context or (as in a taxonomy) assigns a name to that context. Structuralists have implicitly assumed that descriptions of behavior should not only be correct, but should also minimize the number of rules and permit only the simplest possible contextual specifications. It turns out that these intuitive notions can actually be derived from more fundamental statements about the uncertainty of rule systems. Traditionally, linguistic analyses have been based on the idea that a language is a system of rules. Saussure, of course, is well known as an early proponent of linguistic structuralism, as

exemplified by his characterization of language as "a self-contained whole and principle of classification" (Saussure 1966:9). Yet linguistic structuralism did not originate with Saussure - nor did it end with "American structuralism".

NLP: Describe the Art of Mind Control, Nlp and Body Language (Guide to Influencing Human Behavior Using Covert Persuasion, & Ethical Manipulation) - Russell Berry 101-01-01

For so many years now, the concept of mind control has existed, and people have shown both fear and fascination of what would take place if an individual would control their thoughts and minds and lead them to do things that are against their wish and will. There have been conspiracy theories on how government officials, as well as other influential persons, use their talents and capacities to control actions of the minorities and small groups. Take a sneak peek at what you're going to discover: ● How manipulative people really operate and tips to help you spot them a mile away ● Foolproof ways to tell if you or someone you know is being manipulated ● How to get anyone to say "yes" to your requests with little-known psychological techniques ● A crash guide to body language cues and how to accurately identify and interpret micro-expressions ● Steps to take to save yourself if you're in a romantic relationship with an emotional manipulator ● ...and much, much more! Do you know people who are constantly pushing your buttons to get you to do things you wouldn't otherwise do for the purpose of furthering their agenda? Do you feel you are always being led into things you don't want to do by others? Do you feel helpless, powerless and off-balance while interacting with your partner or your boss? Is someone constantly making you feel inadequate and unworthy? This book will help you gain comprehensive insights into the world of manipulation, negative persuasion and NLP. It will blow the lid off the clever and sneaky manipulation tactics people use to have their way over you. It will also help you recognize situations where you

have been manipulated. In addition to this, you'll also learn how to fight back against manipulation and be in control of certain situations.

Pragmatic Enterprise Architecture - James Luisi 2014-03-15

Pragmatic Enterprise Architecture is a practical hands-on instruction manual for enterprise architects. This book prepares you to better engage IT, management, and business users by equipping you with the tools and knowledge you need to address the most common enterprise architecture challenges. You will come away with a pragmatic understanding of and approach to enterprise architecture and actionable ideas to transform your enterprise. Experienced enterprise architect James V. Luisi generously shares life cycle architectures, transaction path analysis frameworks, and more so you can save time, energy, and resources on your next big project. As an enterprise architect, you must have relatable frameworks and excellent communication skills to do your job. You must actively engage and support a large enterprise involving a hundred architectural disciplines with a modest number of subject matter experts across business, information systems, control systems, and operations architecture. They must achieve their mission using the influence of ideas and business benefits expressed in simple terms so that any audience can understand what to do and why. *Pragmatic Enterprise Architecture* gives you the tools to accomplish your goals in less time with fewer resources. Expand your Enterprise Architecture skills so you can do more in less time with less money with the priceless tips presented. Understand the cost of creating new Enterprise Architecture disciplines and contrast those costs to letting them go unmanaged. Includes 10 life cycle architectures so that you can properly assess the ROI of performing activities such as outsourcing, insourcing, restructuring, mergers and acquisitions, and more. Complete appendix of eight transaction path analysis frameworks provide DBA guidelines for proper physical database

design

Algo Bots and the Law - Gregory Scopino 2020-10-31

The trillion-dollar markets for futures, swaps, commodity options, and related derivatives are extremely important to the global economy because, among other things, they influence the prices that people pay for everything from heating oil and bread to the interest rates connected to mortgages and student loans. Due to technological advances in automation and artificial intelligence, these markets have recently undergone a dramatic transformation away from human-centered trading and operations to control by high-speed automated systems. In this work, Gregory Scopino explains how such changes present challenges to the oversight of these markets and discusses potential ways for authorities to address issues presented by computerized trading and related systems. This book should be read by anyone interested in learning how artificial intelligence is used in the financial markets and how those markets are - and should be - regulated.

The Law of Possibilities - Anne Mette Rosting 2018-03-31

In life there are two roads to choose from—the road of light, filled with happiness and possibilities or the road of darkness, replete with negativity. This book will inspire you to take valuable steps toward your natural source of power to experience a joyful life; a life path filled with many opportunities. Read this book to gain a deeper understanding of why things happen the way they do so that you can attract more of the things you want in life and less of the things you don't want. The author herself has trodden the path of change and talks from her own experience as a motivational speaker and coach, as of well as those who have shared their stories with her after applying the law of possibilities in their life. She also gives you practical toolkits so that you can start to act and get your own results.

Legal Knowledge and Information Systems - S. Villata 2020-12-07

The field of legal knowledge and information systems has

traditionally been concerned with the subjects of legal knowledge representation and engineering, computational models of legal reasoning, and the analysis of legal data, but recent years have also seen an increasing interest in the application of machine learning methods to ease and empower the everyday activities of legal experts. This book presents the proceedings of the 33rd International Conference on Legal Knowledge and Information Systems (JURIX 2020), organised this year as a virtual event on 9–11 December 2020 due to restrictions resulting from the Covid-19 pandemic. For more than three decades, the annual JURIX international conference, which now also includes demo papers, has provided a platform for academics and practitioners to exchange knowledge about theoretical research and applications in concrete legal use cases. A total of 85 submissions by 255 authors from 28 countries were received for the conference, and after a rigorous review process, 20 were selected for publication as full papers, 14 as short papers, and 5 as demo papers. This selection process resulted in a total acceptance rate of 40% (full and short papers) and a competitive 23.5% acceptance rate for full papers. Topics span from computational models of legal argumentation, case-based reasoning, legal ontologies, smart contracts, privacy management and evidential reasoning to information extraction from different types of text in legal documents, and ethical dilemmas. Providing a state-of-the-art overview of developments in the field, this book will be of interest to all those working with legal knowledge and information systems.

Practical Spoken Dialog Systems - Deborah Dahl 2005-02-14

For professional speech researchers, there is a rich technical literature covering many years of primary research in speech. However, this literature is not necessarily applicable to the needs of business people, application developers, and students who are interested in learning about the practical uses of speech technology. On the other hand, while existing introductory

resources cover the basic mechanics of development of application development as well as aspects of the voice user interface, they don't go far enough in dealing with the details that have to be taken into account to make spoken dialog systems successful in practice. What's missing is information in between the in-depth technical literature and the more introductory development resources. The goal of this book is to provide information for anyone who wants to take the next step beyond the basics of current speech applications but isn't yet ready to dive into the technical literature. It is hoped that this book will help project managers, application developers, and students gain a fuller and more complete understanding of spoken dialog technology and the practical aspects of developing and deploying spoken dialog applications.

Understanding Artificial Intelligence - Albert Chun-Chen Liu
2022-08-31

Understanding Artificial Intelligence Provides students across majors with a clear and accessible overview of new artificial intelligence technologies and applications Artificial intelligence (AI) is broadly defined as computers programmed to simulate the cognitive functions of the human mind. In combination with the Neural Network (NN), Big Data (BD), and the Internet of Things (IoT), artificial intelligence has transformed everyday life: self-driving cars, delivery drones, digital assistants, facial recognition devices, autonomous vacuum cleaners, and mobile navigation apps all rely on AI to perform tasks. With the rise of artificial intelligence, the job market of the near future will be radically different???many jobs will disappear, yet new jobs and opportunities will emerge. *Understanding Artificial Intelligence: Fundamentals and Applications* covers the fundamental concepts and key technologies of AI while exploring its impact on the future of work. Requiring no previous background in artificial intelligence, this easy-to-understand textbook addresses AI challenges in healthcare, finance, retail, manufacturing,

agriculture, government, and smart city development. Each chapter includes simple computer laboratories to teach students how to develop artificial intelligence applications and integrate software and hardware for robotic development. In addition, this text: Focuses on artificial intelligence applications in different industries and sectors Traces the history of neural networks and explains popular neural network architectures Covers AI technologies, such as Machine Vision (MV), Natural Language Processing (NLP), and Unmanned Aerial Vehicles (UAV) Describes various artificial intelligence computational platforms, including Google Tensor Processing Unit (TPU) and Kneron Neural Processing Unit (NPU) Highlights the development of new artificial intelligence hardware and architectures Understanding Artificial Intelligence: Fundamentals and Applications is an excellent textbook for undergraduates in business, humanities, the arts, science, healthcare, engineering, and many other disciplines. It is also an invaluable guide for working professionals wanting to learn about the ways AI is changing their particular field.

Free Yourself From Fears with NLP - Joseph O'Connor
2011-06-17

"I've had thousands of problems in my life, most of which never actually happened." Mark Twain. As never before, our lives are bombarded with daily events that stir fear - real or imagined - in both our individual and collective psyches. From financial worries to social anxiety, from public speaking to personal safety, "Free Yourself From Fears" show us how to 'unlearn' our unreal fears and find emotional freedom. Applying the power of psychology, O'Connor goes inside the mind and shows you how to deal not only with such common anxieties as fear of heights and flying but also fear of other people's opinions and even of our own success. This immensely practical, hands-on book will help you: know when to trust and when not to trust, develop your intuition to stay safe when there is real danger, defeat socially created fears in

this age of anxiety, deal with change and worries about an uncertain future, and be in the here and now - true emotional freedom. One of the first books to address how to help children deal with fear and to deal with the all-pervasive and insidious feeling of "social anxiety," "Free Yourself From Fears" includes dozens of helpful exercises and practical techniques to help you achieve your best without anxiety and live without worry.

Natural Language Processing in Artificial Intelligence - Brojo Kishore Mishra 2020-11-01

This volume focuses on natural language processing, artificial intelligence, and allied areas. Natural language processing enables communication between people and computers and automatic translation to facilitate easy interaction with others around the world. This book discusses theoretical work and advanced applications, approaches, and techniques for computational models of information and how it is presented by language (artificial, human, or natural) in other ways. It looks at intelligent natural language processing and related models of thought, mental states, reasoning, and other cognitive processes. It explores the difficult problems and challenges related to partiality, underspecification, and context-dependency, which are signature features of information in nature and natural languages. Key features: • Addresses the functional frameworks and workflow that are trending in NLP and AI • Looks at the latest technologies and the major challenges, issues, and advances in NLP and AI • Explores an intelligent field monitoring and automated system through AI with NLP and its implications for the real world • Discusses data acquisition and presents a real-time case study with illustrations related to data-intensive technologies in AI and NLP

Power and Principle in the Market Place - Jacob Dahl Rendtorff
2016-04-08

In the global financial crisis, the need to develop a new kind of economy with a closer relation between ethics and economics has

become an important challenge to the international society. This book contributes to this debate by investigating different aspects of global business ethics and corporate social responsibility which are becoming more and more important in the ongoing discussions on the relation between market institutions and democratic governments. The different chapters of the book deal with fundamental philosophical issues of the ethics of the market economy, including discussions of the role of the social sciences and economics in contributing to a sustainable economics and global responsibility in the twenty-first century. In this sense, the book takes up the transnational debate on ethics and economics in order to contribute to a more balanced, fair, just and conscientious development in the world. The book starts with a European perspective on these issues, based on philosophical, sociological and economic views from Europe. These views are further developed in order to share thoughts of how to improve corporate social responsibility, welfare and justice, and the advancement of ethical principles in the international context. It is argued that in the international community, good corporate citizenship as social and environmental responsibility is realized through individual and organizational cosmopolitan responsibility for fostering the common good for humanity. The chapters of the book were originally presented at a conference in Copenhagen, organized together with the German Cultural Institute - the Goethe Institute of Copenhagen, Copenhagen Business School and Roskilde University, Denmark.

Manipulation and Dark Psychology - R.J. Anderson 2021-02-09
 Dark Psychology Series 2 Book Bundle This book includes:

NLP - Raphael Deception 2021-06-02

Do you want to become a success in whatever you do in life? Have you often wondered how others have achieved wealth and success? Do you want to learn their secrets too? Becoming a success in life depends on a wide range of factors that we may

not always possess. Of course, successful people seem to have it easy but it is actually possible to learn their secrets using the powerful tool of Neuro-linguistic programming (NLP). This psychological method analyzes the strategies that successful individuals use, which can then be applied to suit your own personal goals. Inside the pages of this book, NLP: Neuro-Linguistic Programming, you will discover how you can use this effective strategy to improve your chances of success, with chapters covering: What NLP is The benefits of learning this amazing skill NLP techniques Subconscious programming and the Law of Attraction The principles of success Myths about NLP How to train your brain 10 great habits to teach your brain And much more... Using thoughts, language and patterns of behavior that have been learned through experience, NLP helps you to realize specific outcomes that will benefit you and improve your chances in business and other important areas of your life. With it you can quickly set yourself on the path to even greater success than you would previously have imagined and improve your life for good.

Information Extraction in the Web Era - Maria Teresa Pazienza
2003-07-29

The revised versions of lectures given at the Summer Convention on Information Extraction, SCIE 2002, held in Frascati, Italy in July 2002. The following lectures by leading authorities in the field of information extraction are included: - acquisition of domain knowledge - terminology mining - finite-state approaches to Web IE - measuring term representatives - agent-based ontological mediation in IE systems - information retrieval and IE in question answering systems - natural language communication with virtual actors

Hearings, Reports and Prints of the Senate Committee on Energy and Natural Resources - United States. Congress. Senate. Committee on Energy and Natural Resources 1979

Dark Psychology - R.J. Anderson 2020-02-08

You've just discovered the book that will change your life and how you see the world forever. It exposes the real methods people use to control others. By the end of this book, your eyes will have been opened and you will understand more than you ever expected. People will bow to your will, rely on you to show them the way and unknowingly follow your every whim. You can take what you want when you want and where you want. Nothing will be able to stand in your way! This book walks you through the most powerful dark psychology techniques ever created. You will learn advanced techniques for persuasion, NLP, CBT, social manipulation, subliminal messaging, psychological warfare, body language, and deception. Can you handle that kind of power? This book will launch you into command of every situation and allow you to control every person you meet. It will teach you how to protect your allies and annihilate your enemies. You will become an unstoppable force of order and control in this mad world. These methods are no trivial matter. Many have died or otherwise suffered at the hands of people discovering them. The world is a darker and scarier place because of the presence of this knowledge. Even if you don't plan to dominate the world and rule with an iron fist, the techniques within this book will serve you well. They will reveal the plots and ploys your enemies will use to try and take you out, giving you the chance to react before it's too late. I share this knowledge in the hopes that it will protect others from it. Once a person can identify the methods of control, they can work to overcome them. You can make the world better or continue the dark legacy of our past, the choice is yours. So consider your choices and understand that others have this power as well. The game of life is long and the rules are complex. Don't let others take advantage of you any longer. Learn how to control people and bend them to your will, willingly or not. Seize the power all great leader possess for yourself today. After all, you deserve to win!

Topic Detection and Tracking - James Allan 2002-02-28

Topic Detection and Tracking: Event-based Information Organization brings together in one place state-of-the-art research in Topic Detection and Tracking (TDT). This collection of technical papers from leading researchers in the field not only provides several chapters devoted to the research program and its evaluation paradigm, but also presents the most current research results and describes some of the remaining open challenges. Topic Detection and Tracking: Event-based Information Organization is an excellent reference for researchers and practitioners in a variety of fields related to TDT,

including information retrieval, automatic speech recognition, machine learning, and information extraction

Ignite The Spark - Gina Mitchell 2015-01-25

Discover the strategies to unlock the secrets to discovering exactly what you want. * Love Languages: Learn or relearn how to speak them * Your values and to see if they have changed * The qualities that are important to you in a partner * Your interests and creating a bucket list * Intimacy * The emotional bank account * Interventions * The Decision to Leave * An inspiring future. This is a no nonsense guide to finding yourself and either rediscovering the passion in your relationship and making it flourish or realising it is time to move on and leave with love and integrity. In short you will find the purpose and happiness you have been craving. Author, Gina Mitchell is the founder of Positive Life Shift. She has successfully helped people from Australia and around the world with their relationships and their lives in general since 2012. Gina uses simple and effective strategies to help people overcome issues in their lives, particularly in their relationships. Gina has always had a passion for helping people and that is why she undertook the NLP training and life coaching courses. She also completed an Honours degree in Biochemistry and teaching diploma in the 1980s. Gina brings to the table the logic of her science experience along with her real life skills in science teaching, backed up with her NLP qualifications. This is a unique combination of skills for a relationship facilitator. Don't forget to register your book to receive the interactive chapter by chapter videos and workbooks.

Understanding Artificial Intelligence - Ralf T. Kreutzer
2019-09-25

Artificial Intelligence (AI) will change the lives of people and

businesses more fundamentally than many people can even imagine today. This book illustrates the importance of AI in an era of digitalization. It introduces the foundations of AI and explains its benefits and challenges for companies and entire industries. In this regard, AI is approached not just as yet another technology, but as a fundamental innovation, which will spread into all areas of the economy and life, and will disrupt business processes and business models in the years to come. In turn, the book assesses the potential that AI holds, and clarifies the framework that is necessary for pursuing a responsible approach to AI. In a series of best-practice cases, the book subsequently highlights a broad range of sectors and industries, from production to services; from customer service to marketing and sales; and in industries like retail, health care, energy, transportation and many more. In closing, a dedicated chapter outlines a roadmap for a specific corporate AI journey. No one can ignore intensive work with AI today - neither as a private person, let alone as a top performer in companies. This book offers a thorough, carefully crafted, and easy to understand entry into the field of AI. The central terms used in the AI context are given a very good explanation. In addition, a number of cases show what AI can do today and where the journey is heading. An important book that you should not miss! Professor Dr. Harley Krohmer University of Bern "Inspiring, thought provoking and comprehensive, this book is wittingly designed to be a catalyst for your individual and corporate AI journey." Avo Schönbohm, Professor at the Berlin School of Economics and Law, Enterprise Game Designer at LUDEO and Business Punk

Formal Semantics and Pragmatics for Natural Language

Querying - James Clifford 1990-06-29

Connects the semantics of databases to that of natural language, and links them through a common view of the semantics of time.
